Note 1. Description of the Plan

The following description of the Universal Hospital Services, Inc. Employees' Pension Plan (the Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General: The Plan is a noncontributory defined benefit plan covering substantially all Universal Hospital Services, Inc. (the Company) employees who were eligible to enter the Plan prior to July 1, 2001. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and the Internal Revenue Code of 1986, as amended (the Code).

Eligibility: The Plan was frozen on December 31, 2002, with no new participants hired after July 1, 2001, being eligible to enter the Plan. In addition, for purposes of computing a participant's accrued benefit, any additional service or changes in earnings after December 31, 2002, will not be taken into account. However, for purposes of determining a participant's vested interest in his or her accrued benefit, service performed by a participant for periods after December 31, 2002, shall be taken into account.

Pension benefits: Eligible participants with at least three years of service are entitled to annual pension benefits beginning at normal retirement age (65). The fully vested benefit is based on the participant's earnings, years of service, and level of the participant's Social Security benefit. If a participant who has attained age 65 or a fully vested participant dies at age 55 or older while employed by the Company, a death benefit equal to the actuarial equivalent of the participant's accrued pension benefit is paid to the participant's beneficiary. For active participants not eligible for early retirement, a death benefit equal to 50 percent of the accrued benefit, actuarially reduced for early commencement, is paid to the participant's beneficiary.

Benefits are distributed at the option of the participant in the form of a life annuity, qualified joint and survivor annuity, or life with 10 years certain. If the present value of the participant's accrued benefit is less than $5,000, they receive a lump-sum payment.

Funding policy: Contributions are made to the Plan by the Company to fund normal costs currently and the unfunded initial liability over a period of 15 years. This amount is determined on an actuarial basis, and the Plan Administrator believes it meets the minimum funding requirements of ERISA.

Contributions made under the Plan are deposited with Wells Fargo Bank, N.A. (the trustee) and administered in accordance with the provisions of a trust agreement. Company contributions are recorded once they are approved by Company management.

Note 2. Significant Accounting Policies

Basis of accounting: The financial statements have been prepared on the accrual basis of accounting.

Use of estimates: The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of plan assets available for benefits and the actuarial present value of accumulated plan benefits, the changes in those amounts during the reporting period, and when applicable, disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Investment valuation and income recognition: Investments are reported at fair value. Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Administrative Committee determines the Plan's valuation policies utilizing information provided by its investment advisors and trustee. See Note 5 for a discussion of fair value measurements.

Note 2. Significant Account Policies (Continued)

Realized gains and losses related to sales of investments are recorded on a trade-date basis, and unrealized gains and losses are recorded based on the fair value at the end of the reporting period. Interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date.

Benefits paid to participants: Benefits paid to participants are recorded when paid.

Administrative expenses: Substantially all administrative expenses are paid by the Plan. In addition, certain investment-related expenses are included in net appreciation (depreciation) in fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Risks and uncertainties: The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, participant compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Recent accounting pronouncements: In May 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. The amendments in this update remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. However, sufficient information must be provided to permit reconciliation of the fair value of assets categorized within the fair value hierarchy to the amounts presented in the statement of net assets available for benefits. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. The Plan adopted ASU 2015-07 for the plan year ended December 31, 2015; however, as the Plan currently has no investments for which fair value is measured using the net asset value per share practical expedient, ASU 2015-07 had no effect on the Plan's financial statements.

In July 2015, the FASB issued ASU No. 2015-12, *Plan Accounting: Defined Contribution Pension Plans (Topic 962)*. ASU 2015-12 eliminates the requirements to measure the fair value of fully benefit-responsive investment contracts and provide certain disclosures. Contract value is the only required measure for fully benefit-responsive investment contracts. ASU 2015-12 also eliminates the requirements to disclose individual investments that represent 5 percent or more of the net investments available for benefits and the net appreciation or depreciation for investments by general type, and simplifies the level of disaggregation of investments that are measured using fair value. The Plan adopted ASU 2015-12 for the plan year ended December 31, 2015, and retrospectively applied it to the plan year ended December 31, 2014. Prior-year disclosures in Notes 4 and 5 have been revised to reflect the retrospective application.

