Rio Tinto Alcan Pension Plan (U.S.)
South Jordan, Utah

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Rio Tinto Alcan Pension Plan (U.S.) (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2015 and 2014, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by State Street Bank and Trust Company, the trustee, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2015 and 2014, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards general accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 1. Description of the Plan

The following description of Rio Tinto Alcan Pension Plan (U.S.) ("RTAPP" or the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the RTAPP's provisions.

General: The Plan was established by Alcan Corporation (the "Company"). Effective December 31, 2013, the Alcan Combined Pension Plan (the "Combined Plan") was merged into the AlcanCorp Pension Plan (the "AlcanCorp Plan"). As a result of this merger, the Plan was restated in its entirety, effective January 1, 2014, and the name of the Plan was changed to the Rio Tinto Alcan Pension Plan (U.S.). The RTAPP is a noncontributory defined benefit plan that includes certain groups of full-time employees, as defined in the Plan document, provided they are no longer accruing benefits as participants of another retirement benefit plan maintained jointly or individually by the Company and/or a related company and/or a collective bargaining unit, unless such plan is specifically exempted by the Board of Directors. The Company is a subsidiary of Rio Tinto America Holdings, Inc., which is an indirect, wholly owned subsidiary of Rio Tinto plc (the "Parent"). The RTAPP is intended to be a qualified retirement plan under the Internal Revenue Code ("IRC") and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended. The Company has appointed State Street Corporation to be the third party administrator of the plan. The Plan is administered by the Rio Tinto America Inc. Benefits Governance Committee (the "Plan Administrator").

The Plan participates in the Rio Tinto America Master Retirement Trust ("Master Trust"), which was created to hold the qualified defined benefit investment assets of the Plan and other plans sponsored by the Parent and its affiliates. The Company has appointed State Street Bank and Trust Company ("Trustee"), to be the trustee of the Master Trust and to invest and manage assets of the related plans.

AlcanCorp Plan: Effective December 31, 2011, participation in the AlcanCorp Plan became closed to individuals who are hired or rehired as, or become an employee of a participating company on or after January 1, 2012. Effective June 30, 2013, the AlcanCorp Plan was amended to freeze all participation and cease all benefit accruals.

Combined Plan: Effective December 31, 2011, participation in the Combined Plan was closed to individuals who were hired or rehired as, or became an employee of a participating company on or after January 1, 2012. Effective December 31, 2011, benefit accruals under the Combined Plan were frozen, and compensation for determining participants' accrued benefits did not include compensation paid after December 31, 2011.

Plan Merger: Effective December 31, 2013, the Combined Plan merged into the AlcanCorp Plan (which was subsequently renamed the RTAPP) and net assets of approximately \$141,301,000 were transferred from the Combined Plan into the legal control of RTAPP. No physical transfer of Combined Plan assets occurred because such assets were already held in the Master Trust. In addition, the Combined Plan's accumulated benefits of approximately \$125,653,000 were also assumed by RTAPP.

Lump Sum Window: Effective January 1, 2014, the Plan was amended to allow for lump sum payments for certain terminated participants who had not commenced receipt of their accrued benefit. The amendment allowed for a lump sum election period during the 2014 and 2015 Plan Years. As of December 31, 2015, approximately 2,940 participants elected the lump sum option representing \$101.9 million in benefit payments.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

Pension Benefits – Historical Alcancorp Plan: Participants are entitled to annual pension benefits at normal retirement age (65 with five years of service). Benefit accruals are frozen for all participants effective as of June 30, 2013 although participants continue to accrue vesting service. Pension benefits are based on Highest Average Earnings (“HAE”), which is the highest pay average of three consecutive calendar years. HAE does not include earnings for calendar year 2011 or subsequent years, and covered compensation and unused months will be calculated as of December 31, 2011. Previous to the freeze, the normal retirement benefit was calculated by summing (a) 45 percent of the HAE, (b) 15 percent of HAE in excess of Social Security covered compensation for participants with at least 35 years of benefit service and (c) 0.25 percent of HAE multiplied by the number of unused months as defined in the Plan document.

