Notes to Financial Statements

(1) Description of the Plan

(a) General

The following brief description of the NUS Corporation Employees' Pension Plan (the Plan) is included for general information purposes. Participants should refer to the Plan document for more complete information. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

The Plan is a noncontributory defined benefit pension plan, established on January 1, 1972 to provide specified benefits for eligible employees of NUS Corporation (the Company), upon retirement, death, or disability. The Plan was amended and restated in its entirety effective January 1, 1987 in order to comply with the provisions of the Tax Reform Act of 1986. No new participants were allowed in the Plan on or after January 1, 1993. Participants are 100% vested in their benefits. Effective December 31, 1993, the benefits accrual under the Plan was frozen.

(b) Administration

The KBR Benefits Committee maintains all control, management, and administration of the Plan. The KBR Investment Committee maintains all powers and duties related to the Plan's investment fund or funds.

State Street Bank and Trust Company (State Street or the Trustee) is the Plan's trustee and Aon Hewitt is the Plan's record keeper.

(c) Contributions and Funding Policy

The Company contributes such amounts as are necessary, on an actuarially determined basis, to meet the minimum funding requirements of ERISA. Employer contributions in excess of the required minimum may be made at the discretion of the Company. The minimum funding requirements under ERISA regulations for the year ended December 31, 2014 have been met by the Company.

(d) Benefits

Normal retirement benefits equal the sum of the following:

- The member's past service benefit as of December 31, 1987.
- For the year 1988, before the participant completed 15 years of service, and the participant completed 1,000 hours of service during 1988, 1% times total wages per Form W-2 plus any salary reductions made under the Internal Revenue Code of 1986, as amended (IRC) Section 401(k) or IRC Section 125 Plan (applicable compensation) up to an amount determined based on the employee's sixty-fifth birthday (covered compensation) plus 2% times applicable compensation in excess of covered compensation.

NUS CORPORATION
EMPLOYEES' PENSION PLAN
Notes to Financial Statements

- For any year after December 31, 1988, before the participant completed 15 years of service and the participant completed 1,000 hours of service during that year, 1.25% times applicable compensation up to covered compensation plus 2% times applicable compensation in excess of covered compensation.
- For any year after December 31, 1987, after the participant completed 15 years of service but before the participant completed 35 years of service and the participant completed 1,000 hours of service during that year, 1% times applicable compensation.

The normal retirement benefit accrued after 1988 is reduced 1/15 for each year by which normal retirement date precedes unreduced social security retirement age.

The early retirement benefit for accruals prior to 1989 equals the accrued benefit reduced by 1/15 for each of the first five years and 1/30 for each of the next five years that payments commence prior to age 65. The early retirement benefit for accruals after 1988 equals the accrued benefit reduced by 1/15 for each of the first five years, 1/30 for each of the next five years, and 1/24 for each year thereafter that payments commence prior to unreduced social security retirement age.

Disability benefit is an amount payable at age 65 equal to the benefit the participant would have accrued assuming his applicable compensation continued to age 65 as the rate in effect at the date of disability.

(2) Significant Accounting Policies

(a) Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

(b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

(c) Securities Transactions and Investment Income of the Master Trust

The Plan participates in the KBR Employee Benefit Master Trust (Master Trust). The Master Trust was established for the collective investment of certain defined contribution and defined benefit plans.

Purchases and sales of securities in the Master Trust are recorded on a trade-date basis. Realized gains (losses) on investments sold and unrealized appreciation (depreciation) for investments of the Master Trust are combined and presented as Plan interest in Master Trust investment income (loss) in the statement of changes in net assets available for benefits.

NUS CORPORATION
EMPLOYEES' PENSION PLAN
Notes to Financial Statements

In addition, investment income (loss) of the Master Trust includes dividends, interest, and other income. Interest income of the Master Trust investments is recorded as earned. Dividends on the Master Trust investments are recorded on the ex-dividend date.

