The client has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.

Appendix B (Continued)

<i>Asset Method</i>	Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
<i>Employees Valued</i>	Only participants as of the valuation date were valued.
<i>Selection of Assumptions</i>	<p>Information used in the analysis of selecting assumptions include: discount rate – Citi Group yield curve; expected return on assets – review of historical and expected returns on various asset categories held by the plan as well as information provided by the plan’s investment advisor.</p> <p>The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.</p> <p>A complete review of non-economic assumptions, to satisfy ASOP 35, has not been done since the plan was frozen, but we monitor the gains and losses annually to ensure the assumptions are still reasonable.</p>
<i>Changes in Assumptions and Methods since the Last Actuarial Valuation</i>	<p>The segmented interest rates used for determining the funding target were 4.94%, 6.15% and 6.76%. These rates were updated to the rates required for the current plan year.</p> <p>The mortality table for the funding target was changed as required under PPA '06.</p>
<i>Justification for Changes in Actuarial Assumptions</i>	The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any “Change in Actuarial Assumptions.”