Benefits were prorated for service less than 35 years. The benefit computation is subject to minimum and maximum limits. Effective January 1, 2012, salaried employees at the Sebree, Kentucky location of the Company and salaried employees of Ingot Sales, Specialty Aluminas and Management Services in Cleveland, Ohio, transitioned to the following benefit formula: (a) the sum of (i) 1 percent of final average earnings (as defined in the Plan) up to the Breakpoint, plus (ii) 1⅔ percent of such final average earnings in excess of the Breakpoint, multiplied by (b) months and years of benefit service after December 31, 2011.

Breakpoint is the Internal Revenue Service (“IRS”) Covered Compensation Table, which is defined as the average of the Social Security tax bases in effect in each year that would be used to calculate the primary Social Security benefit for a participant retiring at his Social Security retirement age. For participants that retire early, a reduced retirement benefit may be received.

The Plan permits early retirement when the sum of the participant's age plus the participant's years of service equals 75 or more, or if the participant reaches age 55 with five years of service. The early retirement benefit is the product of the normal retirement benefit multiplied by a factor based on the number of years the participant's early retirement precedes the normal retirement date.

The Plan also provides for disability, termination and pre-retirement spouse benefits for participants meeting certain age and length of service requirements. There is also a provision for a postretirement spouse benefit that generally does not require a reduction in the participant's benefit.

Pension Benefits – Historical Combined Plan: Participants were entitled to annual pension benefits at normal retirement (age 65). Benefit accruals are frozen for all participants effective January 1, 2012. Generally, the benefit formula provides an annual normal retirement benefit equal to 1.5 percent of the Average Annual Compensation multiplied by years of benefit service (a benefit based on a career average formula).

The Plan generally permits early retirement if the participant reaches age 60 with five years of service. The early retirement benefit is the product of the normal retirement benefit multiplied by a factor based on age and early commencement.

The Plan also provides for disability, termination and pre-retirement spousal benefits for participants meeting certain age and length of service requirements.

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

Termination of the Plan: Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits which former participants or their beneficiaries have been receiving for at least three years, or employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit which was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit which would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (vested benefits not insured by the PBGC).
- d. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The accompanying financial statements are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions which affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from the estimates.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics, all of which are subject to change. Due to the uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would be material to the financial statements.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Risks and uncertainties: The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, currency exchange rate, and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near-term and such changes could materially affect the amounts reported in the 2015 statement of net assets available for benefits.

The Master Trust invests in securities with contractual cash flows, such as credit default and interest rate swaps. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, delinquencies and/or defaults, and may be adversely affected by a shift in the market's perception of the issuers and changes in interest rates.

Investment valuation and income recognition: Investments are reported at fair value. Fair value is the price which would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Rio Tinto America Inc. Pension Investment Committee ("Investment Committee") determines the Plan's valuation policies, utilizing information provided by the investment advisors and Trustee. See Note 6 for a discussion of fair value measurements.

Interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date. Purchases and sales of investments are recorded on a trade-date basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Valuation of investment in Master Trust: The Master Trust is a multiple-plan trust, ownership of which is divided among the plans based on allocated units of participation. Each participation unit has a value equal to the total fair value of the Master Trust's net assets divided by the total participation units outstanding.

The Plan has an undivided interest in the Master Trust's underlying investments. The Plan's interest in the Master Trust is stated at fair value. The Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust, plus actual contributions and allocated investment income (loss), less actual distributions and actual and allocated investment-related expenses. The net investment income (loss) and investment-related expenses attributable to the Master Trust, which are not plan-specific, are allocated by the Trustee to the Plan based on the Plan's pro rata share of each of the underlying assets of the Master Trust on a monthly basis. The Plan presents in the statements of changes in net assets available for benefits its interest in the net investment income or loss of the Master Trust, which consists of the realized gains or losses, unrealized appreciation or depreciation, interest, dividends of the Master Trust's investments, and allocated expenses.

Funding policy: The Company contributes to the Plan at such times and in such amounts as considered necessary so contributions are sufficient to provide benefits as actuarially calculated under the terms of the Plan. The Company's current funding policy is to meet the minimum funding standards prescribed by law.