(d) *Valuation of Investments Held in the Master Trust*

Investments are reported at fair value, which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

The Stable Value Fund within the Master Trust invests primarily in asset-backed contracts that are fully benefit-responsive. These asset-backed contracts have two components: 1) a portfolio of securities or underlying assets and 2) a wrap contract. These underlying assets, generally fixed-income securities, are held by an independent trustee for the sole benefit of the fund and a wrap contract is entered into for a fee with a financial institution to assure contract value liquidity for Plan participant-directed withdrawals, transfers, or loans. The issuer of the contract (wrap provider) undertakes to repay the principal amount deposited pursuant to the contract plus accrued interest less expenses to fund participant-directed withdrawals, transfers, and loans. The crediting rate of the asset-backed contract is a function of the relationship between the market value, yield, and duration of the underlying assets versus the contract value. If the positive adjustment for the portion of net assets attributable to fully benefit-responsive investment contracts from fair value to contract value increases, the crediting rate at the next reset date will be negatively impacted and vice versa. Interest rate change is a key factor that can influence future crediting rates because it impacts the value, yield, and duration of the underlying securities. The contract rate is reset periodically by wrap providers and cannot be less than zero.

The net weighted average yield earned, which is different from the interest rate credited to participants, by the entire fund for 2014 was 1.34% and for 2013 was 1.22%. The net weighted average interest rate credited to participants in the fund for 2014 was 1.76% and for 2013 was 1.53%.

All of the asset-backed contracts held by the fund are fully participating contracts. In a fully participating contract, the asset and liability risks may be transferred from the wrap provider to the fund in the event of a termination or a nonparticipant directed withdrawal, transfer, or loan. The risk of this event happening is possible but not probable. The wrap provider may terminate a fully benefit-responsive contract and settle at an amount different from the contract value if the wrap provider or the fund is unable to meet the terms of the contract.

For 2014, the Defined Benefit Plan Fund (DB Fund) invests in the SSgA Moderate Strategic Balance Fund (MSB) to manage its investment exposure. The MSB is valued daily, allowing the DB Fund to be valued daily. Contributions to and withdrawals from the MSB by the Plan are used to buy and sell units at the prior day's closing unit price of the MSB.

For 2013, the DB Fund invests in the Moderate Premixed Portfolio (MPP) to manage its investment exposure. The MPP operates on a unitized basis and is valued daily, allowing the DB Fund to be valued daily. The unit price is calculated by dividing the total value of the fund by the total number of units in existence. Contributions to and withdrawals from the MPP by the DB Fund are used to buy and sell units at the prior day's closing unit price of the MPP.

NUS CORPORATION
EMPLOYEES' PENSION PLAN
Notes to Financial Statements

The Plan's proportionate interest in the investments of the Master Trust is shown in the statements of net assets available for benefits as Plan interest in Master Trust (see Note 5).

(e) *Administrative Expenses*

The Master Trust pays substantially all plan expenses on behalf of the Plan. Generally, trustee fees, actuarial fees to the extent allowable by law, audit fees, investment management fees, and Pension Benefit Guaranty Corporation (PBGC) premiums are paid from Master Trust assets and are charged to the applicable plans participating in the Master Trust. Expenses related to the direct management of the Master Trust are shared on an equitable basis by the participating plans. Expenses specifically related to an individual plan are charged to the assets of the plan that incurred the charges. These expenses are shown as a component of Plan interest in Master Trust investment income (loss).

(f) *Actuarial Present Value of Accumulated Plan Benefits*

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their compensation and years of credited service on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was determined by Aon Hewitt and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (in 2014, the Plan used the Internal Revenue Service (IRS) RP-2000 Non-Annuitant/Annuitant Mortality table projected to 2014; in 2013, the Plan used the IRS RP-2000 Non-Annuitant/Annuitant Mortality table projected to 2013), (b) retirement age assumptions (age 65), and (c) 6% expected investment return.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(g) *Distribution of Benefits*

Benefit distributions are recorded when paid.

(h) Recent Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board issued Accounting Standards Update 2015-07, *Disclosures for Investments in Certain Entities that Calculate Net Asset Value Per Share (or its Equivalent)* (ASU 2015-07). ASU 2015-07 removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The new guidance will be applied retrospectively and is effective for fiscal years beginning after December 15, 2016, with early adoption permitted. Plan management is currently evaluating the impact that the new guidance will have on the Plan's financial statements.

