Administrative expenses

Administrative expenses of \$3,472,863 are included in the Target Normal Cost. This is equal to the actual administrative expenses paid in the prior year (\$2,148,853) with an adjustment for the increase in the expected 2015 PBGC variable rate premium to be paid (\$1,324,010).

Methods

Valuation date

First day of plan year

Funding target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the Plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time. For ASC 960 purposes, the discount rate was chosen by the Plan sponsor based on market information on the measurement date.
Administrative expenses	Administrative expenses are estimated as the actual expenses paid from the trust the preceding year and reflecting estimated increases or decreases in PBGC variable rate premiums.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on plan sponsor expectations and represent a best estimate of future experience.

Benefit commencement date for deferred benefits:

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value.
- Deferred vested benefit
Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the Plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

Form of payment	The form of payment is based on the normal form of the Plan. Other forms are considered to be actuarially equivalent.

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the Plan sponsor from a range of methods permitted by IRC §430.

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

December 31, 2015 and 2014

Note 1: Description of the Plan

The following brief description of the Diebold, Incorporated Retirement Plan for Salaried Employees (the “Plan”) is provided for general information purposes only. Participants and users of the financial statements should refer to the Plan document for more complete information.

(a) General

The Plan is a defined benefit pension plan sponsored by Diebold, Incorporated (the “Company”) that covers substantially all salaried employees hired prior to July 1, 2003. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”). The Plan has been amended and restated to either provide additional benefits or options, or to comply with changes in the law. The Plan was closed to new hires effective July 1, 2003. In July 2013, the Company's board of directors approved freezing the Plan benefits effective as of December 31, 2013 for U.S.-based employees who joined the Company prior to July 1, 2003.

(b) Retirement Dates

The normal retirement date of a participant is the later of the 65th anniversary of his or her date of birth or the 5th anniversary of the date the associate commenced participation in the Plan. A participant who has attained age 50 and whose combined age and years of credited service equals or exceeds a total of 70, or a participant who has completed 30 or more years of benefit service regardless of attained age, may retire at any time thereafter under early retirement. A participant who has completed 15 or more years of credited service and becomes incapacitated by total and permanent disability may retire and receive a disability retirement benefit. If, for any reason other than death, the services of a participant are terminated after completion of at least five years of vesting service with the Company but prior to normal or early retirement, such participant shall have a deferred vested benefit to commence distribution at the normal retirement date.

(c) Credited Service

Credited service is the total number of years of service accumulated by a participant prior to his or her retirement. A participant accumulates credited service based upon the total period of continuous service covered under the Plan. For each full year of continuous service, a participant receives credit for one year of credited service. The maximum number of years of credited service cannot exceed 30 years. No additional credited service accrues after December 31, 2013.

(d) Trust Fund Management

Under the terms of the trust agreement between The Bank of New York Mellon (the “Trustee”) and the Plan, the Trustee manages the trust funds and executes transactions on behalf of the Plan. All investments, as of December 31, 2015 and 2014, and a portion of the investment income for the year ended December 31, 2015, are included in the financial statements have been reported to the Plan by the Trustee as having been determined through the use of fair values of all assets of the trust fund.

(e) Vested Benefit

Vested benefit is the retirement benefit to which a participant, whose service terminated after his or her vesting date, is entitled. After five years of vesting service, such vested benefit is 100 percent of the participant's accrued benefit derived from the Company contributions. A participant earns vesting service based upon the total period of service covered under the Plan including service after the Plan freeze date of December 31, 2013.

(f) Normal Retirement Benefit

The normal monthly retirement benefit is equal to the greater of:

- Benefit calculated as 0.8 percent of final average monthly compensation, as defined, up to covered compensation, as defined, plus 1.25 percent of final average monthly compensation in excess of covered compensation, multiplied by credited service (maximum of 30 years);
- Sixteen dollars per month per year of credited service, plus 20 percent of the portion of final average monthly compensation which exceeds \$1,200 (reduced proportionately for credited service under 30 years); or
- Accrued benefit as of July 31, 1991 under the Plan prior to the Plan amendment, which became effective January 1, 1992.

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES
Notes to Financial Statements
December 31, 2015 and 2014

In addition, all participants retiring after January 1, 1992, receive a monthly retiree medical supplement equal to \$4.20 times years of credited service up to a maximum of 30 years.

(g) Death Benefit

A surviving spouse of a vested participant who dies prior to retirement is entitled to a spouse's benefit. The spouse's benefit is a pension payable for the life of the spouse equal to the amount that would have been payable to the surviving spouse had the participant retired immediately preceding his or her death and elected a 50 percent joint and survivor option.

Note 2: Summary of Significant Accounting Policies

(a) Basis of Accounting

The accompanying financial statements of the Plan are prepared on the accrual basis of accounting and are in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Company has evaluated subsequent events through the date the Plan financial statements were available to be issued, October 13, 2016. There were no significant subsequent events that have occurred which would require adjustments to or disclosure in the Plan financial statements. In September 2016, the Plan was selected by the Department of Labor for audit.

