SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 1 - Plan Description

The following description of the SPX US Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

Effective December 31, 2012, all participants, assets, and related obligations of the Pension Plan for Bargaining Unit Employees of SPX Corporation (BU Plan) merged into the Plan. Participants and beneficiaries of the BU Plan will participate in the SPX US Pension Plan under the terms and conditions of the BU Plan as in effect immediately prior to the merger.

Effective January 1, 2013, the Plan's name was changed from SPX Corporation Individual Account Retirement Plan (IARP Plan) to SPX US Pension Plan.

General - The Plan is a defined benefit plan that provides for retirement, death, and disability benefits for eligible salaried and union employees of SPX Corporation (the "Company") and those of its subsidiaries that adopt the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Plan Operations - Under a trust agreement, JPMorgan Chase Bank, N.A. (the "Trustee") was appointed trustee of the Plan. In accordance with the powers and duties of the Trustee, as designated by the Company, the Trustee administers the Plan in accordance with the orders of the administrative committee and invests the Plan's assets and the income therefrom as directed by the Plan's investment manager. Administrative fees incurred in administering the Plan are paid from the assets of the Plan.

Eligibility and Vesting - Employees become participants in the Plan following completion of the eligibility requirements as described in the Plan. Employees under the former IARP Plan are fully vested for normal retirement benefits after three years of service and individuals hired on or after January 1, 2001 are not eligible to participate. Employees under the former BU Plan are fully vested for normal retirement benefits after five years of service. Pursuant to the terms of the former BU Plan and the applicable collective bargaining agreements, there were no new entrants to the former BU Plan after December 31, 2010 and these terms continue under the SPX US Pension Plan.

Pension Benefits - The Plan provides for payment of normal retirement, early retirement, disability retirement, and death benefits to its participants, as calculated under the provisions of the Plan.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 1 - Plan Description (Continued)

Under terms of the Plan, effective July 1, 1997, benefits for the former IARP Plan's general salaried and management employees of the Company are governed under a cash balance plan. In addition, former employees of General Signal Corporation, which merged into the Plan on December 31, 1998, are also governed by this cash balance plan. The cash balance account consists of any initial account balance at July 1, 1997 or December 31, 1998, as applicable, employer contribution credits, interest credits, and any applicable transition credits. Employer contribution credits are equal to 4 percent of the participants' compensation, as defined by the Plan, for each calendar year. Interest credits are based on the participants' cash balance accounts at December 31 of the prior calendar year multiplied by the five-year U.S. Treasury rate on the last business day of November of the prior calendar year. Transitional credits are available to participants who meet certain requirements, as defined in the Plan.

Eligible employees governed under terms of the former BU plan are entitled to normal annual pension benefits beginning at the participant's normal retirement age of 65, as described in the Plan. For these employees, the individual pension benefit is equal to credited service multiplied by the monthly pension basic benefit in effect on the date the employee terminates service as set forth in the Plan and union agreements. Special provisions for retirement at other than the normal retirement age are described in the Plan and union agreements.

In November 2013, the Plan purchased an annuity contract to settle the benefit obligations for approximately 16,000 retirees currently receiving annuity payments. The purchase price of the annuity contract was \$663,700,000 and is reported in the accompanying statement of changes in net assets available for benefits for the year ended December 31, 2013. The annuity contract is excluded from plan assets.

Under terms of the annuity contract agreement, the obligation to make future pension payments began in April 2014; however, because the annuity contract was purchased in 2013, the impact of the annuity purchase is reflected in the December 31, 2013 actuarial present value of accumulated plan benefits as reported in Note 5.

During 2014, a refund totaling \$4,833,382 related to the purchase price of the annuity was received as a result of events that occurred in 2014 before the obligation was assumed in April 2014.

In 2014, the Plan was amended to provide a window for lump-sum distributions to substantially all terminated vested participants that commence benefits on March 1, 2014. The effect of this amendment is not reflected in accumulated plan benefits as of December 1, 2013 in Note 5.

Funding - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. There were no required contributions in 2014 and 2013.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 1 - Plan Description (Continued)

Termination - Should the Plan terminate at some future time, its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - If available, quoted market prices are used to value investments. When quoted market prices are not available, various valuation techniques are utilized and observable inputs are prioritized to determine fair value.

The insurance contracts are valued at contract value. Contract value represents deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees. Investments in common/collective trusts are those in which the Plan purchases a security in a commingled investment vehicle unit (e.g., common stock or units), whereby the security represents an interest in an underlying pool of assets. Common/collective trusts are valued at the net asset value per share (or its equivalent), which is based on the Plan's ownership interest in the fair value of the fund's underlying net assets. Government securities and corporate debt securities are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. Investments in partnership interests and hedge funds are valued at the net asset value per share (or its equivalent) of the fund based on audited financial statements of the funds or partnership, where available, with adjustments to account for market activity and other applicable valuation adjustments. Short-term investments are valued at fair value based on quoted market value, if quoted, or otherwise at the outstanding balance including accrued interest. All other investments are based on quoted market values.

See Note 7 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Administrative Expenses - Various administrative costs are paid by the Company.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 2 - Summary of Significant Accounting Policies (Continued)

Benefit Payments - Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Beneficiaries of employees who have died
- c. Present employees or their beneficiaries

Benefits are calculated based on the specific provisions outlined in the plan agreement.

Actuarial Assumptions - The significant actuarial assumptions used in the valuation of the Plan at December 31, 2013 are summarized as follows:

Actuarial cost method	- Unit credit cost method
Assumed rate of return	- 7.00 percent
Mortality and disability basis	- RP-2014 Mortality Tables for males and females adjusted by 11.7 percent for actual experience projected using the generational MP-2014 improvement scale
Retirement basis	- The participants will retire upon becoming eligible for normal retirement
Retirement age	- A scale ranging from 2.5 percent between the ages of 55 and 59 and 100 percent at age 67

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including October 14, 2015, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

The Trustee holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedules of assets held at end of year and reportable transactions are based solely on information provided by the Trustee. Additionally, the Plan invests in certain investments managed by the Trustee.

Significant investments at December 31, 2014 and 2013 are as follows:

	2014	2013
Investments at fair value:		
Pyramis Long Duration Pool Fund	\$ 50,429,107	\$ -
BlackRock Long Corporate Open-End Fund	29,286,429	-
BlackRock Long Term Government Bond Index Fund	21,720,582	-
JPMCB Extended Duration Fund	50,036,937	38,224,104
Bridgewater All Weather Fund	25,403,507	51,053,458
PIMCO Funds StockPLUS Long Duration Fund	14,992,046	37,853,444
Morgan Stanley Pooled Int'l Equity Fund	6,603,991	56,605,080
JPMorgan U.S. Govt MMKT - Premier Shr Fund	8,713,041	156,830,068

Note 4 - Securities Lending

On December 6, 2006, the SPX Corporation Retirement and Welfare Plan administrative committee entered into a separate agreement with the Trustee. The agreement authorizes the Trustee to lend securities held in the Plan's accounts to third parties (the "Borrower"). Under the terms of the agreement, the Trustee must obtain collateral from the Borrower, generally cash or acceptable securities, having a market value of 102 percent of the loaned securities for U.S. securities and 105 percent of the loaned securities for non-U.S. securities. Both the collateral and the securities loaned are marked-to-market on a daily basis so that all loaned securities are more than fully collateralized at all times. In the event that the loaned securities are not returned by the Borrower, the Trustee will, at its own expense, either replace the loaned securities or, if unable to purchase those securities on the open market, credit the Plan's accounts with cash equal to the fair value of the loaned securities. Investment income, excluding any realized or unrealized gains or losses from securities lent, was approximately \$31,000 and \$163,000 during the years ended December 31, 2014 and 2013, respectively.