Contributions to the Plan are designed to fund at least the minimum required contributions as specified by ERISA and determined under IRC section 430(a). The minimum contribution is determined as of the beginning of the plan year, and all contributions are discounted at the effective interest rate from the date funded to the beginning of the plan year. The Company may elect to use all or a portion of any funding standard carryover balance or prefunding balance to offset the minimum required contribution for a plan year depending on the Plan's funded status.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

The Plan is “not-at-risk” for 2015, thus allowing the use of a more favorable interest rate corridor in determining the minimum required contribution. Adjustment to the statutory interest rates specified under IRC §430 were first introduced by the Moving Ahead for Progress in the 21st Century Act (“MAP-21”) and subsequently modified by the Highway and Transportation Funding Act of 2014 (“HATFA”).

The Plan has currently met all minimum funding requirements. Under the law, the minimum required contribution for the 2015 and 2014 plan years, respectively, was \$0 and \$0 for the Plan. The minimum required contribution was satisfied in each plan year with a combination of cash contribution and application of prefunding balances. These amounts totaled \$70,000,000 and \$0 for the Plan for the 2015 and 2014 plan years, respectively.

Benefit restrictions under IRC section 436 depend on the Plan’s Adjusted Funding Target Attainment Percentage (“AFTAP”). For 2014, the Plan’s AFTAP was 107.3 percent. As this exceeds 90 percent and the plan sponsor is not in bankruptcy there are no restrictions on amendments increasing benefits, accelerated payments, or future accruals.

Payment of benefits: Benefits are recorded when paid.

Administrative expenses: The Company pays a portion of the costs and expenses incurred in administering the Plan, with the Plan paying the remaining costs and expenses. The Company provides accounting and other services for the Plan at no cost to the Plan. Expenses paid directly by the Company are excluded from these financial statements, unless reimbursed by the Plan.

Tax status: The IRS has determined and informed the Company by a letter dated July 10, 2012, the Plan and the Master Trust are designed in accordance with applicable sections of the IRC. The Plan document has been amended since receiving the determination letter. However, the Plan Administrator believes the Plan is designed and is currently being operated in compliance with applicable requirements of the IRC and therefore believes that the Plan and the Master Trust are tax-exempt.

The Plan Administrator has evaluated the Plan’s tax positions and concluded that the Plan had taken no uncertain tax positions which would require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax years in progress.

Subsequent events: The Plan Administrator has evaluated subsequent events and transactions through October 5, 2016, the date of this report on which the financial statements were available to be issued.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

New accounting pronouncements: In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-07 which provides new guidance under Topic 820, *Fair Value Measurements, Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent)*. The update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value ("NAV") per share as a practical expedient. The update also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the NAV per share as a practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. This update is effective for all non-public entities for fiscal years beginning after December 15, 2016 and must be applied retrospectively with early adoption permitted. Management has elected to adopt ASU 2015-07 for the 2015 plan year, and has therefore removed investments for which fair value is measured using NAV as a practical expedient from the fair value hierarchy table (see Note 6).

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Parts I and III are not applicable to the Plan. Part II eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Parts I and II are to be applied retrospectively. Management has elected to adopt Part II early. Accordingly, the amendment was retrospectively applied, resulting in the removal of the disclosures of individual investments that represent five percent or more of net assets available for benefits; the presentation of the net appreciation or depreciation in fair value of investments in total versus disaggregating by general type; and the presentation of investments that are measured at fair value by general type versus disaggregating by nature, characteristics and risks. Adoption of these pronouncements did not have a material impact on the Plan's financial statements.

Note 3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees with vested rights or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. In calculating the accumulated benefits, only service and salary prior to the valuation date are considered. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service rendered prior to the valuation date.

The actuarial present value of accumulated plan benefits was calculated by consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected future payment dates.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial valuation was done by using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2014, are presented from information provided by the actuary as of January 1, 2015. There has been no significant change in the Plan's provisions or coverage from December 31, 2014, to January 1, 2015.

The more significant assumptions underlying the actuarial computations as of December 31, 2014, are as follows:

Investment return	6.50% per annum
Mortality table used	RP2014 mortality table with generational mortality projected by Scale MP2015 weighted by 115% for males and 125% for females for Salaried participants. RP2014 mortality table with generational mortality projected by Scale MP2015 weighted by 130% for males and 150% for females for Hourly participants.
Retirement rate and average retirement age	Terminated vested participants: 62 for Castplate, otherwise 63; 100% at December 31, 2013, for active PPPI participants; rates increasing from 10% to 100% between ages 55 and 70 for actives and 55-65 for terminated vested.
Withdrawal rates	Rates for pre-retirement ages that vary by age and employee group.

