Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
OAKLAND COUNTY CREDIT UNION DEFINED BENEFIT PLAN
EIN 38-1497358 Plan No. 001

Assumptions Prescribed by Law	
Mortality	<p>During Benefit Payment Period IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.</p> <p>Before Benefit Payment Period IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.</p>
Assumptions Selected by Actuary	
Asset Return	<p>7.00% for the current plan year.</p> <p>The Asset Return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. See Long-Term Capital Market Assumptions 2014.</p>
Expected Expense	<p>The expected expense included in Target Normal Cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.</p>
Retirement	<p>Active participants are assumed to retire at Normal Retirement Age as defined in Plan Provisions.</p> <p>Inactive participants are assumed to retire at age 60.</p> <p>This assumption is based on the results of recent experience analysis and anticipated future experience.</p>

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
OAKLAND COUNTY CREDIT UNION DEFINED BENEFIT PLAN
EIN 38-1497358 Plan No. 001

Assumptions Selected by Actuary (continued)	
Disability	None. This plan does not offer a subsidized disability benefit; therefore, the disability assumption is reflected in the withdrawal assumption.
Marriage	75% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.50. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.50 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.
Form of Benefit and Basis	50% of active participants will elect a benefit paid in a lump sum at the assumed retirement age. The remaining active participants will elect a monthly annuity on the normal form at the assumed retirement age. Participants who are already terminated on the valuation date are assumed to receive their benefit on the normal form at the assumed retirement age. This assumption is based on the results of recent experience analysis and anticipated future experience. The single sum benefit is based on the applicable mortality projected to decrement and the plan's funding target interest rates, as prescribed.
Methods Prescribed by Law	
Liability Measure	Funding target is the present value of the benefits accrued on the valuation date. Target Normal Cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Lump Sum Payments	Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions; therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
OAKLAND COUNTY CREDIT UNION DEFINED BENEFIT PLAN
EIN 38-1497358 Plan No. 001

Methods Selected by Plan Sponsor	
Asset Method	<p>The asset valuation method is prescribed by law for plans that elect to use a value other than market value.</p> <p>For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.</p> <p>The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the Maximum Allowable Rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.</p> <p>When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.</p>
Segment Rates	24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.
PBGC Premium Basis	Your plan is a small plan as defined by PBGC. Variable Rate Premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the funding segment rates without the MAP-21 interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2010 plan year and this method must be used for five years before a change can be made.
Methods Elected by Actuary	
Retirees	Assets and liabilities for current and future retirees are included.
HCE Benefit Payment Restrictions	<p>A ratio of the market value of assets and funding target is used to determine if restrictions apply. Assets and Funding Target are as of the valuation date and are reduced by:</p> <ul style="list-style-type: none"> • any retiree benefit index or floor • amounts for HCEs who were previously restricted • an amount for the retiring HCE <p>The Funding Target is not based on the MAP-21 interest rate corridor defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods may be used.</p>

Methods Elected by Actuary (continued)																									
Vested Benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant’s vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the Survivor Annuity Death Benefit and post retirement death benefits for non-retired participants except as noted in the Plan Provisions.</p>																								
Assumptions and Methods Elected by Actuary Plan Accounting (ASC 960)

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
OAKLAND COUNTY CREDIT UNION DEFINED BENEFIT PLAN
EIN 38-1497358 Plan No. 001

Assumptions and Methods Elected by Actuary Plan Accounting (ASC 960) (continued)	
Interest Rate Used to Value Liabilities	<p>6.50%</p> <p>The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. See Long-Term Capital Market Assumptions 2014.</p>
Basis for Lump Sums	<p>Interest Rate: 5.60%</p> <p>The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high-quality corporate bond yields. The long-term expectation from our forward-looking and historical data review of the yields for the Long Credit Bond asset class falls into a range of 5.80% to 6.20%. This expectation has been adjusted by the historical difference between the long credit and corporate yields of 40 basis points, which leads to a range of 5.40% to 5.80%. See Long-Term Capital Market Assumptions 2014.</p> <p>Mortality: We have selected the same mortality assumption for lump sum payments but with a 50/50 blend of male and female mortality and improvement rates since lump sums are paid using unisex factors.</p>