Subsequent events: The Plan Administrator has evaluated subsequent events through October 7, 2016, the date the financial statements were available to be issued.

Note 3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died and (c) present participants or their beneficiaries. Benefits under the Plan are based on participants' compensation during their five highest consecutive plan years of credited service prior to December 31, 2002, the date the Plan was frozen. The accumulated plan benefits for active participants are based on their average compensation during the five years ended on December 31, 2002, the date the Plan was frozen. Benefits payable under all circumstances, including retirement, death and termination of employment, are reflected as accumulated plan benefits, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death or retirement) between the valuation date and the expected date of payment.

Significant assumptions underlying the actuarial computation as of January 1, 2015, are as follows:

Expected investment return	6.35 percent
Mortality basis	RP-2014 aggregate mortality table reflecting a fully generational projection by Scale MP2015
Retirement age	Varying by age, from 55 to 65+ years

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The latest actuarial valuation was performed as of January 1, 2015. There were no significant differences between December 31, 2014, and January 1, 2015, that would cause the actuarial valuation not to be representative of the Plan's obligations as of December 31, 2014.

The actuarial present values of accumulated plan benefits were as follows as of December 31, 2014:

Vested benefits:	
Participants currently receiving payments	$ 9,924,415
Vested benefits for other participants	11,008,548
	20,932,963
Nonvested benefits	235,673
Total actuarial present value of accumulated plan benefits	$ 21,168,636

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

Below is a summary of significant changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2014:

Actuarial present value of accumulated plan benefits at beginning of year	$ 19,607,927
Increase for interest due to decrease in the discount period	1,313,785
Benefits paid	(871,612)
Change in actuarial assumptions	964,201
Other changes	154,335
Actuarial present value of accumulated plan benefits at end of year	$ 21,168,636

The following assumption changes were used in determining the actuarial present value of the accumulated plan benefits as of December 31, 2014:

- A change in the expected investment return from 6.85 percent to 6.35 percent
- A change in the mortality assumption from the 2014 static mortality table for annuitants and non-annuitants per Section 1.430(h)(3)-1(e) to the RP-2014 aggregate mortality table reflecting a fully generational projection by Scale MP2015

Note 4. Information Certified by Plan Trustee

The following is a summary of the Plan's asset information as of and for the years ended December 31, 2015 and 2014, included throughout the Plan's financial statements and supplemental schedules, that was prepared by or derived from information provided by the trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the trustee that the information provided to the Plan Administrator by the trustee related to the following assets is complete and accurate. Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information that appears throughout the financial statements and supplemental schedules related to the following assets:

	December 31	
	2015	2014
Investments, at fair value:		
Registered investment companies	$ 19,450,468	$ 20,563,649
Cash and cash equivalents	86,173	74,808
	$ 19,536,641	$ 20,638,457

Wells Fargo Bank, N.A. also certified for the years ended December 31, 2015 and 2014, respectively, as to the completeness and accuracy of $(702,454) and $232,815 of net appreciation (depreciation) in fair value of investments in registered investment companies and $494,613 and $581,367 of interest and dividends related to the aforementioned investments.

Note 5. Fair Value Measurements

Accounting standards established the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under accounting standards are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specific (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2015 and 2014.

Cash and cash equivalents: Cash and cash equivalents are valued at cost plus accrued income, which approximates fair value.

Registered investment companies: Shares in registered investment companies (mutual funds) are valued at the quoted market price of shares held by the Plan at year-end in the active market on which the individual securities are traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 5. Fair Value Measurements (Continued)

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2015 and 2014:

	Assets at Fair Value as of December 31, 2015			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	$ 86,173	$ -	$ -	$ 86,173
Registered investment companies	19,450,468	-	-	19,450,468
Total assets at fair value	$ 19,536,641	$ -	$ -	$ 19,536,641

	Assets at Fair Value as of December 31, 2014			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	$ 74,808	$ -	$ -	$ 74,808
Registered investment companies	20,563,649	-	-	20,563,649
Total assets at fair value	$ 20,638,457	$ -	$ -	$ 20,638,457