The foregoing actuarial assumptions are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2014, is summarized as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefits	\$ 628,180,153
Other participants	187,919,465
	<u>816,099,618</u>

Nonvested benefits	<u>227,899</u>
--------------------	----------------

Total actuarial present value of accumulated plan benefits, at December 31, 2014	<u><u>\$ 816,327,517</u></u>
--	------------------------------

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

Below is a summary of significant changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2014:

Actuarial present value of accumulated plan benefits, at beginning of year	<u>\$ 849,914,097</u>
Increase (decrease) during the year attributable to:	
Benefits paid	(122,808,381)
Interest accumulation	55,268,391
Change in actuarial assumptions*	30,569,539
Benefits accumulated and experience gains and losses	<u>3,383,871</u>
Net change	<u>(33,586,580)</u>

Actuarial present value of accumulated plan benefits, at end of year	<u><u>\$ 816,327,517</u></u>
--	------------------------------

*The most significant changes in actuarial assumptions were a change in the Investment Return from 7.00 percent to 6.50 percent; and a change in the mortality assumption from the RP2014 mortality table with generational mortality projected by MP2014, with specific weighting between males and females for salaried and hourly participants to the RP2014 mortality table with generational mortality projected by Scale MP2015, with specific weighting between males and females for salaried and hourly participants.

Note 4. Information Certified or Provided by State Street

The following is a summary of the Plan's asset information as of December 31, 2015 and 2014, and for the years then ended, included throughout the Plan's financial statements, which were prepared by or derived from information provided by the Trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the Trustee that the information provided to the Plan Administrator by the Trustee related to the following assets is correct and complete to the best of their knowledge and belief. Accordingly, as permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements related to the following assets:

	December 31	
	2015	2014
Investments:		
Plan's interest in Rio Tinto America Master Retirement Trust	\$ 789,171,821	\$ 918,170,716

The Trustee also certified to the best of their knowledge and belief the correctness and completeness of investment results of the Plan's interest in the Master Trust for the years ended December 31, 2015 and 2014, as follows:

	Years Ended	
	2015	2014
Investment results:

Note 4. Information Certified or Provided by State Street (Continued)

The Plan's interest in and the investment results of the Master Trust as presented above do not reflect an increase in the value of partnerships/joint ventures/real estate investments and certain accrued Master Trust expenses.

Note 5. Interest in Master Trust

The Plan participates in the Master Trust as permitted by the Plan document and Master Trust agreement. The Plan has an undivided interest of 51.3 percent and 53.2 percent in the net assets of the Master Trust as of December 31, 2015 and 2014, respectively.

The Master Trust financial information disclosed below and in Note 6 represents 100 percent of the Master Trust net assets and the related changes in net assets in which the Plan has an undivided interest as of and for the years ended December 31, 2015 and 2014.

Note 6. Fair Value Measurements

Accounting guidance provides the framework for measuring fair value. That framework provides a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include quoted market prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 6. Fair Value Measurements (Continued)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets within the Master Trust measured at fair value. There have been no significant changes in the methodologies used at December 31, 2015 and 2014.

Fixed-income securities: Fixed-income securities consist of U.S. and foreign government securities and corporate and other obligations. These securities are valued based on pricing matrices or models from pricing vendors used by the Trustee. Commingled funds are valued based on the NAV of units held at year-end as provided by the fund administrator.

Common collective trusts: The common collective trusts are valued based on the NAV of units held at year-end as provided by the fund administrator. Generally, under ordinary market conditions, all common collective trust positions provide daily market liquidity to the Master Trust. Certain Master Trust-directed withdrawals may be subject to market value adjustments calculated in accordance with the provisions of the investment contracts.

Common and preferred stocks: Common and preferred stocks are valued based on the last sales price on the primary exchange.

Partnerships/joint ventures/real estate: Partnerships/joint ventures/real estate are valued based on the estimated fair value of the participation owned by the Master Trust as determined by the general partner or investment manager of the respective partnership. The NAV of the partnerships/joint ventures/real estate is based on the fair value of the underlying investments. The valuation inputs are derived primarily from audited financial statements and other financial data. Partnerships/joint ventures/real estate include 14 private equity funds which are comprised of limited partnerships that invest in private equity, both domestically and internationally. Certain of these investments are considered illiquid and are meant to be held for the life of the funds but, if necessary, sales can be arranged through the secondary market. Distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 14 years. Unfunded commitments of the Master Trust as of December 31, 2015 and 2014 approximate \$76 million and \$81 million, respectively, for these 14 funds.

