### Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

| V | 0 | 4 | h | _ | G |
|---|---|---|---|---|---|

Valuation date First day of plan year

**Funding target** Present value of accrued benefits as required by

regulations under IRC §430.

Target normal cost Present value of benefits expected to accrue during the

plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by

regulations under IRC §430.

Actuarial value of assets [for determining minimum required contributions]

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.99% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Profile Products regarding the likelihood that these benefits will be paid. Towers Watson has reviewed the plan provisions with Profile Products and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits (with a present value up to \$1,000) in a single lump sum payment. Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Schedule SB, Part V - Statement of Actuarial Assumptions / Methods

**Assumptions Rationale - Significant Economic Assumptions** 

**Discount rate**The basis chosen was selected by the plan sponsor from

among choices prescribed by law, all of which are based on

observed market data over certain periods of time.

**Assumptions Rationale - Significant Demographic Assumptions** 

**Healthy Mortality** Assumptions used for funding purposes are as prescribed by

IRC §430(h).

**Disabled Mortality** Assumptions used for funding purposes are as prescribed by

IRC §430(h).

**Termination** Termination rates were based on a published table for pension

participants believed to have similar characteristics to the plan

population.

**Retirement** Retirement rates are based on plan sponsor expectations for

the future.

Benefit commencement date for deferred benefits:

Preretirement death

benefit

Surviving spouses assumed commencement age is a single age intended to capture the average age at commencement. Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not expected to be

significant.

Deferred vested benefit
 Deferred vested participants' assumed commencement age is a

single age intended to capture the average age at

commencement. Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not

expected to be significant.

Form of payment Participants are assumed to take a single life annuity based on

the plan sponsor expectations for the future.

**Percent married**The percent married is based on plan sponsor expectations for

the future.

**Spouse age** The spouse age assumption is based on plan sponsor

expectations for the future.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

### **Source of Prescribed Methods**

### Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

### **Changes in Assumptions and Methods**

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430.

The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC 430.

The assumed plan-related expenses added to the target normal cost were changed from \$6,000 for the prior valuation to \$8,000 for the current valuation to account for higher expected expenses to be paid from the trust.

Change in methods since prior valuation

None.
