Independent Auditors' Report

To the Board of Trustees
Plumbers & Pipefitters Local 693
Defined Benefit Pension Plan
South Burlington, Vermont

We have audited the accompanying financial statements of the Plumbers and Pipefitters Local 693 Defined Benefit Pension Plan (the "Plan"), which comprise the statements of net assets available for plan benefits as of April 30, 2015 and 2014 and the related statements of changes in net assets available for plan benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for plan benefits of the Plumbers and Pipefitters Local 693 Defined Benefit Pension Plan as of April 30, 2015 and 2014, and the changes in its net assets available for plan benefits for the years then ended in accordance with accounting principles generally accepted in the United States of America.

The supplemental schedule does not disclose the cost information for the pooled separate account. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental information are the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the 2015 basic financial statements. The information in the supplemental schedule has been subjected to the auditing procedures applied in the audit of the 2015 basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the 2015 basic financial statements or to the financial statements themselves and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the 2015 basic financial statements taken as a whole.

(1) Description of Plan

The following description of the Plumbers & Pipefitters Local 693 Defined Benefit Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions.

(a) General – The Plan is a noncontributory defined benefit pension plan covering substantially all members of Local 693. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan was established on May 1, 1969.

(b) Eligibility – Each union member becomes a Plan participant on the first day of employment with a contributing employer.

(c) Contributions – Contributing employers make contributions to the Plan at a rate of $4.72 an hour for each hour worked by eligible union members.

(d) Years of credited service – Years of credited service is equal to total hours of service with a contributing employer divided by 1,600. Additional credited service may be granted for periods before May 1, 1969.

(e) Accrued benefit – Accrued benefit is the monthly pension benefit equal to the applicable benefit level multiplied by the credited service earned as of a given date. There are special rules for those not covered by the Plan for a significant period.

(f) Normal retirement – Normal retirement is considered to be at age 65 with 5 years of credited service required. The retirement benefit is equal to the accrued benefit.

(g) Early retirement – Early retirement is considered to be at age 55 with 5 years of credited service required. The 5 years of credited service requirement is waived for disabled participants. The retirement benefit is equal to the full-accrued benefit if started at the normal retirement date, or a percentage of accrued benefit if started immediately (at age 55, 59.9%; at age 62 or more, 100%). However, if a participant has less than 10 years of credited service, benefits are actuarially reduced from normal retirement date.

(h) Disability benefits – A participant with ten years of credited service who becomes disabled to the extent required by Social Security qualifications will be eligible for the full accrued benefit, starting immediately.

(i) Vesting – Effective May 1, 2006, participants are 100% vested upon the earlier of (1) completion of 5 years of service with 1,000 or more hours per year, or (2) accumulating 1,600 hours of service after May 1, 2005 and 8,000 total hours of participation with the Plan. Participants are also 100% vested if they reach age 65 while employed. Participants are not vested if they do not meet the service requirements or age minimums.

(j) Pre-retirement death benefit – The pre-retirement death benefit is equal to the value of the vested accrued benefit and is payable to a designated beneficiary. The spouse is the automatic beneficiary, but a non-spouse can be elected with spousal consent.

(k) Normal form of benefit – The normal form of the retirement benefit is payment for life with a five-year guarantee. Other options are available including a Social Security leveling feature.

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting – The Plan maintains its accounting records on the accrual basis of accounting.

(b) Cash and cash equivalents – The Plan considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

(c) Investments and investment income – The Plan's investments are maintained by TD Bank, the Union Labor Life Insurance Company (ULLICO), and Morgan Stanley Smith Barney. The Plan's pooled separate account with ULLICO is valued at contract value. Contract value represents contributions made under the contract, plus interest at the contract rate, less funds used to purchase annuities, pay annuity benefits and pay administrative expenses. The contract value approximates fair value. The investments maintained by Morgan Stanley Smith Barney and TD Bank are measured by quoted prices in an active market.