Partnerships/joint ventures/real estate also include five investments in domestic and international real estate fund limited partnerships and one commingled real estate fund. The fair value of the limited partnerships is estimated using the NAV of the Master Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third-party appraisals. Certain of these investments are considered illiquid, but sales can be arranged on the secondary market. Distributions from each fund are received as income is generated through the investments and as the underlying assets of the funds are liquidated. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 10 years. Unfunded commitments of the Master Trust as of December 31, 2015 and 2014 approximate \$14 million and \$29 million, respectively, for these five investments. The commingled real estate fund is valued based on the NAV of units held at year-end as provided by the fund manager.

Interest-bearing cash and cash equivalents: Interest-bearing cash is valued at cost plus accrued income, which approximates fair value measured by similar assets in active markets.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 6. Fair Value Measurements (Continued)

Loans secured by mortgages: Loans secured by mortgages are valued on the basis of their principal and interest payments discounted at prevailing interest rates for similar investments.

Credit default and interest rate swaps: Credit default and interest rate swaps are valued based on pricing matrices or models from pricing vendors used by the Trustee. The net position is included with fixed-income securities-corporate bonds for purposes of the fair value measurement disclosures. See Note 8 for additional disclosures.

(a) In accordance with Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefits.

The following table sets forth a summary of changes in the fair value of the Master Trust's Level 3 assets for the years ended December 31, 2015 and 2014:

Notes to Financial Statements

Note 6. Fair Value Measurements (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The Master Trust evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets. For the years ended December 31, 2015 and 2014, there were no transfers in or out of Levels 1, 2 or 3.

The Master Trust follows guidance on how entities should estimate fair value of certain alternative investments. The fair value of investments within the scope of the guidance can be determined using NAV per share as a practical expedient, when fair value is not readily determinable, unless it is probable the investment will be sold at something other than NAV.

The following tables include categories of investments within the Master Trust that measure NAV per share (or its equivalent) as of December 31, 2015 and 2014:

- (a) Domestic - The objective of the funds is to seek capital appreciation by investing in U.S. publicly listed companies.
- (b) International - The objective of the funds is to seek capital appreciation by investing in international publicly listed companies.
- (c) Commingled funds - The objective of these investments is to seek current income and total return by investing in a diversified portfolio of fixed-income investments of varying maturities (mainly long credit).

Note 7. Party-in-Interest Transactions

The Master Trust invests in the following investments managed by the Trustee or affiliated companies that qualify as party-in-interest transactions:

	December 31	
	2015	2014
State Street Global Advisors Russell 1000 Index Fund	\$ 104,998,999	\$ 127,524,337

AXA Private Equity Fund II	709,604	1,086,613
State Street Corp	332,160	310,320

Fees paid by the Master Trust for investment-related expenses to the Trustee and affiliated companies amounted to approximately \$713,000 and \$554,000 for the years ended December 31, 2015 and 2014, respectively. Fees paid by the Master Trust or Plan for investment management services were included as a reduction of the return earned on each investment. Fees paid by the Plan for certain administrative functions performed by officers or employees of the Parent and affiliates amounted to approximately \$11,300 and \$9,800 for the years ended December 31, 2015 and 2014, respectively. Certain other administrative functions are performed by officers or employees of the Parent and affiliates, for which no compensation is received from the Plan.

These transactions are not, however, considered prohibited transactions under Section 408(b) of the ERISA regulations.

Note 8. Derivative Financial Instruments

As of December 31, 2015 and 2014, a fixed-income manager of the Master Trust utilizes derivative financial instruments consisting of credit default and interest rate swaps. This manager uses these financial instruments to manage exposure to interest rate and credit risks and to achieve the overall desired duration under the Master Trust's fixed-income mandate.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 8. Derivative Financial Instruments (Continued)

Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Master Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap, provided there is no credit event.

