Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of TRW Automotive Salaried Pension Plan, which comprise the statements of net assets available for benefits as of December 31, 2014 and 2013, and the related statement of changes in net assets available for benefits for the year ended December 31, 2014, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified investment information described in Note 4, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the entity that certified the investment information meets the requirements of 29 CFR 2520.103-8. The plan administrator has obtained certifications as of December 31, 2014 and 2013, and for the year ended December 31, 2014, stating that the investment information provided to the plan administrator is complete and accurate.

Disclaimer of Opinion on Financial Statements

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Disclaimer of Opinion on Supplemental Schedule

The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2014, is presented for purposes of additional analysis and is not a required part of the financial statements, but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on the supplemental schedule referred to above.

Report on Compliance of Form and Content With Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the certified investment information, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

TRW Automotive Salaried Pension Plan

Notes to Financial Statements

December 31, 2014

1. Description of the Plan

The following description of the TRW Automotive Salaried Pension Plan (the Plan) provides general information about the Plan's provisions. TRW Automotive U.S. LLC (the Company or Plan Sponsor) is the plan sponsor. Participants should refer to the plan document and summary plan description for a more complete description of the Plan's provisions, copies of which may be obtained from the Plan Sponsor.

General

The Plan is a defined benefit plan covering substantially all salaried employees hired before June 1, 2009, and certain hourly union and nonunion employees of the Company, and provides pension benefits for such employees as permitted by the Plan. The Plan provides for retirement benefits and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

The Bank of New York Mellon is the trustee of the Plan.

The Company offered pension buyouts and annuities to certain Plan members in efforts to reduce the future retirement obligations. Effective July 1, 2014, approximately \$12.7 million of plan assets and approximately \$13.0 million of accumulated plan benefits related to those plan members who accepted the buyout and annuity offer were transferred into the TRW Automotive Spinoff Plan for Hourly Employees (the Spinoff Plan). The Spinoff Plan terminated effective September 1, 2014, and all retirement benefits were processed accordingly. In addition, voluntary lump sum payments, which were paid from plan assets, amounted to approximately \$55 million in 2014. The remaining Plan members from the lump sum payment offer who did not elect to receive a lump sum had an allocated annuity contract purchased on their behalf which amounted to approximately \$431 million in 2014.

Funding

The Company periodically contributes amounts necessary to provide assets sufficient to meet the benefits to be paid to the Plan's participants. For any plan year, the Company's contributions to the Plan are, at a minimum, equal to the amounts required to fund the Plan's actuarial normal cost and to amortize the Plan's unfunded actuarial liability in accordance with the minimum amortization requirements of the Pension Protection Act of 2006 (PPA). The Plan has met the ERISA minimum funding requirements for 2014 and 2013.

TRW Automotive Salaried Pension Plan
Notes to Financial Statements (continued)

1. Description of the Plan (continued)

Plan Termination

Although it has not expressed an intention to do so, the Company has the right under the Plan to discontinue such contributions for future periods and to terminate the Plan provided that such discontinuance or termination will not be undertaken in such a manner as to constitute a violation of any applicable provision of a collective bargaining agreement between the Company and a union. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits.

Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Eligibility and Vesting

Salaried employees hired or rehired after June 1, 2009, are not eligible to participate in the Plan.

Effective December 31, 2010, the accrual of benefits ceased for all employees.

Information about the plan agreement, the vesting and benefit provisions, and the PBGC's benefit guarantee is contained in the summary plan description, which is available from the Company.

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

Payment of Benefits

Benefits are recorded when paid.

2. Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (U.S. GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes and supplemental schedule. Actual results could differ from those estimates.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 3) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees on the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Through December 31, 2006, the accumulated plan benefits for active employees are based on their average compensation during the highest five consecutive years' compensation preceding the valuation date. The new Career Average Earnings (CAE) formula was effective January 1, 2007. Under the new formula, a participant earns an annual benefit amount each year from January 1, 2007, and thereafter based on a percentage of their earnings each year. The total benefit amount under the new CAE formula is determined by adding the annual benefit amount earned each year. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Investment Valuation and Income Recognition

The Plan's investments and those investments held in the TRW Automotive Master Trust (Master Trust) are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). See Note 5 for further discussion and disclosures of fair value measurements.

