Jostens Pension Plan “B”

NOTES TO FINANCIAL STATEMENTS

December 31, 2015 and 2014

NOTE A – PLAN DESCRIPTION

Jostens Pension Plan “B” (the Plan) is a defined benefit pension plan, which covers substantially all employees located in Topeka, Kansas of Jostens, Inc. (the Company) who are compensated on an hourly basis and represented by a union for collective bargaining purposes, which has entered into an agreement for coverage under this Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan was most recently amended effective September 16, 2013.

Effective November 2, 2015, Visant Holding Corp., the parent company of Jostens, Inc. and other entities comprising the Jostens business was acquired by Jarden Corporation.

Participants should refer to the Plan documents for complete information regarding the Plan’s definitions, benefits, eligibility and other matters.

Eligibility

Employees are eligible to participate in the Plan if they meet certain requirements, including being paid on an hourly wage rate basis, being at least age 21, having completed one year of eligibility service and being represented by the Graphic Arts International Union. The Plan was closed to new hires effective January 1, 2008. The Topeka, KS facility no longer employs participants represented by the Graphic Arts International Union as of December 31, 2013, and, therefore, no participants are accruing additional benefits under the Plan.

Pension Benefits

Pension benefits are determined by multiplying years of benefit service by the benefit level in effect on the date of retirement or termination. Monthly benefit level for the Plan is \$17.25.

Vesting Service

Vesting service determines when employees have a right to a benefit. Employees were credited with one year of vesting service for each calendar year during which they earned at least 1,000 hours of service and are fully vested after five years of service.

Benefit Service

Benefit service is used to determine the amount of an employee’s pension benefit. Employees are credited with benefit service based on the number of hours of service earned each calendar year as a union employee.

NOTES TO FINANCIAL STATEMENTS – CONTINUED

December 31, 2015 and 2014

NOTE A – PLAN DESCRIPTION – Continued

Contributions

The Company has been contributing such amounts as determined by the actuary, which, together with the principal and accumulated earnings of the individual Plan trust, will afford participants the benefits specified by the Plan. There are no participant contributions to the Plan. Company contributions are made in amounts sufficient to fund the Plan's current service costs and to fund the unfunded past service costs plus interest thereon over a period of 30 years. No contributions were made for the years ended December 31, 2015 and 2014. The Plan has met its ERISA minimum funding requirements.

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.
4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Basis of Accounting

The accompanying financial statements have been prepared using the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America.

Investments

The Plan investments are held in the individual Plan trust. Mutual fund investments are stated at fair value, as determined by the trustee, based on quoted market prices. The Plan may also hold cash equivalents which are invested in a short-term investment fund and carried at fair value. See Note D for discussion of fair value measurements.

Interest and Dividends

Interest income is recorded as earned on an accrual basis, and dividend income is recorded on the ex-dividend date.

Net Appreciation (Depreciation) in Fair Value of Investments

Net appreciation (depreciation) in the fair value of investments represents the net realized gains or losses and the net unrealized appreciation (depreciation) of investments. Realized gains or losses are the difference between the proceeds received and either the cost of the investment sold, determined on a first-in, first-out basis, or the fair value at the end of the previous year, whichever is applicable. Unrealized appreciation (depreciation) is the change in the difference between fair value and the cost of investments or the fair value at the end of the previous year, whichever is applicable.

Benefits Paid to Participants or Beneficiaries

Benefits paid to participants or beneficiaries are recorded by the Plan when paid.

Administrative Expenses

The Company pays certain administrative expenses. In addition, the Company pays for certain other administrative expenses and performs certain services on behalf of the Plan for which the Company is reimbursed.

Risks and Uncertainties

The Plan invests in various combinations of equities, bonds and fixed income securities, and other investment instruments. Such investments are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investments securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimations and assumptions in the near term could be material to the financial statements.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Adoption of New Accounting Rules

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965): Part (I) Fully Benefit-Responsive Investment Contracts, Part (II) Plan Investment Disclosures, Part (III) Measurement Date Practical Expedient*. This three-part standard simplifies employee benefit plan reporting with respect to fully benefit-responsive investment contracts and plan investment disclosures, and provides for a measurement-date practical expedient. Part I and Part II are effective for the fiscal years beginning after December 15, 2015, and should be applied retrospectively, with early application permitted. Part III is effective for fiscal years beginning after December 15, 2015, and should be applied prospectively, with early application permitted.

