Pilkington North America, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2015 and 2014

Note 1 - Plan Description

The following description of Pilkington North America, Inc. Hourly Employees Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined benefit plan that provides retirement and disability benefits to certain hourly employees represented by the United Steelworkers of America, AFL-CIO, CLC (the "Union") at certain Pilkington North America, Inc. (the "Company") plants, former represented employees of the Company, and former employees of Pilkington Visioncare, Inc. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan also includes participants who transferred from the Restated Salaried Retirement Plan, who are part of a group of plans that were established on October 7, 1985 also related to Pilkington North America, Inc. Upon receiving approval from the Pension Benefit Guaranty Corporation (PBGC), the assets of the original plans were used to purchase annuity contracts for payment of participant benefits accrued to October 7, 1985. The net assets available for plan benefits as of December 31, 2015 and 2014, as detailed in Note 4, do not include the value of the investment in the annuity contracts with Prudential Asset Management Co. (Prudential). The value of these contracts, as estimated by the plan administrator, is approximately \$4.9 million and \$4.2 million as of January 1, 2015 and 2014, respectively. The Prudential annuity contracts have no surrender or market value. The aforementioned value equals the actuarial present value of expected future payments from these contracts determined on the basis of the actuarial assumptions used to determine the actuarial present value of accumulated plan benefits.

Eligibility and Vesting - The Plan has been frozen to new participants effective December 31, 1986 (June 30, 1987 for certain other participants, as defined in the plan agreement); therefore, participants' benefits are fully vested.

Pension Benefits - The normal monthly retirement benefit is calculated as either (a) certain percentages of average monthly compensation (defined by the Plan), multiplied by the participant's years of benefit service, or (b) years of benefit service multiplied by fixed dollar amounts, as set forth in the applicable attachments to the Plan. The normal benefit is adjusted for early or late retirement, disability, or upon the participant's death, as stated in the Plan.

Funding - Contributions are made by the Company in actuarially determined amounts to fund the Plan's current service costs and to fund, over a maximum of 30 years, the Plan's past service costs. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA. No participant contributions are permitted.

Pilkington North America, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2015 and 2014

Note 1 - Plan Description (Continued)

Party-in-interest Transactions - Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. Other administrative expenses are paid directly by the Plan.

Certain plan assets are in investment funds managed by the The Northern Trust Company or its affiliates. The Northern Trust Company is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - The fair value of the Plan's interest in the Pilkington North America, Inc. Master Retirement Trust (the "Master Trust") is based on the beginning of the year value of the Plan's interest in the trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. The Master Trust's investments are stated at fair value.

The U.S. corporate bonds are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. The money market fund is valued at fair value based on its outstanding balance. All other investments are valued based on quoted market prices. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Modified Cash Basis - The accompanying financial statements have been prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America (GAAP). On a modified cash basis of accounting, revenue is recognized when cash is received and expenses are recognized when paid. On a GAAP basis of accounting, revenue is recognized as earned and expenses are recognized when the obligation is incurred. Investments are recognized at fair value, which is consistent with a GAAP basis of accounting.

Notes to Financial Statements December 31, 2015 and 2014

Note 2 - Summary of Significant Accounting Policies (Continued)

Actuarial Assumptions - The actuarial present value of accumulated plan benefits is determined by an actuary from Aon Hewitt Associates, LLC and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at January 1, 2015 are summarized as follows:

Actuarial cost method	- Projected unit credit cost method
Retirement	- Various rates of retirement are assumed beginning at age 50. All participants are assumed to retire by age 63.
Assumed rate of return	- 4.75 percent for 2015
Mortality table	- RP-2014 Employees and Healthy Annuitants Mortality Table with Blue Collar adjustment.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Use of Estimates - The preparation of financial statements on the modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Significant estimates are used in determining the actuarial present value of accumulated plan benefits.