If a credit event occurs, as defined under the terms of that particular swap agreement, the Master Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligation or underlying securities comprising the referenced index or (ii) pay a net settlement in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The maximum potential amount of future payments (undiscounted) that the Master Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2015 and 2014, for which the Master Trust is a seller of protection, are disclosed below. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, up-front payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Master Trust for the same referenced entity or entities.

Interest rate swap agreements involve the exchange by the Master Trust with a counterparty of their respective commitments to pay or receive interest, e.g., an exchange of floating-rate payments for fixed-rate payments, with respect to the notional amount of principal. These swaps are used to adjust interest rate and yield curve exposure and substitute for physical securities. Long swap positions ("received fixed") increase exposure to long-term interest rates; short positions ("pay fixed") decrease exposure. Notional amounts of all interest rate swap agreements outstanding as of December 31, 2015 and 2014, are disclosed below.

Note 8. Derivative Financial Instruments (Continued)

The notional values summarized below provide an indication of the extent of the Plan's involvement in such instruments. Notional amounts of derivative financial instruments do not necessarily represent amounts exchanged by parties and, therefore, are not a direct measure of the Plan's exposure from its use of derivatives. The net liability position of approximately \$1,560,000 and \$75,000 as of December 31, 2015 and 2014, respectively, is included in fixed income investments for purposes of the fair value measurement disclosures in Note 6.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption changes:

- A change in the funding asset return assumption from 6.90% to 6.99%.
- A change in the optional payment form election to a lump sum payable January 1, 2015, for vested participant that elected a lump sum with a January 1, 2015 commencement date through the terminated vested lump sum window.

These changes were made to better reflect anticipated plan experience. The non-prescribed assumption changes did not reduce the funding shortfall by more than \$5 million; as such, approval of the Commissioner is not required.

Benefit Limits

Projected benefits are limited by the current IRC section 415 maximum benefit of \$210,000.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Schedule SB, Part V—Summary of Plan Provisions

Plan History

Following is a description of significant events that have occurred within the past ten years.

Effective December 31, 2006, the following plans merged into the AlcanCorp Pension Plan:

- Alcan Pension Plan for Cleveland Hourly Employees,
- Alcan Pension Plan for Mt. Vernon Hourly Employees,
- Alcan Global Pharmaceutical Packaging Consolidated Service Retirement Plan,
- Alcan Global Pharmaceutical Packaging Salaried Employees Pension Plan, and;
- Pechiney Cast Plate Pension Plan for Union Employees.

Any benefits transferred from the merged plans into the AlcanCorp Pension Plan shall be determined under the terms of the respective plans as of December 31, 2006. As of January 1, 2011, all participants from the merged plans are inactive.

Effective December 31, 2011, all benefit accruals are frozen for certain Cable unit employees. Benefit Service and Social Security Covered Compensation are frozen as of December 31, 2011. Highest Average Earnings shall not include earnings during 2011 or any subsequent years. Members who are affected are “Non-Grandfathered Cable Unit Members” and include participating employees that do not meet the following criteria:

- age 45 and ten years of Benefit Service, or;
- age 55 and nine years of Benefit Service or ten years of Eligibility Service.

All other Cable unit employees are “Grandfathered Cable Unit Members” and continue to accrue benefits. This includes any Cable unit employee on long-term disability or severance.

Effective December 31, 2011, all benefit accruals under the AlcanCorp Plan formula are frozen for Salaried Sebree and Cleveland employees. These participants start to accrue benefits under the Rio Tinto America Plan formula for service after December 31, 2011. The December 31, 2011 frozen benefit is increased by the percentage increase of the Final Average Earnings (as defined under the Rio Tinto America formula), over the participant’s Highest Average Earnings (as defined under the AlcanCorp formula) at December 31, 2011.

Effective December 31, 2011, any PPPI employee who was a participant of the Alcan Combined Pension Plan as of December 31, 2011 shall become a participant of the AlcanCorp Pension Plan as of January 1, 2012. For these participants, the benefit payable from the AlcanCorp Pension Plan is equal to the benefit accrued under the Alcan Combined formula using all years of service and pay prior to termination, and offset by the benefit accrued under the Alcan Combined formula as of December 31, 2011.