The collateral received pursuant to securities lending transactions is reflected as a liability in the statement of net assets available for benefits at December 31, 2014 and 2013. To the extent that a loan of securities is secured by cash collateral, such collateral is invested in pooled investments managed by the Trustee. At December 31, 2014 and 2013, these pooled investments were primarily invested in fixed-income investments. The Plan bears the risk of loss (reward of gain) with respect to unfavorable (favorable) changes in the fair value of the invested collateral. If applicable, this difference in value of the investments purchased with the cash collateral received and the amount due to the Borrower upon return of securities on loan is recorded as an unrealized gain (loss) and is included in the statement of changes in net assets available for benefits in net realized and unrealized gains (losses) on investments from collateral held under securities loan agreements for 2014 and 2013.

Although the Plan's securities lending activities are collateralized as described above, and although the terms of the securities lending agreement with the Trustee requires the Trustee to comply with government rules and regulations related to the lending of securities held by ERISA plans, the securities lending program involves both market and credit risk. In this context, market risk refers to the possibility that the Borrower of the securities will be unable to collateralize the loan upon a sudden material change in the fair value of the loaned securities or the collateral, or that the Plan's investment of collateral received from the Borrower of the Plan's securities may be subject to unfavorable market fluctuations. Credit risk refers to the possibility that counterparties involved in the securities lending program may fail to perform in accordance with the terms of their contracts.

Notes to Financial Statements December 31, 2014 and 2013

Note 5 - Benefit Obligations

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Towers Watson. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan as of and for the year ended December 31, 2013 are as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefit payments	\$ 31,049,096
Other vested participants	<u>307,979,518</u>
Total vested benefits	339,028,614

Nonvested benefits	<u>1,196,579</u>
--------------------	------------------

Total actuarial present value of accumulated plan benefits	<u>\$ 340,225,193</u>
--	-----------------------

Actuarial Present Value of Accumulated Plan Benefits -

Beginning of year	\$ 878,487,863
Increase (decrease) during the year attributable to:	
Benefits accumulated	2,504,027
Actuarial losses	164,546,658
Interest due to the decrease in the discount period	51,851,067
Change in actuarial and other assumptions	16,907,330
Benefits paid	(110,371,752)
Purchase of annuity contract	<u>(663,700,000)</u>
Net decrease	<u>(538,262,670)</u>

Actuarial Present Value of Accumulated Plan Benefits -

End of year	<u>\$ 340,225,193</u>
-------------	-----------------------

For the year ended December 31, 2013, the change in actuarial and other assumptions was due in part to the change in the mortality and disability basis from the RP-2000 Mortality Tables for males and females project to 2018 using Scale AA in 2012 to the RP-2014 Mortality Tables for males and females adjusted by 11.7 percent for actual experience projected using the generational MP-2014 improvement scale in 2013. Additionally, the assumed rate of return was changed from 7.25 percent in 2012 to 7.00 percent in 2013.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2011.

Note 7 - Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on the following hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Level 1 - Fair values determined by Level 1 inputs use readily observable quoted prices for identical assets in active markets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques that take into account the characteristics of the asset. Level 3 inputs include unadjusted net asset value or adjusted net asset value for subsequent events.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 7 - Fair Value Measurements (Continued)

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Assets measured at fair value on a recurring basis include the following:

Of the Level 3 assets still held by the Plan at December 31, 2014 and 2013, the unrealized gains and losses are recognized in the statement of changes in net assets available for benefits.

Both observable and unobservable inputs may be used to determine the fair value of positions classified as Level 3 assets and liabilities. As a result, the unrealized gains and losses for these assets and liabilities presented in the tables above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Plan also holds other assets not measured at fair value on a recurring basis, including insurance contracts, receivables, and pending securities transactions. The fair value of the receivables and pending securities transactions approximates the carrying amounts in the accompanying financial statements due to the short maturity of the instruments. The insurance contract invests in the general assets of various insurance companies; however, since there are no specific securities in the insurance companies general accounts related to the contract and due to the contract terms, including the frequency of the interest rate reset intervals, contract value approximates fair value. Contract value represents deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees.

