Schedule SB, Part V - Statement of Actuarial Assumptions / Methods

Actuarial Cost Methods:

Traditional Unit Credit

The actuarial cost method used in the valuation was the traditional unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. The normal cost is zero for active participants whose credited service equals or exceeds the plan maximum, and for non-active participants.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution and the at-risk liabilities, if applicable, was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Asset Valuation Method:

The actuarial value of the assets is determined as the market value of the plan's assets at the valuation date and includes contributions receivable.

Participants included in valuation:

All employees who are eligible to participate as of the valuation date, plus retirees, beneficiaries and terminated participants entitled to current or future benefits.

PLAN: IT PRACTICE CONSULTING CORPORATION CASH BALANCE PLAN

EIN/PN: 65-1239360 / 001

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods (Continued)

Discount Rates: PPA basis Segment rates published for September, 2013

(1.37% / 4.05% / 5.06%).

HATFA basis Interest rate basis for the 2014 valuation is

4.99% / 6.32% / 6.99%. The Plan's effective rate, based on the HATFA segment rates, is

6.31% for 2014.

Expected Rate of

Return on Plan

Assets:

The expected return assumption is the applicable 3rd segment rate

as detailed in Notice 2009-22 (6.99% for 2014).

Mortality: No pre-retirement mortality was assumed.

Retirement Age: 65

Turnover: No turnover was assumed.

Salary Scale: 3%

Disability: None assumed.

Percent married: 100%; female spouse is assumed to be 3 years younger than

male spouse.

Lump Sum 100% of participants elect a lump sum; Hypothetical Accounts

Assumptions: are assumed to grow with 3% interest each year.

Administrative Administrative expenses are estimated based on the prior year's

Expenses: expenses. For 2014, this amount is \$0.

PLAN: IT PRACTICE CONSULTING CORPORATION CASH BALANCE PLAN

EIN/PN: 65-1239360 / 001

Schedule SB, Part V - Statement of Plan Provisions

History

The plan was effective January 1, 2014.

Eligibility

Employees enter on January 1 or July 1 of the plan year after reaching age 21 and completing one year of service.

Credited Service

Years and months of employment.

Vesting Service

A year of service is earned if at least 1,000 hours of service are worked during the plan year.

Normal Retirement

Eligibility

Age 65

Amount of Benefit

The annuity equivalent of a Hypothetical Account arising from the following annual allocation commencing January 1, 2014:

- (1) Flat dollar amount per participant as determined by the plan document.
- (2) Interest shall be credited to each participant's Hypothetical Account at the rate of 3.0% per year.

Vesting

Eligibility

3 years of service

Amount of Benefit

Lump sum distribution of Hypothetical Account or annuity equivalent payable at normal retirement date.

Early Retirement

None

Disability

None

PLAN: IT PRACTICE CONSULTING CORPORATION CASH BALANCE PLAN

EIN/PN: 65-1239360 / 001

Schedule SB, Part V – Statement of Plan Provisions (Continued)

Death Benefit

Eligibility

3 years of service

Amount of Benefit

Hypothetical Account balance payable as a single lump sum or annuity equivalent to spouse or beneficiary as of the first day of any month following the participant's death.

Normal Form of Payment

If married, benefits are paid in the form of a 100% joint and survivor annuity. If not married, benefits are payable for the life of the participant.

Optional Forms of Payment

The plan provides the following optional forms of payment: Life Annuity, 100% Joint and Survivor Annuity, and a Lump Sum distribution.

Contributions

The employer pays the total cost of the plan.
