Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Participants and Administrator Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA

We have audited the accompanying financial statements of the Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2015 and 2014, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2015, and changes therein for the year then ended, and its financial status as of December 31, 2014, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

NOTES TO FINANCIAL STATEMENTS

December 31, 2015 And 2014

(Dollars In Thousands, Unless Otherwise Stated)

1. Description Of The Plan

The following brief description of the Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan is a defined benefit plan that provides normal retirement, early retirement, disability and death benefits to eligible hourly-paid employees at covered operations of the participating employers who have completed one year of service and who are not covered by a collective bargaining agreement under which the participating employers are required to make contributions to another retirement plan. Employees do not contribute to the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan Administration

The Plan Administrator is Anheuser-Busch, LLC (the Company). The Plan's custodian and trustee is The Bank of New York Mellon (Mellon). Mellon, as sole trustee of the Plan, holds all Plan assets and is responsible for benefit payments from the Anheuser-Busch Companies, LLC Master Defined Benefit Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Benefits

Plan benefits are determined in accordance with the provisions of each supplement to the Plan Document.

Vesting service is used in determining eligibility for early retirement and disability benefits, as defined in each supplement to the Plan Document.

Expenses Of The Plan

Under the Master Trust agreement with the Trustee, the Company may pay all expenses incurred in the administration of the Plan, including trustee fees, but is not obligated to do so. Trustee expenses not paid by the Company are paid by the Master Trust and proportionately allocated to participating plans. All other direct expenses are paid by the Plan.

Notes To Financial Statements *(Continued)*

Plan Termination

The Company anticipates the Plan will continue without interruption but reserves the right to discontinue its participation in the Plan. In the event that such discontinuance results in termination of the Plan, the Plan provides that the net assets will be allocated among the participants and beneficiaries of the Plan in the order of preference and in the manner outlined in the Plan Document. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (PBGC) to participants, up to specified limitations. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

2. Summary Of Significant Accounting Policies

Basis Of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Use Of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Investment Valuation And Income Recognition

Investments are reported at fair market value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for a discussion of fair value measurements.

Purchases and sales of securities held by the Master Trust are recorded on a trade-date basis. Investment income from the Master Trust includes rental income from real estate properties and net appreciation in fair value of investments. Rental income is recorded on the accrual basis. Net appreciation in fair value of investments includes the gains and losses on investments bought and sold as well as held during the year.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

Allocation Of Assets In Master Trust

The Master Trust was established for the investment of the Plan's assets and certain other Company sponsored retirement plans.

The interest of each participating plan is represented in units. Each unit represents an undivided interest in the Master Trust. The value of each plan's interest in the Master Trust is based on the beginning of year value of the plan's interest in the trust plus actual contributions and allocated investment income, net of investment expenses, less actual distributions and allocated administrative expenses. The allocation of investment income and administrative expenses is based on each plan's ownership of Master Trust units at the end of each month.

Payment Of Benefits

Benefit payments are recorded when paid.

Recent Accounting Pronouncements

In July 2015, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Parts I and III are not applicable to the Plan. Part II eliminates the requirements to disclose individual investments that represent 5% or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. Additionally, Part II permits plans to eliminate the disclosure of significant investment strategies for any investment measured using the net asset value per share (or its equivalent) practical expedient, provided that the investment fund files an annual report on Form 5500 as a direct filing entity. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Management has elected to early adopt Part II. Part II is to be applied retrospectively.

There were no impacts on the statement of net assets available for benefits or the statement of changes in net assets available for benefits as of or for the years ended December 31, 2015 or 2014.

3. Funding Policy

Pension contributions are funded by the Company. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value for assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2015 and 2014.

