## ANDERSON LUBRICANTS, INC. 401(k) Plan

### Notes to the Financial Statements

November 11, 2015

#### NOTE 1 - DESCRIPTION OF PLAN

The following description of the Anderson Lubricants, Inc. 401(k) Profit Sharing Plan (the Plan) provides only general information. Users of these financial statements should refer to the Plan agreement for a more complete description of the Plan's provisions. Any subsequent references to "Company" shall mean Anderson Lubricants, Inc.

General: The Plan was a defined contribution Plan covering all regular full-time employees and employees whose regularly scheduled service is 480 or more hours of service, who have completed 3 months of service, and are age twenty-one or older. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions: Each year participants could contribute up to 100% of pretax compensation and 100% of bonuses, as defined in the Plan. Contributions are subject to annual deductibility limits specified under the Internal Revenue Code. The annual limitation was \$18,000 or \$24,000 including catch-up, for 2015. The plan allowed pre-tax and post-tax (Roth) elective deferrals. Participants could also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Participants directed the investment of their contributions into various investment options offered by the Plan. The Plan offered 24 mutual funds as investment options for participants. The Company made a discretionary matching contribution to the Plan in an amount equal to 3% of the employee's deferral to eligible employees for 2015. The Company did not make a discretionary profit sharing contribution to the Plan for 2015.

Participant Accounts: Each participant's account was credited with the participant's contribution and allocations of (a) the company's contribution and (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations were based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting: Participants were immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts plus actual earnings thereon is based on years of continuous service. A participant is 100% vested after five years of credited service for each year he/she performed 1000 hours of service. Vesting exceptions provided for full vesting for a Participant who terminated employment due to death or disability.

Notes Receivable from Participants: Participants who were active employees could borrow from their fund accounts a minimum of \$1000 and up to a maximum of \$50,000, or 50% of their vested account balance, whichever is less. The Plan allowed up to two outstanding loans at one time. The loans were secured by the balance in the participant's account and bore interest at rates that ranged from 4.25 percent to 6.0 percent, which are commensurate with local prevailing rates as determined by the Plan administrator. Principal and interest was paid ratably through payroll deductions. Loans must be repaid over a period not to exceed five years from the date of the loan.

Payment of Benefits: On termination of service a participant may receive the value of the vested interest in his or her account as a lump-sum distribution or a roll-over distribution. An annuity form of distribution will only be available to the extent that such distribution form has been elected by the Participant through the applicable product.

Employees were entitled to retirement benefits beginning at normal retirement age, 59 ½ years. No early retirement provisions were provided.

In-service distributions could be made to a Participant who had not separated from service provided the Participant had attained age 59 ½ and was fully vested. Hardship withdrawals were permitted if certain criteria are met.

Administrative Expenses: Investment related expenses are included in net appreciation of fair value of investments.

### Notes to the Financial Statements

#### NOTE 1 - DESCRIPTION OF PLAN (continued)

Termination of Employment: Upon termination of employment participants forfeit their non-vested balances. Forfeited balances of terminated participants' non-vested accounts are used to restore forfeitures, reduce Company contributions or to pay Plan expenses. At November 11, 2015 forfeited non-vested accounts totaled \$0. Forfeitures used to reduce Company contributions for 2015 were \$2,304.

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting: The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Fully Benefit-Responsive Investment Contracts: Investment contracts held by a defined contribution Plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution Plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts through a common/collective trust. The Statements of Net Assets Available for Benefits presents the fair value of the investment in the collective trust as well as the adjustment of the investment in the collective trust from fair value relating to the investment contracts. The Statements of Net Assets Available for Benefits are prepared on the contract basis. The adjustment from fair value to contract value was \$0 at November 11, 2015. The fair value of the Plan's interest in the funds is based on information reported by the issuer of the common/collective trust at year end. The contract value of the fund represents contributions plus earnings, less participant withdrawals and administrative expenses.

Investment Valuation and Income Recognition: Except as noted above, investments are reported at fair value and are measured by quoted market prices. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

Participant Loans Receivable: Participant loans receivable are measured at their unpaid principal balance. Delinquent participant loans are reclassified as distributions based upon the terms of the Plan document.

Payment of Benefits: Benefits are recorded when paid.

#### NOTE 3 – INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE

The Plan administrator has elected the method of annual report compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, American Funds, the trustees of the Plan, have certified to the completeness and accuracy of all investments, at fair value, the adjustment from fair value to contract value for interest in common/collective trust relating to fully benefit-responsive investment contracts, and notes receivable from participants reflected on the accompanying Statements of Net Assets Available for Benefits as of November 11, 2015, the Schedule of Assets (Held at End of Year) as of November 11, 2015, and the investment income (loss) components, interest income from participant notes receivable, and the related investment activity reflected in the Statement of Changes in Net Assets Available for Benefits for the short year ended November 11, 2015.

#### NOTE 4 - INVESTMENTS

Prior to the merger, the plans investments consisted of approximately 4% investment in annuity contracts and the remainder invested in registered Investment Companies. During 2015 the Plan's investments (including investments purchased and sold as well as held during the year) increased in value by \$135,641 as follows:

|                                 |                   |
|---------------------------------|-------------------|
| Annuity Contracts               | \$ 3,339          |
| Registered Investment Companies | 132,302           |
|                                 | <u>\$ 135,641</u> |

#### NOTE 5 – FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair market value hierarchy under FASB ASC 820 are described below:

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level 1 | Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Level 2 | Inputs to the valuation methodology include: <ul style="list-style-type: none"><li>▪ Quoted prices for similar assets or liabilities in active markets;</li><li>▪ Quoted prices for identical or similar assets or liabilities in inactive markets;</li><li>▪ Inputs other than quoted prices that are observable for the asset or liability;</li><li>▪ Inputs that are derived principally from or corroborated by observable market data by correlation or other means.</li></ul> If the asset or liability has a specific (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability. |
| Level 3 | Inputs to the valuation methodology are unobservable and significant to the fair value measurement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

The asset's or liabilities' fair market value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at November 11, 2015.

*Shares of registered investment companies:* Investments in shares of registered investment companies are reported at fair value based on the quoted market prices of the funds, which represent the asset value of shares held by the Plan at year-end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

All investments in the Statements of Net Assets Available for Benefits are reported at fair value.
