The following description of the *Clearon Corporation Employees' Pension Plan* (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan, which was adopted on January 1, 1996 and last amended December 31, 2014, by Clearon Corporation LP (the "Plan Sponsor"), is a defined pension plan covering all employees of the Plan Sponsor who were hired before December 1, 2005. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

Pension Benefits

Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age (65) equal to the greater of (a) 1.0% of the participant's average annual compensation multiplied by the years of service or (b) 1.5% of average annual compensation times the years of benefit service, minus the lesser of $1/70^{th}$ of the participant's primary Social Security Benefit ("SSB") multiplied by the years of benefit service up to a maximum of 35 years, or 50% SSB times actual years of service over total years at normal retirement date, computed using the highest salary levels for three out of the last ten plan years prior to the participant's retirement. If an employee continues employment after normal retirement age, the employee is entitled to benefits based on the formula above as of the later retirement date. Employees may elect to receive the value of their accumulated plan benefits as a single life annuity or as a joint and survivor annuity payable monthly from retirement.

Death and Disability Benefits

If an active vested employee dies, a benefit is calculated as if the participant had terminated on the date before his or her death, survived to the earliest date he or she could have commenced their pension, and then elected payment in the form of a joint and 50 percent survivor annuity is paid to the employee's beneficiary. A participant who has a nonforfeitable benefit and who becomes disabled shall be treated as if continuing in employment, with earnings equaling the sum of the participant's compensation actually paid during such calendar year (specifically excluding any lump sum cash out of vacation or sick pay attributable to the participant's last calendar year of active service or any lump sum severance or terminal pay), plus an amount which is determined by multiplying the participant's monthly base pay determined as of his last day of active service in the calendar year by the number of months remaining in the calendar year for which he is not being paid wages, salary, or severance. Such participant shall continue to accrue benefit service until normal retirement is elected.

Vesting

Participants vest in the Plan at a rate of 20% per year and are fully vested after five years of credited service.

Funding Policy

The Plan Sponsor's funding policy is to contribute such amounts as necessary to provide assets sufficient to meet the benefits to be paid to Plan members. The Plan Sponsor's present intention is to make contributions in amounts sufficient to fund the Plan's current service cost on a current basis.

NOTE 1 DESCRIPTION OF PLAN (CONTINUED)

Funding Policy (Continued)

The Plan Sponsor's contributions for 2014 and 2013 met the minimum funding requirements of ERISA.

Benefit Information Policy

The actuarial present value of accumulated plan benefits and information regarding the change in accumulated plan benefits is presented in Note 8 based on valuations performed as of the beginning of the year.

Plan Termination

Although it has not expressed any intention to do so, the Plan Sponsor has the right under the Plan to discontinue its contributions at any time to terminate the Plan subject to the provisions set forth in ERISA.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The Plan follows the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from estimated amounts.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Employee Benefits Committee determines the Plan's valuation policies utilizing information provided by the investment advisers, custodians and insurance company. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions based on service provided by participants. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest average compensation during any three out of the last ten years of credited service. The accumulated plan benefits for active employees are based on their highest average compensation during any three out of the last ten years ending on the date of which the benefit information is presented (the valuation date). Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the actuary, AON Hewitt, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2014 and 2013 were (a) life expectancy of participants (the RP 2000 Generational Table Projected by Scale BB was used), (b) retirement age assumptions (the assumed average retirement age was 63), and (c) investment return. The 2014 and 2013 valuations included assumed average rates of return of 7 percent for each year. The foregoing actuarial assumptions are based on the presumption that the plan will continue. Were the plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Administrative Expenses

Administrative expenses of the Plan are paid by both the Plan and the Plan Sponsor.

Payment of Benefits

Benefits are recorded when paid.

NOTE 3 FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level I – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

NOTE 3 FAIR VALUE MEASUREMENTS (CONTINUED)

Level II – Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level III – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Common stocks: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Real Estate Funds: Valued on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant view as rental property.

Guaranteed investment contract: Guaranteed investment contracts are valued at fair value by the insurance company by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the creditworthiness of the issue (see Note 5). Because the participants transact at contract value, fair value is determined annually for financial statement reporting purposes only. In determining the reasonableness of the methodology, the Investment Committee evaluates a variety of factors including review of existing contracts, economic conditions, industry and market developments, and overall credit ratings. Certain unobservable inputs are assessed through review of contract terms (for example, duration or payout date) while others are substantiated utilizing available market data (for example, swap curve rate).

NOTE 3 FAIR VALUE MEASUREMENTS (CONTINUED)

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014 and 2013:

NOTE 4 INVESTMENTS AND CONCENTRATION OF CREDIT RISK (CONTINUED)

During 2014, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated in value by $1,079,127 as follows:

Equity Funds	$	519,460
Fixed Income Funds		301,656
REIT Funds		258,011
Total Appreciation	**$**	**1,079,127**

NOTE 5 CONTRACT WITH INSURANCE COMPANY

The Plan holds its investments under a contract with MetLife. MetLife maintains the Plan's contributions in separate accounts and invests the assets in commingled investment vehicles. The contract is included in the financial statements at contract value, which approximates fair value, as reported to the Plan by MetLife. Contract value represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses.

At the direction of the Plan's administrator, a stipulated payment to purchase an annuity for a retiring employee is withdrawn by MetLife from the plan reserve account. Purchased annuities are contracts under which MetLife is obligated to pay benefits to named employees or their beneficiaries, therefore, these annuities are excluded from Plan assets. The stipulated payment rates for such annuities are adjustable after the first anniversary of the Plan and any time thereafter.

NOTE 6 TAX STATUS

The Plan is designed to be a qualified trust under Section 401(a) of the Internal Revenue Code ("IRC") which provides that a qualified trust is exempt from federal income taxes. The Plan is required to operate in accordance with the Plan document and the applicable federal laws in order to maintain its qualification. The Plan obtained its latest determination letter on December 15, 2004, in which the Internal Revenue Service stated that the plan, as then designed, was in compliance with the applicable requirements of the IRC. Although the Plan has been amended since receiving the determination letter, the Plan Sponsor believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the tax authorities. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2011.

NOTE 7 INFORMATION PREPARED AND CERTIFIED BY TRUSTEE

The following information included in the accompanying financial statements and additional information was obtained from data that has been prepared and certified to be complete and accurate by MetLife as of December 31, 2014 and 2013.

Net appreciation in fair value of investments	$ 1,079,127	

NOTE 8 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Information regarding the actuarial present value of accumulated benefits as of January 1, 2014 and 2013 (the dates of the most recent valuations) are as follows at the Plan years ended December 31, 2014 and 2013:

	2014	2013
Actuarial present value of accumulated benefits:		
Vested benefits:		
Vested benefits for other participants	$ 6,545,911	$ 6,513,015
Participants currently receiving benefits	8,476,534	7,164,264
Non-vested benefits:	745,477	766,099
Total actual present value of accumulated benefits	**$ 15,767,922**	**$ 14,443,378**

Changes in the actuarial present value of accumulated plan benefits for the Plan years ended December 31, 2014 and 2013 are as follows:

	2014	2013
Actuarial present value of accumulated plan benefits at beginning of year:	$ 14,443,378	$ 12,256,172
Change during the year attributable to:		
Benefits accumulated	887,192	577,612
Interest	982,416	952,948
Assumption changes	286,728	1,358,796
Benefits paid	(831,792)	(702,150)
Actuarial present value of accumulated plan benefits at end of year	**$ 15,767,922**	**$ 14,443,378**

NOTE 8 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

The more significant assumptions underlying the actuarial computation are as follows:

Mortality	2014 Static Mortality Table for Annuitants and Non-Annuitants
Interest rate	7% in 2014; 7% in 2013
Retirement age	Normal retirement age (65)

These actuarial assumptions are based on the presumption that the Plan will continue. Should the Plan terminate different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 9 PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

- Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. Government agency) up to the applicable limitations.

