To the Rio Tinto America Inc. Benefits Governance Committee of
Kennecott Utah Copper Pension Plan for Represented
Hourly Employees
South Jordan, Utah

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Kennecott Utah Copper Pension Plan for Represented Hourly Employees, (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2015 and 2014, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by State Street Bank and Trust Company, the trustee, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2015 and 2014, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards general accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 1. Description of the Plan

The following description of Kennecott Utah Copper Pension Plan for Represented Hourly Employees (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General: The Plan was established by Kennecott Utah Copper LLC (the "Company"). The Plan is a noncontributory defined benefit pension plan covering all eligible hourly employees who are represented by or included in a collective bargaining unit of Kennecott Utah Copper LLC and its participating subsidiaries (collectively, the "Participating Employers"), as designated in the Plan document. Employees begin participating in the Plan upon employment. The Participating Employers are subsidiaries of Rio Tinto America Inc., which is an indirect, wholly owned subsidiary of Rio Tinto plc (the "Parent"). The Plan is intended to be a qualified retirement plan under the Internal Revenue Code ("IRC") and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended. The Company has appointed State Street Corporation to be the third party administrator of the Plan. The Plan is administered by the Rio Tinto America Inc. Benefits Governance Committee (the "Plan Administrator").

The Plan participates in the Rio Tinto America Master Retirement Trust ("Master Trust"), which was created to hold the qualified defined benefit investment assets of the Plan and other plans sponsored by the Parent and its affiliates. The Company has appointed State Street Bank and Trust Company ("Trustee"), to be the trustee of the Master Trust and to invest and manage assets of the related plans.

Pension benefits: Participants are eligible for monthly benefit payments upon reaching normal retirement age. Normal retirement is the earlier of attaining age 65 and attainment of 5th anniversary of original date of hire or attainment of 70th birthday, or 30 years of continuous service. Pension payments are calculated using continuous years of service. Participants terminating employment in years 2010 through 2012 receive \$42 a month per continuous years of service; participants terminating employment between the years 2013 and 2015 receive \$44 a month per continuous years of service (except for Kennecott Barney's Canyon Mining Company participants who received either \$35, \$36.50 or \$38 for under 15 years of service, 15-30 years of service, or over 30 years of service, respectively); and participants terminating employment after 2015 receive \$47 a month per continuous years of service.

The normal forms of retirement benefits available under the Plan are a single life annuity for a single participant or, for a married participant, a qualified 50 percent joint and survivor annuity. Participants will receive a lump-sum distribution in the event that the actuarial present value of the participant's entire vested benefit is \$1,000 or less. An early retirement benefit is available after attainment of age 60 and completion of between 10 and 30 years of continuous service.

A participant vests fully in the plan benefits after five years of continuous service with the Participating Employers or upon termination of the Plan.

Termination of the Plan: Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits which former participants or their beneficiaries have been receiving for at least three years, or employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit which was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit which would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (vested benefits not insured by the PBGC).
- d. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The accompanying financial statements are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires plan management to make estimates and assumptions which affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would be material to the financial statements.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Risks and uncertainties: The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, currency exchange rate, and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near-term and such changes could materially affect the amounts reported in the 2015 statement of net assets available for benefits.

The Master Trust invests in securities with contractual cash flows, such as credit default and interest rate swaps. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, delinquencies and/or defaults, and may be adversely affected by a shift in the market's perception of the issuers and changes in interest rates.

Investment valuation and income recognition: Investments are reported at fair value. Fair value is the price which would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Rio Tinto America Inc. Pension Investment Committee ("Investment Committee") determines the Plan's valuation policies, utilizing information provided by the investment advisors and Trustee. See Note 6 for a discussion of fair value measurements.

Interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date. Purchases and sales of investments are recorded on a trade-date basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Valuation of investment in Master Trust: The Master Trust is a multiple-plan trust, ownership of which is divided among the plans based on allocated units of participation. Each participation unit has a value equal to the total fair value of the Master Trust's net assets divided by the total participation units outstanding.