SPX US Pension Plan

Notes to Financial Statements December 31, 2014 and 2013

Note 7 - Fair Value Measurements (Continued)

The Company has processes in place to select the appropriate valuation techniques and unobservable inputs to perform Level 3 fair value measurements. Processes include meetings with the investment custodian and annual reviews of the audited financial statements of investments valued at the net asset value per share and terms of the contract.

Note 8 - Subsequent Events

Subsequent to year the Plan was amended and the accrued benefits of all participants, except participants whose participation in the Plan is covered by a collective bargaining agreement, were frozen.

Inclusion Date

The valuation date coincident with or next following the date on which the employee becomes a participant.

Plan-related Expenses

The amount included for this year for plan-related expenses is \$11,000,000.

Mortality

For all participants: The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates (per 100 employees) at which participants retire by age and gender are shown below.

Attained Age	Unisex Rates	Attained Age	Unisex Rates
55	2.50	62	20.00

Disability Rates

The rates (per 1000 employees) at which participants become disabled by age and gender are shown below:

Percentage becoming disabled during the year		
Age	Males	Females
20	.30	.30
25	.30	.30
30	.30	.40
35	.40	.70
40	.80	1.30
45	1.60	2.40
50	3.30	4.00
55	6.90	6.40
60	11.50	9.00

Future Increases in Social Security

For purposes of determining the target normal cost and the additional funding target for maximum deductible contribution purposes, Social Security benefits are assumed to increase in the future due to increases in the national average wage index of 3.00% per year and due to increases in the cost of living of 2.50% per year compounded annually.

Cash Balance Interest Crediting Rate

The interest credit rate is assumed to be a 5-year average of the actual plan rates. This year that rate is 1.28%.

Future Increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increase in the maximum annual benefit or compensation limit.

Calculation of Lump Sum

100% of participants in the main IARP (cash balance plan with grandfathered benefits) are assumed to elect a lump sum when eligible. Lump sums were valued using the PPA valuation interest rates and mortality tables.

Employees

It was assumed that there will be no new or rehired employees.

Funding Target

Present value of accrued benefits as of the valuation date.

Target Normal Cost

Present value of benefits expected to accrue during the year plus plan-related expenses expected to be paid from plan assets during the year.

Asset Method

Under this method, the valuation assets are equal to the average of four values, the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The four values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of 8 months prior to the valuation date, the adjusted market value of assets as of 16 months prior to the valuation date, and the adjusted market value of assets as of 24 months prior to the valuation date. The adjusted market value as of a relevant determination date is equal to the market value of assets as of that date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date.

The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.76%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.25%, and the applicable limitation for the plan year, equal to 6.76%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 7.25%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.25%, and the applicable limitation for the plan year, equal to 7.52%. For periods that span two plan years, the assumed rate of return on assets is the lower of the assumed rates of return for each year (pursuant to IRS Notice 2009-22). Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant Data

Employee data was supplied electronically as of the valuation date.

Schedule SB – Statement by Enrolled Actuary

Plan Sponsor	SPX Corporation
EIN/PN	38-1016240/003
Plan Name	SPX US Pension Plan
Valuation Date	January 1, 2014
Enrolled Actuary	Megan Foster
Enrollment Number	14-7582

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

For line 15 of the Schedule SB, the actuarial value of assets and the funding target as of January 1, 2014 used to calculate the adjusted funding target attainment percentage (AFTAP) were not adjusted for the \$663,700,000 annuity purchase made November 12, 2013. The AFTAP is over 100% without this adjustment and inclusion of this amount would only further improve the AFTAP and therefore would not be a material change.

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.
