Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Actuarial Cost Methods:

Traditional Unit Credit

The actuarial cost method used in the valuation was the traditional unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. The normal cost is zero for active participants whose credited service equals or exceeds the plan maximum, and for non-active participants.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution and the at-risk liabilities, if applicable, was projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Asset Valuation Method:

The actuarial value of the assets is determined by using the average value of the fair market value of the plan's assets at the valuation date over a 24 month period adjusted for contributions, distributions, expected earnings, and includes contributions receivable discounted to the plan year end. The asset value determined under this method is adjusted to be no greater than 110% and no less than 90% of the fair market value of assets.

Participants included in valuation:

All employees who are eligible to participate as of the valuation date, plus retirees, beneficiaries and terminated participants entitled to current or future benefits.

Death Benefit

Eligibility
After 5 years of service

One-half of the benefit that would have been paid if the participant had retired the day before he died under the joint and survivor option. Benefits are paid immediately or at the participant's early retirement age, if later. If participant is age 40 or greater with at least 10 years of service, benefit is 50% of accrued benefit payable immediately.

Optional Forms of Payment

The plan provides the following forms of payment: Life annuity and 50%, 55%, and 75% Joint and Survivor annuities.

Assumptions for Optional Forms of Payment

Optional forms of payment are calculated by multiplying the monthly pension benefit payable at the time of retirement by a percentage based upon the following formulas:

Life Annuity: 100%;

50% Joint and Survivor Annuity: 100%; however, if the Spouse is more than 5 years younger than the Participant, the 100% factor is reduced 2% for each full year and proportionately for any fractional part of a year the age difference exceeds 5 years.

55% Joint and Survivor Annuity: 90% if the dates of birth of the Participant and the Participant's spouse are within 12 months of each other. If the spouse is at least 12 months older than the Participant, the 90% factor is increased by .5% for each full 12 month period by which the spouse's age exceeds the Participant's age (not to exceed 100%); if the spouse is at least 12 months younger than the Participant, the 90% factor is decreased by .5% for each full 12 month period by which the spouse's age is less than the Participant's age.

75% Joint and Survivor Annuity: 85% if the dates of birth of the Participant and the Participant's spouse are within 12 months of each other. If the spouse is at least 12 months older than the Participant, the 85% factor is increased by .5% for each full 12 month period by which the spouse's age exceeds the Participant's age (not to exceed 100%); if the spouse is at least 12 months younger than the Participant, the 85% factor is decreased by .5% for each full 12 month period by which the spouse's age is less than the Participant's age.

Net assets available for plan benefits, ending	$ 10,663,979	$ 9,894,801

The accompanying Notes to Financial Statements
are an integral part of these statements.

1. Description of Plan

The following description of the Strippit, Inc. Pension Plan for Hourly Employees ("the Plan") provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan is a non-contributory defined benefit pension plan sponsored by Strippit, Inc. ("the Company"). All full-time employees who are represented for collective bargaining purposes by Local 1691 ("the Union") are eligible for participation in the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974 ("ERISA").

Administration

The Company is responsible for the general administration of the Plan and carrying out the Plan's provisions. Vanguard Fiduciary Trust Company ("the Trustee") serves as the trustee and custodian of the Plan's assets. The Company pays certain administrative expenses of the Plan.

Eligibility

Effective October 31, 2003, benefits under the Plan were frozen. Prior to that date, an employee was eligible to participate in the Plan after completion of one year of service if the employee worked at least 1,700 hours during that time. No new participants are permitted to enter the Plan.

Vesting

Participants became 100% vested upon the completion of five years of credited service. A year of credited service was granted for each plan year in which an employee worked at least 1,700 hours of service. The Plan was frozen on October 31, 2003; therefore, no additional years of credited service will be earned after that date.

Payment of benefits

Under the Plan, a participant is eligible for normal retirement benefits upon attaining age 65 or on the fifth anniversary of employment if hired after age 60. The Plan also has provisions for early retirement benefits. The normal monthly retirement benefit is equal to $26 for each year of credited service. The Plan provides for early and disability retirement benefits at reduced levels upon completion of certain age and service requirements. Benefits are payable in the form of joint and survivor annuity, single life annuity or a lump sum payment.

Funding policy

Employees are neither required nor permitted to contribute to the Plan. The Company makes contributions to the Plan as determined by its actuary to be required under accepted actuarial principles in order to meet the minimum funding requirements of ERISA. The Company's contribution was $650,000 and $695,000 for the years ended December 31, 2014 and 2013, respectively, which met or exceeded the minimum funding requirements of ERISA.

1. **Description of Plan** (Continued)

Administrative expenses

The plan sponsor has elected to pay certain administrative fees of the Plan. For 2014 and 2013, administrative expenses consisted of the following:

	2014	2013
Total administrative expenses	$ 55,371	$ 59,048
Less: Expenses paid by plan sponsor	(4,650)	(4,650)
	$ 50,721	$ 54,398

2. **Summary of Significant Accounting Policies**

Basis of accounting

The accompanying financial statements have been prepared on the accrual basis of accounting and present the net assets available for plan benefits and changes in those net assets.

Cash and cash equivalents

The Company considers all highly liquid investments with a maturity of three months or less to be cash and cash equivalents.

Investments

The Strippit, Inc. Master Trust ("the Trust") was established for the investment of the Plan's assets and the assets of an additional employee benefit plan sponsored by the Company. Both plans have an undivided interest in the Trust. The Trustee holds the assets of the Trust. The Plan's investments are stated at fair market value. Quoted market prices are used to value investments in the Trust. Investment income and administrative expenses are allocated to the individual plans based upon average monthly balances invested by each plan.

