Any participant who dies with a vested benefit under the Plan shall have a survivor's benefit payable to the participant's eligible spouse. Any unmarried participant who dies before pension commencement date shall forfeit benefits under the Plan.

In the event a participant over the age of 55 becomes disabled after the completion of ten years of service, that participant is entitled to disability retirement benefits equal to the accrued benefit at the time of disability, actuarially reduced if payments commence prior to age 65.

Vesting - The Plan provides for 100% vesting upon completion of five years of service. Employees terminating prior to completing 5 years of service forfeit the right to receive their accumulated plan benefits.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements have been prepared on the accrual basis of accounting, whereby income is recorded in the accounting period it is earned and expenses in the accounting period the expense is incurred regardless of when the cash is received or paid. The Plan's more significant accounting policies are as follows:

Investments - Investments are reported at their fair values based on quotations from public security exchanges. Dividend and interest income is recorded when earned. Realized gains and losses on sales of investments are determined using the average cost method.

Contributions - Contributions are recognized when the expense is incurred by the Plan Sponsor. National Electric Coil, Inc. makes contributions to the Plan within the minimum and maximum amounts allowed by law as determined by the Plan's actuary.

Benefit Payments - Benefit payments are recognized when paid to the participants.

Fees and Expenses - Fees and expenses are recognized when incurred. A portion of the fees and expenses connected with providing administrative services to the Plan are absorbed by the Plan Sponsor.

Federal Income Tax Status - The Internal Revenue Service (IRS) issued its latest determination letter on January 19, 2001, which stated that the Plan and its underlying trust qualify under the applicable provisions of the Internal Revenue Code and, therefore, are exempt from federal income taxes. The Plan Sponsor and trustees are not aware of any provision, action or event that has occurred that might affect the Plan's qualified status.

The Plan complies with ASC 740-10 related to uncertain tax positions. This standard prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken on a tax return. Plan administration is not aware of any tax positions taken by the Plan that it considers to be uncertain. Tax returns for the years ended 2012, 2013 and 2014 are open and subject to examination by the Internal Revenue Service.

Subsequent Events - Subsequent events were evaluated through October 10, 2016, which is the date the financial statements were available to be issued.

Risks and Uncertainties - The Plan invests in a variety of investment securities. These investment securities are exposed to various risks, such as interest rate and market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes would materially affect the amounts reported in the statement of net assets available for plan benefits.

Use of Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

New Accounting Standards - In May 2015, the Financial Accounting Standards Board (FASB) issued ASU 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, which exempts investments measured using the

New Accounting Standards - Continued – net asset value (NAV) practical expedient in ASC 820, *Fair Value Measurement*, from categorization within the fair value hierarchy. The guidance requires retrospective application and is effective for fiscal years beginning after December 15, 2016. Early adoption is permitted. The Plan elected not to early adopt the provisions of this new standard and are still evaluating the effects on the financial statements.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960): Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965): Part (I) Fully Benefit-Responsive Investment Contracts, Part (II) Plan Investment Disclosures, Part (III) Measurement Date Practical Expedient*. This three-part standard simplifies employee benefit plan reporting with respect to fully benefit-responsive investment contracts and plan investment disclosures, and provides for a measurement-date practical expedient. Parts I and II are effective for fiscal years beginning after December 15, 2015 and should be applied retrospectively, with early application permitted. Part III is effective for fiscal years beginning after December 15, 2015 and should be applied prospectively, with early application permitted. The Plan has elected not to early adopt the provisions of this new standard and are still evaluating the effects on the financial statements.

Jacob, Haxton & Bood serves as the Plan's actuary and Balestra, Harr & Scherer, CPAs serves as the Plan's auditor. As a result, transactions with these parties qualify as party-in-interest transactions.

Certain administrative functions are performed by officers or employees of the Plan Sponsor. No such officer or employee received compensation from the Plan. Certain administrative expenses of the Plan are paid directly by the Plan Sponsor and are not charged to the Plan.

RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

Differences between the audited financial statements and the information on the Form 5500 related to the other income of \$17,246 is listed separately on the Form 5500 but combined with dividends on the financial statements.

OBLIGATION FOR PENSION BENEFITS

The Plan Sponsor's contributions are designed to fund the Plan's annual service costs on a current basis and to fund prior service costs and recognize the actuarial gains and losses over a twenty-year period.