Investments are stated at fair value. Investments consist primarily of units of the Master Trust at December 31, 2014 and 2013. The cost of securities sold is determined by the average cost method for purposes of determining realized gains and losses. All losses and expenses incurred with regard to the purchase, sale, or transfer of investments and other assets are borne by the Master Trust.

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

The Plan's interest in the Master Trust is based upon the combined market value of the Plan's proportionate share of assets in the Master Trust. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold, as well as held during the year.

Interest-bearing cash consists of funds that were transferred from the trustee on December 26, 2014 for the purpose of funding January 1, 2015 benefit payments.

Relevant Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board (the FASB) issued Accounting Standards Update (ASU) 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financing, and Disclosure*. ASU 2014-11 requires repurchase-to-maturity transactions to be accounted for as secured borrowings rather than as sales with a forward repurchase commitment and eliminates current guidance on repurchase financing. ASU 2014-11 requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty that will result in secured borrowing accounting for the repurchase agreement. The ASU requires new disclosures for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions that are accounted for as secured borrowings. These disclosures include information about the types of assets pledged and the relationship between those assets and the related obligation to return the proceeds. The ASU also requires new disclosures for transfers of financial assets that are accounted for as sales that involve an agreement with the transferee entered into in contemplation of the initial transfer that result in the transferor retaining substantially all of the exposure to the economic return on the transferred financial assets throughout the term of the transaction. The accounting and disclosure changes are effective for annual periods beginning after December 15, 2014. Management is currently evaluating this updated guidance.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Part II of the ASU eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. It also simplifies the level of disaggregation of investments that are measured using

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. The ASU is effective for fiscal years beginning after December 15, 2015. Part II is to be applied retrospectively. Plans can early adopt any of the ASU's three parts without early adopting the other parts. Management has elected to adopt Part II of the ASU early. Parts I and III are not applicable to the Plan.

3. Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits as calculated by the Plan's actuary for the years ended December 31, 2014 and 2013, is the amount that results from applying actuarial assumptions to plan participant data to determine the accumulated plan benefits earned to date by the participants. The present value reflects the time value of money (through discounts for interest) and the probability of payment recognizing decrements, such as for death, disability, withdrawal, or retirement between the valuation date and the expected dates of payment.

3. Accumulated Plan Benefits (continued)

The accumulated plan benefit information follows:

	December 31

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

3. Accumulated Plan Benefits (continued)

The more significant assumptions underlying the actuarial computations are as follows:

	December 31	
	2014	2013
Discount rate	4.25%	5.00%
Mortality basis	120% of RP-14 Mortality Table (projected back to 2009 with scale MP-2014)	UP-94 Mortality Table (projected to 2017)
Employee turnover	Rates varying by age and service	Rates varying by age and service
Retirement	Rates varying by age with 100% by age 70	Rates varying by age with 100% by age 70
Actuarial cost method	Unit credit	Unit credit

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Investments

Other than the fair value of the interest-bearing cash and the related interest, certain information related to investments for the Plan and Master Trust disclosed in the accompanying financial statements and supplemental schedule, including investments held at December 31, 2014 and 2013, and net appreciation in fair value of investments, interest, and dividends from the Master Trust for the year ended December 31, 2014, was obtained or derived from information supplied to the Company and certified as complete and accurate by the trustee of the Plan and the Master Trust.

The Master Trust was established on February 28, 2003, to hold the investment assets of plans sponsored by TRW Automotive U.S. LLC and affiliates. Each participating retirement plan has an undivided interest in the Master Trust. The Plan's interest in the net assets of the Master Trust was approximately 95% and 87% at December 31, 2014 and 2013, respectively. The Master Trust's assets are allocated among the participating plans by assigning to each plan those transactions (primarily contributions, benefit payments, and plan-specific expenses) that can be specifically identified and by allocating among all plans, in proportion to each plan's beneficial interest in the Master Trust, income and expenses resulting from the collective investment of the assets of the Master Trust.

5. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy in ASC 820, *Fair Value Measurement*, are described below:

- Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.
- Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable, either directly or indirectly, for substantially the full term of the asset or liability. Level 2 inputs include the following:
 - Quoted prices for similar assets and liabilities in active markets
 - Quoted prices for identical or similar assets or liabilities in markets that are not active
 - Observable inputs other than quoted prices that are used in the valuation of the assets or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals)
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

5. Fair Value Measurements (continued)

- Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity. Level 3 inputs include management's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The following methods and assumptions were used to determine the fair value of assets recorded at in the statements of net assets available for benefits.

Cash equivalents and cash, interest-bearing: Cash is valued at cost, which approximates fair value. Cash equivalents primarily consist of cash and money market funds.

Common/collective trust fund: Valued at net asset value (NAV) provided by the administrators of the funds. The NAV is based on the underlying assets owned by the fund, minus its liabilities, and then divided by the number of units outstanding. The investment strategy of the common/collective trust fund is to seek as high a level of current income as is consistent with the preservation of capital and maintenance of liquidity. The assets of the common/collective trust fund are primarily invested in instruments issued by the U.S. government, federal agencies and other highly rated corporate organizations. The common/collective trust fund provides for daily redemptions at reported NAV, with no advance notice required.

United States government debt securities and treasuries: The fair value of investments in U.S. government, state, and municipal obligations is primarily determined using techniques consistent with the income approach. Significant observable inputs to the income approach include data points for benchmark constant maturity curves and spreads.

Corporate bonds: Fixed income securities of companies from diversified industries. The fair value of investments in corporate bonds is primarily determined using techniques consistent with the market approach. Significant observable inputs include benchmark yields, reported trades, observable broker-dealer quotes, issuer spreads, and security-specific features, such as redemption options.

Mutual funds: Investments in funds comprised mainly of fixed income securities, including Corporate bonds and U.S. government securities. The fair value of the investments is determined using quoted market prices, which represent net asset value of shares held by the Plan at year-end.

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

5. Fair Value Measurements (continued)

Synthetic equities: Investments in over-the-counter equity call and put option “collar” structures that reduce the exposure to falls in levels of underlying equity markets. The fair value of the fund has been estimated based on a Black Scholes option model.

The following tables set forth by level, within the fair value hierarchy, the Plan’s assets held outside of the Master Trust at fair value as of December 31, 2014 and 2013:

6. Derivatives

In the normal course of operations, the Plan's assets and liabilities may include derivative financial instruments (futures, options, and foreign currency contracts). These derivatives involve, in varying degrees, elements of credit and market volatility risks in excess of more traditional investment holdings, such as equity and debt instruments. The contract or notional amounts provide a measure of the Plan's involvement in such instruments, but are not indicative of potential loss. The intent is to use derivative financial instruments as economic hedges to manage market volatility risk, foreign currency exchange rate risk, or credit risk associated with the Plan's investment assets. The Plan's fiduciaries do not anticipate any material adverse effect on the Plan's financial position resulting from its involvement in these instruments.

Option Contracts

The primary risk managed by the Plan using option contracts is the price risk associated with investments. On behalf of the Plan, investment managers have purchased and written various option contracts, which are agreements between two parties giving the buyer the right, but not the obligation, to buy or sell a specified item at a fixed price (exercise or strike) during a specified period, and giving the seller the obligation to sell or buy a specified item at a fixed price. These option contracts are intended by the Plan to economically hedge and manage its price exposures with respect to investments in foreign and domestic securities. When the investment manager buys or writes an option contract, a nonrefundable fee (the premium) is paid or received by the Plan, is recorded as an asset or liability, and is subsequently adjusted to the current market value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses when the options expire. The difference between the premium and the amount paid or received on affecting a closing purchase or sale transaction is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost of the underlying if acquired upon exercise. There is no collateral related to the option contracts.