The fair value of the Plan's interest in the Trust is based on the beginning of year value of the Plan's interest in the Trust plus actual contributions (if any) and allocated investment income less actual distributions and allocated administrative expenses. At December 31, 2014 and 2013, the Plan's interest in the Trust was 54.4%.

Revenue recognition

Purchases and sales of securities are recorded on the trade date basis. Interest and dividends are recorded on the accrual basis. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

2. **Summary of Significant Accounting Policies** (Continued)

Payment of benefits

Benefits are recorded when paid.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Risks and uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates and demographics. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the changing nature of these assumptions and the level of risk associated with investment securities, it is at least reasonable possible that changes in these assumptions and in the values of investment securities will occur in the near term. Additionally, such changes could materially affect accumulated benefit obligations and the amounts reported in the statements of net assets available for Plan benefits.

Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the plan's provisions to services rendered by employees through October 31, 2003, at which time participants stopped accruing benefits. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee service rendered through October 31, 2003.

Fair value measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurements*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are described below:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

2. Summary of Significant Accounting Policies (Continued)

Fair value measurements (Continued)

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quotes prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specific (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Mutual funds: Valued at the net asset value ("NAV") of shares held by the Plan at the end of the year.

Cash equivalents: Includes money market accounts, certificates of deposit and all highly-liquid debt instruments purchased with an original maturity date of three months or less.

Corporate bonds and common stock: Valued at the closing price reported on the active market on which the individual securities are traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

2. Summary of Significant Accounting Policies (Continued)

Income taxes

The Plan evaluates income tax positions for uncertainty to determine any tax positions that may not be fully sustained upon examination by taxing authorities, despite the belief that the underlying tax positions are fully supportable. Tax positions are reviewed on an ongoing basis and are analyzed in light of changing facts and circumstances, including progress of tax audits, developments in case law, and closing of statute of limitations. The Plan administrator has determined that the Plan has no uncertain tax positions.

Plan management's review of subsequent events

The Plan Administrator evaluated events occurring between the end of the most recent plan year and September 10, 2015, the date the financial statements were available to be issued.

Cash concentration

The Plan maintains cash balances at certain financial institutions which may, at times, exceed the insured limits set by the Federal Deposit Insurance Corporation. The Plan believes it is not exposed to any significant risk with respect to cash.

Reclassifications

Certain prior year amounts have been reclassified to conform with the current year presentation.

3. Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by an actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, termination or retirement) between the valuation date and the expected date of payment.

The significant assumptions used in calculating the actuarial present value of accumulated plan benefits as of January 1, 2014 and 2013 were as follows:

Interest rate	6.36% and 6.21%, respectively
Employee turnover	U.S. Steel Turnover rates
Retirement age	Normal retirement age is 65
Mortality rate	Combined RP-2000 tables projected to 2015
Investment rate of return	6.99% and 7.52% compounded annually, respectively

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of the accumulated plan benefits.

3. Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits consisted of the following at January 1:

	2014	2013
Vested benefits:		
Participants currently receiving benefits	$ 6,795,112	$ 6,326,957
Active participants	1,122,602	1,263,927
Other participants	1,497,504	1,775,511
	$ 9,415,218	$ 9,366,395

The change in the actuarial present value of accumulated plan benefits consisted of the following for the years ended January 1:

	2014	2013
Accumulated plan benefits - beginning of year	$ 9,366,395	$ 9,306,355
Actuarial gains	172,035	133,428

	48,823	60,040
Accumulated plan benefits - end of year	$ 9,415,218	$ 9,366,395

4. Financial Information Certified by the Trustees

The Plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Vanguard Fiduciary Trust Company, the trustee of the Plan, has certified the completeness and accuracy of all investments reflected on the accompanying statement of net assets available for plan benefits and the schedule of assets held for investment purposes and the related investment income reflected in the statement of changes in net assets available for plan benefits.

	2014	2013
Accrued interest and dividends	$ 7,983	$ 8,393
Cash and cash equivalents	675	675
Common stock	752	627
Corporate bonds and U.S. Government Securities	13,980	15,266
	$ 23,390	$ 24,961

7. Related Party Transactions

The Trust invested in shares of mutual funds of Vanguard Fiduciary Trust Company. Vanguard Fiduciary Trust Company acted as the trustee for only those investments as defined by the Plan. Transactions in such investments qualified as party-in-interest transactions which were exempt from prohibited transaction rules.

8. Tax Status

The Plan obtained its latest determination letter on July 16, 2002 in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable provisions of the Internal Revenue Code (IRC). Therefore, no provision for income taxes has been included in the Plan's financial statements. The Plan has been amended since receiving this determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

9. Plan Termination

Although it has not expressed any intent to do so, the Company reserves the right under the Plan to terminate the Plan subject to the provisions set forth in the Plan and ERISA.

In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of benefits to the participants in the order of priority as determined in accordance with ERISA, applicable regulations thereunder and the plan document, as follows:

- Benefits former employees or their beneficiaries have been receiving, or that employees eligible to retire would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority is limited to individuals in pay status, or eligible to be in pay status as of three years prior to the Plan termination date. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the three years preceding Plan termination.

- Other benefits guaranteed under Title IV of ERISA.

- All other nonforfeitable benefits.

- All other benefits.

- Funding in excess of vested benefits reverts back to the respective employer.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guarantee while other benefits may not be provided for at all.