The Plan has an undivided interest in the Master Trust's underlying investments. The Plan's investment in the Master Trust is stated at fair value. The Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust, plus actual contributions and allocated investment income (loss), less actual distributions and actual and allocated investment-related expenses. The net investment income (loss) and investment-related expenses attributable to the Master Trust, which are not plan-specific, are allocated by the Trustee to the Plan based on the Plan's pro rata share of each of the underlying assets of the Master Trust on a monthly basis. The Plan presents in the statements of changes in net assets available for benefits its interest in the net investment income or loss of the Master Trust, which consists of the realized gains or losses, unrealized appreciation or depreciation, interest, dividends of the Master Trust's investments, and allocated expenses.

Funding policy: The Company contributes to the Plan at such times and in such amounts as considered necessary so contributions are sufficient to provide benefits as actuarially calculated under the terms of the Plan. The Company's current funding policy is to meet the minimum funding standards prescribed by law.

Contributions to the Plan are designed to fund at least the minimum required contributions as specified by ERISA and determined under IRC section 430(a). The minimum contribution is determined as of the beginning of the plan year, and all contributions are discounted at the effective interest rate from the date funded to the beginning of the plan year. The Company may elect to use all or a portion of any funding standard carryover balance or prefunding balance to offset the minimum required contribution for a plan year depending on the Plan's funded status.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

The Plan is “not-at-risk” for 2015, thus allowing the use of a more favorable interest rate corridor in determining the minimum required contribution. Adjustment to the statutory interest rates specified under IRC §430 were first introduced by the Moving Ahead for Progress in the 21st Century Act (“MAP-21”) and subsequently modified by the Highway and Transportation Funding Act of 2014 (“HATFA”).

The Plan has currently met all minimum funding requirements. Under the law, the minimum required contribution for the 2015 and 2014 plan years, respectively, was \$0 and \$4,265,333. The minimum required contribution was satisfied in each plan year with a combination of cash contribution and application of prefunding balances. These amounts totaled \$29,100,000 and \$4,349,929 for the 2015 and 2014 plan years, respectively.

Benefit restrictions under IRC section 436 depend on the Plan’s Adjusted Funding Target Attainment Percentage (“AFTAP”). For 2015, the Plan’s AFTAP was 104.27 percent. As this exceeds 90 percent and the plan sponsor is not in bankruptcy there are no restrictions on amendments increasing benefits, accelerated payments, or future accruals.

Payment of benefits: Benefits are recorded when paid by the Plan.

Administrative expenses: The Company pays a portion of the costs and expenses incurred in administering the Plan, with the Plan paying the remaining costs and expenses. The Company provides accounting and other services for the Plan at no cost to the Plan. Expenses paid directly by the Company are excluded from these financial statements, unless reimbursed by the Plan.

Tax status: The Internal Revenue Service has determined and informed the Company by a letter dated April 2, 2014, the Plan and the Master Trust are designed in accordance with the applicable requirements of the IRC. The Plan has been amended since receiving the determination letter; however, the Plan Administrator believes the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore believes that the Plan and the Master Trust are tax-exempt.

The Plan Administrator has evaluated the Plan’s tax positions and concluded that the Plan had taken no uncertain tax positions which would require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax years in progress.

Subsequent events: The Plan Administrator evaluated subsequent events and transactions through October 5, 2016, the date which the financial statements were available to be issued.

Note 2. Summary of Significant Accounting Policies (Continued)

New accounting pronouncements: In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-07 which provides new guidance under Topic 820, *Fair Value Measurements, Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent)*. The update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value ("NAV") per share as a practical expedient. The update also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the NAV per share as a practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. This update is effective for all non-public entities for fiscal years beginning after December 15, 2016 and must be applied retrospectively with early adoption permitted. Management has elected to adopt ASU 2015-07 for the 2015 plan year, and has therefore removed investments for which fair value is measured using NAV as a practical expedient from the fair value hierarchy table (see Note 6).