Parts I and III are not applicable to the Plan but management has elected to adopt Part II early. Accordingly, the amendments were retrospectively applied. The disclosures of individual investments that represent 5% or more of net assets available for benefits, the net appreciation or depreciation of investments by general type and the investment strategy for the Plan's investment measured at NAV have been removed and the level of disaggregating investments that are measured at fair value has been simplified by disaggregating investments by general type versus disaggregating by nature, characteristics and risks.

Subsequent Events

The Plan evaluated its December 31, 2015 financial statements for subsequent events through August 23, 2016, the date the financial statements were available to be issued. Effective April 15, 2016, Jarden Corporation was acquired by Newall Brands, Inc. The Plan is not aware of any other subsequent events, which would require recognition or disclosure in the financial statements, except as noted above.

NOTE C – TRUSTEE CERTIFICATIONS

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, SEI Private Trust Company, the trustee of the Plan, has certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments and accrued income, as shown in the statements of net assets available for benefits, as of December 31, 2015 and 2014.
- Total investment income (loss), as shown in the statements of changes in net assets available for benefits, for the years ended December 31, 2015 and 2014.
- Schedule H, line 4(i) – Schedule of assets (held at end of year) as of December 31, 2015.
- Schedule H, Line 4(j) – Schedule of reportable transactions for the year ended December 31, 2015.

NOTE D – FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820-10, *Fair Value Measurements*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820-10 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2: Inputs to the valuation methodology include

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

NOTE D – FAIR VALUE MEASUREMENTS - Continued

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability’s fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the valuation methodologies used at December 31, 2015 and 2014.

Money market account: Short term money market instruments are valued at cost, which approximates fair value based on quoted market prices available on an active market.

Mutual funds: Valued at the net asset value of shares held by the Plan at year end based on quoted market prices.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The asset or liability’s fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The following table sets forth by level, within the fair value hierarchy, the Plan’s investments at fair value as of December 31:

	December 31, 2015			
	Level 1	Level 2	Level 3	Total
Mutual funds	\$19,112,272	\$ -	\$ -	\$19,112,272

NOTE E – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment, is determined annually by consulting actuaries.

Accumulated plan benefits are those future benefit payments attributable to pension benefit obligations for employees’ service rendered to the benefit information date.

Accumulated plan benefit obligations include benefits expected to be paid to (a) retired or terminated employees and their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries.

The accumulated plan benefit information as of the beginning of each plan year is as follows:

	<u>January 1,</u>	
	<u>2015</u>	<u>2014</u>
Actuarial present value of accumulated plan benefits		
Vested benefits		
Participants currently receiving payments	\$11,339,205	\$10,684,335

The change in actuarial present value of accumulated plan benefits is as follows:

Spouse's benefit eligibility	70% of all male active and terminated employees are married to an eligible spouse, and wives are assumed to be two years younger than husbands.
------------------------------	---

For the 2014 valuation, the Plan assumption change was using the RP-2014 Healthy Annuitant and RP-2014 Employee Sex distinct tables translated to 2007 using MP-2014 sex distinct projection scales.

For the 2015 valuation, the Plan assumption changes related to the following: (1) the segment interest rates used to calculate the funding target and target normal costs were updated to the current valuation date as required by IRC 430; (2) the mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC 430; (3) as a result of an experience study completed in December 2014, changes were made to the termination rates, retirement rates, vested termination retirement age, percent of participants married, age difference between participants and spouses and the option form of payment election; and (4) the estimated costs of plan administration were updated to be 0.40% of the market value of assets as of January 1, 2015 plus the estimated PBGC variable rate premium for the current plan year, rounded to the nearest \$5,000, from 0.30% of the market value of assets as of January 1, 2015 plus the estimated PBGC variable rate premium for the current plan year, rounded to the nearest \$5,000.

NOTE F – INCOME TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter dated August 24, 2011, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended and restated since receiving the determination letter. The Plan will apply for a determination letter from the IRS in 2016. However, the Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan Management to evaluate tax positions taken by the plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2015, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2012.