Risks and Uncertainties - Contributions to the Plan and the plan benefit obligations are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Note 2 - Summary of Significant Accounting Policies (Continued)

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 26, 2016, which is the date the financial statements were available to be issued.

New Accounting Pronouncement - During 2015, the Plan adopted Accounting Standards Update (ASU) No. 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, and III. Measurement Date Practical Expedient*. Part II of the ASU was applicable to the Plan and modified the investment disclosures under ASC 820 and 960. The standard was adopted retrospectively and had no impact on the Plan's net assets or changes in net assets.

Note 3 - Unaudited Information

The Northern Trust Company (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment results included in the accompanying financial statements, including Master Trust information included in Note 4, is based solely on information provided by the Trustee.

Note 4 - Interest in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and Pilkington North America, Inc. Restated Salaried Retirement Plan. Each participating benefit plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by The Northern Trust Company. At December 31, 2015 and 2014, the Plan's interest in the net assets of the Master Trust was approximately 71 and 73 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon average monthly balances invested by each plan.

The fair values of investments for the Master Trust at December 31, 2015 and 2014 are as follows:

	2015	2014
Master Trust investments:		
Money market fund	\$ 2,735,027	\$ 2,884,114
Corporate bonds	183,202,185	219,111,648
Common stocks	20,205,443	25,795,400

Note 4 - Interest in Master Trust (Continued)

The investment income for the Master Trust for the years ended December 31, 2015 and 2014 is as follows:

	2015	2014
Net realized and unrealized (loss) gain in fair value of investments:		
Corporate bonds	\$ (15,443,166)	\$ 24,778,852
Common stock	10,066,985	2,431,829
Net realized and unrealized (loss) gain in fair value of investments	(5,376,181)	27,210,681
Interest	2,234	4,398
Net investment income	<u>\$ (5,373,947)</u>	<u>\$ 27,215,079</u>

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries. The calculations of the postretirement benefit obligation attributable to participants in the Plan, which were made as of and for the year ended January 1, 2015, the most recent actuarial valuation by AON Hewitt Associates, LLC is as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:	
Retired employees	\$ 164,912,425
Active, terminated, and transferred employees not presently receiving benefits	35,627,717
Total vested benefits	200,540,142
Nonvested benefits	165,360
Total actuarial present value of accumulated plan benefits	<u>\$ 200,705,502</u>

Pilkington North America, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2015 and 2014

Note 5 - Accumulated Plan Benefits (Continued)

Actuarial present value of accumulated plan benefits -	
Balance - Beginning of year	\$ 180,168,349
(Decrease) increase during the year attributable to:	
Benefits accumulated and actuarial experience	(1,223,596)
Interest accumulation	10,424,581
Benefits paid	(18,825,830)
Changes of assumptions	30,161,998
Net increase	20,537,153
Actuarial present value of accumulated plan benefits - End of year	<u>\$ 200,705,502</u>

The assumption changes in 2014 relate to a change in the mortality basis from the 2014 Static Mortality Table for Annuitants and Non-Annuitants to the RP-2014 Employees and Healthy Annuitants Mortality Table with Blue Collar adjustment. The expected long-term rate of return on plan assets decreased from 6.10 percent to 4.75 percent. The discount rate used decreased from 4.20 percent to 3.50 percent. The interest rate assumption changed from the segment rates as of September 2013 to the segment rates as of September 2014 each adjusted as applicable to fall within the 25-year average interest rate stabilization corridor.

Note 6 - Interest in Master Trust

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2015 and 2014.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

Pilkington North America, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2015 and 2014

Note 6 - Interest in Master Trust (Continued)

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Master Trust Assets at December 31, 2015

	Master Trust Balance	Level 1	Level 2

Master Trust Assets at December 31, 2014

	Master Trust Balance	Level 1	Level 2

Total master trust investments at fair value	<u>\$ 247,791,162</u>	<u>\$ 25,795,400</u>	<u>\$ 221,995,762</u>

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer.