(b) Recently Issued Accounting Guidance

In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share or Its Equivalent* ("ASU 2015-07"). The amendments in this update remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. The standard is effective for the Plan on December 15, 2015, with early adoption permitted. The adoption of this update is not expected to have a material impact on the financial statements of the Plan.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient (consensus of the FASB Emerging Issues Task Force)*. Part I and Part II of the ASU simplify financial reporting requirements for benefit plans by eliminating or reducing certain investment disclosures. Part III provides an alternative method for measuring investments for plans having fiscal year-ends that do not fall on a month-end date. The new guidance is effective for reporting periods beginning after December 15, 2015 and shall be applied retrospectively for Part I and Part II and prospectively for Part III. Only Part I and Part II are applicable to the Plan. The adoption of this update is expected to impact certain investment disclosures and have no impact on net assets available for benefits.

(c) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Due to investments in partnerships within the Diebold, Incorporated Pension Master Trust ("Master Trust") not being traded on an active market, the values as of any particular date are not necessarily indicative of amounts that may ultimately be realized as a result of future sales or other dispositions of investments held. The estimated values may differ significantly from the values that would have been used had an active market for the securities existed. Actual results could differ from those estimates.

(d) Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. Significant assumptions underlying the actuarial computations include:

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES
Notes to Financial Statements
December 31, 2015 and 2014

- Assumed retirement based on a table of retirement rates beginning at age 50 through age 70 which result in an average retirement age of 62;
- Assumed valuation interest rates for both 2015 and 2014 of 7.75 percent compounded annually;
- Assumed turnover and disability rates based on published statistical data and tables;
- Assumed mortality rates based upon the RP-2014 Combined Healthy Mortality Table ("RP-2014") with separate male and female rates, projected to the valuation date (January 1, 2016) for December 31, 2015 results.
- Assumed mortality rates based upon the RP-2000 Combined Healthy Mortality Table ("RP-2000") with separate male and female rates, projected to the valuation date (January 1, 2015) for December 31, 2014 results.

The actuarial cost method used by the actuary is the unit credit cost method. This is a method under which an accrued benefit is calculated as of the beginning of the year and as of the end of the year for each benefit that may be payable in the future. The accrued benefit is based on the Plan's accrual formula and upon service as of the beginning or end of the year. For benefits where the Plan's accrual formula is not relevant, benefits are assumed to accrue on a straight-line basis over the period during which the employee earns credited service.

Note 3: Funding Policy

The Company met the minimum funding requirements of ERISA for 2015.

Note 4: Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

In the event of permanent termination of the Plan, the assets then remaining in the trust fund, subject to provision for expenses incident to such termination, are allocated in the following priority: first, to retirees who began receiving benefits at least three years before termination, including benefits to individuals who would have received benefits for at least three years had they retired that long ago; second, to all other individuals guaranteed under the termination insurance provisions of ERISA; third, among all other non-forfeitable benefits; and fourth, among all other benefits under the Plan. In the event the Plan assets are not sufficient to accomplish the above method of termination, the assets are distributed pro rata to participants based on the present value at termination date of their individual benefits.

In addition, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees.

Note 6: Fair Value Measurements

The fair value framework described in FASB Auditing Standards Codification ("ASC") 820, *Fair Value Measurements*, requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to value the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment.

The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active or inputs, other than quoted prices in active markets that are observable either directly or indirectly.

Level 3: Unobservable inputs for which there is little or no market data.

Valuation methodologies used by the Master Trust are as follows:

Level 1 - Fair value of investments categorized as Level 1 are determined based on period end closing prices in active markets on which the individual securities are traded.

Level 2 - Fair value of investments categorized as Level 2 are determined based on the latest available ask price or latest trade price if listed. The fair value of unlisted securities is established by fund managers using the latest reported information for comparable securities and financial analysis. If the manager believes the fund is not capable of immediately realizing the fair value otherwise determined, the manager has the discretion to determine an appropriate value. Common collective trusts are valued at their net asset value ("NAV") which is used for expedience purposes, on the last day of the period.

Level 3 - Fair value of investments categorized as Level 3, represent the Plan's interest in private equity, hedge and property funds. The fair value for these assets is determined based on the NAV, which is used for expedience purposes, as reported by the underlying investment managers.

Note 7: Tax Status

The Internal Revenue Service (“IRS”) has determined and informed the Company by a letter dated March 31, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (“IRC”). As of December 31, 2015, the Company believes that the Plan is designed and currently being operated in compliance with the applicable requirements of the IRC. The Plan has been amended and restated since receiving the determination letter. The Plan’s sponsor has provided the IRS with an application for an updated determination letter which is currently in process. However, the Company and Plan's tax counsel believe the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for the income taxes has been included in the Plan's financial statements. In September 2016, the Plan was selected by the Department of Labor for audit.

Certain Plan investments are managed by the Trustee and, therefore, these transactions are party-in-interest transactions. Fees are paid by the Master Trust for asset custody and management to parties-in-interest. These fees are pursuant to arrangements exempted from the prohibited transaction rules.