In July 2015, the Financial Accounting Standards Board issued Accounting Standards Update 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965)* (ASU 2015-12). ASU 2015-12 was issued to reduce the complexity of employee benefit plan accounting. Part I requires that fully benefit-responsive investment contracts are measured, presented, and disclosed only at contract value. Part II eliminates the disclosure of: investments that represent 5 percent or more of net assets; the net appreciation or depreciation by general type; and the disaggregation of investment classifications. Part III permits plans to measure investments and related accounts as of a month-end date closest to the plan's fiscal year-end when it does not coincide with a month-end. The new guidance will be applied retrospectively and is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Plan management has not yet adopted this guidance.

(3) Fair Value Measurements

The Financial Accounting Standards Board Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value, and requires additional disclosure about the use of fair value measurements in an effort to make the measurement of fair value more consistent and comparable.

Cash and cash equivalents, equity securities, mutual funds, and bonds held within the Master Trust are presented at their quoted market values. Common/collective trust funds are stated at the fair value of the underlying securities. The Master Trust considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Various inputs are used in determining the fair value of the Plan's investments. Valuation techniques used to measure fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. In addition, ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The three levels of the fair value hierarchy under ASC 820, including the types of Plan investments that fall under each category and the valuation methodologies used to measure fair value, are described below:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 - Inputs to the valuation methodology are other than quoted market prices in active markets that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities;

NUS CORPORATION
EMPLOYEES' PENSION PLAN
Notes to Financial Statements

quoted prices that are in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs to the valuation methodology are unobservable inputs (i.e., projections, estimates, interpretations, etc.) that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The inputs and methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. There have been no changes in the methodologies used at December 31, 2014 or 2013.

The following tables set forth by level, within the fair value hierarchy, the Master Trust's investments at fair value as of December 31, 2014 and 2013:

*Investment did not exceed 5% of the Master Trust's net assets in the year indicated.

During 2013, the Master Trust made use of several investment strategies involving limited use of derivative investments. Certain investment managers were allowed limited use of derivatives for strategies such as portfolio structuring, return enhancement, or hedging against market and interest rate changes. Derivatives may also be used as a hedge against foreign currency fluctuations. Investment managers are not permitted to use leverage for any investment purchase. Derivative investments are stated at estimated fair values as determined by quoted market prices. Gains and losses on such investments are included in net investment appreciation (depreciation) in the statement of changes in participating plans' net assets of the Master Trust.

(6) Information Certified by the Trustee

The Plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, State Street Bank and Trust Company, the trustee of the Plan, has certified to the completeness and accuracy of all investments reflected on the accompanying statements of net assets available for benefits as of December 31, 2014 and 2013, and the related investment activity reflected in the statement of changes in net assets available for benefits for the year ended December 31, 2014.

(7) Plan Termination

Management expects the Plan to continue without interruption but reserves the right to discontinue the Plan. In the event the Plan terminates, the net assets will be allocated in a class order of precedence in accordance with ERISA's rules and regulations, and the Plan document. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's guaranty, while other benefits may not be provided for.

(8) Party-in-Interest Transactions

The Plan, through its participation in the Master Trust, may invest in investment securities issued and/or managed by the Trustee and asset managers. These entities are considered parties-in-interest to the Plan. These transactions are covered by an exemption from the prohibited transaction provisions of ERISA and the IRC.

(9) Tax Status

The IRS has determined and informed the Company by a letter dated June 13, 2013, that the Plan and related trust were designed in accordance with the applicable provisions of the IRC. The Plan has been amended since receiving the letter; however, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, the

NUS CORPORATION
EMPLOYEES' PENSION PLAN
Notes to Financial Statements

Plan administrator believes that the Plan was qualified and the related trust was tax exempt as of December 31, 2014 and 2013.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014 and 2013, there are no uncertain positions taken or expected to be taken. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2011.

(10) Risks and Uncertainties

The investments of the Master Trust are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(11) Subsequent Events

The Plan has evaluated subsequent events through October 15, 2015, the date the financial statements were available to be issued.