Note 7 - Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Provide benefits for all participants or beneficiaries whose benefits have been, or could have been, in pay status for the entire three-year period prior to termination, based on the plan provisions in effect during the five-year period ending on such date under which such benefit would be the least

Pilkington North America, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2015 and 2014

Note 7 - Plan Termination (Continued)

2. Provide all other benefits guaranteed under Title IV of the Employee Retirement Income Security Act of 1974 (without regard to the limitation of Section 4022(b)(3) or the limitation on benefits payable to "substantial owners" of Section 4022(b)(5))
3. Provide all other vested benefits other than those becoming nonforfeitable solely on account of the termination of the Plan
4. Provide all other benefits under the Plan

The Pension Benefit Guaranty Corporation (PBGC) guarantees the payment of all nonforfeitable basic benefits subject to certain limitations prescribed by ERISA. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

Note 8 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code. Accordingly, no provision for income taxes has been made in the accompanying financial statements.

Covered Effective Compensation

The 35-year average of Social Security taxable wage bases ending in the year a participant attains Social Security normal retirement age. The Social Security wage base is projected level forward in making this determination.

Effective for participants who retire on or after January 1, 2000, this value is determined based on the Social Security taxable wage bases through 1999 and does not increase based on any increases to the Social Security taxable wage bases in the year 2000 or later. However, the covered effective compensation is determined by projecting the Social Security taxable wage base in effect during the most recent year that compensation was used in the determination of effective compensation.

Credited Service

Effective December 31, 1986 (June 30, 1987 for participants in the Modern Tools Plan), credited service used to determine the amount of plan benefits was frozen.

Eligibility Service

Although credited service was frozen, eligibility service continues to accrue for purposes of determining eligibility for retirement benefits.

An employee who transfers to salaried status covered by the plan from a status not covered by the plan shall have the period of service while not covered by the plan included solely for the purpose of determining eligibility for benefits.

Actuarial Equivalence

For optional forms of benefit, use the immediate annuity rate published by the Pension Benefit Guaranty Corporation as of the first day of each plan year, and the UP-1984 Mortality table. For distributions after December , 1995, the single lump sum value of a participant's benefit is determined using the "applicable mortality table" and "applicable interest rate" determined under Section 417(e)(3)(A) of the Internal Revenue Code.

Determined based on the 1951 Group Annuity Mortality table projected to 1975 by Scale C, with a one-year setback for pensioners and a six-year setback for spouses. Interest is the "Factor K-1" promulgated by the Pension Guaranty Corporation as of January 1 (for retirements after February 1, 1991).

Minimum Benefits Under the
1974 Plan (Article III Benefits)

A salaried employee actively employed at the time of his retirement and who retires after January 1, 1987 may elect to receive the following minimum benefits in lieu of and in substitution for any other benefits under this plan. (For the purpose of valuation calculations, it has been assumed that this election is made whenever it produces a larger benefit.)

Forms of Benefits

Minimum Normal Retirement

With at least 10 years of eligibility service at normal retirement, the participant may elect to receive a pension equal to the number of years of credited service as of the earlier of the normal retirement date (or current age for employees over age 65) and December 31, 1986 (June 30, 1987 with respect to former participants in the Modern Tools Plan) multiplied by the following amounts:

Credited Service	Annual Multiplier
< = 19	\$180.00
> 19, < = 29	\$216.00
> 29	\$240.00

Retirements after October 1, 1987:

Credited Service	Annual Multiplier
< = 18	\$192.00
> 18, < = 28	\$228.00
> 28	\$255.60

This benefit is payable as a life only annuity.

Pilkington North America, Inc. Hourly Employees Pension Plan
EIN: 34-1506654 PN: 040

Minimum Early Retirement

Upon age 60 and 10 years of eligibility service or age 55, with age plus eligibility service at least 85, the minimum normal benefit is payable after applying the following factor prorated for intermediate ages.

