EFW INC. CONSOLIDATED RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS

December 31, 2015 and 2014

A. Description of the Plan

General

The following brief description of the EFW Inc. Consolidated Retirement Plan (the “Plan”) is provided for general information purposes only. The Plan is sponsored by EFW Inc. (the “Company”). Participants should refer to the Plan document for more complete information.

The Plan was effective February 15, 1993, restated January 1, 2012, and is a non-contributory defined benefit plan covering all employees of the Company who have completed one year of service and have attained age 21. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

In August 2009, the Compensation Committee of the Board of Directors of Elbit Systems US Corp. (“Elbit Systems US”), the parent company of the Company, approved a freeze of the Plan effective January 1, 2010. The “soft freeze” of the Plan prohibits non-represented employees that are hired on or after the freeze date from being added to the Plan. Existing participants will continue to accrue benefits as defined under the Plan’s provisions based on years of service and Plan provisions in effect.

Contributions

The Company contributes amounts as necessary to provide assets sufficient to meet the benefits expected to be paid to Plan participants, conditioned upon their deductibility under the Internal Revenue Code (the “Code”) Section 404. The Company will also make minimum funding contributions, as calculated by the Plan’s actuary.

Plan Expenses

Employees of the Company perform certain administrative functions of the Plan with no compensation from the Plan. In accordance with Plan provisions, the Company and the Plan both pay administrative expenses.

Plan Benefits

Participants accrue benefits as defined under the Plan’s provisions based on years of service and Plan provisions in effect as of the date of determination.

B. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“GAAP”).

B. Summary of Significant Accounting Policies – continued

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. Refer to Note C for significant assumptions used in determining the Plan's present value of accumulated plan benefits.

Investments

The investments of the Plan are stated at fair value as of the end of the year and are generally subject to market or credit risks customarily associated with equity and fixed income investments. Fair values are determined in accordance with GAAP, which defines fair value, establishes a framework for measuring fair value, and requires certain disclosures about assets and liabilities measured at fair value. See Note D for information related to the Plan's valuation methodologies.

Purchases and sales of securities are recorded on a trade-date basis. The net realized and unrealized gains on investments include realized gains and losses on sales of investments during the year and unrealized increases or decreases in the market value of investments held at year end. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are estimated future periodic payments, including lump-sum distributions attributable under the Plan's provisions to services rendered by employees through the valuation date. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries and present employees or their beneficiaries. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included, to the extent they are deemed attributable to employee service rendered through the valuation date.

B. Summary of Significant Accounting Policies – continued

New Accounting Pronouncements

In July 2015, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Part II eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. Parts I and III are not applicable to the Plan. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Part II is to be applied retrospectively. Plan management has elected to adopt Part II for the year beginning January 1, 2015 and certain notes within the financial statements have been removed or adjusted to reflect the amendments described in Parts II of the standard.

C. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan’s independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by Plan participants to reflect the time value of money and the probability of payment (such as for death, disability, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of the accumulated plan benefits information based on a beginning of the year valuation is as follows:

	January 1,	
	2015	2014
Vested benefits:		
Participants currently receiving payments	\$ 28,195,649	\$ 22,276,897
Other vested participants	55,514,376	57,546,550
Total vested benefits	83,710,025	79,823,447
Non-vested benefits	434,916	773,482
Total actuarial present value of accumulated plan benefits	<u>\$ 84,144,941</u>	<u>\$ 80,596,929</u>

EFW INC. CONSOLIDATED RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS *(continued)*

C. Actuarial Present Value of Accumulated Plan Benefits – continued

The following is a summary of the changes in the actuarial present value of accumulated plan benefits between the applicable benefit information dates:

	Year Ended January 1,	
	2015	2014
Actuarial present value of accumulated plan benefits at beginning of the year	\$ 80,596,929	\$ 74,948,073
Changes during the year:		
Benefits accumulated and actuarial gains and losses	4,494,475	4,602,297
Changes in actuarial assumptions	(3,588,128)	(1,626,055)
Increase for interest due to decrease in the discount period	5,173,429	4,696,959
Benefits paid	(2,531,764)	(2,024,345)
Actuarial present value of accumulated plan benefits at end of the year	<u>\$ 84,144,941</u>	<u>\$ 80,596,929</u>

The actuarial cost method used was the traditional unit credit actuarial cost method. For 2015 and 2014, the compensation increase assumption was 2.4% and the social security taxable wages base annual increase assumption was 3.0% per annum. The more significant assumptions underlying the actuarial computations as of January 1, 2015 and 2014 for the respective actuarial valuations are as follows:

	2015	2014
Interest discount rate	4.480%	4.440%
Retirement age	From age 55 to 70	From age 55 to 65

The actuarial assumptions related to the mortality basis are based on RP-2000 Combined (Male/Female) Regulation Section 1.430(h)(3) for 2015 and 2014.