- All other vested benefits (that is, vested benefits not insured by the PBGC).

- All non-vested benefits.

Benefits to be provided via contracts with MetLife (Note 5), who is obligated to pay the benefits, would be excluded for allocation purposes.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or those who elect to receive their benefits in a form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward. Certain benefit improvements attributable to plan amendments may not be fully guaranteed even though total benefit entitlements fall below the aforementioned ceilings. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

NOTE 10 RELATED PARTY TRANSACTIONS

Certain Plan investments are shares of mutual funds managed by MetLife. These transactions qualify as party-in-interest transactions. The fees paid by the Plan for the investment management services are netted with the investment income (loss) on each investment option of the Plan for the year ended December 31, 2014.

NOTE 11 RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTE 12 SUBSEQUENT EVENTS

Management has evaluated subsequent events through the date of the independent auditors' report, the date which the financial statements were available to be issued.

Schedule SB, Part V – Summary of Plan Provisions (Cont.)

Normal Retirement Benefit

The monthly benefit beginning on the normal retirement date is equal to $1/12^{th}$ the greater of (a) or (b)

(a) 1.0% of the participant's Average Annual Earnings multiplied by the employee's Years of Benefit Service

(b) The excess of (i) over (ii), if any

In such event he will receive at actual retirement a benefit calculated as of his delayed retirement date based on credited service to such date, but not less than the Actuarial Equivalent of the benefit that would have been payable had the participant retired on his Normal Retirement Date.

Annual Earnings

The total cash compensation paid to a participant by the Plan Sponsor during a calendar year, including amounts excluded from taxable income to IRC Section 125 or 402(g) and excluding amounts contributed to this plan or other deferred compensation programs, any benefits paid under this plan or any other employee benefit program or fringe benefit plan, cost of living or similar allowances, amounts paid under a performance unit plan or other long-term bonus plan, or other extraneous income, provided that in the first or last calendar year of employment, Annual Earnings shall be adjusted based on his rate of earnings as of the first or last day of such employment, as applicable, and the number of months before or after such day, as applicable, as provided in the plan. Disability Benefit

When a participant has completed five years of vesting service, is disabled according to the plan's definition, and is not eligible for early retirement, then the participant is eligible for this benefit. The benefit to be calculated uses projected credited service at normal retirement date but earnings and covered compensation as of the date of disability. The benefit begins on the normal retirement date.

Pre-Retirement Death Benefit

In the event of an active participant's death after becoming vested his surviving spouse shall receive a benefit calculated as if the participant had terminated on the day before his death, survived to the earliest date he could have commenced his pension, and then elected payment in the form of a joint and 50% survivor annuity.

Post-Retirement Death Benefit

(2) An actuarial equivalent benefit to be paid during the participant's lifetime with 120 or 60 installments guaranteed.

(3) Social Security adjustment options with either the life annuity or one of the contingent annuity options.

If the present value of a participant's vested accrued benefit is $5,000 or less, the present value of such benefit shall be paid to the participant in the form of a lump sum payment.

All optional methods of settlement (other than joint and survivor and lumps sums) are actuarially equivalent to the normal form of annuity based on the 1971 Group Annuity Mortality Table and 7.00% interest. For lump sums, the interest rate is a three segment rate specified by the Commissioner of Internal Revenue in effect for the third month preceding the first day of the Plan Year prior to distribution of the lump sum, and the applicable mortality table used for this purpose as required by regulations.

The benefit otherwise payable in the form of a single life annuity is reduced if it is paid as a joint and survivor annuity by multiplying the single life benefit by the applicable factor from the table in Exhibit A of the plan document.

Schedule SB, Part V – Summary of Plan Provisions (Cont.)