4. Actuarial Present Value Of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

Notes To Financial Statements (*Continued*)

Significant actuarial assumptions used in the valuation as of January 1, 2015 and 2014 are as follows:

Mortality:

- | | |
|-------------|--|
| 2015 | RP-2014 Mortality Tables for males and females, with blue-collar adjustment, increased by 5%, projected generationally from 2011 with scale MP-2014 adjusted to reflect long term mortality improvement trend decreasing from 1% to 0% from 2012 to 2031 |
| 2014 | RP-2014 Mortality Tables for males and females, with blue-collar adjustment, increased by 5%, projected generationally from 2011 with scale MP-2014 adjusted to reflect long term mortality improvement trend decreasing from 1% to 0% from 2012 to 2031 |

Discount Rate

- | | |
|-------------|-------|
| 2015 | 5.65% |
| 2014 | 6.65% |

Retirement:

- | | |
|-------------|---|
| 2015 | According to a graded retirement schedule based on years of service and age
Years of service - range from 20 to 30 years
Age - ranges from age 55 to age 68 |
| 2014 | According to a graded retirement schedule based on years of service and age
Years of service - range from 20 to 30 years
Age - ranges from age 55 to age 68 |

Actuarial Cost Method:

- | | |
|-------------|-------------------------|
| 2015 | Traditional unit credit |
| 2014 | Traditional unit credit |

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. Interest In Anheuser-Busch Companies Master Trust

At December 31, 2015 and 2014, the Plan's interest in the investments of the Master Trust was approximately 3%.

The following table presents the fair values of investments in the Master Trust at December 31, 2015 and 2014:

	2015	2014
Investments, At Fair Value		
Collective trusts	\$ 1,181,140	\$ 1,200,583
Real estate properties	171,860	169,490
Short-term investments	14,592	37,081
	\$ 1,367,592	\$ 1,407,154

Investment income of the Master Trust for the years ended December 31, 2015 and 2014 is as follows:

	2015	2014
Investment Income		
Net appreciation in fair value investments	\$ 12,279	\$ 163,567
Real estate properties rental income	11,925	11,939
	24,204	175,506
Administrative Expenses	(1,117)	(1,318)
	\$ 23,087	\$ 174,188

Direct Financing Lease

The Company has contributed real estate properties to the Master Trust, which are leased back to the Company through a direct financing lease. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

Thereafter	144,527
	\$ 206,414

Fair Value Measurements

The Master Trust follows current accounting standards, which provide a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value:

Collective Trusts

Valued at the net asset value (NAV) of units in the collective trust funds. The NAV, as provided by the collective trust funds, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements *(Continued)*

Real Estate Properties

The fair value of the real estate properties held by the Plan is valued on the basis of its market value based upon independent appraisals of each property conducted by an independent, MAI-certified appraiser. The appraisals were based upon a combination of the sales comparison and income capitalization approaches, consistent with prior year. The appraiser takes into account historical and projected cash flow, the terms of the lease on the property and comparable sales, and as a result, the investment is classified as a Level 3 asset in the fair value hierarchy.

The valuation process involves an independent fiduciary's selection of an independent, MAI-certified appraiser. The independent fiduciary and representatives of the tenants accumulate the data concerning the properties for the appraiser. The appraiser prepares draft reports for each property which the independent fiduciary reviews in detail and discusses with the appraiser. The final report for each property is approved by the independent fiduciary and delivered to the Plan's Trustee. Management reviews the results of the certified appraisals and believes the results are fairly stated.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short maturities, and are valued at cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

There have been no changes in the valuation methodologies used at December 31, 2015 or 2014.

6. Transactions With Parties-In-Interest

The Master Trust holds investments in collective trust funds managed by the Trustee. Therefore, these transactions are allowable party-in-interest transactions under ERISA.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2015 and 2014 was \$171,860 and \$169,490, respectively. The Master Trust received rental payments for the years ending December 31, 2015 and 2014 of \$11,925 and \$11,939, respectively. These transactions are allowable party-in-interest transactions under ERISA.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

7. Income Tax Status

The IRS has determined and informed the Company by a letter dated November 20, 2013, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (the Code). Therefore, the underlying trust of such a Plan is exempt from federal income taxes under Section 501 of the Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. Risks And Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Mortality

For non-disabled participants, the prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants.

Disabled Mortality

For disabled participants: mortality in accordance with Revenue Ruling 96-7.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which active participants retire are shown below. Terminated vested employees are assumed to commence benefits at age 65.

