SCHEDULE SB ATTACHMENTS

Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable as described above.
Methods	
Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immidiation preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits not valued	We believe that we have reflected all significant plan provisions in this valuation.

Assumptions Rationale – Significant Economic Assumptions for Contributions

Interest rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash balance interest crediting rate	<p><i>FRZ (not Duke Non-Union):</i> The plan credits interest to cash balance accounts using the 1-year Treasury Bill plus 100 bps.</p> <p><i>FRZ Duke:</i> The plan credits interest to the variable rate cash balance accounts using the 30-year treasury rate, but with a minimum interest credit rate of 4% and a maximum of 9%. Interest credits for the fixed rate account are equal to 4.0%.</p> <p>Interest crediting rate assumption is long-term assumption based on consensus economic forecasts for 30-year treasury rates adjusted to reflect current conditions, minimum interest credits under the plan and the interest rate basis defined under the plan, if different.</p> <p>We believe that the selected assumptions do not significantly conflict with what would be reasonable based on future expectations consistent with other economic assumptions used, other than the interest rate.</p>
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are the same as described above for the interest rate.
Administrative expenses	Administrative expenses are estimated by determining the average expenses paid from the trust over the preceding 3 years.

Assumptions Rationale – Significant Demographic Assumptions

Healthy and Disabled Mortality	As prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2012 combined with best estimates for future experience taking into account whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2012 combined with best estimates for future experience taking into account whether any conditions have changed that would be expected to produce different results in the future.
Deferred vested benefit commencement age for participants	<p>Deferred vested participants with a lump sum option are assumed to take their lump sum payment within four years of the valuation date based on a best estimate of expected future experience.</p> <p>All other deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.</p>
Percent married	The assumed percentage married is based on general population statistics with adjustments as appropriate based on how expected future experience will vary amongst the population cohorts.
Spouse age	The assumed age difference for spouses is based on general population statistics on the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Optional Forms of Retirement Income in Lieu of Normal Form

The plan provides for optional monthly payment forms. Actuarial equivalence for this purpose is based on 7% interest rate and the 1983 Blended Group Annuity Mortality Table. Actuarial equivalence for purposes of converting the Cash Balance Account to a Single Life Annuity is based on the applicable interest rate and applicable mortality table as determined in accordance with Code Section 417(e)(3) with the applicable phase-in percentages to the new PPA interest rate basis. The applicable interest rate for a given plan year is based on the month of November (the lookback month) that precedes the Plan Year (the stability period) in which the distribution is made.

The Normal Form of payment for married participants is a Qualified Joint & Survivor Annuity, and for a single participant, it is a Single Life Annuity. In lieu of the Normal Form of payment, a participant may elect the following optional forms of payment:

- Single Life Annuity
- A Qualified Joint and Survivor benefit payable as long as the participant is alive with either 50%, 75% or 100% of such amount being payable during the lifetime of the participant's spouse upon the death of the participant.
- Lump Sum payment

Benefits Paid Upon the Following Events

Normal Retirement

Participant's retirement formula is either based on a final average pay formula ("Traditional Program"), a cash balance plan account ("Cash Balance Program"), or a combination of both ("Traditional Choice" and "Traditional Frozen").

Former TCSR plan participants were moved to the Duke cash balance formula effective January 1, 2010. These participants will have their December 31, 2009 final average pay benefit indexed with pay and will be able to elect to receive their final average pay benefit as a lump sum. These participants are included as part of the Traditional Choice group in the descriptions provided in this report.

Traditional Plan participants were given the choice to stay in the Traditional Program and continue to accrue benefits or to enter the Duke Cash Balance Program with a \$0 opening account balance and a soft freeze (frozen credited service and increasing final average pay) on their Traditional Benefit effective April 1, 2007. Effective January 1, 2011, all Traditional Plan participants were automatically moved to the Duke Cash Balance Program for future accruals with a hard freeze on their Traditional Program benefit.

Effective January 1, 2007, the plan was amended to adopt the Duke Energy Corporation cash balance formula for new hires and for active Cinergy employees previously in the Balanced and Investor Programs. Certain prior accrued benefits are guaranteed as minimum benefits.

Employees commencing participation after January 1, 2003 and before January 1, 2007 were given the choice between the Balanced and Investor Programs. On January 1, 2003 the plan was amended to allow all existing participants a one-time choice between the Traditional Program, the Balanced Program, and the Investor Program.

Duke Cash Balance Formula A cash balance benefit with monthly pay credits based on the following schedule:

Pay Credit by Points for Duke Energy Corporation Cash Balance Formula

Points	Contribution Credit Percentage
<35	4%, plus 4% of pay over Social Security Wage Base
35 – 49	5%, plus 4% of pay over Social Security Wage Base
50 – 64	6%, plus 4% of pay over Social Security Wage Base
>64	7%, plus 4% of pay over Social Security Wage Base

A participant's points as of any January 1 (or date of participation) equal the sum of the attained age and creditable service on such date, with the sum truncated to drop less than full points.

The monthly interest adjustment is a percentage increase in the account balance. For balances accrued through December 31, 2012, the rate of monthly increase is the average yield on 30-year Treasury bonds for the end of the third full business week of the month prior to the beginning of the calendar quarter in which the particular month occurs. The interest factor will not be greater than an annual percentage rate of 9% and not less than 4%. For pay credits accrued on or after January 1, 2013, the rate of monthly interest credit is fixed based on our annual percentage rate of 4%.

Traditional Program Effective January 1, 2007, the plan was amended to adopt a minimum benefit formula on benefit accruals beginning January 1, 2005. The benefit is the greater of Formula A or Formula B.

Formula A: 1.10% of FAP plus 0.50% of FAP in excess of Covered Compensation multiplied by service (maximum 35 years); plus 1.55% of FAP multiplied by service over 35 years.

Formula B: Less of 1.12% of FAP plus 0.50% of FAP in excess of Covered Compensation multiplied by service (maximum 35 years) or 1.163% of FAP multiplied by service (maximum 35 years); plus 1.492% of FAP multiplied by service over 35 years.
