<p style="text-align: center;">FIRST CREDIT UNION CASH BALANCE DEFINED BENEFIT RETIREMENT PENSION PLAN NOTES TO THE FINANCIAL STATEMENTS</p>

NOTE 1: DESCRIPTION OF PLAN

The following description of First Credit Union Cash Balance Defined Benefit Retirement Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

The Plan is a defined benefit plan available to employees of the Credit Union. An employee is eligible to participate in the Plan on the January 1st or July 1st following completion one year of credited service and has attained the age of 21. The Plan is subject to the provisions of the Employee Retirement Securities Act of 1974 (ERISA).

Pension Benefits

Normal Retirement Benefits - At your normal retirement age (65), with five years of participation, you will be entitled to receive a normal retirement benefit. The normal retirement date is the first day of the month coinciding with or next following your Normal Retirement Age and will be equal to 3% accumulation Cash Balance pay credits beginning July 1, 2013 with interest based on the 30 year Treasury rate plus frozen accrued benefits accumulated to May 22, 2009. Payment of your benefits will begin as soon as practicable following Normal Retirement Date. The Normal Form of this benefit is a Straight Life annuity for single participation or its actuarial equivalent 50% Joint and Survivor Benefit for married participants. Participants may elect other options under the plan.

Early Retirement Benefits - Your Early Retirement Date is the first day of the month coinciding with or next following the date you have attained age 55 and completed 10 years of service with your employer. Early retirement benefits shall equal the greater of (1) your Accrued Benefit reduced by 5/9 of 1% for each of the first sixty complete calendar months, and 5/18th of 1% for each complete calendar month in excess of sixty calendar months that the Early Retirement Date precedes Normal Retirement Date, or (2) the Actuarial Equivalent of your Accrued Benefit if that benefit is distributed in a form other than a nondecreasing life annuity payable over your lifetime. Payment of your Early Retirement benefits will begin as soon as practicable following the date you elect to receive payment and will be paid in the same form as your normal retirement date.

Late Retirement Benefits - The benefit you will receive at your late retirement date generally takes into account the requirement that you continue to earn or "accrue" benefits past your normal retirement age. Late retirement benefits are the greater of the accrued benefit at actually accrued as of the end of the plan year at retirement or the actuarial equivalent of the benefit entitled to as of the close of the plan year immediately preceding actual retirement date.

Death and Disability Benefits - If a participant dies, the beneficiary will receive a benefit equal to the present value of the employee's accumulated pension benefit. Active employees who become disabled receive disability benefits equal to the retirement benefits they have accumulated as of the time they became disabled.

Vesting: Vesting the plan is based on years of continuous service. Vesting prior to June 30, 2013, was a one year cliff, with 100% vesting after one year of service. Vesting after June 30, 2013 is equivalent to 0% less than three years and 100% at three years or more.

<p style="text-align: center;">FIRST CREDIT UNION CASH BALANCE DEFINED BENEFIT RETIREMENT PENSION PLAN NOTES TO THE FINANCIAL STATEMENTS</p>

NOTE 2: SUMMARY OF ACCOUNTING POLICIES

Basis of Presentation: The Plan's financial statements are on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results may differ from these estimates.

Investment Transactions and Related Investment Income: Purchases and sales of securities are recorded on a trade date basis. Realized gains and losses on security transactions are computed on the basis of average cost of investments sold. Interest from investments is recorded as earned on the accrual basis.

Actuarial Present Value of Accumulated Plan Benefits: Accumulated plan benefits are those future periodic payments, including lump sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' accumulated pension credits as determined under the Plan ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances, retirement, death, disability and termination of employment are included, to the extent they are deemed attributable to employees' service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary, and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation were as follows:

<u>Actuarial Cost Method</u>	<u>Modified Aggregate</u>
Investment return	4.00%
Mortality for funding	RP 2000 combined table projected to 2016 by scale AA before and after retirement
Salary increases	3.00%

The foregoing actuarial assumptions are based on the presumptions that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2016. Had the valuations been performed as of December 31, 2015 there would be no material difference.