7. Securities Lending

The Master Trust is authorized to engage in the lending of certain investments. Securities lending is a temporary exchange of portfolio assets for acceptable collateral between a lender and an approved borrower. The market value of securities on loan in the Master Trust was approximately \$41 million and \$45 million, and the collateral held was approximately \$42 million and \$46 million at December 31, 2014 and 2013, respectively. Noncash collateral held at December 31, 2014 and 2013, was \$40.8 million and \$39.6 million, respectively.

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

7. Securities Lending (continued)

In return for the loaned securities, the agent, prior to or simultaneous with delivery of the loan securities to the borrower, received collateral in the form of cash, U.S. government securities, or letters of credit as a safeguard against possible default of any borrower on the return of the loan. Each loan is initially collateralized in the case of (a) loaned securities denominated in U.S. dollars or whose primary trading market is located in the U.S. at 102% of the market value of the loaned securities or (b) loaned securities not denominated in U.S. dollars or whose primary trading market is located in the U.S. to the extent of 105% of the market value of the loaned securities. The collateral is marked to market on a daily basis. The Master Trust maintains full ownership rights to the securities loaned (except for the right to vote proxy, whereas the customer can request that the security be returned on a best-efforts basis in consideration of a normal settlement cycle) and, accordingly, classifies loaned securities as investments. The Master Trust does not have an enforceable master netting agreement or similar arrangement as of December 31, 2014 and 2013. Securities lending income earned by the Master Trust was \$30,341 for the year ended December 31, 2014.

8. Administrative Expenses

The Plan incurs administrative expenses directly related to the Plan that consist primarily of benefit administration, advisory, actuarial, and auditing fees. These expenses are reported on the statement of changes in net assets available for benefits as administrative expenses. Investment-related expenses for the Master Trust are allocated to the Plan and are reflected in administrative expenses. All other costs of administering the Plan are paid by the Company.

9. Party-in-Interest Transactions

Party-in-interest transactions include the purchase and sale of short-term investments and Master Trust units through the trustee and the payment of services and expenses of the Master Trust by the Plan. Party-in-interest transactions also include transactions between the Plan and Fidelity, the plan administrator. Such transactions are exempt from being prohibited transactions under ERISA.

There were no party-in-interest transactions that were prohibited under the Department of Labor's regulations.

Other than those described above or pursuant to a certain trust agreement (see Notes 1, 3, and 4), the Plan has had no agreements or transactions with related parties.

TRW Automotive Salaried Pension Plan

Notes to Financial Statements (continued)

10. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (the IRS) dated March 14, 2014, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the IRC), and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualified status. The plan sponsor believes the Plan is being operated in compliance with applicable requirements of the IRC and, therefore, believes that the Plan, as amended, is qualified and the related trust and Master Trust are tax-exempt.

U.S. GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examination for years prior to 2011.

11. Risks and Uncertainties

The Plan and the Master Trust invest in various investment securities. Investment securities are exposed to various risks, such as interest rate, market volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Notes to Financial Statements (continued)

12. Reconciliation of Financial Statements to the Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements to the Form 5500 as of December 31, 2014 and 2013:

	<u>2014</u>	<u>2013</u>
Net assets available for benefits per the financial statements	\$ 260,280,613	\$ 603,869,298
Transfer from other plan due to merger	–	64,993,021
Net assets available for benefits per the Form 5500	<u>\$ 260,280,613</u>	<u>\$ 668,862,319</u>

13. Subsequent Events

Management has evaluated and concluded that there were no subsequent events for the Plan through October 15, 2015, the date the financial statements were available to be issued.

Counts include participants of the former Kelsey-Hayes Salaried Pension Plan, and active employees having balances under the Lucas cash balance program. LRA participants indicated as "active" accrued benefit service under the "Salaried Plan" component of the TRW Automotive Salaried Pension Plan, but ceased accruing benefit service under the "LRA Plan" component. All benefit service accruals ceased effective December 31, 2010.