NOTE G – RELATED-PARTY AND PARTY-IN-INTEREST TRANSACTIONS

The trustee is authorized under contract provisions or by ERISA regulations providing an administrative or statutory exemption to invest in funds under its control. Transactions resulting in plan assets being transferred to or used by a related party are prohibited under the Pension Reform Act (the Act) unless a specific exemption exists. The trustee is a party in interest as defined by the Act as a result of its investing plan assets in its investment funds. However, such transactions are exempt under Section 408(b)(8) and are not prohibited by the Act. The Company has been designated as the Plan Administrator and Plan Sponsor. The Company charged the Plan \$7,678 in 2015 and \$7,527 in 2014 for reimbursement of the Company's expenses associated with administration of the Plan.

Future increases in maximum benefits and plan compensation limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Assumed cost-of-living adjustments

None.

Plan-related expenses

The costs of the plan administration, which are paid through the trust fund assets, are assumed to be 0.40% of the market value of assets as of January 1, 2015 plus the estimated PBGC variable rate premium for the current plan year, rounded to the nearest \$5,000.

Demographic Assumptions

Mortality

For all purposes except ASC 960

For all participants: The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants.

For ASC 960

RP-2014 Healthy Annuitant and RP-2014 Employee sex distinct tables translated to 2007 using MP-2014 sex distinct projection scales.

Projection scale is based on the RPEC model with the following adjustments: Short-term mortality improvements have maximum slope of 0 and converges to long-term mortality improvements of 0.75% in 15 years (2008 to 2022). Long-term mortality improvements of 0.75% at age 85 reduced linearly to 0% at age 95.

Single Life Annuity	50.0%
10 Year Certain & Life Annuity	15.0%
50% Joint & Survivor Annuity	35.0%

Marriage

70% of males and females are assumed to be married. Males are assumed to be 2 years older than their spouse.

Employees

It was assumed there will be no new or rehired employees.

Methods

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.3. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Benefits not valued

None.

Data Sources

Employee data was supplied by Jostens Inc. as of the census date. Data on persons receiving benefits was supplied by Jostens Inc.

Assumptions Rationale - Significant Economic Assumptions

Funding Interest Rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

ASC 960 Interest Rate

The ASC 960 interest rate was prescribed by the plan sponsor and represents an estimate of future experience based upon the plan sponsor's assumed long-term rate of return on plan assets for ASC 715 purposes.

Assumptions Rationale - Significant Demographic Assumptions

Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h). Assumptions used for ASC 960 purposes were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.

Termination

The Qualified Spouse who is entitled to a benefit that commences prior to the Participant's Normal Retirement Date may elect to defer commencement of such benefit to any month not later than the month during which the Participant would have attained age 65 had he lived.

Forms of benefit payment

Actuarially reduced benefit in the joint and 50% survivor form is automatic if participant has a qualified spouse. Otherwise, benefits payable for life only. Participant may elect out of either form in favor of the following optional forms. Benefits paid are adjusted to be actuarially equivalent.

2. Lifetime benefit.
3. Lifetime benefit with 50%, 75% or 100% (the percentage is elected by the participant prior to retirement) of such amount continuing to joint pensioner after participant's death.
4. Lifetime benefits with 120 payments guaranteed.
5. Other forms of payment are available subject to the approval of Jostens.

The actuarial equivalence to calculate optional form conversion factors is based on an interest rate of 6% per annum, compounded annually, and the mortality table, based on a fixed blend of 50 percent of the unloaded male mortality rates and 50 percent of the unloaded female mortality rates underlying the mortality rates in the 94 GAR, projected to 2002.

Changes in plan provisions since last actuarial valuation

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 24 Change in Actuarial Assumptions as of January 1, 2015

As a result of an experience study completed in December 2014, changes were made to the termination rates, retirement rates, vested termination retirement age, percent of participants married, age difference between participants and spouses, optional form of payment election and plan-related expenses.

Approval for the non-prescribed assumption changes was not required as outlined in IRS Regulation 1.430(d) – 1(f)(8) because the change in liability is less than the threshold.