Payment of benefits: Benefit payments to participants are recorded upon distribution.

Administrative Expenses: The majority of the Plan's expenses are paid by the Plan.

<p style="text-align: center;">FIRST CREDIT UNION CASH BALANCE DEFINED BENEFIT RETIREMENT PENSION PLAN NOTES TO THE FINANCIAL STATEMENTS</p>

Subsequent Events: Credit Union Management has evaluated subsequent events through September 20, 2016, the date on which the financial statements were available to be issued.

NOTE 3: FUNDING POLICY

The employer may be required to make contributions to the Plan. Participants are not required to contribute to the Plan.

The Plan's funding policy is for the Credit Union to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. During the 2015 plan year, the Credit Union no contribution as there was no minimum funding amount due to funded status of plan based on actuarial calculations. The Plan had a credit balance of \$4,147,086 as of the valuation date.

NOTE 4: PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated after providing for any administrative expenses:

- a) benefits attributable to employee contributions, taking into account those paid out before termination.
- b) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the terms of the Plan. The priority amount is limited to the lowest benefit that was payable during those three years. The amount is further limited to the lowest benefit that would be payable under the plan provisions in effect at any time during the five years preceding plan termination.
- c) to benefits guaranteed and insured by the Pension Benefit Guaranty Corporation (PBGC)
- d) to all other vested accrued benefits under the Plan not insured by the PBGC
- e) to all non-vested benefits

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the level of benefits guaranteed by the PBGC.

<p style="text-align: center;">FIRST CREDIT UNION CASH BALANCE DEFINED BENEFIT RETIREMENT PENSION PLAN NOTES TO THE FINANCIAL STATEMENTS</p>

NOTE 5: INVESTMENTS - UNAUDITED

CMFG Life Insurance Company, through MG Trust Company, LLC, the custodian of the Plan, holds investment assets and executes transactions therein, and substantially all information pertaining to investments which is included in the financial statements has been certified by them. This information has not been audited by independent public accountants. The following presents investments that represent five percent or more of the Plan's net assets:

	December 31, 2015
CUNA Mutual Retirement Pension Fund	\$ 7,525,538

During the plan year ending December 31, 2015, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year depreciated \$229,799.

NOTE 6: FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

The availability of inputs relevant to the asset or liability and the relative reliability of the inputs might affect the selection of appropriate valuation techniques.

Level 1 Inputs

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs

- (a) quoted market prices for similar assets or liabilities in active markets;
- (b) quoted market prices for identical or similar assets or liabilities in inactive markets;
- (c) inputs other than quoted market prices that are observable for the asset or liability;
- (d) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs

Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Collective Investment Trust - The collective investment trust is valued at the net asset value (NAV) per share. The NAV is based on the underlying holdings that are primarily comprised of fixed income and equity mutual funds.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2015:

Assets at Fair Value as of December 31, 2015				
	Level 1	Level 2	Level 3	Total
Collective Investment Trust	\$ -	\$ 7,525,538	\$ -	\$ 7,525,538

Fair Value of Investments in Entities that Use NAV

The following sets forth additional disclosures for the fair value measurement of investments in certain entities that calculate net asset value per share (or its equivalent) as of:

<i>December 31, 2015</i>	<i>Fair Value</i>	<i>Unfunded Commitments</i>	<i>Redemption Frequency</i>	<i>Redemption Notice Period</i>
Collective Investment Trust	\$ 7,525,538	\$ -	daily	daily

NOTE 7: RELATED PARTY TRANSACTIONS

Parties-in-interest are defined under Department of Labor regulations as any fiduciary of the Plan, any party rendering service to the Plan, the employer and certain others. The Plan invests in a collective trust managed by CMFG Life Insurance Company through MG Trust Company, LLC, the custodian of the Plan. Therefore, these transactions qualify as party-in-interest transactions.

NOTE 8: TAX STATUS

The Internal Revenue Service has determined and informed the Plan by a letter dated October 25, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code. The Plan administrator and the Plan's tax council believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

NOTE 9: RISKS AND UNCERTANTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is a least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.