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Parts I and III are not applicable to the Plan. Part II eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Parts I and II are to be applied retrospectively. Management has elected to adopt Part II early. Accordingly, the amendment was retrospectively applied, resulting in the removal of the disclosures of individual investments that represent five percent or more of net assets available for benefits; the presentation of the net appreciation or depreciation in fair value of investments in total versus disaggregating by general type; and the presentation of investments that are measured at fair value by general type versus disaggregating by nature, characteristics and risks. Adoption of these pronouncements did not have a material impact on the Plan's financial statements.

Note 3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees with vested rights or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service rendered prior to the valuation date.

The actuarial present value of accumulated plan benefits was calculated by consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected future payment dates.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial valuation was done by using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2014, are presented from information provided by the actuary as of January 1, 2015. There has been no significant change in the Plan's provisions or coverage from December 31, 2014, to January 1, 2015.

The more significant assumptions underlying the actuarial computations as of December 31, 2014, are as follows:

Investment return	6.50% per annum
Mortality table used	RP2014 with generational mortality projected by Scale MP2015 weighted 120% for males and 145% for females
Retirement rates and average retirement age	Rates increasing from 3% to 100% between ages 50 and 70, and an average retirement age of 62 for active and terminated vested participants
Withdrawal rates	Rates for pre-retirement ages that vary by age and gender

The foregoing actuarial assumptions are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2014, is summarized as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:	
Participants currently receiving benefits	\$ 200,228,253
Other participants	52,017,825
	<u>252,246,078</u>
Nonvested benefits	6,035,211
Total actuarial present value of accumulated plan benefits, at December 31, 2014	<u><u>\$ 258,281,289</u></u>

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

Below is a summary of significant changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2014:

Actuarial present value of accumulated plan benefits, at beginning of year	\$ 249,260,331
Increase (decrease) during the year attributable to:	
Benefits paid	(20,136,962)
Interest accumulation	16,754,572
Change in actuarial assumptions*	10,778,920
Benefits accumulated and experience gains and losses	1,624,428
Net change	9,020,958
Actuarial present value of accumulated plan benefits, at end of year	\$ 258,281,289

*The most significant change in actuarial assumptions were a change in the interest rate from 7.00 percent to 6.50 percent; a change in mortality assumption from the RP2014 mortality table with generational mortality projected by Scale MP2014, weighted by 120 percent for males and 145 percent for females to the RP2014 mortality table with generational mortality projected by Scale MP2015, weighted by 120 percent for males and 145 percent for females; and a change in the assumed inflation rate from 2.30 percent to 2.10 percent.

Note 4. Information Certified or Provided by State Street

The following is a summary of the Plan's asset information as of December 31, 2015 and 2014, and for the years then ended, included throughout the Plan's financial statements, which were prepared by or derived from information provided by the Trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the Trustee that the information provided to the Plan Administrator by the Trustee related to the following assets is correct and complete to the best of their knowledge and belief. Accordingly, as permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements related to the following assets:

The Plan's interest in and the investment results of the Master Trust as presented above do not reflect an increase in the value of partnerships/joint ventures/real estate investments and certain accrued Master Trust expenses.

Note 5. Interest in Master Trust

The Plan participates in the Master Trust as permitted by the Plan document and Master Trust agreement. The Plan has an undivided interest of 16.8 percent and 16.3 percent in the net assets of the Master Trust as of December 31, 2015 and 2014, respectively.

The Master Trust financial information disclosed below and in Note 6 represents 100 percent of the Master Trust net assets and the related changes in net assets in which the Plan has an undivided interest as of and for the years ended December 31, 2015 and 2014.

Note 6. Fair Value Measurements

Accounting guidance provides the framework for measuring fair value. That framework provides a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include quoted market prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets within the Master Trust measured at fair value. There have been no significant changes in the methodologies used at December 31, 2015 and 2014.

Fixed-income securities: Fixed-income securities consist of U.S. and foreign government securities and corporate and other obligations. These securities are valued based on pricing matrices or models from pricing vendors used by the Trustee. Commingled funds are valued based on the NAV of units held at year-end as provided by the fund administrator.

