SECTION I

CHANGES SINCE LAST YEAR'S VALUATION

Changes in Pension Plan Provisions

No changes in the pension plan provisions were recognized with this actuarial valuation.

Legislated Changes

There were no legislative changes recognized with this actuarial valuation.

Changes in Actuarial Assumptions

Estimated expenses changed from \$117,000 for 2014 to \$125,000 for 2015, reflecting actual expenses paid during the year.

The mortality table for ASC 960 purposes has changed from the 2014 IRS Static Mortality Table to the RP-2014 Total Dataset with Scale MP-2014 Mortality Table. The discount rate for ASC 960 purposes has changed from 7.75% to 6.50%, reflecting the long term expected asset return of the plan based on its current asset allocation.

Changes in Actuarial Methods

No changes in actuarial methods were recognized with this actuarial valuation.

SECTION VII

ACTUARIAL METHODS

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

SECTION VII

ACTUARIAL METHODS

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

Death benefit payments commence on the first day of the month following the later (a) the participant's earliest retirement age or (b) the participant's death.

Disability Benefit

Eligibility

First day of the month coincident with or next following date Member declared totally and permanently disabled, but not earlier than two months following last date worked.

Benefit Formula

Disabled participant continues to earn benefit service until retirement. Earnings are assumed to remain at the level prior to disability.

SECTION I

CHANGES SINCE LAST YEAR'S VALUATION

Changes in Pension Plan Provisions

No changes in the pension plan provisions were recognized with this actuarial valuation.

Legislated Changes

There were no legislative changes recognized with this actuarial valuation.

Changes in Actuarial Assumptions

Estimated expenses changed from \$117,000 for 2014 to \$125,000 for 2015, reflecting actual expenses paid during the year.

The mortality table for ASC 960 purposes has changed from the 2014 IRS Static Mortality Table to the RP-2014 Total Dataset with Scale MP-2014 Mortality Table. The discount rate for ASC 960 purposes has changed from 7.75% to 6.50%, reflecting the long term expected asset return of the plan based on its current asset allocation.

Changes in Actuarial Methods

No changes in actuarial methods were recognized with this actuarial valuation.

SECTION VII

ACTUARIAL METHODS

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the HATFA interest rate corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

In accordance with the Highway and Transportation Funding Act of 2014 (HATFA), segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
2012-2017	90% - 110%
2018	85% - 115%
2019	80% - 120%
2020	75% - 125%
2021 and later	70% - 130%

For the 2013 plan year, segment rates may be adjusted by a corridor of 85% - 115% instead of 90% - 110%, in accordance with the plan sponsor's election.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

SECTION VII

ACTUARIAL METHODS

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects HATFA interest rates for discounting contributions and limiting expected earnings.

THALES COMMUNICATIONS PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2015 AND 2014

1. DESCRIPTION AND SIGNIFICANT EVENTS OF THE PLAN

General – The Thales Communications Pension Plan (the “Plan”) is a defined benefit pension plan subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”) that was established January 1, 1974, for the salaried employees of Thales Communications, Inc. and participating affiliates (the “Company”). Participants should refer to the Plan Document for a more complete description of the Plan’s provisions.

No other employees are eligible to participate under the Plan as participation was closed on December 31, 2002. On December 31, 2002, the accrual of plan benefits of the Plan was frozen. As a result of freezing the accrual of benefits, each person who was a general participant in the Plan on December 31, 2002, and who was in the employment of the Company on that date, became fully vested in their accrued benefits as of December 31, 2002.

Effective June 1, 2004, the Plan became one of the participating plans in the Thales Master Trust (Master Trust), see Note 4. The Master Trust’s custodian of the pooled separate account investments is Prudential Retirement Insurance and Annuity Company. The custodian for the Master Trust’s other investments is Prudential Bank & Trust, FSB. Both custodians are affiliated through common ownership, and will collectively be referred to as “Prudential.”

The Plan document was restated in 2013. The restated Plan has essentially the same provisions as the previous Plan.

Contributions – Employer contributions are based upon actuarial determinations. Under the current provisions of the plan, employees make no contributions. All contributions made by the employer are paid to the trustee and deposited in the trust fund.

Retirement Benefits – Participants become eligible for normal retirement on the first day of the month coincident with or next following the employee’s 65th birthday. Early retirement is permitted after age 55 with ten years of vested service.

Upon retirement, participants receive benefits based upon years of credited service, average annual compensation, and covered compensation, as defined by the Plan Document.

Benefit distributions upon normal retirement are in the form of a life annuity for unmarried participants, if an optional payment is not selected. Married participants receive an actuarially reduced 50% joint and survivor annuity. Optional payment forms include single life annuity, 10-year certain, joint and 50% survivor, joint and 75% survivor, joint and 100% survivor or lump sum payment of small amount.

Vesting – At December 31, 2002, the accrual of plan benefits was frozen and all eligible participants who were employed on that date became fully vested.