Supplemental Portability Benefit Assumption

- No decrements other than mortality and retirement
- Retirement at the average retirement age of the participant's original defined benefit plan
- For Normal Cost calculation, growth of the Defined Contribution account balances at 7.50% and the following contribution rates per hour during the year:

<u>Location</u>	<u>2015</u>
Cartersville	4.190
Ft. Collins	4.290
Williamsburg	4.449
Houston Teamsters	5.301

- Defined Contribution account balances converted to annuities using whichever following set of assumptions that produces the higher annuity factor:
 - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
 - the funding valuation interest rate assumption and PPA unisex combined mortality for 2015

Form of payment

25% of participants are assumed to elect the normal form (single life annuity), 25% of participants are assumed to elect the 75% joint and survivor, and 50% of participants are assumed to elect the 10-year certain. Supplemental portability participants are assumed to elect the normal form (single life annuity).

10-year certain are valued using the substitution of annuity form under Proposed IRC §1.430(d)-1(f)(4). The 2015 unisex PPA combined optional post-retirement mortality table is used for conversions.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain (single life annuity for supplemental portability benefit participants).

Methods

Valuation date

First day of the plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset method

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (6.65% in 2014 and 6.80% in 2013, with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event would be less than 5%, the number who would receive the offer would be fewer than 10 employees, and the resulting liability impact would be de minimis.

Certain early retirement supplements available under the plan to Local 947 painters who terminate from the company after reaching early retirement are excluded due to the small number of eligible employees.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

The benefits for participants that cannot be located and which have been deemed forfeited by the Plan Administrator after reasonable attempts to locate the beneficiary and/or estate are not valued.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Conversion rate for 10-year certain form of payment	As required by IRC §430, 10-year certain benefits are valued using “annuity substitution” so that the interest rates assumed are effectively the same as described above for the discount rate.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h). The disabled mortality table used does not project mortality improvements beyond the valuation date.
Termination	<p>Termination rates were based on an experience study conducted in 2011, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Assumed termination rates differ by age, gender, service and location because of observed differences in termination rates by these factors.</p> <p>Termination rates for at-risk funding calculations are as required by IRC 430.</p>
Disability	Disability rates were based on a disability incidence developed by W. Alfred Hayes & Co. (former actuary). Given the lack of credible experience for disabled participants in this plan, and the lack of studies of incidence among comparable disabled participants (i.e., comparable demographics and disability definition comparable to plan’s definition), and the materiality of this assumption, there is not a different assumption that the plan actuary believes to be a better estimate.
Retirement	<p>Retirement rates were based on an experience study conducted in 2011, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Retirement rates differ by age, service, and location because of the observed effects these factors have on retirement rates.</p> <p>Retirement rates for at-risk funding calculations are as required by IRC 430.</p>

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Benefit commencement date for deferred vested benefits	Deferred vested participants are assumed to begin benefits at their normal retirement age (or current age if later) because the plan's experience is not considered to be credible and the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.
Form of payment	Optional form of payment elections were based on the pension experience study performed in 2011.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Termination	<p>Termination rates were based on an experience study conducted in 2011, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Assumed termination rates differ by age, gender, and service because of observed differences in termination rates by these factors.</p> <p>Termination rates for at-risk funding calculations are as required by IRC 430.</p>
Retirement	<p>Retirement rates were based on an experience study conducted in 2011, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Retirement rates for at-risk funding calculations are as required by IRC 430.</p>
Benefit commencement date for deferred vested benefits	Deferred vested participants are assumed to begin benefits at their normal retirement age (or current age if later) because the plan’s experience is not considered to be credible and the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.
Form of payment	Optional form of payment elections were based on the pension experience study performed in 2011.

Death Benefits for Participants in Active Service

Eligibility:	Must be a vested participant
Monthly Benefit:	The participant's spouse of at least one year will receive a monthly retirement income payable for life in an amount equal to 50% of the amount the participant would have received if he had terminated on his date of death (or actual termination date if earlier), survived to his earliest retirement date, elected to commence receiving benefits under the qualified joint-and-50% survivor option, and then immediately died.

