The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan is administered by the Company's Benefits Committee (Committee), which is a committee of the board of directors of the Company. The Committee has overall responsibility for the operation and administration of the Plan. The Committee determines the appropriateness of the Plan's investment offerings, monitors investment performance and reports to the Plan's Board of Trustees.

Pension Benefits

Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age of 65. The Plan permits early retirement at age 60. Normal retirement pension benefits equal 21% of the participant's average monthly compensation in excess of one-twelfth of your covered compensation. Effective January 1, 1998, for participants who are projected to have earned less than 35 years of service as of the end of the Plan year in which they attain normal retirement age, the sum of your initial percentage and the excess percentage shall be reduced by $1/35^{\text{th}}$ for each year of service less than 35.

If an employee elects to receive his/her Accrued Benefit prior to Normal Retirement Date, he/she will receive an Accrued Benefit equal to the greater of the Accrued Benefit payable at the Normal Retirement Date reduced by 5/9% for each month that the commencement of the Early Retirement Benefit precedes the Normal Retirement Date, OR the actuarial equivalent of the Accrued Benefit payable at the Normal Retirement Date if such benefit is distributed in a form other than a non-decreasing life annuity payable for a period not less than the employee's life expectancy.

For married participants who are currently receiving benefits the spouse will receive the same amount based upon the benefit election made at the retirement date. For married participants who were not in payment status when they died will receive a benefit based on an actuarial calculation for a pre-retirement survivor annuity payment.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements are presented on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of Plan assets available for benefits and the actuarial present value of accumulated plan benefits as the date of the financial statements. Actual results could differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. A change in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividends are recorded on the accrual basis. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

All reasonable expenses, taxes and fees of the Plan, the Committee and the Custodian incurred in the administration of the Plan and Trust Fund shall be paid from the Trust Fund, except the audit fee and PBGC insurance, which are both paid directly by the Plan Sponsor and are excluded from these financial statements.

Subsequent Events

Subsequent events have been evaluated through October 5, 2015, which is the date the financial statements were available to be issued.

Recent Accounting Pronouncements

In October 2012, the FASB issued ASU 2012-04, Technical Corrections and Improvements. The amendments in this Update cover a wide range of Topic in the Accounting Standards Codification, including plan accounting. These amendments include technical corrections and improvements to the Accounting Standards Codification and conforming amendments related to fair value measurements. The amendments in this update were generally effective for December 15, 2013, for nonpublic entities, except for amendments in this update where there was no transition guidance which were immediately effective upon issuance. The adoption of immediately effective amendments was not significant to these financial statements. The adoption of ASU 2012-04 has not and is not expected to have a material impact on subsequent periods.

On July 31, 2015, in an effort to simplify plan accounting, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965) - (I) Fully Benefit-Responsive Investment Contracts, (II) Plan Investment Disclosures, and (III) Measurement Date Practical Expedient*. ASU 2015-12 is effective for fiscal years beginning after December 15, 2015. Earlier application is permitted. Retrospective application is required for Parts I and II on all periods presented. There is no anticipated effect on the value of the net assets available for benefits, as the main changes resulting from implementation of this ASU centers around certain disclosures in the notes to the financial statements. The adoption of ASU 2015-12 is expected to be adopted for the plan year beginning January 1, 2015 (and will be applied retrospectively as required

NOTE 6: FAIR VALUE MEASUREMENTS

Accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Money market and mutual funds: Valued at the net asset value ("NAV") of shares held by the plan at year end.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The table below presents the fair value hierarchy of the Plan's assets as of December 31, 2014 and 2013:

NOTE 7: PLAN TERMINATION

Although it has not expressed any intention to do so, The Hartley Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA and its related regulations. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

THE HARTLEY COMPANY PENSION
PLAN AND TRUST
NOTES TO THE FINANCIAL STATEMENTS

NOTE 8: TAX STATUS

The Internal Revenue Service has determined and informed The Hartley Company Pension Plan and Trust by a letter dated March 23, 2004, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Hartley Company Pension Plan and Trust believes that the Plan is currently being operated in compliance with the applicable requirement of the IRC and has no income subject to unrelated business income tax. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require management of an organization to evaluate tax positions taken by the organization and recognize a tax liability if the organization has taken an uncertain tax position that more likely than not would not be sustained upon examination by the Internal Revenue Service. Plan management has analyzed the tax positions taken by the Plan, and had concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements.

There are currently no audits for any tax periods in progress. Plan management believes it is no longer subject to income tax examinations for years prior to 2011.

NOTE 9: RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTE 10: ACTUARIAL ASSUMPTIONS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to services rendered by the employees. Benefits payable under all circumstances (retirement, death, disability, or termination of employment) are included to the extent they are deemed attributable to employee service rendered through the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary using the unit credit method and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions underlying the computations were made as of January 1. Had the valuations been performed as of December 31, there would be no material differences.

The significant actuarial assumptions underlying the computations for the Plan as of January 1, 2014, are as follows:

THE HARTLEY COMPANY PENSION
PLAN AND TRUST
NOTES TO THE FINANCIAL STATEMENTS

NOTE 10: ACTUARIAL ASSUMPTIONS (continued)

Average rate of return:	6.15% per annum, compounded annually, net of investment expenses
Mortality basis:	2014 Combined Mortality for healthy lives
Normal retirement age:	Age 65

The significant actuarial assumptions underlying the computations for the Plan as of January 1, 2013, are as follows:

Average rate of return:	6.56% per annum, compounded annually, net of investment expenses
Mortality basis: lives	2013 Combined Mortality for healthy lives
Normal retirement age:	Age 65

The net increase in the actuarial present value of accumulated plan benefits each year is the result of benefits paid, discounts for interest, changes in participant mix, actuarial experience gains and losses and changes in actuarial assumptions.

Actuarial assumptions are based on the presumption that the Plan will continue. Should the Plan terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 11: FUNDING POLICY

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. Pension funding is actuarially determined and includes normal cost and the amortization of past service costs. The Company has made contributions in amounts not less than those necessary to comply with the minimum funding standards of ERISA as set forth in the actuary's report. The actuary's report indicated that Company contributions of \$62,508 and \$52,762 were required in 2014 and 2013 to meet the minimum funding standards of ERISA.