In each cell, the top number is the count of active participants for each age/service combination, the middle number is the average cash balance account, and the bottom number is the average accrued benefit. Because the plan is hard frozen, accrued benefit is reported in lieu of compensation. The average is not shown for cells with fewer than 20 participants. LRA Lucas Cash Balance Participants are eligible for the greater of their cash balance account or the annuity benefit. LRA Kelsey-Hayes Participants are eligible for their accrued benefit.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all plan participants.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

- A detailed description of the calculation follows:
The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 15 — Reconciliation of Differences Between Valuation Results and Amounts Used to Calculate AFTAP, and Details Related to July 1, 2014 Spinoff

Certain active participants of the TRW Automotive Salaried Pension Plan were spun off into a new plan effective July 1, 2014. This new plan, the TRW Automotive Spinoff plan for hourly employees ("Spinoff Plan"), was terminated effective September 1, 2014. The Spinoff Plan was established with a calendar year plan year, so per previous IRS Gray Book guidance, the 2014 funding results and contribution requirements for the Salaried Pension Plan were reasonably allocated to the Spinoff Plan rather than a full valuation being completed for the Spinoff Plan. Since the Spinoff Plan is over 100% funded net of credit balance, the entire minimum required contribution was allocated to the residual plan.

² Approximately 1.77% of the MVA was allocated to the spinoff plan in accordance with the Section 4044 allocation as of July 1, 2014. For purposes of allocating the AVA, the spun-off assets were treated as a transfer out during the plan year.

³ As of January 1, 2014 and prior to application of balances toward the combined plan 2014 MRC.

⁶ Balances are allocated in the same proportion as the MVA allocation.

⁷ Amortization bases were allocated according to the percentage of the unfunded liability attributable to each plan.

Schedule SB, Line 15 — Reconciliation of Differences Between Valuation Results and Amounts Used to Calculate AFTAP, and Details Related to July 1, 2014 Spinoff

*Specific 2014 AFTAP of 104.60% for the residual Salaried Plan was certified September 30, 2014 based on estimated allocation of 1/1/2014 FT (\$604,338,897) and AVA (\$632,175,092).

The December 2, 2014 contribution is considered a contribution in excess of the minimum required determined for the pre-spinoff portion of the 2014 plan year. \$1,400,521 was allocated to the spinoff plan and all other contributions listed on the SB were allocated to the Salaried plan.

⁸ Balances are allocated in the same proportion as the MVA allocation.

Schedule SB, Part V — Summary of Plan Provisions***Plan provisions*****Benefits included or excluded**

Unless noted below, all benefits provided by the plan, as restated and amended, through the valuation date are included in the valuation

- **Most recent plan amendment included:** Amendment #14
- **Plan amendments excluded:** None
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation does not include increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the accumulated value of their missed payments with 5.00% interest.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **Internal Revenue Code Limitations:** The Limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Schedule SB, Part V — Summary of Plan Provisions**Summary of Major Plan Provisions*****TRW Automotive Salaried Pension Plan***

Effective date and plan year	Original plan: January 1, 1989 Restated plan: January 1, 2007 Plan year: Calendar year
Status of the plan	The plan was amended to freeze benefit accruals as of December 31, 2010; employees hired after June 1, 2009 are not eligible to participate in this plan.
Significant events that occurred during the year	As of July 1, 2013, certain active participants were spun off from the TRW Automotive Salaried Pension Plan into the TRW Automotive Salaried Spinoff Pension Plan. The new plan was terminated effective September 1, 2013 via standard plan termination process. TRW Automotive Lebanon Hourly Plan C merged into the Salaried Pension Plan effective December 31, 2013 As of July 1, 2014, selected active and deferred vested participants were spun off from the TRW Automotive Salaried Pension Plan into the TRW Automotive Spinoff Plan for Hourly Employees. The new plan was terminated effective September , 2014 via standard plan termination process. The plan was amended to allow a temporary lump sum window to certain participants late in 2014.

Definitions

• Covered employees	All salaried employees in a TRW Automotive controlled group of companies at a unit covered by a Schedule under the plan, or any person actively accruing Credited service, with certain exclusions. Explicitly excluded, effective January 1, 2007, are hourly and production employees at the Sterling Heights and St. Louis modules facilities. The plan was closed to new entrants effective June 1, 2009.
• Participation date	Date of becoming a covered participant