The Specialty Aluminas business unit was sold in August 2012 and the Cable business unit was sold on September 4, 2012. For participants with ongoing accruals, any accruals in the plan have ceased as of the date of sale. Any participants that were terminated as a result of the sales with less than five years of service have been vested in their benefit. Participants that were on LTD at the time of the sale will continue to earn future service accruals from the AlcanCorp Pension Plan.

As of September 30, 2012, accruals for Cleveland participants were frozen in the AlcanCorp Pension Plan. These participants transferred to the Rio Tinto America Plan on October 1, 2012. The Rio Tinto America Plan provides future accruals and pay growth on the past service frozen benefit from the AlcanCorp Plan.

Any remaining Cable, PPPI and LTD participants in the AlcanCorp Pension Plan as of December 31, 2012 have transferred to the Rio Tinto America Plan. Accruals in the AlcanCorp Pension Plan have ceased as of December 31, 2012 for these participants. The Rio Tinto America Plan provides future accruals and pay growth on the past service benefit from the AlcanCorp Plan, as applicable.

As of July 1, 2013, accruals were frozen for all remaining participants.

Effective December 31, 2013, the Alcan Combined Pension Plan was merged into the AlcanCorp Pension Plan, and the merged plan was renamed the Rio Tinto Alcan Pension Plan (U.S.). The January 1, 2014 funding valuation reflects the benefit liabilities and plan assets of the Alcan Combined Pension Plan that merged into the Rio Tinto Alcan Pension Plan (U.S.) on December 31, 2013.

Freeze Dates

Benefit accruals are frozen for non-grandfathered Cable participants effective December 31, 2011

Benefit accruals under the AlcanCorp formula are frozen for Sebree and Cleveland Salaried participants effective December 31, 2011, but are increased by the percentage increase of the Final Average Earnings (as defined under the Rio Tinto America formula), over the participant's Highest Average Earnings at December 31, 2011 (as defined under the AlcanCorp formula). These participants accrue under the Rio Tinto America Plan formula for post-2011 benefit service.

All benefit accruals from the AlcanCorp Pension Plan are frozen for Cleveland participants effective September 30, 2012.

Benefit accruals for all remaining AlcanCorp Pension Plan participants are frozen effective July 1, 2013.

Date of Participation

First of month following date of hire for regular full time employees

Normal Retirement
Eligibility

Age 65 and five years of Eligibility Service

Total Benefit

A monthly benefit equal to (a) plus (b) plus (c) below:

- (a) 45% of Highest Average Earnings
- (b) 15% of Highest Average Earnings in excess of the Social Security Covered Compensation
- (c) 0.25% of Highest Average Earnings times the number of Unused Months

If the participant has fewer than 35 years of Benefit Service, then the monthly benefit amount will be multiplied by the participant's Benefit Service and divided by 35

Accrued Benefit "Ratchet"

In no event will the total benefit amount above be less than the total benefit calculated as of any prior March 1

Frozen Sebree and Cleveland Benefit

The benefit under the AlcanCorp formula for Sebree and Cleveland participants is determined as the greater of (a) and (b) below:

(a) Accrued benefit as of December 31, 2011 using Benefit Service and Highest Average Earnings as of December 31, 2011 (*based on Earnings through December 31, 2010*), plus the Highest Average Earnings make-up (Part (c) above), increased by the percentage increase of the Final Average Earnings under the Rio Tinto formula at termination over the Highest Average Earnings at December 31, 2011, if any.

(b) Accrued benefit as of December 31, 2011 using Benefit Service and Highest Average Earnings as of December 31, 2011 (*based on Earnings through December 31, 2011*), increased by the percentage increase of the Final Average Earnings under the Rio Tinto formula at termination over the Highest Average Earnings at December 31, 2011, if any.

Prior Plan Offsets

If Benefit Service includes service from other company sources and the prior plan benefit is not payable from the AlcanCorp Trust, the total benefit amount above is offset by any such benefit. The offset amount cannot exceed the benefit amount that would be accrued had only Benefit Service giving rise to the offset were used in determining the total benefit.