Accumulated plan benefits are those future benefit payments attributable under the Plan's provisions to service that employees have rendered to date. The actuarial present value of accumulated plan benefits has been determined by an independent actuary, and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the benefit information date and the expected payment dates. The effect of Plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective.

The more significant assumptions and methods underlying the actuarial valuations are as follows:

<u>Actuarial method</u>	<u>Unit Credit funding method</u>

Retirement age	Normal retirement age (65)
Salary increase	N/A
Employee turnover	T-2

The Plan Sponsor may terminate the Plan or discontinue contributions at any time, subject to the provisions set forth in ERISA and the collective bargaining agreement. Should the Plan be terminated at some future time, all participants become 100% vested in benefits earned as of the termination date. If the termination is the result of bankruptcy or near bankruptcy of the Plan Sponsor and the Plan's assets are not adequate to pay all benefits vested prior to the termination, the Pension Benefit Guaranty Corporation (PBGC) will take over the Plan and will apply those benefits which it guarantees. In this case, some participants may receive a smaller benefit than if the Plan had continued. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits (as described in the Plan) and the level of benefits guaranteed by the PBGC at that time.

OBLIGATION FOR PENSION BENEFITS - Continued

If, however, the Plan is terminated for any reason other than the bankruptcy or near bankruptcy of the Plan Sponsor and the Plan has insufficient assets, the Plan Sponsor will be required to pay to the Plan an amount which, together with Plan assets, will satisfy all benefits accumulated to the date of the Plan termination.

FAIR VALUE MEASUREMENTS

The Plan complies with ASC 820 *Fair Value Measurements and Disclosures* to account for and report fair value. ASC 820 provides a single definition of fair value, a framework for measuring fair value and expanded disclosures concerning fair value. It also defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Fair value of certain assets and liabilities are determined based on the fair value hierarchy established in the standard, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The standard describes three levels within its hierarchy that may be used to measure fair value which are:

Level 1 - Values are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Values are based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Values are generated from unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. These unobservable inputs would reflect management's estimates of assumptions that market participants would use in pricing related assets or liabilities. Valuation techniques might include the use of pricing models, discounted cash flow models or similar techniques.

A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels.

The methods used may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while Plan management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Mutual funds include debt and equity mutual funds. These funds are publicly traded and their fair value represents the closing price or net asset value as of December 31, 2015 and 2014. As a result, these items and cash are listed as Level 1. Cash equivalents include money market funds which are listed as Level 2 and their value is based on the values of the underlying securities held by the funds.

Reasonable efforts were made in the valuation to ensure items that are significant to the actuarial liabilities or cost are treated appropriately and not included or excluded inappropriately.

A range of results different from those shown in this report could also be considered reasonable. The results are shown to the nearest dollar for convenience and do not imply a precision not inherent in actuarial calculations.

Future actuarial measurements may differ significantly from the current measurements in this report due to factors such as plan experience differing from anticipated demographic or economic assumptions, increases or decreases inherent in the methodology used for the measurements, changes in plan provisions, or changes in applicable law.

Cost Methods

Funding

The actuarial cost method used for funding purposes is frequently described as the Unit Credit funding method. This method sets the accrued liability equal to the present value of accrued benefits, and sets the normal cost equal to the present value of the benefit accrued in the current year. This method is required by Internal Revenue Code.

Asset Method

Funding

Assets are valued at Market Value with receivable contributions adjusted as required by law.

Other Methods

The valuation date was set as of the beginning of the plan year.

Interest rates used are the three Segment Rates as published monthly by the Internal Revenue Service for the third full month prior to the valuation date. The first Segment Rate is applicable for benefit payments made during the first 5 years from the valuation date, the second Segment Rate is applicable for benefit payments during the next 15 years, and the third segment rate is applicable for all benefits payments after 20 years.

Funding relief was not elected for the 2009, 2010 nor 2011 plan years.

Minimum funding interest rates are limited by a corridor over the next few valuations in accordance with the following table per the current law:

Valuation Cycle Beginning	Percentage of the 25 year Average of IRS Rates	
	Minimum	Maximum
2015	90%	110%
2016	90%	110%
2017	90%	110%
2018	85%	115%