Common collective trusts: The common collective trusts are valued based on the NAV of units held at year-end as provided by the fund administrator. Generally, under ordinary market conditions, all common collective trust positions provide daily market liquidity to the Master Trust. Certain Master Trust-directed withdrawals may be subject to market value adjustments calculated in accordance with the provisions of the investment contracts.

Common and preferred stocks: Common and preferred stocks are valued based on the last sales price on the primary exchange.

Note 6. Fair Value Measurements (Continued)

Partnerships/joint ventures/real estate: Partnerships/joint ventures/real estate are valued based on the estimated fair value of the participation owned by the Master Trust as determined by the general partner or investment manager of the respective partnership. The NAV of the partnerships/joint ventures/real estate is based on the fair value of the underlying investments. The valuation inputs are derived primarily from audited financial statements and other financial data. Partnerships/joint ventures/real estate include 14 private equity funds which are comprised of limited partnerships that invest in private equity, both domestically and internationally. Certain of these investments are considered illiquid and are meant to be held for the life of the funds but, if necessary, sales can be arranged through the secondary market. Distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 14 years. Unfunded commitments of the Master Trust as of December 31, 2015 and 2014 approximate \$76 million and \$81 million, respectively, for these 14 funds.

Partnerships/joint ventures/real estate also include five investments in domestic and international real estate fund limited partnerships and one commingled real estate fund. The fair value of the limited partnerships is estimated using the NAV of the Master Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third-party appraisals. Certain of these investments are considered illiquid, but sales can be arranged on the secondary market. Distributions from each fund are received as income is generated through the investments and as the underlying assets of the funds are liquidated. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 10 years. Unfunded commitments of the Master Trust as of December 31, 2015 and 2014 approximate \$14 million and \$29 million, respectively, for these five investments. The commingled real estate fund is valued based on the NAV of units held at year-end as provided by the fund manager.

Interest-bearing cash and cash equivalents: Interest-bearing cash is valued at cost plus accrued income, which approximates fair value measured by similar assets in active markets.

Loans secured by mortgages: Loans secured by mortgages are valued on the basis of their principal and interest payments discounted at prevailing interest rates for similar investments.

Credit default and interest rate swaps: Credit default and interest rate swaps are valued based on pricing matrices or models from pricing vendors used by the Trustee. The net position is included with fixed-income securities-corporate bonds for purposes of the fair value measurement disclosures. See Note 8 for additional disclosures.

Note 6. Fair Value Measurements (Continued)

- (a) In accordance with Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefits.

The following table sets forth a summary of changes in fair value of the Master Trust's Level 3 investment assets for the years ended December 31, 2015 and 2014:

	Level 3 Assets	
	Partnerships/Joint Ventures/Real Estate	
	2015	2014
Balance, beginning of year	\$ 236,038,840	\$ 211,546,350
Realized gains/(losses)	9,552,245	11,635,988
Unrealized gains/(losses) relating to instruments still held at the reporting date	15,129,634	19,847,634
Sales	(401,858,477)	(299,963,780)
Purchases	387,576,112	292,972,648
Balance, end of year	\$ 246,438,354	\$ 236,038,840

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The Master Trust evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets. For the years ended December 31, 2015 and 2014, there were no transfers in or out of Levels 1, 2 or 3.

The Master Trust follows guidance on how entities should estimate fair value of certain alternative investments. The fair value of investments within the scope of the guidance can be determined using NAV per share as a practical expedient, when fair value is not readily determinable, unless it is probable the investment will be sold at something other than NAV.

