Notes to Financial Statements November 30, 2015 and 2014

Note 1 - Plan Description

The following description of the Ohio CAT Employees' Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined benefit plan covering all employees of Ohio Machinery Company d/b/a Ohio CAT (the "Company") who are part of the Company's Eastern Region and who are members of the International Union of Operating Engineers (the "Union"). Eligible employees become participants on their date of employment. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits - Employees with five or more years of service are entitled to annual pension benefits equal to the accrued benefit, which is years of credited service times the benefit rate, beginning at normal retirement age (65) with 60 monthly payments guaranteed. The Plan permits early retirement after age 60, as defined, with 10 years of service. If employees terminate before rendering five year of service, they forfeit the right to receive the portion of their accumulated plan benefits. Upon retirement or termination, employees may elect to receive their entire benefit as a joint and survivor annuity or life annuity. Employees who have retired may elect to receive the present value of their plan benefits accrued through November 30, 1996 as a lump-sum distribution with the remainder paid out out as an annuity payable monthly from retirement. Employees whose accrued benefits are \$5,000 or less at the time of termination will receive involuntary distributions. In the event employees receiving involuntary distributions between \$1,000 to \$5,000 do not elect direct rollovers to other qualified plans or lump-sum distributions, the amounts will be distributed in the form of direct rollovers to individual retirement accounts as designated by the plan administrator.

Death and Disability Benefits - If an active employee dies before receiving benefits, the employee's spouse will receive the qualified joint and survivor annuity of the employee's accrued benefit. If an employee dies after beginning to receive payments, the balance of the employee's vested benefit will be paid to the employee's beneficiaries, at least as rapidly as it was being paid to the employee.

Active employees who become totally and permanently disabled become 100 percent vested and receive the actuarial equivalent of their accrued benefit. In the event of terminated participants' total and permanent disability subsequent to their termination of employment, they shall receive the benefit as though they had retired.

Funding - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Notes to Financial Statements November 30, 2015 and 2014

Note 1 - Plan Description (Continued)

Party-in-interest Transactions - Certain plan assets are in investment funds managed by KeyBank National Association or its affiliates. KeyBank National Association is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

New Accounting Pronouncements - During 2015, the Plan adopted Accounting Standards Update (ASU) Nos. 2015-07, *Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent)*, and 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, and III. Measurement Date Practical Expedient*. ASU No. 2015-07 amended ASC 820, *Fair Value Measurements*, and removed the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share as a practical expedient. Part II of ASU No. 2015-12 was applicable to the Plan and modified the investment disclosures under ASC 820 and 960. The standards were adopted retrospectively and had no impact on the Plan's net assets or changes in net assets.

Investment Valuation - The Plan's investments are stated at fair value.

The common collective trust funds are valued at net asset value per share or its equivalent of the funds, which is based on the fair value of the funds' underlying assets. The investment in the limited partnership is valued at net asset value per share (or its equivalent) of the fund based on audited financial statements of the fund, where available, with adjustments to account for partnership activity and other applicable valuation adjustments. All other investments are valued based on quoted market prices. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Various administrative costs are paid by the Company.

Ohio CAT Employees' Retirement Plan

Notes to Financial Statements November 30, 2015 and 2014

Note 2 - Summary of Significant Accounting Policies (Continued)

Actuarial Assumptions - Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on employees' years of service times the effective rate. The accumulated plan benefits for active employees are based on their years of service preceding the valuation date. Benefits paid under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee services rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at November 30, 2015 and 2014 are summarized as follows:

Actuarial cost method	- Projected unit credit
Assumed rate of return	- 7.25% per annum (November 30, 2015)
	- 8.50% per annum (November 30, 2014)
Mortality basis	- RP-2014 adjusted backward to 2006 with Scale MP-2014 and projected with Scale MP-2015 (November 30, 2015)
	- RP-2014 with Scale MP-2014 (November 30, 2014)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Ohio CAT Employees' Retirement Plan

Notes to Financial Statements November 30, 2015 and 2014

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the plan benefit obligations are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 12, 2016, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

KeyBank National Association (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedule of assets held at end of year are based solely on information provided by the Trustee.