Surviving Spouse Benefits – Upon the death of a vested participant prior to eligibility for early retirement, benefits become payable to the spouse beginning on the participant’s earliest retirement date. The benefit payable to the spouse is equal to the 50% joint and survivor annuity that would have been paid had the participant survived to their earliest retirement date.

Upon the death of a vested participant after reaching eligibility for early retirement, the benefit payable to the spouse equals the benefit that would have been paid had the participant selected the early retirement option. The benefit is payable in the form of a 50% joint and survivor annuity.

Disability Retirement Benefits – In the event that a participant's employment is terminated as a result of disability, and the participant is eligible to receive a normal or early retirement benefit, they shall receive such benefit.

Administrative Expenses – Accounting fees incurred in administering the Plan are paid by the Company. Actuarial, PBGC, auditing and trustee fees are paid from the assets of the Plan.

Plan Termination – Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. Upon termination, the net assets of the Plan will be allocated for payment to the participants in an order of priority as prescribed by ERISA and its related regulations and the Plan document.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefits and may also depend on the financial condition of the Company and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC"), as well as the priority of those benefits. Some benefits may be fully or partially provided for by the then existing net assets of the Plan and the PBGC guarantee, while other benefits may not be provided for at all.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements have been prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires of the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment in Master Trust – The fair value of the Plan's investments in the Master Trust is based on the beginning of year value of the Plan's interest in the trust plus actual contributions and allocated investment income less actual distributions and allocated expenses. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Funding Policy - Annual contributions, as determined by the Plan's actuary, are made by the Company to fund the Plan and have been computed in accordance with the Unit Credit Actuarial Cost Method. No contribution was required for 2015 and 2014.

Payment of Benefits – Benefits to participants are recorded when paid.

Accounting Standards Update – In May 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-07, *Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, which, among other things, amends Accounting Standards Codification (ASC) 820, *Fair Value Measurements*, to remove the requirement to categorize within the fair value hierarchy all

investments for which fair value is measured using the net asset value per share practical expedient. The ASU is effective for reporting periods beginning after December 15, 2015, and early application is permitted. This standards update is to be applied retrospectively, and management has elected to adopt this standards update early.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962); Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Parts I and III are not applicable to the Plan. Part II eliminates the requirements to disclose individual investments that represent 5% or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Part II is to be applied retrospectively. Management has elected to adopt Part II early.

Date of Management's Review – Subsequent events have been evaluated through October 7, 2016, which is the date the financial statements were available to be issued, and there were no material events requiring recognition or disclosure.

3. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances-retirement, death, disability, and termination of employment, are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the plan's actuary, Prudential. Significant actuarial assumptions used include the following:

Investment return – 6.5% per annum, compounded annually for 2015 and 2014.

Life expectancy assumptions – for the 2015 year, the RP-2014 Adjusted to 2006 Total Dataset with Scale MP-2015, and for the 2014 year, the RP-2014 Total Dataset with Scale MP-2014 Mortality Table.

Discount rate – 6.5% for 2015 and 2014.

Estimated expenses – \$165,000 for 2015 and \$125,000 for 2014.

The actuarial present value of accumulated plan benefits as January 1 is as follows:

	2016	2015
Vested Benefits:		
Active participants	\$ 2,049,757	\$ 2,062,868
Retired participants	7,367,099	7,247,903
Terminated participants	<u>3,572,020</u>	<u>3,807,409</u>

Non-Vested Benefits	<u>-</u>	<u>-</u>
Total accumulated plan benefits	<u>\$ 12,988,876</u>	<u>\$ 13,118,180</u>

The change in accumulated plan benefits for the year ended December 31, 2015 is as follows:

benefits at beginning of period	\$ 13,118,180
Increase (decrease) during the year attributable to:	
Benefits accumulated	6,407
Interest due to the decrease in discount period	828,236
Assumption changes	(199,741)
Benefits and certain expenses paid	<u>(764,206)</u>
	<u>(129,304)</u>
Actuarial present value of accumulated plan benefits at end of period	<u><u>\$ 12,988,876</u></u>

The changes in the actuarial assumptions discussed above resulted in the decrease to the accumulated plan benefits of \$199,741.

4. MASTER TRUST

The Plan's sole investment is its interest in the Master Trust which was established for the investment of assets of this Plan (referred to as Plan A below) and two other Thales Company sponsored retirement plans, the Retirement Plan of Thales, ATM, Inc. (Plan B) and Thales Pension Plan for Certain U.S. Employees (Plan C). Each participating retirement plan has a divided interest in the Master Trust. The value of the Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income (loss), less actual distributions and allocated administrative expenses. Investment income (loss), investment management fees and other direct expenses relating to the Master Trust are allocated to individual plans based on the average daily balances. The Plans' respective interests in the Master Trust as of December 31, 2015 and 2014, are shown in the table below.