Investment income is recorded as earned.

(d) Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(e) Expenses of the Plan – Accounting, actuarial, administrative, and other fees are paid directly by the Plan.

(f) Payment of benefits – Benefits are recorded when paid.

(g) Risks and uncertainties – The Plan utilizes various instruments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(h) New Accounting Pronouncements – The FASB issued 2015-07, Disclosure for Investments in Certain Entities that Calculate Net Asset Value Per Share (or its Equivalent) ("ASU 2015-07"), an update to ASC 820. ASU 2015-07 removed the requirement to categorize within the fair value hierarchy investments for which fair value is measured at net asset value using the practical expedient. In addition, the FASB issued ASU 2015-12, Plan Accounting: Defined Contributions Plans ("ASU 2015-12"). ASU 2015-12 removes (1) the requirement that plans disclose investments that represent 5 percent or more of net assets available for plan benefits; and (2) the net appreciation or depreciation for investments by general type; and (3) removes the requirement to present classes of assets grouped and disclosed on the basis of nature, characteristics, and risks, or general type. Both ASUs are effective for fiscal years beginning after December 15, 2015, with early adoption permitted. The Plan will implement the provisions of both ASUs retrospectively for all periods presented.

(i) Subsequent events – The Plan evaluated subsequent events through February 15, 2016, the date the Plan's financial statements were available to be used and no events or transactions occurred.

(3) Summary of Actuarial Information

(a) Actuarial cost methods – The actuarial cost method used for this valuation, for purposes of minimum funding standards and maximum deductions, is the Unit Credit Funding Method. Under this method, the benefits expected to be paid to each participant are projected with the actuarial assumptions. The projected benefits are then allocated to various years according to the year of service such benefits were earned.

The normal cost for the year is equal to the present value of the benefits allocated to the coming year in accordance with the above.

The accrued liability is equal to the actuarial present value of all benefits allocated to years prior to the valuation date. The unfunded accrued liability is equal to the excess of the actuarial accrued liability over the actuarial asset value.

Each year the unfunded accrued liability is expected to be equal to the sum of the unfunded accrued liability and normal cost from the prior year, plus interest at the assumed rate, less the contributions made to the fund, plus interest, if made prior to the end of the plan year. The extent to which the actual value of the unfunded accrued liability differs from the "expected" unfunded accrued liability reflects the actuarial experience for the Plan during the year. A positive difference results in an experience loss for the year, a negative difference results in a gain for the year. The unfunded accrued liability is further modified for changes in plan provisions or actuarial assumptions.

(b) Method for determining level of contribution – The contribution, under this method, is determined by subtracting the assets on hand from the present value of all future expected benefits. The remainder is divided by the present value of future hours assumed worked for each active participant, resulting in the contribution per hour worked. The final contribution is then equal to the contribution per hour worked, times the expected number of hours during the plan year.

(c) Actuarial assumptions – Mortality, turnover and disability: Mortality is based on the 1983 Group Annuity Mortality Table.

Interest: 7.5%

Retirement age: Active members are assumed to retire in accordance with the following rates of retirement:

Age	Rate of Retirement	Age	Rate of Retirement
55	10.00%	61	25.00%
56	10.00%	62	50.00%
57	10.00%	63	50.00%

(4) Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures,* establishes a framework for measuring fair value. That framework provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Fair Value Measurements (continued)

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at April 30, 2015 and 2014.

Cash equivalents, mutual funds and exchange traded funds: Valued at the closing price reported on the active market on which the individual securities are traded.

Investment contract: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit worthiness of the issuer.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of April 30, 2015 and 2014:

	Assets at Fair Value as of April 30, 2015			
	(Level 1)	(Level 2)	(Level 3)	Total
Cash equivalents	$ 583,476	$ -	$ -	$ 583,476

Total investments at Fair value	$ 24,033,024	$ -	$ 552,350	$ 26,117,895

* Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been categorized in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Statements of Net Assets Available for Plan Benefits.