Note 7. Party-in-Interest Transactions

The Master Trust invests in the following investments managed by the Trustee or affiliated companies that qualify as party-in-interest transactions:

	December 31	
	2015	2014
State Street Global Advisors Russell 1000 Index Fund	\$ 104,998,999	\$ 127,524,337

AXA Early Secondary Fund V	3,890,579	2,353,932
AXA Private Equity Fund II	709,604	1,086,613
State Street Corp	332,160	310,320

Fees paid by the Master Trust for investment-related expenses to the Trustee and affiliated companies amounted to approximately \$713,000 and \$554,000 for the years ended December 31, 2015 and 2014, respectively. Fees paid by the Master Trust or Plan for investment management services were included as a reduction of the return earned on each investment. Fees paid by the Plan for certain administrative functions performed by officers or employees of the Parent and affiliates amounted to approximately \$12,800 and \$9,800 for the years ended December 31, 2015 and 2014, respectively. Certain other administrative functions are performed by officers or employees of the Parent and affiliates, for which no compensation is received from the Plan.

These transactions are not, however, considered prohibited transactions under Section 408(b) of the ERISA regulations.

Note 8. Derivative Financial Instruments

As of December 31, 2015 and 2014, a fixed-income manager of the Master Trust utilizes derivative financial instruments consisting of credit default and interest rate swaps. This manager uses these financial instruments to manage exposure to interest rate and credit risks and to achieve the overall desired duration under the Master Trust's fixed-income mandate.

Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Master Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap, provided there is no credit event.

If a credit event occurs, as defined under the terms of that particular swap agreement, the Master Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligation or underlying securities comprising the referenced index or (ii) pay a net settlement in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 8. Derivative Financial Instruments (Continued)

The maximum potential amount of future payments (undiscounted) that the Master Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2015 and 2014, for which the Master Trust is a seller of protection, are disclosed below. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, up-front payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Master Trust for the same referenced entity or entities.

Interest rate swap agreements involve the exchange by the Master Trust with a counterparty of their respective commitments to pay or receive interest, e.g., an exchange of floating-rate payments for fixed-rate payments, with respect to the notional amount of principal. These swaps are used to adjust interest rate and yield curve exposure and substitute for physical securities. Long swap positions ("received fixed") increase exposure to long-term interest rates; short positions ("pay fixed") decrease exposure.

Notional amounts of all interest rate swap agreements outstanding as of December 31, 2015 and 2014, are disclosed below.

The notional values summarized below provide an indication of the extent of the Plan's involvement in such instruments. Notional amounts of derivative financial instruments do not necessarily represent amounts exchanged by parties and, therefore, are not a direct measure of the Plan's exposure from its use of derivatives. The net liability position of approximately \$1,560,000 and \$75,000 as of December 31, 2015 and 2014, respectively, is included in fixed income investments for purposes of the fair value measurement disclosures in Note 6.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption changes:

- A change in the assumed expenses payable from the trust from \$1,270,115 to \$1,558,807.
- A change in the funding asset return assumption from 6.90% to 7.00%.

These changes were made to better reflect anticipated plan experience. The non-prescribed assumption changes did not reduce the funding shortfall by more than \$5 million; as such, approval of the Commissioner is not required.

Total Benefit	<p>For an active participant, the benefit is an immediate annuity to the surviving spouse equal to 50% of the accrued normal retirement benefit.</p> <p>For terminated vested participants, the benefit is a deferred annuity to the surviving spouse equal to 55% of the monthly benefit the participant would have been entitled to had he terminated employment on the date of his death, survived to early retirement age, elected the 55% J&S option, and then died the following day.</p>
Normal Form of Benefit	Actuarially reduced 55% J&S annuity if married, otherwise straight life.
Optional Forms of Payment	<p>50%, 75%, or 100% joint and survivor annuities.</p> <p>These optional forms are based on the 1983 Group Annuity Mortality Table and 8.00% interest.</p>

Plan Changes Since the Prior Year

The funding valuation reflects the following plan change:

- Effective January 1, 2015 (adopted December 19, 2014), the accrued benefit multiplier was changed for active Barney's Canyon employees retiring or terminating on or after January 1, 2015. The multiplier was increased to \$44 per year of service, which is the same as the multiplier in effect for other KUCH employees.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

The enrolled actuary has changed from Scott Fullerton to Troy Ware due to an internal change in assignment at Aon Hewitt.