The following is a summary of the value of the investments of the Master Trust as of December 31:

Plan's % Interest in Master Trust	<u>25.30%</u>	<u>26.44%</u>	<u>48.25%</u>		

The following are changes in net assets for the Master Trust for the year ended December 31, 2015:

Investment loss in assets of Master Trust	\$ (439,450)
Contributions	1,994,490
Distributions to participants	(7,741,559)

Net assets of Master Trust, beginning of year	<u>54,497,995</u>
Net assets of Master Trust, end of year	<u>\$ 47,668,842</u>

The Master Trust is comprised of mutual funds, pooled separate accounts and a limited partnership, which invest in a variety of investments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility due to the level of risk associated with certain investment securities. It is reasonably possible that changes in the values of investment securities will occur in the near term and, that such changes could materially affect the amounts reported in the financial statements.

Investment expenses are allocated to the individual plans based upon each Plan's investments, and certain other expenses are charged to each specific plan. Expenses paid by the Master Trust attributable to this Plan and in total consisted of the following for the year ended December 31, 2015:

	<u>Plan A</u>	<u>Plan B</u>	<u>Plan C</u>	<u>Total</u>

5. FAIR VALUE MEASUREMENTS

FASB ASC 820, *Fair Value Measurements*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs consist of unadjusted quoted prices for identical assets in active markets that the plan has the ability to access.

Level 2 – Inputs consist of 1) quoted prices for similar assets in active markets, 2) quoted prices for identical or similar assets in inactive markets, 3) inputs other than quoted prices that are observable, and 4) inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset has a specified (contractual) term, the level 2 input must be observable for substantially the full term.

Level 3 – Inputs consist of unobservable inputs where there is little or no market activity, and the reporting entity makes estimates and assumptions related to the pricing of the asset including assumptions regarding risk.

The assets fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2015 and 2014:

Master Trust – Valued at fair value based on the fair value of the underlying investments of the fund, which have been determined based on the fair value of the underlying investments of the Master Trust. When quoted market prices are not available, the fair value of investments is estimated primarily by independent investment brokerage firms and insurance companies.

The underlying investments in the master trust are valued as follows:

Pooled Separate Accounts – Prudential calculates a unit value (similar to a net asset value “NAV”) of a separate account daily. It is the sum of the

market value of the underlying investments as determined by quoted market prices, less operating expenses accrued but not deducted, if any.

Mutual Funds – Valued at the closing price reported on the active market on which the individual securities are traded.

Limited Partnership – Valued at the reported amount in the audited financial statements, based on the fair value of the underlying investments held by the limited partnership.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Master Trust's investments are reported at fair value as follows at December 31, 2015 and 2014:

(a) Certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in Note 4.

The following table summarizes investments for which fair value is measured using the net asset value per Share Practical Expedient as of December 31, 2015 and 2014, respectively.

December 31,			Redemption Frequency (If	Redemption Notice
2015	Fair Value	Unfunded Commitments	Currently Eligible)	Period
Pooled Separate Accounts (b)	\$ 33,900,247	n/a	Daily	None
Limited Partnership (c)	\$ 3,448,268	n/a	See below	See below

December 31,			Redemption Frequency (If	Redemption Notice
2014	Fair Value	Unfunded Commitments	Currently Eligible)	Period
Pooled Separate Accounts (b)	\$ 38,021,993	n/a	Daily	None
Limited Partnership (c)	\$ 3,931,262	n/a	See below	See below

(b) Pooled separate accounts are investments offered through Prudential that use NAV per share to determine fair value. The investments are direct filing entities, and therefore, it is not necessary to disclose their investment strategies herein.

(c) This investment is the “Alternative Investments Institutional, L.P., (the “LP”) a Delaware limited partnership. The LP was organized for the purpose of investing in securities and private investment companies. The LP is managed by Alternative Investment Group, L.L.C. (the “General Partner”) and Alternative Investment Group Services, L.P. (the “Management Company”). The LP invests substantially all of its assets through a master-feeder structure in Alternative Investments Institutional Master Fund Ltd. (the “Master Fund”), an investment company that has the same investment objectives as the LP. The LP is valued at the end of each calendar year. Redemption requirements call for 90 days’ notice, and the LP will be redeemed at the end of that quarter. Ninety percent of the fund will be redeemed, and 10% will be held back until the next annual audit is complete.

The Plan Administrator assesses the reasonableness of the valuation of the limited partnership investment by reviewing the published financial statements of the limited partnership, and by reviewing industry and market conditions.

6. INFORMATION CERTIFIED BY CUSTODIANS

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Prudential Retirement Insurance and Annuity Company and Prudential Bank & Trust, FSB, the custodians of the Plan, have certified that the following data included in the accompanying financial statements is complete and accurate with respect to investments as of December 31, 2015 and 2014, and for the year ended December 31, 2015:

- Investment in Master Trust, at fair value
- Investment loss from Master Trust

The Plan's independent public accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

7. TAX STATUS

The IRS has determined and informed the Company by a letter dated July 27, 2014, that the Plan is designed in accordance with applicable sections of the IRC. The Plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision has been made in the financial statements for income taxes.

Generally accepted accounting principles requires Plan management to evaluate tax positions taken by the Plan and recognizes a tax liability (or asset) if the Plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments held in the Master Trust are pooled separate accounts managed by Prudential. Prudential is the custodian of the Plan and therefore, these transactions qualify as party-in-interest.
