Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Lockheed Martin Specialty Components Pension Plan, which comprise the statements of net assets available for benefits as of December 31, 2015 and 2014, and the related statement of changes in net assets available for benefits for the year ended December 31, 2015, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 4, which was certified by the State Street Bank and Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of December 31, 2015 and 2014, and for the year ended December 31, 2015, stating that the investment information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion on Financial Statements

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Disclaimer of Opinion on Supplemental Schedules

The accompanying supplemental schedules of assets (held at end of year) as of December 31, 2015 and reportable transactions for the year ended December 31, 2015 are required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA and are presented for the purpose of additional analysis and are not a required part of the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on the supplemental schedules.

Report on Compliance of Form and Content with Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the certified investment information, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements

1. Description of the Plan

The following description of the Lockheed Martin Specialty Components Inc. Pension Plan (the Plan) provides only general information about the Plan's provisions. Participants should refer to the Plan document and Summary Plan Description for a more complete description of the Plan's provisions.

General

The Plan is a contributory, defined benefit plan covering retirees and other vested participants formerly employed by Lockheed Martin Specialty Components, Inc. (Specialty Components), and has been amended from time to time. The assets of the Plan are held and invested under an agreement between Lockheed Martin Corporation (the Corporation) and State Street Bank and Trust Company (the Trustee). The Corporation is the Plan Sponsor and the Plan Administrator.

Effective September 30, 1997, the Specialty Components facility was closed. All employees were either transferred to other facilities of the Corporation or were terminated by December 31, 1997. In connection with those activities, all affected participants became fully vested in the Plan. At present, the Corporation maintains the Plan as a wasting trust. For employees transferred to other facilities, the related assets were transferred to the affiliated plans.

Effective February 26, 2015, the Board of Directors of the Corporation approved the complete termination of the Plan and the Plan was amended to terminate effective June 1, 2015. On September 30, 2015, the Corporation filed an Application for Determination for Terminating Plan (Form 5310) with the Internal Revenue Service (IRS). On November 12, 2015, the Corporation filed a Standard Termination Notice (Form 500) with the Pension Benefit Guaranty Corporation (PBGC). Upon receipt of the IRS determination letter, the Plan Administrator will solicit (i) benefit distribution elections from Plan participants who are not in pay status, and (ii) quotes from annuity providers for benefits to be paid in the form of an annuity. Plan benefits will be distributed to participants within 120 days of the receipt of the IRS determination letter.

Funding Policy

Funding for the Plan is determined in accordance with the Employee Retirement Income Security Act of 1974 (ERISA), as amended by the Pension Protection Act of 2006 (PPA) and consistent with U.S. Government Cost Accounting Standards (CAS). Contributions by the Corporation, if any, meet the ERISA minimum funding requirements. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of benefits attributable to active and non-active participant contributions, next for payment of retirement benefits that former employees or their beneficiaries have been receiving, and finally for the payment of other vested benefits. If the net assets are not sufficient to pay all benefits, the net assets shall be paid to the most senior categories until a category cannot be paid in full, and remaining net assets shall be allocated pro rata to all the benefits in that category and not those of lower priority. However, in the event of termination of the Plan, the PBGC guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting. Certain amounts in the prior year have been reclassified to conform to the current year presentation.

Lockheed Martin Specialty Components Inc. Pension Plan
Notes to Financial Statements (continued)

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's compensation during each year of credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's compensation during each year of credited service preceding the valuation date. Benefits payable under all circumstances retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Investment Valuation and Income Recognition

Investments in the Plan are reported at fair value. Fair value is the price that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Gains and losses on investments bought and sold as well as held during the year are included in net appreciation (depreciation) in fair value of investments.

Administrative Expenses

Administrative expenses are generally paid by the Corporation, with the exception of the cost of certain administrative services, which are paid by the Plan.

Recent Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board (FASB) issued a new standard that eliminates the current requirement to categorize within the fair value hierarchy investments with fair values measured at net asset value (NAV) using the practical expedient in Accounting Standards Codification (ASC) 820 "Fair Value Measurement." The new standard will require entities to disclose the fair values of such investments as a reconciling item between the Statements of Net Assets Available for Benefits amounts and the amounts reported in the fair value hierarchy table. Entities will be required to continue to disclose information describing the nature and risks of the investments measured using the NAV practical expedient. The standard is effective for the Plan beginning on January 1, 2016, with early adoption permitted. The Plan early adopted the standard on January 1, 2015 and determined that adoption of the standard did not impact the financial statements as there were no investments measured at NAV using the practical expedient in plan year 2015.

In July 2015, the FASB issued a new three-part standard that simplifies employee benefit plan reporting. Part I of the standard eliminates the requirement to measure and present fully benefit-responsive investment contracts at fair value within the statements of net assets available for benefits and related disclosures and also eliminates the requirement to reconcile contract value to fair value, when these measures differ. Part II of the standard simplifies plan investment disclosures and Part III provides for a measurement date practical expedient. Parts I and III of the standard are not applicable as the Plan has no investments in fully benefit-responsive investment contracts and the Plan's year end coincides with the end of the reporting period on which investments are measured. The standard is effective for the Plan beginning on January 1, 2016. Plans may early adopt any of the three parts of the standard without adopting the other parts. The Plan early adopted Part II of the standard for plan year 2015 and applied the provisions of Part II of the standard to the investment disclosures in these financial statements.

Subsequent Events

The Plan has evaluated subsequent events through October 10, 2016, the date the financial statements were available to be issued. No material subsequent events have occurred since December 31, 2015 that required recognition or disclosure in these financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits is as follows (in thousands):

	December 31,	
	2015	2014
Vested benefits:		
Participants currently receiving payments	\$ 93,661	\$ 99,026
Participants not currently receiving payments	25,321	31,635
Total vested benefits	118,982	130,661
Total actuarial present value of accumulated plan benefits	\$ 118,982	\$ 130,661

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (RP-2014 Total Dataset Adjusted to 2006 with Scale MP-2015 for 2015 and RP-2014 Total Dataset with Scale MP-2014 for 2014), (b) assumed retirement age probabilities based on the experience of the Plan resulting in an average retirement age of 60, and (c) an annual discount rate of 4.375% and 4.00% for 2015 and 2014, respectively. The discount rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

Lockheed Martin Specialty Components Inc. Pension Plan
Notes to Financial Statements (continued)

Changes in the actuarial present value of accumulated plan benefits are as follows (in thousands):

	Year Ended December 31, 2015
Actuarial present value of accumulated plan benefits at beginning of year	\$ 130,661
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	5,035
Benefits paid	(8,815)
Benefits accumulated	(953)
Changes in actuarial assumptions	(6,946)
Net decrease	(11,679)
Actuarial present value of accumulated plan benefits at end of year	\$ 118,982

The changes in actuarial assumptions reflect the increase in the discount rate and change in mortality, which resulted in a decrease to the actuarial present value of accumulated plan benefits of \$4,426,000 and \$2,520,000, respectively.

The actuarial assumptions are based on the presumption that the Plan will continue. The Plan is currently following the process of a formal termination. It is expected that IRS approval to distribute assets and purchase annuities will be received during 2016. After such approval is received different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits that would measure the value of those benefits on a liquidation basis.

4. Investments

All investment information disclosed in the accompanying financial statements as of December 31, 2015 and 2014, supplemental schedules including investments held as of December 31, 2015, and net appreciation in fair value of investments, interest income, and dividend income for the year ended December 31, 2015, was obtained or derived from information certified as complete and accurate by State Street Bank and Trust Company, the Trustee of the Plan.

5. Fair Value Measurements

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and requires disclosures regarding fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 – Quoted prices in active markets for identical assets and liabilities;
- Level 2 – Observable inputs, other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 – Unobservable inputs where valuation models are supported by little or no market activity that one or more significant inputs are unobservable and require us to develop relevant assumptions.

Lockheed Martin Specialty Components Inc. Pension Plan
Notes to Financial Statements (continued)

The following table presents the fair value of Plan assets by asset category and their level within the fair value hierarchy as of December 31, 2015 (in thousands):

	Level 1	Level 2	Total
Cash equivalents	\$ 12,839	\$ —	\$ 12,839
Common collective trusts	—	115,358	115,358
Total at Fair Value	\$ 12,839	\$ 115,358	\$ 128,197

The net appreciation for the year ended December 31, 2015 was \$1,031,000.

The following table presents the fair value of Plan assets by asset category and their level within the fair value hierarchy as of December 31, 2014 (in thousands):

	Level 1	Level 2	Total
Cash equivalents	\$ 11,889	\$ —	\$ 11,889
Common collective trusts	—	124,667	124,667
Total at Fair Value	\$ 11,889	\$ 124,667	\$ 136,556

The Plan recognizes transfers between levels of the fair value hierarchy as of the date of the change in circumstances that causes the transfer. At December 31, 2015 and 2014, there were no assets in the Plan categorized as Level 3. During 2015, the Plan had no assets transferred in or out of the Level 3 category.

Valuation Techniques

Cash equivalents are comprised of a short-term money-market instrument that is valued at cost, which approximates fair value.

Common collective trusts categorized as Level 2 are valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

6. Parties-in-Interest Transactions

The Plan invests in the State Street Bank and Trust Company Short Term Investment Fund which is sponsored by State Street Bank and Trust Company, the Trustee, a party-in-interest. Transactions involving this investment are considered to be party-in-interest transactions for which a statutory exemption from the prohibited transaction regulation exists.

Lockheed Martin Specialty Components Inc. Pension Plan
Notes to Financial Statements (continued)

7. Income Tax Status

The IRS has determined and informed the Corporation by letter dated January 9, 2014, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since issuance of the determination letter. However, the Plan Administrator and the Corporation's counsel believe that the current design and operations of the Plan are in compliance with the applicable provisions of the IRC and, therefore, believe the Plan, as amended, is qualified.

GAAP requires plan management to evaluate tax positions taken by the Plan to determine whether the Plan has taken any uncertain positions that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2015, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions, but no tax audits are in progress. The Plan Administrator believes the Plan is no longer subject to income tax examinations for years prior to 2012.

Terminated Vested Participants: Age 60

Form of Payment: 80% of male and 20% of female married employees are assumed to elect the spouse option. Single employees are assumed to elect the normal form.

For inactive participants in payment, any remaining PPA/VPA balances are assumed to be paid as immediate lump sums on the valuation date. For deferred vested participants, any remaining PPA/VPA balances are assumed to be deferred to age 60 and paid as a lump sum.

Survivor's Benefit: It is assumed that husbands are 2 years older than wives and that 85% of male terminated Participants and 50% of female terminated Participants will be survived by an eligible Spouse.

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

For inactive participants in payment, any remaining PPA/VPA balances are assumed to be paid as immediate lump sums on the valuation date. For deferred vested participants, any remaining PPA/VPA balances are assumed to be deferred to age 60 and paid as a lump sum.

Survivor's Benefit: It is assumed that husbands are 2 years older than wives and that 85% of male terminated Participants and 50% of female terminated Participants will be survived by an eligible Spouse.

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

Normal Form of Annuity

Life Annuity with a 5-year minimum.

Normal Retirement Date

The first day of the month coinciding with or next following the Participant's 65th birthday.

Normal Retirement

Eligibility

Completion of five years of service.

Benefit Formula

A Career Average Benefit equal to the sum of the Past Service Annuity and the Future Service Annuity.

Past Service Annuity

Formula based on service prior to September 1, 1946.

Future Service Annuity

Annual benefit equal to the sum of (i) and (ii):

- i) Future Service Annuity (with updates) accrued up through December 31, 1990.
- ii) 1.45% of employee's compensation earned in each calendar year after December 31, 1990, up to (1) Social Security Covered Compensation for 1991, (2) \$18,000 for 1992, and (3) Social Security Covered Compensation less \$3,192 for 1993 and subsequent years, plus 1.90% of remaining compensation (1.45% of all compensation earned in each calendar year, after service as of January 1 exceeds 34 years).

Most Recent Benefit Update

Effective December 1, 1991, the future service annuity as of December 31, 1990 (including all updates as of December 31, 1990) will not be less than 0.90% of average compensation from 1988 through 1990 up to \$25,000, plus 1.5% of remaining average compensation, times a maximum of 35 years of benefit service through December 31, 1990.

Minimum Benefit

For each year of service, \$21 per month plus \$0.25 per month for each \$300 by which highest 5-year average Compensation exceeds \$25,050, subject to a total maximum of \$29 per month (5-year average Compensation exceeds \$34,650).

Personal and Voluntary Pension Accounts

Employee contributions in each calendar year after December 31, 1988, plus voluntary contributions in each calendar year after December 31, 1990, credited with interest at a prescribed rate. The required and voluntary accounts are converted to an annuity based on the form of annuity elected for the regular pension or paid as a lump sum.

Early Retirement

<i>Eligibility</i>	Attained age 60.
<i>Benefit Formula</i>	Benefit accrued to date of early retirement with no reduction.
<i>Regular Supplement</i>	For each year of service, \$10/month is payable up to age 62 for retirement between ages 60 and 62 on or after July 1, 1991.
<i>Special Supplement</i>	If a participant retires on or after July 1, 1990 with 25 years of service or more under the special eligibility rules, an additional \$225 per month supplement is provided.

Pre-Retirement Spouse Benefit

<i>Eligibility</i>	Death occurs prior to retirement after at least 5 years of service, and married for at least 12 months at the time of death.
<i>Benefit Formula</i>	<p>The surviving spouse receives 50% of the pension accrued at the date of death reduced by the appropriate joint and survivor factors. Payments would be deferred to no earlier than the early retirement date of the deceased participant.</p> <p>If death occurs after attaining age 60 or age 50 with at least 15 years, payments commence immediately. Payments are reduced 12% if they begin before age 60.</p>

Death Benefit

<i>Eligibility</i>	Death occurs prior to retirement after attaining age 60 or at least 15 years of service; not eligible for Pre-Retirement Spouse Benefit.
<i>Benefit Formula</i>	<p>Lump sum equal to the value of payments for 5 years of the accrued pension benefit. If payment occurs prior to age 60, the lump sum is reduced by 12%.</p> <p>If not eligible for either the Pre-Retirement Spouse Benefit or the Death Benefit, a refund of employee contributions with interest is paid.</p>

Vested Benefit

<i>Eligibility</i>	At least 5 years of service.
<i>Benefit Formula</i>	Accrued benefit payable as early as age 60. Terminated employees may withdraw their contributions with interest, Personal Pension Account, and Voluntary Pension Account and retain their right to the company provided portion of their benefit.
