Note 1 - Plan Description

The following description of Century Aluminum of West Virginia, Inc. Hourly Employees Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a noncontributory defined benefit pension plan and covers substantially all employees of Century Aluminum of West Virginia, Inc. (the "Company") who are represented by the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industries and Service Workers International Union, AFL-CIO-CLC (the "Union"). The Plan is a "spin-off" of all active employees at the Ravenswood facility who were participants in the Kaiser Aluminum and Chemical Corporation Pension Plan (KAPP). In connection with the spin-off, the Company is responsible for the benefits of active participants of the Company who were formerly in the KAPP. The spin-off met applicable government regulations. Represented employees hired after February 7, 1989 are eligible to participate in the Plan in accordance with the Plan's provisions.

In accordance with the Plan and the February 7, 1989 asset purchase agreement between the Company and Kaiser Aluminum and Chemical Corporation (KACC), the Plan grants credit for service under KAPP for purposes of eligibility, vesting, and benefit accruals. The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974 (ERISA).

On July 27, 2015, the Company announced the immediate and permanent closure of the Company's plant located in Ravenswood, West Virginia (Ravenswood). The Ravenswood smelter has been idled since February 2009. The decision to permanently close the Ravenswood smelter was based on the inability to secure a competitive power contract for the smelter, compounded by challenging aluminum market conditions largely driven by increased exports of aluminum from China. As a result, the economics of restarting and operating the facility are unfavorable. The Company does not believe the permanent closure of the Ravenswood plant will have a material impact on the Plan's financial statements.

Contributions - All contributions to the Plan are made by the Company. The Company contributes such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants. No participant contributions are permitted.

Funding - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Note 1 - Plan Description (Continued)

Pension Benefits - Retirement benefits under the Plan are based upon age attained and years of service. The collective bargaining agreement between the Company and the Union specifies the pension factors by job class, which are utilized in the determination of monthly benefits. Eligibility for normal retirement requires the participant to attain the age of 62 and have 10 years of service or to have 30 or more years of continuous service, but not to have attained age 62. The Plan permits early retirement at age 60 provided the participant has completed at least 10 years of continuous service. The Plan also provides for death and disability benefits. Participants become vested following the completion of five years of service.

Effective October 1, 2014, the Plan was amended to allow for a temporary distribution widow benefit, as defined by the second amendment to the plan agreement. Pursuant to the second amendment, the temporary distribution widow benefit allows for a one-time lump-sum distribution payable in December 2014 or a monthly annuity starting in December 2014. The temporary distribution widow benefit is available for spouses who are beneficiaries of deceased employees and former employees who participated in the plan, terminated employment with the Company before July 31, 2014, earned a vested pension under the Plan, have not yet commenced the receipt of monthly pension benefits as of October 1, 2014, and are not a restricted employee as defined by the Internal Revenue Code.

Party-in-interest Transactions - Certain plan assets are in investment funds managed by SEI Private Trust Company or its affiliates. SEI Private Trust Company is the custodian of the Plan; therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation and Income Recognition - Investments held by the Plan are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

a. Retired or terminated employees or their beneficiaries

b. Beneficiaries of employees who have died

c. Present employees or their beneficiaries

Note 2 – Summary of Significant Accounting Policies (Continued)

Actuarial Assumptions - The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at 2015 and 2014 are summarized as follows:

Actuarial cost method	-	Unit credit actuarial cost method
Assumed rate of return	-	6.75 percent per annum at December 31, 2015 and 2014
Mortality basis	-	RP-2000 combined fully generational mortality with blue collar adjustment using Scale SSA for December 31, 2014 and RP-2000 Mortality Table for males and females projected to 2025 with a blue collar adjustment using Scale BB for December 31, 2013
Incident of retirement	-	Early retirement age assumptions beginning at age 55 with full retirement at age 70

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Certain administrative costs, including custodial, retirement services, and Pension Benefit Guaranty Corporation (PBGC) fees and expenses, are paid by the Plan. All other administrative costs are paid by the Company.

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Note 2 - Summary of Significant Accounting Policies (Continued)

New Accounting Pronouncement - During 2015, the Plan adopted Accounting Standards Update (ASU) No. 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, and III. Measurement Date Practical Expedient*. Part II of the ASU was applicable to the Plan and modified the investment disclosures under ASC 820, *Fair Value Measurements*, and ASC 960. This standard was adopted retrospectively and had no impact on the Plan's net assets or changes in net assets.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 30, 2016, which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

Note 3 - Fair Value Measurements (Continued)

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

All investments held by the Plan are classified as Level I investments within the fair value hierarchy.

The following valuation methodologies have been used to value the Plan's investments:

Mutual Funds - Mutual funds are valued at closing quoted prices reported in active markets.

U.S. Government Securities - The U.S. government securities are valued using quoted market prices.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Assets Measured at Fair Value on a Recurring Basis at December 31, 2015

	Investments (at Fair Value)	Level I	Level 2	Level 3
Mutual funds	$ 39,783,643	$ 39,783,643	$ -	$ -
U.S. government securities	6,886,975	6,886,975	-	-
Total investments at fair value	$ 46,670,618	$ 46,670,618	$ -	$ -

Assets Measured at Fair Value on a Recurring Basis at December 31, 2014

	Investments (at Fair Value)	Level I	Level 2	Level 3
Mutual funds	$ 55,223,572	$ 55,223,572	$ -	$ -

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer.

Note 4 - Unaudited Information

SEI Private Trust Company (the "Custodian") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedules of assets held at end of year and reportable transactions are based solely on information provided by the Custodian.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from PricewaterhouseCoopers, LLP. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of December 31, 2015 and 2014, the most recent actuarial valuations, are as follows:

	2015	2014
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	$ 39,210,448	$ 40,149,621
Participants entitled to deferred benefits	4,773,081	5,903,782
Other vested participants	185,098	1,125,851
Total vested benefits	44,168,627	47,179,254
Nonvested benefits	33,161	48,976
Total actuarial present value of accumulated plan benefits	$ 44,201,788	$ 47,228,230

Note 5 - Accumulated Plan Benefits (Continued)

A summary of significant changes in the actuarial present value of accumulated plan benefits during the years ended December 31, 2015 and 2014 is as follows:

	2015	2014
Actuarial present value of accumulated plan benefits -		
Beginning of year:	$ 47,228,230	$ 52,093,337
Increase during the year attributable to:		
Net benefits accumulated (including actuarial gains and losses)	(348,235)	3,689,968
Increase for interest due to the decrease in the discount period	2,999,415	3,273,816
Changes in actuarial assumptions	-	2,292,704
Benefits paid	(5,677,622)	(14,121,595)
Net decrease	(3,026,442)	(4,865,107)
Actuarial present value of accumulated plan benefits - End of year	$ 44,201,788	$ 47,228,230

A summary of significant changes in the actuarial present value of accumulated plan benefits during the years ended December 31, 2015 and 2014 is as follows:

There were no changes in assumption in 2015.

The change in assumption in 2014 is the result of a change in the mortality tables to better reflect anticipated plan experiences as well as the reduction of the discount rate.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Actuarial Methods for Funding Purposes

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Smoothed Method (for ERISA Funding purposes only):

Smoothed value method. Under this method the Plan Assets is equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefit payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate with no phase-in applicable to the corresponding valuation date).