Note 4 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of and for the years ended November 30, 2015 and 2014, the most recent actuarial valuations, are as follows :

	Year Ended November 30,	
	2015	2014
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 11,511,380	\$ 11,067,649
Other participants	13,978,140	15,378,048
Total vested benefits	25,489,520	26,445,697
Nonvested benefits	314,481	338,304
Total benefit obligations	<u>\$ 25,804,001</u>	<u>\$ 26,784,001</u>

Ohio CAT Employees' Retirement Plan

Notes to Financial Statements November 30, 2015 and 2014

Note 4 - Accumulated Plan Benefits (Continued)

A summary of significant changes in the actuarial present value of accumulated plan benefits during the years ended are as follows:

	November 30, 2015
Actuarial present value of accumulated plan benefits - Beginning of year:	\$ 26,784,001
Increase (decrease) during the year attributable to:	
Benefits accumulated	1,096,362
Increase for interest due to the decrease in the discount period	1,654,081
Changes in actuarial assumptions	(2,378,962)
Benefits paid	(1,351,481)
Net decrease	(980,000)
Actuarial present value of accumulated plan benefits - End of year	\$ 25,804,001

Note 5 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code. Accordingly, no provision for income taxes has been made in the accompanying statements.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at November 30, 2015 and 2014.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Ohio CAT Employees' Retirement Plan

Notes to Financial Statements November 30, 2015 and 2014

Note 6 - Fair Value Measurements (Continued)

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Notes to Financial Statements November 30, 2015 and 2014

Note 6 - Fair Value Measurements (Continued)

- (1) This investment relates to a fund of fund holding within the Private Advisors Stable Value Fund, Ltd. (the "Fund"). The Fund invests all of its assets through a master-feeder structure in the Private Advisors Stable Value Master Fund, Ltd. (the "Master Fund"). The Fund owned approximately 8 and 91 percent of the Master Fund as of December 31, 2015 and 2014, respectively. The master fund investment objective is to achieve consistent, positive returns while attempting to reduce risk and volatility. The Master Fund invests with hedge funds and other portfolio managers with investment strategies such as direct lending, convertible arbitrage, merger, or risk arbitrage and other event-driven investing, distressed, and long or short credit, long or short equity, multi-strategy, and other relative value strategies. Per the Fund's audited financial statements, cash and cash equivalents consisted of approximately 0 and 4 percent of the Master Fund's assets as of December 31, 2015 and 2014, respectively. Redemptions of the Fund are permitted at the end of any calendar year, provided that written notice of such redemption is given no later than the last business day of October. The Fund is generally required to remain invested for a period of 12 months before redemption restrictions are in effect.

Subsequent to plan year end, the investment manager of the Master Fund and Fund (collectively the "Funds") elected to suspend voluntary redemptions and to commence an orderly liquidation of the Funds. Effective June 30, 2016, the Funds began a compulsory redemption process. Liquidation proceeds will be paid to the stockholders pro rata in proportion to their sholders balances as of the date of such distribution. In addition, effective June 30, 2016, the investment manager ceased charging management and incentive fees. Stockholders will be treated as stockholders, not as creditors, until they are fully withdrawn from the Funds. Therefore, any balance that remains in the Plan's account will be subject to market fluctuations until such stockholder is fully withdrawn from the Funds.

There were no unfunded commitments or redemption restrictions on the investments described above other than the limited partnership.

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the end of the reporting period.

Appendix B (Continued)

<i>Asset Method</i>	Funding and ASC 960-20: Market Value of Assets plus any contributions for prior plan years that will be made in this plan year. For funding purposes only, contributions made after the end of the prior plan year will be discounted for interest at the prior year's effective rate.
<i>Lump Sum Distributions</i>	40% of active participants as assumed to take their November 30, 1996 benefit as a lump sum distribution when they retire.
<i>Employees Valued</i>	Only participants as of the valuation date were valued.
<i>Selection of Assumptions</i>	Information used in the analysis of selecting assumptions include: discount rate – Citi Group yield curve; expected return on assets – review of historical and expected returns on various asset categories held by the plan as well as information provided by the plan's investment advisor. The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.
<i>Changes in Assumptions and Methods since the Last Actuarial Valuation</i>	The segmented interest rates used for determining the funding target were 5.23%, 6.51% and 7.16%. These rates were updated to the rates required for the current plan year and adjusted by MAP-21/HATFA. The mortality table for the funding target was changed as required under PPA '06.
<i>Justification for Changes in Actuarial Assumptions</i>	Assumption changes were made but since they did not decrease liabilities, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."

Change in Actuarial Assumptions

The mortality assumption has been changed from combined to separate rates for annuitants and non-annuitants as a result of the plan being over 500 participants.