(5) Funding Policy

Employers make contributions to the Plan at rates determined by the collective bargaining agreements. The amount of employer contribution is determined from work-hours during the period and the contractual employer contribution rate in effect. Employer contributions are included in income for the period in which work is performed. The contributions for 2015 and 2014 exceeded the minimum funding requirements of ERISA.

(6) Plan Termination

Local 693 expects to maintain the Plan indefinitely but reserves the right to amend or terminate the Plan at any time. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

(a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years.

The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

(b) Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).

(c) All other vested benefits (that is, vested benefits not insured by the PBGC).

(d) All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2015 and 2014 that ceiling was $5,011 and $4,943 per month, respectively. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Should the Plan terminate at some future time, the participants' benefits would depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and on the level of benefits guaranteed by the PBGC.

(7) Income Taxes

The Plan obtained its latest determination letter on September 9, 2015, stating that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is currently designed and being operated in compliance with IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the applicable taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of April 30, 2015, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to the year ended April 30, 2012.

(8) Parties-In-Interest

The Plan leases office space on a month-to-month basis from the United Realty Corporation, a Vermont corporation, of which Local 693 is a sixty-five percent owner. The total expenses for 2015 and 2014 were $4,210 and $5,954, respectively.

Employees of Plumbers and Pipefitters Local 693 perform certain administrative functions of the Plan. The Plan reimburses Plumbers and Pipefitters Local 693 at rates approved by the Board of Trustees of the Plan for direct expenses incurred. During the years ended April 30, 2015 and 2014, the Plan reimbursed direct expenses for salary and benefits in the amount of $14,246 and $14,238, respectively.

The Board of Trustees includes representatives of the Union as well as representatives of the contributing employers.

Trustee and investment management fees are paid to Morgan Stanley Smith Barney, TD Bank and Union Labor Life Insurance Company. These transactions qualify as party-in-interest transactions. Total amounts paid for the year ended April 30, 2015 to Morgan Stanley Smith Barney, TD Bank and Union Labor Life Insurance Company was $110,268, $8,644 and $3,655, respectively. Total amounts paid for the year ended April 30, 2014 to Morgan Stanley Smith Barney, TD Bank and Union Labor Life Insurance Company was $109,505, $5,152 and $3,536, respectively.

Actuarial Valuation Method:	Unit Credit Cost Method. Under this method, the normal cost is calculated as the present value of benefits expected to be earned in the valuation year. The actuarial accrued liability is the present value of all benefits earned as of the valuation date. Actuarial gains (losses), as they occur, reduce (increase) the unfunded actuarial accrued liability.
Asset Method:	A smoothed market value method which reflects the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last 5 years at a rate of 20% per year. However, the investment loss during the 2008-2009 plan year was smoothed over a period of ten years. The actuarial value is is subject to a restriction that it not be less than 80% or more than 120% of the market value.
Shortfall Funding Method:	Not used.
Changes since the Prior Valuation:	The interest rate used to calculate the RPA current liability was decreased from 3.66% to 3.61%.

Actuarial Valuation Method:	Unit Credit Cost Method. Under this method, the normal cost is calculated as the present value of benefits expected to be earned in the valuation year. The actuarial accrued liability is the present value of all benefits earned as of the valuation date. Actuarial gains (losses), as they occur, reduce (increase) the unfunded actuarial accrued liability.
Asset Method:	A smoothed market value method which reflects the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last 5 years at a rate of 20% per year. However, the investment loss during the 2008-2009 plan year was smoothed over a period of ten years. The actuarial value is is subject to a restriction that it not be less than 80% or more than 120% of the market value.
Shortfall Funding Method:	Not used.
Changes since the Prior Valuation:	The interest rate used to calculate the RPA current liability was decreased from 3.66% to 3.61%.