Early Retirement
Eligibility

Age 55 and five years of Eligibility Service, or when age plus Eligibility Service is at least 75

Late Retirement Eligibility	After age 65 with five years of Eligibility Service
Total Benefit	The normal retirement benefit actuarially increased beyond the normal retirement date.
Vested Termination Eligibility	Five years of Eligibility Service
Total Benefit	The normal retirement benefit accrued at date of termination, commencing at age 65. The participant may elect for benefits to start before age 65, with benefits reduced by the early retirement reduction factors above.
Cable and Specialty Aluminas	Any Cable and Specialty Aluminas participants affected by the sales are immediately vested in their benefit
All active participants	All remaining active participants as of July 1, 2013 are immediately vested as a result of the plan freeze
Preretirement Death Eligibility	Any vested participant or participant eligible for early retirement, and married to an eligible spouse
Total Benefit	<p>For a participant who is eligible for early or normal retirement, the benefit is an immediate annuity to the surviving spouse equal to 50% of the monthly benefit the participant would have been entitled to had he retired the day before his death and elected the 50% J&S option.</p> <p>For all other vested participants, the benefit is a deferred annuity to the surviving spouse equal to 50% of the monthly benefit that the participant would have been entitled to had he terminated employment on the date of his death, survived to the earliest retirement age, elected the 50% J&S option, and then died the following day.</p>
Disability Retirement Eligibility	Eligible for a medical leave of absence
Total Benefit	The normal retirement benefit, computed using Benefit Service that continues to accrue during disability leave

Normal Form of Benefit

50% J&S annuity if married, otherwise 5 year certain and life annuity. For married participants, the normal form of benefit is actuarially reduced if the spouse is 10 years younger

Optional Forms of Payment

A retiring participant may also elect other optional forms of payment on an actuarially equivalent basis. The options include:

- Full Benefit Joint and Survivor Annuity: Payable for life of participant with an amount less than 50% payable to the spouse upon the participant's death. Only available if spouse is more than 10 years younger. The participant's benefit is not reduced for payment form.
- Continuing Income Joint and Survivor Annuity: Payable for life of participant with a chosen percent (1-100%) payable to the beneficiary upon the participant's death.
- A level income option for retirement prior to commencement of Social Security benefits.
- Lump sum if monthly retirement benefit is less than \$100.
- Participants with accrued benefits from prior plans may have different optional forms

Most optional forms are based on the 1951 Group Annuity Table projected to 1966 with a 5 year setback for beneficiaries, and 6.00% interest. Certain prior plans use different actuarial equivalence for benefits accrued in those plans.

Benefit Limits

Effective January 1, 2002, EGTRRA increased the Internal Revenue Code section 415 limit to \$160,000 and the limit on compensation to \$200,000. The \$200,000 pay limit was applied retroactively for participants who were active as of January 1, 2002.

Definitions

Eligibility Service

Special Provisions Applicable to Former Nonhighly-Compensated Members of the
American National Can Group Retirement Plan for Salaried Employees—Plan 1 (i.e.,
former ACPI Salaried Plan)

Note: Eligibility for these special provisions is based on service in the ANCG Salaried Plan, but the actual monthly retirement benefit and the annual salary is based on accredited service and salary as of December 31, 1988 (under the terms of the ACPI Salaried Plan then in effect).

PPPI assumes all liabilities under the ANC 25-Year Survivorship and ANCG 10-Year Survivorship Plan in respect to PPPI employees transferring from ANC.

Survivor Income Benefit

Eligibility

The following requirements must be met at death:

- Hired before January 1, 1979
- Ten years of service
- Employee is active, on leave, on long-term or short-term disability, and
- Not covered by the Survivorship Benefit.

Total Benefit

For death before age 55: a monthly benefit of \$100 payable to the employee's age 55. After the employee's age 55, a monthly benefit equal to the greatest of \$100, 15% of the monthly retirement benefit (as if retired on date of death), or the Preretirement Spouse's Benefit.

For death after age 55: a monthly benefit equal to the greatest of \$100, 15% of the monthly retirement benefit (as if retired on date of death), or the Preretirement Spouse's Benefit.

Survivorship Benefit

Eligibility

The following requirements must be met at death:

Employed on or before April 30, 1975
25 years of service before age 65, and
Either active, on long-term or short-term disability, or an early retiree (does not include vested terminations).

Total Benefit

An amount calculated from a benefit base of two times frozen annual salary (base pay plus salary reductions only). If the benefit base is greater than \$5,000, the amount shall be paid in monthly installments to a beneficiary in such amounts as would have been payable had the benefit base been used to purchase a straight life annuity from an insurance company.