Age	Factor
55	0.579
56	0.635
57	0.694
58	0.752
59	0.808
60	0.867
61	0.933
62	1.000

If, at the time of retirement, the participant is actively employed and has attained age 62 with 15 or more years of eligibility service, the minimum early benefit is doubled for each monthly payment up to and including the earlier of the month in which age 65 is attained or until eligible for an unreduced old age or disability Social Security allowance.

Minimum Special Thirty

An active salaried employee who retires with 30 years of eligibility service may elect to receive a benefit equal to the amount of the minimum early retirement benefit, plus a special allowance to bring his annual benefit to \$10,980.

A person that qualifies for this benefit and has less than 30 years of credited service as of December 31, 1986 shall receive a fraction of this benefit relative to credited service as of December 31, 1986 divided by 30 years.

At age 62, the minimum normal retirement benefit is payable.

Minimum Survivor Option

In lieu of minimum normal, minimum early, or special thirty benefits, a participant may elect to receive an allowance of 95% (if the participant and spouse's ages are the same) of the amounts otherwise payable with a survivor benefit payable to the spouse for the spouse's lifetime of 60% of the reduced amount.

95% is increased by $\frac{1}{2}\%$ (up to a maximum of 100%) for each 12 months in excess of five years by which the spouse's age exceeds the participant's age and decreased by $\frac{1}{2}\%$ for each 12 months in excess of five years by which the spouse's age is less than the participant's age.

Minimum Preretirement Survivor

For a salaried employee who dies prior to retirement but after becoming eligible for these minimum benefits, the surviving spouse shall be entitled to a monthly benefit for life, commencing the first of the month after the employee's death. The monthly benefit is the amount the spouse would have been entitled to receive under the minimum survivor benefit option if the employee had retired on the date of death.

The surviving spouse of a salaried employee who dies after attaining 10 or more years of eligibility service but prior to becoming eligible for retirement benefits shall be entitled to a monthly benefit commencing at any time after the employee would have attained age 60. The amount of this benefit is 50% of the minimum normal benefit reduced as defined under the minimum survivor benefit option and additionally reduced by $\frac{5}{9}\%$ for each complete calendar month prior to the date the employee would have attained age 65.

Effective Compensation	The average annual compensation during the five highest paid consecutive calendar years of service through December 31, 1999. Effective for participants who retire on or after January 1, 2000, compensation earned after December 31, 1999 is not used to determine retirement benefits.

Covered Effective Compensation

The 35-year average of Social Security taxable wage bases ending in the year a participant attains Social Security normal retirement age. The Social Security wage base is projected level forward in making this determination.

Effective for participants who retire on or after January 1, 2000, this value is determined based on the Social Security taxable wage bases through 1999 and does not increase based on any increases to the Social Security taxable wage bases in the year 2000 or later. However, the covered effective compensation is determined by projecting the Social Security taxable wage base in effect during the most recent year that compensation was used in the determination of effective compensation.

Credited Service

Effective December 31, 1986 (June 30, 1987 for participants in the Modern Tools Plan), credited service used to determine the amount of plan benefits was frozen.

Eligibility Service

Although credited service was frozen, eligibility service continues to accrue for purposes of determining eligibility for retirement benefits.

An employee who transfers to salaried status covered by the plan from a status not covered by the plan shall have the period of service while not covered by the plan included solely for the purpose of determining eligibility for benefits.

Actuarial Equivalence

For optional forms of benefit, use the immediate annuity rate published by the Pension Benefit Guaranty Corporation as of the first day of each plan year, and the UP-1984 Mortality table. For distributions after December , 1995, the single lump sum value of a participant's benefit is determined using the "applicable mortality table" and "applicable interest rate" determined under Section 417(e)(3)(A) of the Internal Revenue Code.

Determined based on the 1951 Group Annuity Mortality table projected to 1975 by Scale C, with a one-year setback for pensioners and a six-year setback for spouses. Interest is the "Factor K-1" promulgated by the Pension Guaranty Corporation as of January 1 (for retirements after February 1, 1991).