Supplemental Portability Benefit

Eligibility:	The participant must be within a collective bargaining unit covered by an Anheuser-Busch –Teamsters National Brewery Conference Master Agreement, or a similar agreement, which includes special job security provisions. The participant must have transferred from a location covered by a defined benefit plan, pursuant to a transfer opportunity described in the agreement, to a new location that does not participate in such plan, and the combined retirement benefit from both the original plan and the new plan is less than the benefit the participant would have received from the original plan had he not transferred. The participant must have 5 years of vesting service and can commence benefits after attaining age 55.
Monthly Benefit:	The participant will receive a monthly benefit equal to the actuarial equivalent value of the benefit that would have been payable from the original defined benefit plan had the participant not transferred, less the actuarial equivalent values of the benefits actually payable to the participant from the original plan and new plan. The provisions for early retirement benefits under the original plan are used when determining the benefit that would have been payable had the participant not transferred.

1.35% of Average Compensation up to the average Social Security base plus 1.70% of Average Compensation in excess of the average Social Security base multiplied by years of benefit service (not in excess of 35 years).

For Latrobe Brewing Company employees covered under the prior Sundor Plan, a minimum of 2.0% of Final Earnings multiplied by years of benefit service is applied. This minimum cannot be greater than \$50,000.

For former John InBev Inc. Pension Plan participants as of May 1, 1993, accrued benefits under that plan were frozen as of March 31, 1995 and future benefits are earned under InBev USA L.L.C. Pension Plan for Salaried Employees for service after March 31, 1995.

For former BNA participants as of December 31, 2004, accrued benefits under their prior plan were frozen as of December 31, 2004. Effective December 31, 2004, the total accrued benefit for former BNA participants is equal to the greater of the InBev USA benefit on all service or the frozen BNA accrued benefit.

All accrued benefits were frozen as of December 31, 2009.

3. Normal Form of Payment:

Single Employees: Life annuity.

Married Employees: 50% joint and survivor, actuarially equivalent to a life annuity.

4. Optional Forms of Payment:

Straight life annuity.

75% or 100% joint and survivor annuity.

50%, 75%, or 100% contingent annuitant.

Lump sum if the present value is less than \$50,000.

For former BNA participants, the frozen benefit as of December 31, 2004 is available as a lump sum.

Actuarial equivalence is based on a discount rate of 8.0% and mortality assumption of the UP84 mortality table for all forms other than the lump sum. This option is based on the discount rates and Applicable Mortality Table in IRS 417(e).

Early Retirement Benefit

1. Eligibility: Age 55 and 10 years of vesting service. Completion of seven years of service for any employee of the Latrobe Brewing Company on October 7, 1987. The minimum accrued benefit on May 1, 1989 is available to prior Sundor Plan participants upon the earlier of attainment of age 55 or the date on which combined age plus years of service equals 80.
2. Monthly Benefit: The accrued benefit determined at date of early retirement, reduced 3% per year for each year early retirement date precedes age 62. For Latrobe Brewing Company employees covered under the prior Sundor Plan, the portion of the accrued benefit equal to the minimum accrued benefit on May 1, 1989, is payable unreduced beginning at the eligibility age described above. The accrued benefit in excess of the minimum accrued on May 1, 1989 is reduced as described above. For former BNA participants, the frozen December 31, 2004 benefit is reduced using the prior plan's actuarial equivalent basis.

Service for determining eligibility and early retirement reductions continues to grow for participants who are employed with other divisions of Anheuser-Busch InBev.

Vested Benefits Upon Termination of Service

The accrued benefit determined at date of termination multiplied by the appropriate vesting percentage from the following table:

<u>Year of Service</u>	<u>Vesting Percentage</u>
Less than 3	0%
3	20
4	40
5	60
6	80
7	100

For former BNA participants as of December 31, 2004, the accrued benefit determined at date of termination multiplied by the appropriate vesting percentage from the following table:

<u>Year of Service</u>	<u>Vesting Percentage</u>
Less than 3	0%
3	20
4	40
5	100

Upon attainment of age 55, the benefit above, reduced 1/180th for each of the first 60 months and 1/360th for each of the next 60 months by which commencement precedes NRD.

Benefit is paid as a lump sum if the present value is less than \$5,000.