The change in the actuarial assumptions was primarily due to the following: (1) an increase in the Plan's effective interest rate from 4.440% in 2014 to 4.480% in 2015; and (2) changes to the mortality tables from the 2014 Internal Revenue Service ("IRS") prescribed tables to the 2015 IRS prescribed tables.

These actuarial assumptions are based on the presumption that the Plan will continue. If the Company terminates the Plan at some future date, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

The Plan is funded by annual contributions from the Company (based on actuarial computations described above) and is non-contributory for participants. The Plan's actuary has determined that the minimum required contribution was \$5,798,332 and \$5,784,168 for the years ended December 31, 2015 or 2014, respectively; however, the Company made contributions of \$6,067,933 and \$6,028,857 for 2015 and 2014, respectively.

D. Fair Value Measurements

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a three-tier hierarchy that is used to identify assets and liabilities measured at fair value. The hierarchy focuses on the inputs used to measure fair value and requires that the lowest level input be used. The three levels defined are as follows:

Level 1 – Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date. The fair values of the mutual funds, common stock, and money market fund are considered Level 1, as the investments have readily available quoted prices in active markets.

Level 2 – Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for assets or liabilities through correlation with market data at the measurement date and for the duration of the instruments' anticipated lives.

Level 3 – Inputs reflect the best estimate of what market participants would use in pricing assets or liabilities at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

The Plan held no Level 2 or 3 investments as of December 31, 2015 or 2014.

E. Party-in-Interest Transactions

Party-in-interest transactions include those with fiduciaries or employees of the Plan, any person who provides services to the Plan, an employer whose employees are covered by the Plan, an employee organization whose members are covered by the Plan, a person who owns 50% or more of such an employer or employee organization, or relatives of such persons.

The Plan had approximately 4% and 3% of Plan assets invested in the common stock of Elbit Systems, Ltd., the parent company of EFW Inc., as of December 31, 2015 and 2014, respectively. In addition, certain Plan investments were comprised of shares of investment funds managed by Bank of America, N.A. (the "Trustee"). Transactions in such investments qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules.

F. Plan Termination

While the Company has not expressed any intent to permanently discontinue its contributions, it is free to do so under the provisions of the Plan at any time, subject to the provisions of ERISA. Should the Company terminate the Plan at some future time, its net assets will generally not be available on a pro-rata basis to provide participant benefits.

EFW INC. CONSOLIDATED RETIREMENT PLAN
NOTES TO FINANCIAL STATEMENTS (continued)

F. Plan Termination – continued

Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at such time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC's guarantee, while other benefits may not be provided for at all.

G. Information Certified by the Trustee

The Plan administrator elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator limited auditing procedures with respect to the investment information certified by the Trustee, which included total investments as of December 31, 2015 and 2014, the total investment income (loss) for the years ended December 31, 2015 and 2014, and all information included in the supplemental schedules.

H. Income Tax Status

The Plan utilizes the Angell Pension Group Inc. Volume Submitter Defined Benefit Plan which has a favorable opinion letter from the IRS. This opinion letter states that the form of the prototype plan is acceptable under Section 401 of the Code. The Company may rely on this letter with respect to the qualification of the Plan under Code Section 401(a) with certain limitations. The Plan has been amended; however, the Company believes that the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan was qualified and the related trust was tax-exempt as of the financial statement date.

GAAP requires management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2015, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

I. Subsequent Events

In preparing the accompanying financial statements, management has evaluated all subsequent events and transactions for potential recognition or disclosure through September 29, 2016, the date the financial statements were available for issuance.

SECTION XII

ACTUARIAL COST METHODS

Traditional Unit Credit

The actuarial cost method used in the development of the minimum contribution was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

SECTION XIII

ACTUARIAL METHODS AND ASSUMPTIONS

A summary of the actuarial assumptions used in the valuation is presented below:

Valuation Assets – Average of fair market value of plan assets as of the current valuation date and as of the valuation date for each of the prior two plan years adjusted for contributions and distributions from the prior period to the current valuation date. The resulting amount is restricted to fall within 90% to 110% of the fair market value of assets [IRC Sec. 430(g)(3)(B)]. This method is restricted such that the expected earnings are limited by Internal Revenue Code Regulations. Therefore, the resulting asset value may tend to be less than the fair market value of assets over a long period of time.