A married participant must have notarized spousal consent to receive a form of benefit other than a qualified joint and survivor annuity (including the designation of a beneficiary other than his spouse).

Minimum Benefits Under the
1974 Plan (Article III Benefits)

A salaried employee actively employed at the time of his retirement and who retires after January 1, 1987 may elect to receive the following minimum benefits in lieu of and in substitution for any other benefits under this plan. (For the purpose of valuation calculations, it has been assumed that this election is made whenever it produces a larger benefit.)

Forms of Benefits

Minimum Normal Retirement

With at least 10 years of eligibility service at normal retirement, the participant may elect to receive a pension equal to the number of years of credited service as of the earlier of the normal retirement date (or current age for employees over age 65) and December 31, 1986 (June 30, 1987 with respect to former participants in the Modern Tools Plan) multiplied by the following amounts:

Credited Service	Annual Multiplier
< = 19	\$180.00
> 19, < = 29	\$216.00
> 29	\$240.00

Retirements after October 1, 1987:

Credited Service	Annual Multiplier
< = 18	\$192.00
> 18, < = 28	\$228.00
> 28	\$255.60

This benefit is payable as a life only annuity.

Pilkington North America, Inc. Hourly Employees Pension Plan
EIN: 34-1506654 PN: 040

Minimum Early Retirement

Upon age 60 and 10 years of eligibility service or age 55, with age plus eligibility service at least 85, the minimum normal benefit is payable after applying the following factor prorated for intermediate ages.

Age	Factor
55	0.579
56	0.635
57	0.694
58	0.752
59	0.808
60	0.867
61	0.933
62	1.000

If, at the time of retirement, the participant is actively employed and has attained age 62 with 15 or more years of eligibility service, the minimum early benefit is doubled for each monthly payment up to and including the earlier of the month in which age 65 is attained or until eligible for an unreduced old age or disability Social Security allowance.

Minimum Special Thirty

An active salaried employee who retires with 30 years of eligibility service may elect to receive a benefit equal to the amount of the minimum early retirement benefit, plus a special allowance to bring his annual benefit to \$10,980.

A person that qualifies for this benefit and has less than 30 years of credited service as of December 31, 1986 shall receive a fraction of this benefit relative to credited service as of December 31, 1986 divided by 30 years.

At age 62, the minimum normal retirement benefit is payable.

Pilkington North America, Inc. Hourly Employees Pension Plan
EIN: 34-1506654 PN: 040

Minimum Survivor Option

In lieu of minimum normal, minimum early, or special thirty benefits, a participant may elect to receive an allowance of 95% (if the participant and spouse's ages are the same) of the amounts otherwise payable with a survivor benefit payable to the spouse for the spouse's lifetime of 60% of the reduced amount.

95% is increased by $\frac{1}{2}\%$ (up to a maximum of 100%) for each 12 months in excess of five years by which the spouse's age exceeds the participant's age and decreased by $\frac{1}{2}\%$ for each 12 months in excess of five years by which the spouse's age is less than the participant's age.

Minimum Preretirement Survivor

For a salaried employee who dies prior to retirement but after becoming eligible for these minimum benefits, the surviving spouse shall be entitled to a monthly benefit for life, commencing the first of the month after the employee's death. The monthly benefit is the amount the spouse would have been entitled to receive under the minimum survivor benefit option if the employee had retired on the date of death.

The surviving spouse of a salaried employee who dies after attaining 10 or more years of eligibility service but prior to becoming eligible for retirement benefits shall be entitled to a monthly benefit commencing at any time after the employee would have attained age 60. The amount of this benefit is 50% of the minimum normal benefit reduced as defined under the minimum survivor benefit option and additionally reduced by $\frac{5}{9}\%$ for each complete calendar month prior to the date the employee would have attained age 65.
