Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Other economic assumptions

• Salary increases	Not applicable
• Flat-dollar benefit increases	Not applicable
• Inflation	2.50% per year Rationale: based on inflation expectations using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook
• Expected investment return	7.50% per year for years 2010 through 2012 and 6.00% for 2013. Rationale: based on the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Markets Outlook for the plan's target assets mix. The expected investment return is net of an adjustment of 20 basis points for investment expenses assumed to be paid from plan assets.
• Expenses	Expenses paid from the trust for the 2014 plan year are assumed to be \$130,000.

Actuarial Methods***Asset Methods***

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with updates to the data for plan participants as of the valuation date.
- **Participants excluded:** No participants have been excluded from the valuation.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***Benefits Included or Excluded***

Unless noted below, all benefits provided by the plan, as restated effective January 1, 2010 are included in this valuation.

- **Most recent plan amendments included:** None
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over unreduced retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, the plan is not subject to being top-heavy because it is a collectively bargained plan; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Other economic assumptions

• Salary increases	Not applicable
• Flat-dollar benefit increases	Not applicable
• Inflation	2.50% per year Rationale: based on inflation expectations using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook
• Expected investment return	7.50% per year for years 2010 through 2012 and 6.00% for 2013. Rationale: based on the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Markets Outlook for the plan's target assets mix. The expected investment return is net of an adjustment of 20 basis points for investment expenses assumed to be paid from plan assets.
• Expenses	Expenses paid from the trust for the 2014 plan year are assumed to be \$130,000.

Actuarial Methods***Asset Methods***

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with updates to the data for plan participants as of the valuation date.
- **Participants excluded:** No participants have been excluded from the valuation.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***Benefits Included or Excluded***

Unless noted below, all benefits provided by the plan, as restated effective January 1, 2010 are included in this valuation.

- **Most recent plan amendments included:** None
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over unreduced retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, the plan is not subject to being top-heavy because it is a collectively bargained plan; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
