Plan Sponsor Elections

Yield curve election:	The plan sponsor did not elect to use the full yield curve under IRC section 430(h)(2)(D)(ii).
Applicable month:	The plan sponsor elected to base segment rates on the rates published in the month containing the valuation date.

Economic Assumptions

First segment rate (years 0 to 4):	4.72%
Second segment rate (years 5 to 19):	6.11%
Third segment rate (years 20 and after):	6.81%
Effective interest rate (current year):	5.91%
First segment rate (years 0 to 4), without stabilization:	1.39%
Second segment rate (years 5 to 19), without stabilization:	3.98%
Third segment rate (years 20 and after), without stabilization:	5.00%
Effective interest rate, without stabilization (current year):	3.68%
PBGC first segment rate (years 0 to 4):	1.25%
PBGC second segment rate (years 5 to 19):	4.57%
PBGC third segment rate (years 20 and after):	5.60%
Interest crediting rate:	3.50%

The interest rates listed above are compounded annually.

The cash balance interest crediting rate is equal to the rate of return on plan assets, subject to cumulative minimum and maximum interest crediting rates. Accordingly, the assets needed to provide future cash balance benefits are independent of interest rates and only dependent on the plan's asset allocation to the extent that the cumulative minimum or maximum interest rates affect the cash balance accounts. This plan provision is difficult to measure using traditional deterministic valuation procedures. To account for this plan provision, the interest crediting rate was selected from a reasonable range based on the plan's asset allocation that when combined with the segment interest rates produced a funding target that was as close as possible to the economic value of the cash balance accounts.

EIN / PN 20-5654362 / 002
Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Demographic Assumptions

Retirement
100% of employees are assumed to retire at age 65.

Weighted average retirement age
The weighted average retirement age for the population during the current year, rounded to the nearest whole number, is 65.

Withdrawal
None.

Disability
None.

Rationale for retirement age, withdrawal and disability assumptions
The economic value of the cash balance benefits is not materially affected by the timing of benefit commencement. Therefore, no preretirement withdrawal or disability is assumed, and all participants are assumed to retire at the plan's Normal Retirement Age.

Mortality and mortality improvement
For funding, no preretirement mortality is assumed. The postretirement funding mortality follows the IRS 2015 Static Mortality Table with separate tables for annuitants and non-annuitants, as prescribed by Treasury regulation section 1.430(h)(3)-1(b).

Other Assumptions

Form of payment
All participants are assumed to elect a lump sum form of payment.

Maximum earnings
The maximum compensation limit under IRC section 401(a)(17) is $265,000 for 2015.

Maximum benefit
The maximum benefit payable under IRC section 415 is $210,000 for 2015.

Expenses
Assumed Expense are zero.

Changes from Prior Year and Rationale for Changes

Interest crediting rate
The interest crediting rate was changed from 5.00% in 2014 to 3.50% for 2015 to better reflect expected experience under the plan.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Actuarial Methods

Valuation date

The valuation date is December 31, 2015.

Actuarial value of assets

The actuarial value of assets is equal to the market value of assets.

Minimum funding method

The funding target and target normal cost for minimum funding calculations are determined using the traditional unit credit cost method as prescribed by Treasury regulation section 1.430(d)-1. The liability under the unit credit cost method is the value of the accrued pension benefit using service and pay as of the valuation date. The sum of the present value of the accrued benefits for all participants is the ERISA funding target. The normal cost is the present value of the benefits earned during the year. The target normal cost is the sum of the normal costs for all participants and the assumed administrative expenses.
