SECTION VII

ACTUARIAL METHODS

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

SECTION VII

ACTUARIAL METHODS

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is equal to the Fair Market Value of Assets.

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

SECTION VII

ACTUARIAL METHODS

The Fair Market Value of Assets used for funds invested in the General Account of an Insurance Company is the stated contract value with a market value adjustment factor. This value is an estimate only and not the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute a final offer by Prudential or a final experience adjustment.

SECTION VII**ACTUARIAL METHODS**

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

SECTION VII

ACTUARIAL METHODS

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is equal to the Fair Market Value of Assets.

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

SECTION VII

ACTUARIAL METHODS

The Fair Market Value of Assets used for funds invested in the General Account of an Insurance Company is the stated contract value with a market value adjustment factor. This value is an estimate only and not the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute a final offer by Prudential or a final experience adjustment.

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 1: DESCRIPTION OF THE PLAN

The following description of the MW Manufacturers, Inc. Retirement Plan (the “Plan”) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan’s provisions.

General

The Plan is a noncontributory defined benefit pension plan which covers all hourly and salaried employees of MW Manufacturers, Inc. (the “Company”) who have reached the age of 21, and have completed one year of service with 1,000 hours. The Plan also covers individuals who formerly participated in the Pension Plan for Eligible Employees of Brown Moulding Co., Inc. or the Valley Recreation Products, Inc. Retirement Income Plan for Salaried and Sales Employees. The Plan participates in the Ply Gem Industries, Inc. Master Trust (the “Master Trust”). The Master Trust was formed to facilitate more cost-effective management of the investments of pension plans administered by Ply Gem Industries, Inc. Prudential Retirement Insurance and Annuity Company and Prudential Bank & Trust, F.S.B. serve as the Plan’s custodian and trustee. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

Effective October 31, 2004, the benefits for salaried participants in the Plan were frozen. No future benefits accrue after this date. Participants who are not fully vested at this date will continue to earn credit for vesting purposes as long as they are employed by the Company. Effective November 1, 2005, no new hourly members are allowed into the Plan. Effective November 15, 2013, no future benefits will accrue for hourly participants after December 31, 2013.

The Plan is administered by the Company’s Benefits Committee (the “Committee”). The Committee has overall responsibility for the operation and administration of the Plan. The Committee determines the appropriateness of the Plan’s investments and monitors investment performance.

Vesting

Participants are fully vested after five years of service.

Pension Benefits

Monthly pension benefits for participants retiring at age 65 are based on the participant’s average compensation and/or years of service. The Plan provides for early retirement at age 60 for participants with ten or more years of service.

MW MANUFACTURERS, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 1: DESCRIPTION OF THE PLAN (concluded)

Upon retirement, participants can elect to receive benefits in the form of monthly payments or in certain instances, a lump-sum cash payment. The Plan allows for early distribution of benefits in the event a participant's accrued benefit is less than \$1,000.

Death and Disability Benefits

If an active participant dies after completing a minimum of ten years of vesting service, the participant's surviving spouse is entitled to a spouse's annuity benefit beginning the later of the first day of the month following the participant's death or the first day of the month following the earliest date the participant would have been able to receive the benefit had the participant lived.

Participants employed by the Company and former participants in the Pension Plan for Eligible Employees of Brown Moulding Co., Inc. who become permanently disabled are entitled to receive disability retirement benefits with the accrued benefit earned at the disability date, payable immediately. Former participants of the Valley Recreation Products, Inc. Retirement Income Plan for Salaried and Sales Employees who become permanently disabled are entitled to the accrued benefit earned at the disability date, payable immediately after both attaining age 55 and completing 15 or more years of vesting service.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Benefit payments to participants are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits as of January 1, 2015, and changes therein. Actual results could differ from those estimates and assumptions.

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Within the Master Trust, purchases and sales of securities are recorded on a trade-date basis, interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date. The Plan's interest in the Master Trust's income and loss includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided in the plan document. Expenses of maintaining the Plan that are paid directly by the Company are excluded from these financial statements. Trustee fees paid by the Plan are included in administrative expenses in these financial statements. Certain investment related expenses are included in plan interest in the Master Trust's investment income or loss presented in the accompanying statements of changes in net assets available for benefits.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near-term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term could be material to the financial statements.

