2. SUMMARY OF SIGNIFCANT ACCOUNTING POLICIES

a. Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP), and are stated in United States Dollars.

statements and the reported amounts of additions to the deductions in net assets available for benefits during the reporting period. Actual results, as determined at a later date, could differ from those estimates.

c. Subsequent Events

Management has evaluated subsequent events through the auditors' report date, the date which the financial statements are available for issue.

d. Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Shares of registered investment Companies (mutual funds) are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end. Securities traded in public markets are valued at their quoted market prices.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

e. Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based on the terms of the Plan document.

f. Payment of Benefits

Benefits are recorded when paid.

g. Risks and Uncertainties

Investment securities, in general, are exposed to various risks, such as interest rate, credit and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect participant's account balances and the amounts reported in the financial statements.

The Plan may invest in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by sub-prime mortgage loans. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

3. INVESTMENTS CERTIFIED BY TRUSTEE (UNADUTIED)

The following information, included in the accompanying financial statements and supplemental schedule, was obtained from data that has been prepared and certified as complete and accurate by the trustees, John Hancock Life Insurance Company and State Street Bank and Trust Company.

During the year ended December 31, 2015, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated in value as follows:

4. FAIR VALUE MEASUREMENTS

The Financial Accounting Standards Board's Accounting Standards codification Topic 820, *Fair Value Measurements* (formerly FASB Statement No. 157, *Fair Value Measurements*), establishes a framework for measuring fair value. The framework provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC Topic 820 are described as follows:

4. FAIR VALUE MEASUREMENTS (CONTINUED)

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:
-- Quoted prices for similar assets or liabilities in active markets;
-- Quoted prices for identical or similar assets or liabilities in inactive markets;
-- Inputs other than quoted prices that are observable for the asset or liability; and
-- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used as of December 31, 2015 and 2014.

Mutual Funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the SEC. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.
Common Collective Trusts: Valued at the net asset value of units held by the Plan at year end. The NAV is determined by the custodian of the fund and is based upon the fair value of the underlying assets held by the fund.

Securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

The methods described above may produce a fair value calculation that is not indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2015 and 2014 is as follows:
