Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

A. Actuarial Funding Method

The actuarial valuation method used in the funding valuation is that prescribed under IRC Section 430(a). Under this section the minimum required contribution is the sum of the plan's target normal cost and the shortfall and waiver amortization bases. The plan's target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year. The shortfall amortization charge is determined based on the difference between the plan's funding target and the value of plan assets. A plan's funding target for a plan year is the present value of all benefits accrued or earned under the plan as of the beginning of the plan year.