MW MANUFACTURERS, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Actuarial Present Value of Accumulated Plan Benefits

Accumulated Plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service that employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The actuarial present value of accumulated Plan benefits is determined by Prudential Financial, an independent consulting actuary, and is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts of interest) and the probability of payment (by means of decrements such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used as of January 1, 2015, are summarized as follows:

Discount rate on obligations - 7% as of January 1, 2015

Rate of return - 7% as of January 1, 2015

Mortality table - The Internal Revenue Service (the "IRS") 2015 Static Mortality Table with RP-2014 scale

Retirement age - For ages 60 - 64, probability of annual retirement rates range from 5% - 20%; age 65 is 100%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

As of January 1, 2015, the accumulated Plan benefits were as follows:

Actuarial present value of accumulated Plan benefits:

Vested benefits:

Participants and/or beneficiaries currently receiving benefits	\$ 8,632,436
Active participants	3,278,929
Participants with deferred benefits	7,092,437
Nonvested benefits	18,536

Total actuarial present value of accumulated Plan benefits	<u>\$ 19,022,338</u>
--	----------------------

MW MANUFACTURERS, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

Changes in accumulated Plan benefits for the year ending January 1, 2015, are summarized as follows:

Actuarial present value of accumulated Plan benefits as of beginning of year	<u>\$ 17,903,938</u>
Changes during the year attributable to:	
Actual benefits paid	(1,218,994)
Interest	1,211,332
Benefits accumulated and actuarial gain	(38,895)
Assumption change	<u>1,164,957</u>
Net increase	<u>1,118,400</u>
Actuarial present value of accumulated Plan benefits as of end of year	<u><u>\$ 19,022,338</u></u>

The assumption change of \$1,164,957 is due to a change in the mortality tables. In October 2014, the Society of Actuaries published the RP-2014 Mortality Tables, which were an update from the RP-2000 Mortality Tables. The updates to the mortality tables increased the lifetime expectancy of plan participants, which in turn increased a defined benefit plan's total expected benefit payments and lengthened the Plan's time horizon.

The other changes in accumulated Plan benefits represent normal operation of the pension plan. Changes consist primarily of those items of Plan experience that are not associated with asset performance.

NOTE 3: FUNDING POLICY

The Company's policy is to fund at least the actuarially computed minimum funding requirements of ERISA each year. The Plan met the ERISA minimum funding requirements for 2015 and 2014.

MW MANUFACTURERS, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2015 and 2014

NOTE 4: PLAN TERMINATION

Although the Company has not expressed intent to terminate the Plan, it reserves that right as provided in the Plan agreement. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the Plan's provisions in effect at any time during the five years preceding plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC") (a United States Government agency) up to the applicable limitations.
4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions.

However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit projections is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2015, that ceiling is \$5,011 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

NOTE 5: INFORMATION CERTIFIED BY THE TRUSTEE AND CUSTODIAN

All investment information disclosed in the accompanying financial statements and supplemental schedule including investments held by the Master Trust as of December 31, 2015 and 2014, and investment income or loss for 2015 and 2014 was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the trustee and custodian.

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information included in the financial statements and supplemental schedule.

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and one other Ply Gem Industries, Inc. sponsored retirement plan. As of December 31, 2015 and 2014, the Plan's interest in the net assets of the Master Trust was approximately 55%. Investment income or loss and administrative expenses relating to the Master Trust are allocated to the individual plans in proportion to the value of each plan's participation as of the last day of each quarter.

Refer to Note 6 for a description of the valuation methodologies used.

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information included in the financial statements and supplemental schedule.

NOTE 6: FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") 820, *Fair Value Measurement* ("FASB ASC 820"), provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820's framework are described as follows:

NOTE 6: FAIR VALUE MEASUREMENTS (continued)

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of an input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of the observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for investments measured at fair value. There have been no changes in the methodologies used as of December 31, 2015 and 2014.

Mutual funds - Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Pooled separate accounts - Valued at net asset value ("NAV") based on the market value of the underlying investments, such as equities, preferred stock, bonds, real estate, and mutual funds. The majority of the underlying securities have observable level 1 quoted pricing inputs. While the underlying asset values are quoted prices, unit values of a pooled separate account are determined by dividing the value of each fund's net assets by the total number of units outstanding on the valuation date. The valuation of fund units is published daily and is the basis for current transactions.

NOTE 7: RELATED PARTY TRANSACTIONS AND PARTY IN INTEREST TRANSACTIONS

The Plan invests in certain funds managed by the custodian and trustee. Therefore, transactions related to these funds qualify as party in interest transactions that are allowable under ERISA. Fees incurred by the Plan for investment management services are included in plan interest in Master Trust investment income or loss, as they are paid through revenue sharing, rather than direct payment. During 2015 and 2014, the Plan made direct payments to the trustee totaling \$297,640 and \$72,128, which were not covered by revenue sharing. The Company pays directly any other fees related to the Plan's operations.

NOTE 8: INCOME TAX STATUS

The Plan obtained its latest determination letter dated November 18, 2009, in which the IRS stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (“IRC”). The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan’s financial statements.

U.S. GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by federal and state tax authorities.

NOTE 9: SUBSEQUENT EVENTS

The plan administrator has evaluated subsequent events through October 13, 2016, the date these financial statements were available for issuance, and determined that there were no events which have occurred that would require adjustment to or disclosure in these financial statements.
