We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Note 1 - Plan Description

The following description of Century Aluminum of South Carolina, Inc. Employees Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

On December 1, 2014, Century Aluminum of South Carolina, Inc., a wholly owned subsidiary of Century Aluminum Company, acquired a controlling interest in an aluminum smelter in South Carolina from Alumax of South Carolina, Inc., a subsidiary of Alcoa, Inc. In accordance with the stock purchase agreement, the Plan was established to cover certain participants, as described below. Accordingly, assets of \$40,857,685 and \$77,928,254 in 2015 and 2014, respectively, and benefit obligations of \$62,108,528 were assumed from plans affiliated with Alcoa, Inc.

Effective August 31, 2015, the Plan was merged into Century Aluminum Employees Retirement Plan. Accordingly, all of the Plan's assets and benefit obligations were transferred to Century Aluminum Employees Retirement Plan as of that date.

General - The Plan was a noncontributory defined benefit pension plan established on December 1, 2014 to cover persons who were employed immediately prior to December 1, 2014 by Alumax of South Carolina, Inc. or one of its subsidiaries, Mt. Holly Commerce Park or Mt. Holly Aluminum Company (Mt. Holly), and who were participants in either Alcoa Retirement Plan I or Alcoa Retirement Plan II (collectively, the "Alcoa Plans"), as well as individuals who retired from or left Mt. Holly as of or before December 1, 2014 who still retained accrued benefits under the Alcoa Plans. Subsequent to December 1, 2014, the Plan covered eligible employees of Century Aluminum of South Carolina, Inc. (the "Company") and any affiliated entity that was authorized by the retirement committee and adopted the Plan. The Plan was subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Funding - The Company's policy was to make contributions necessary to satisfy ERISA funding standards. The minimum funding requirements of ERISA were met for the period from January 1, 2015 through August 31, 2015 and for the period from December 1, 2014 through December 31, 2014.

Eligibility and Vesting - Employees became participants in the Plan after attaining 21 years of age and completing one year of vesting service as defined by the Plan. Participants became fully vested for normal retirement benefits after five years of vesting service or upon attainment of normal retirement date.

Century Aluminum of South Carolina, Inc. Employees Retirement Plan

Notes to Financial Statements Period from January 1, 2015 through August 31, 2015 and Period from December 1, 2014 through December 31, 2014

Note 1 - Plan Description (Continued)

Pension Benefits - Participants with five or more years of vesting service were entitled to normal annual pension benefits beginning at the participant's normal retirement age of 65 as described in the Plan. Pension benefits were based on a percentage of the participant's average final compensation multiplied by a participant's pension service as defined by the Plan. The Plan permitted early retirement for certain employees as described in the Plan.

Party-in-interest Transactions - Certain plan assets were held in investment funds managed by SEI Private Trust Company or its affiliates. SEI Private Trust Company is the custodian of the Plan and therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Payment of Benefits - Distributions were payable upon the retirement, death, disability, or termination of employment in the form of a lump-sum payment or annuity installments.

Note 2 - Summary of Significant Accounting Policies

Income Recognition - Purchases and sales of securities were recorded on a trade-date basis. Interest income was recorded as earned. Dividends were recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits were those future periodic payments that were attributable, under the Plan's provisions, to the service employees have rendered. These included benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Beneficiaries of employees who have died
- c. Present employees or their beneficiaries

Actuarial Assumptions - The actuarial present value of accumulated plan benefits was determined by an actuary and was the amount that resulted from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

Notes to Financial Statements

Period from January 1, 2015 through August 31, 2015 and Period from December 1, 2014 through December 31, 2014

Note 2 - Summary of Significant Accounting Policies (Continued)

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2014 and August 31, 2015 are summarized as follows:

Actuarial cost method	- Unit Credit Actuarial Cost Method
Assumed rate of return	- 7.25% per annum
Mortality basis	- RP-2000 Combined Fully Generational Mortality Table with blue collar adjustment for hourly employees using Scale SSA

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. Were the Plan to terminate and disburse all assets to each participant, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. As described in Note 1, the Plan merged and continued to operate under another plan on August 31, 2015.

Benefit Payments - Benefits were recorded when paid.

Administrative Expenses - Certain administrative costs, including custodial, retirement services, and pension benefit guaranty premiums, were paid by the Company.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties - The accumulated plan benefits were reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it was at least reasonably possible that changes in these assumptions would occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including August 12, 2016, which is the date the financial statements were available to be issued.

Notes to Financial Statements Period from January 1, 2015 through August 31, 2015 and Period from December 1, 2014 through December 31, 2014

Note 3 - Unaudited Information

During 2015, SEI Private Trust Company (the "Custodian") held the Plan's investments and executed all investment transactions. The investment income and losses and other related investment activity included in the accompanying financial statements and supplemental schedule of reportable transactions are based solely on information provided by the Custodian.

Note 4 - Tax Status

The Plan had not received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Management believes that the Plan was designed and operated in compliance with the applicable requirements of the IRC.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits was determined by consulting actuaries at PricewaterhouseCoopers LLP. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of August 31, 2015 and December 31, 2014 and for the periods from January 1, 2015 through August 31, 2015 and December 1, 2014 through December 31, 2014, the most recent actuarial valuations, are as follows:

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding Purposes

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Smoothed Method (for ERISA Funding purposes only):

Smoothed value method. Under this method the Plan Assets is equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefit payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate, with no phase-in, applicable to the corresponding valuation date).
