Notes to Financial Statements October 1, 2015 and December 31, 2014

Note 1 - Plan Description

The following description of Century Aluminum of West Virginia, Inc./United Steelworkers of America Savings Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

Effective October 1, 2015, the Plan was merged into the Century Aluminum 401(k) Plan. Accordingly, all participant account balances were transferred to the Century Aluminum 401(k) Plan as of that date.

General - The Plan was established as a defined contribution plan established on February 7, 1989. The Plan covered all employees of Century Aluminum of West Virginia, Inc. (the "Company") who are represented by the United Steelworkers of America Local 5668. Employees were eligible for the Plan after they completed 90 days of service. The Plan was subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - The Plan provided for employee salary 401(k) deferral contributions up to a maximum of 100 percent of the annual compensation. Participants who had attained age 50 could make catch-up contributions in addition to their regular deferral contributions. Participants could also make contributions to the Plan in the form of a rollover of funds from another qualified plan. The amount of a participant's contributions for any plan year could not exceed the applicable limit under the Internal Revenue Code.

The Company did not match contributions to the Plan.

Participant Accounts - Participants could elect to have their contributions invested in one or all of the investments listed in Note 3. Each participant's account was credited with the participant's contribution and allocations of plan earnings and charged with an allocation of administrative expenses. Allocations were based on participant earnings or account balances as defined. The benefit to which the participant was entitled was the benefit that could be provided from the participant's vested account.

Effective April 1, 2010, the Plan was amended to eliminate Century Aluminum Company common stock as an investment election option. All existing investments in Century Aluminum Company common stock remained unless directed otherwise by the participant.

Vesting - Participants were vested immediately in their contributions plus actual earnings thereon.

Note 1 - Plan Description (Continued)

Participant Notes Receivable - Participants could borrow from their accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50 percent of their account balances. The notes receivable were secured by the balance in the participant's account and bore interest at a rate in effect on the date of the loan, which was commensurate with local prevailing rates as determined periodically by the plan administrator. Loan terms generally ranged from one to five years. Loans for the purchase of a principal residence could be repaid over a reasonable period of time, which could exceed five years. Principal and interest were paid ratably through payroll deductions.

Payment of Benefits - Distributions were payable upon retirement, death, disability, or termination of employment. The Plan provided for normal retirement at age 65. In-service withdrawals were also allowed for employees who have reached the age of 59½. The total vested portion of a participant's account balance was paid in the form of a lump-sum amount.

Hardship Withdrawals - Participants could request that all or a portion of their accounts be distributed in the case of severe financial hardship, as defined in the plan document. The Company approved any such hardship withdrawals.

Party-in-interest Transactions - Certain plan assets were held in investment funds managed by T. Rowe Price Trust Company or its affiliates. T. Rowe Price Trust Company was the trustee of the Plan; therefore, these transactions qualified as party-in-interest transactions as defined under ERISA guidelines. In addition, the Plan had investments in the common stock of Century Aluminum Company, the parent company of the plan sponsor. Therefore, any transactions relating to the common stock qualified as exempt party-in-interest transactions.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - The Plan's investments in mutual funds were stated at fair value based on quoted market prices. The common collective trust fund was valued at net asset value (NAV) per share (or its equivalent) of the fund, which was based on the fair value of the fund's underlying net assets. There were no unfunded commitments or redemption restrictions on the common collective trust fund.

See Note 3 for additional information.

Note 2 - Summary of Significant Accounting Policies (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Change in Presentation - The presentation of the stable value common collective trust fund for 2014 has been changed. The fund is presented using net asset value (NAV) per unit as a practical expedient for the fair value of the investment without presentation of contract value or the difference between fair value and contract value. This change in presentation resulted from a recent clarification from the Financial Accounting Standards Board and had no effect on total net assets available for benefits or the change in net assets available for benefits.

Participant Notes Receivable - Participant notes receivable were recorded at their unpaid principal balances plus any accrued interest. Participant notes receivable were written off when deemed uncollectible.

Benefit Payments - Benefits were recorded when paid.

Administrative Expenses - Various administrative costs were paid by the Company.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including July 14, 2016, which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following table presents information about the Plan's assets measured at fair value on a recurring basis at December 31, 2014.

Century Aluminum of West Virginia, Inc./ United Steelworkers of America Savings Plan

Notes to Financial Statements October 1, 2015 and December 31, 2014

Note 3 - Fair Value Measurements (Continued)

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.