SELECTION OF ACTUARIAL ASSUMPTIONS

Assumption	Entity Who Selects Assumption	Basis for Assumption Selection	Change in Assumption
Segment Interest Rates for Minimum Contribution	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(2)(C))	"Chosen by 3rd party." The Funding Target Liability for Minimum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 4 month look back for determining these rates each Plan Year. These segment rates are adjusted by the applicable percentage of the 25-year average segment rates.	The segment 1, segment 2 and segment 3 interest rates changed from 4.99%, 6.32%, and 6.99%, respectively as of the prior measurement date, January 1, 2014, to reflect the current prescribed rates. This change increased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2015, by 2.40%.
Segment Interest Rates for Maximum Contribution	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(2)(C))	"Chosen by 3rd party." The Funding Target Liability for Maximum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 4 month look back for determining these rates each Plan Year.	The segment 1, segment 2 and segment 3 interest rates changed from 1.37%, 4.05%, and 5.06%, respectively as of the prior measurement date, January 1, 2014, to reflect the current prescribed rates. This change decreased the Funding Target Liability for Maximum Contribution as of the current measurement date, January 1, 2015, by 0.49%.
ASC 960 Interest Rate	EFW Inc.	"Chosen by plan sponsor." The ASC 960 interest rate is developed based on the allocation of the Plan's assets by investment class and the capital market outlook for each investment class. This information is provided by the Plan's investment advisor.	The ASC 960 interest rate was changed from 6.53% as of the prior measurement date, January 1, 2014. For the prior measurement date the ASC 960 interest rate was set equal to the effective interest rate for the minimum contribution. This change decreased the Actuarial Present Value of Accrued Benefits as of the current measurement date, January 1, 2015, by 8.09%.
Inflation Rate	The Angell Pension Group, Inc.	Long-term CPI-U experience.	None
Salary Scale	The Angell Pension Group, Inc.	This assumption was set based on a review of experience under the Plan and the Plan Sponsor's expectations of future salary increases.	None
Taxable Wage Base Increase	The Angell Pension Group, Inc.	Long-term CPI-U experience.	None
IRC 415 and 401(a)(17) Limit Projection	N/A	Projected increases to benefit and pay limits are not applicable under the Actuarial Funding Method used for the Funding Target Liability and the ASC 960 Actuarial Present Value of Accrued Benefits.	None
Pre-Retirement Mortality	Prescribed by Internal Revenue Service (IRC Sec. 430(h)(3))	"Chosen by 3rd party." The IRS prescribes by regulation mortality tables to be used in determining minimum and maximum contributions. Those tables are based on the actual experience of pension plans and projected trends in that experience. Current prescribed tables are based on the RP-2000 Mortality Tables Report, adjusted for mortality improvement using Projection Scale AA.	The mortality tables changed from the 2014 IRS Non-annuitant Mortality (M/F) tables as of the prior measurement date, January 1, 2014, to reflect the current prescribed tables. This change, together with the change in post-retirement mortality, increased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2015, by 0.19%.

SELECTION OF ACTUARIAL ASSUMPTIONS

Assumption	Entity Who Selects Assumption	Basis for Assumption Selection	Change in Assumption
Post-Retirement Mortality	2015 IRS Annuitant Mortality (M/F)	"Chosen by 3rd party." The IRS prescribes by regulation mortality tables to be used in determining minimum and maximum contributions. Those tables are based on the actual experience of pension plans and projected trends in that experience. Current prescribed tables are based on the RP-2000 Mortality Tables Report, adjusted for mortality improvement using Projection Scale AA.	The mortality tables changed from the 2014 IRS Annuitant Mortality (M/F) tables as of the prior measurement date, January 1, 2014, to reflect the current prescribed tables. This change, together with the change in pre-retirement mortality, increased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2015, by 0.19%.
Pre-Retirement Mortality for ASC 960	RP-2014 Employee with MP-2014 Generational Projection (M/F); base tables are blended 70% White Collar & 30% Blue Collar	"Chosen by plan sponsor." The Society of Actuaries published a study of retirement experience in October, 2014. The RP-2014 tables presented in the study represent the most current and complete benchmarks of U.S. private pension plan mortality experience. These tables include generational projections of mortality improvement.	The mortality tables changed from the 2014 IRS Non-annuitant Mortality (M/F) tables as of the prior measurement date, January 1, 2014. The change was made to reflect the best estimate of future experience under the plan. This change, together with the change in post-retirement mortality, increased the Actuarial Present Value of Accrued Benefits as of the current measurement date, January 1, 2015, by 7.40%.
Post-Retirement Mortality for ASC 960	RP-2014 Healthy Annuitant with MP-2014 Generational Projection (M/F); base tables are blended 70% White Collar & 30% Blue Collar	"Chosen by plan sponsor." The Society of Actuaries published a study of retirement experience in October, 2014. The RP-2014 tables presented in the study represent the most current and complete benchmarks of U.S. private pension plan mortality experience. These tables include generational projections of mortality improvement.	The mortality tables changed from the 2014 IRS Annuitant Mortality (M/F) tables as of the prior measurement date, January 1, 2014. The change was made to reflect the best estimate of future experience under the plan. This change, together with the change in pre-retirement mortality, increased the Actuarial Present Value of Accrued Benefits as of the current measurement date, January 1, 2015, by 7.40%.
Disability Mortality	2015 IRS Annuitant Mortality (M/F)	The Disability Mortality table is the same as the Post-Retirement Mortality table.	The mortality tables changed from the 2014 IRS Annuitant Mortality (M/F) tables as of the prior measurement date, January 1, 2014, to reflect the current prescribed tables. This change had no impact on plan liabilities as of the current measurement date, January 1, 2015, because there are currently no disabled plan participants.
Disability Rates	None	The incidence of disability under the Plan is negligible.	None
Withdrawal Rates	2003 Society of Actuaries Pension Plan Turnover - Basic Age Table	Because of the relatively small number of Plan participants, the withdrawal experience under the Plan is not credible for establishing Plan-specific withdrawal rates. The Society of Actuaries table was developed for such plans, and a review of experience under the Plan indicated that this table is a good estimate of future experience under the Plan.	The withdrawal rates were changed from rates that varied from 8% at age 20 to 1.2% at age 45 as of the prior measurement date, January 1, 2014. The change was made to reflect the best estimate of future experience under the plan. This change decreased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2015, by 0.74%.