Note 6. Plan Termination

Although it has not expressed any intention to do so, the Company has the right, under the Plan, to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, assets of the Plan held by the trustee shall be allocated to the participants, as prescribed by ERISA, to the extent adequate in the following order of priority: first, to provide benefits that became payable under the Plan three or more years before the effective date of the plan termination; second, to provide benefits that became payable under the Plan less than three years before the effective date of plan termination; third, to provide all other accrued vested benefits in the following order of priority: to any participant who was eligible for normal or deferred retirement on the effective date of plan termination; to any participant who was eligible for early retirement on the effective date of plan termination; and to all other participants with vested benefits.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, a statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits, should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

Note 7. Related-Party Transactions and Party-in-Interest Transactions

Certain plan investments are shares of a short-term investment fund considered cash equivalents managed by affiliates of Wells Fargo Bank, N.A., the trustee, as defined by the Plan. Therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for investment management services were included as a reduction in the return of each fund.

Note 8. Tax Status

The Company has received a determination letter from the Internal Revenue Service (IRS) dated September 29, 2011, stating that the Plan is qualified under section 401(a) of the Code and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Administrator believes the Plan is designed and being operated in compliance with the applicable provisions of the Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at mid-year, except for the 100% retirement age.

(a) Age	(b) Rate	(c) Weight	(d) Product (a) × (b) × (c)

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following non-prescribed assumption change, which was made to better reflect anticipated plan experience:

- A change in the expected return on assets assumption used to calculate the value of plan assets from 7.00% for the 2013 plan year to 6.85% for the 2014 plan year, with the 2013 rate limited by the third segment rate (6.76%) used for minimum funding purposes for 2013

This assumption does not impact the funding shortfall. Therefore, approval of the Commissioner is not required.

Schedule SB, Part V—Statement of Actuarial Assumptions/Methods For ERISA Requirements

Interest Rates for Minimum Funding Purposes	Based on segment rates with a four-month lookback (as of September 2014), each adjusted as needed to fall within the 25-year average interest rate corridor under HATFA
1st Segment Rate	4.72%.
2nd Segment Rate	6.11%.
3rd Segment Rate	6.81%.
Interest Rates for Maximum Tax Purposes	Based on segment rates with a four-month lookback (as of September 2014), without regard to interest rate stabilization
1st Segment Rate	1.15%.
2nd Segment Rate	4.06%.
3rd Segment Rate	5.15%.
Salary Increases	Benefits are frozen as of 12/31/2002 so no assumption for future pay increases applies.
Optional Payment Form Election Percentage	60% Life Annuity. 10% Joint and 100% Survivor Annuity. 10% Joint and 67% Survivor Annuity. 20% Joint and 50% Survivor Annuity.
Optional Payment Form Conversion Interest Rate	7.00%.

Healthy and Disabled	2015 static mortality table for annuitants and non-annuitants per Section 1.430(h)(3)-1(e).
Withdrawal Rates	See Table 2.
Disability Rates	None.
Decrement Timing	Middle-of-year decrements, with 100% retirement occurring at beginning of year.

Surviving Spouse Benefit	It is assumed that 80% of males and 80% of females have an eligible spouse, and that males are three years older than their spouses.
Benefit and Compensation Limits	Benefits and compensation were frozen 12/31/2002 and were limited at that time based on the IRC section 415 maximum benefit of $140,000 and the compensation limit of $180,000 per year.
Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected Return on Assets	
2013 Plan Year	7.00%, limited to 6.76%.
2014 Plan Year	6.85%.
rust Expenses Included in Target Normal Cost	Estimated administrative expenses (based on the prior years' actual amounts) plus the estimated PBGC premiums for the current year. For 2015, this amount is $200,000.
Actuarial Method	Standard unit credit cost method.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following non-prescribed assumption change, which was made to better reflect anticipated plan experience:

- A change in the expected return on assets assumption used to calculate the value of plan assets from 7.00% for the 2013 plan year to 6.85% for the 2014 plan year, with the 2013 rate limited by the third segment rate (6.76%) used for minimum funding purposes for 2013

This assumption does not impact the funding shortfall. Therefore, approval of the Commissioner is not required.