The change was made to reflect the best estimate of future experience under the plan. This change decreased the Funding Target Liability for Minimum Contribution as of the current measurement date, January 1, 2015, by 2.11%.

*Normal Retirement
Benefit:*

The annual normal retirement benefit is equal to (1) plus (2) plus (3) plus (4):

(1) for years of service prior to 1994 - the annual accrued benefit under the Prior Plans as of December 31, 1993;

(2) for each year of service from 1994 to 1996 - 1.4% of compensation up to the Social Security taxable wage base plus 1.7% of compensation in excess of the Social Security taxable wage base;

(3) for each year of service subsequent to 1996 - 1.7% of compensation up to the Social Security taxable wage base plus 2.0% of compensation in excess of the Social Security taxable wage base;

(4) for collectively bargained participants, for each plan year after 2002, instead of (3) above, an annual accrual of \$720 for each full year of benefit service. This annual accrual is prorated for partial years of benefit service.

For collectively bargained participants employed on December 1, 2008, the annual accrual under item (4) above was increased to \$780 for each plan year after 2002.

Normal Form of Benefit: Life Annuity

Accrued Benefit: The amount to which a participant would be entitled under the benefit formula based upon the participant's Years of Benefit Service and the plan provisions in effect as of the date of determination.

*Top-Heavy Minimum
Accrued Benefit:*

All non-key employees will receive a minimum benefit equal to 2% of 5-year average compensation for each Year of Benefit Service in which the plan is top-heavy (up to a maximum of 10 years).

Early Retirement: A participant who has attained age 55 with 5 Years of Service may retire and receive an early retirement benefit. The amount of the early retirement benefit equals the Accrued Benefit, reduced 0.25% for each month that retirement precedes the Normal Retirement Date. Benefits accrued as of December 31, 1993 are reduced in accordance with the Prior Plans if this would result in a greater early retirement benefit.

A collectively bargained participant may retire early with an unreduced benefit if the participant retires after attaining age 62 and completing 10 Years of Service.

Late Retirement: Participants who continue employment after their Normal Retirement Date are eligible for a late retirement benefit upon termination of employment equal to the Accrued Benefit determined on the participant's actual retirement date.

Death Benefit: Minimum qualified pre-retirement survivor benefit.

Vesting: Based on Years of Service, subject to the following schedule:

<u>Years of Service</u>	<u>Vested Percentage</u>
Less than 5 years	0%
5 years or more	100%

Notwithstanding the above vesting schedule, a participant will become 100% vested upon reaching the Normal Retirement Date.

Participants who terminate with a vested benefit prior to becoming eligible for Early Retirement may commence payments as early as age 55. In this case, the benefit payable at the Normal Retirement Date is reduced actuarially to the actual benefit commencement date.

Optional Forms of Benefit: Life annuity, life annuity with 60 or 120 months guaranteed, joint and 50%, 66 2/3%, 75%, or 100% survivor annuity, joint and 50%, 66 2/3%, 75%, or 100% survivor annuity with pop-up feature, Social Security level income annuity.
