Schneider Electric USA, Inc. Pension Plan

Notes to Financial Statements

December 31, 2015

1. Description of the Plan

The following description of the Schneider Electric USA, Inc. Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan document for more complete information.

General

The Plan, established in 1943 for salaried employees, is a non-contributory, defined-benefit pension plan that provides retirement benefits for eligible salaried and non-union hourly employees of Schneider Electric USA, Inc. (the Company) who are not participants in another company-sponsored pension plan, except as noted below.

Employees hired or rehired on or after January 1, 2006, are not eligible to participate in the Plan. The Company amended the Plan in November 2009 to freeze accrued benefits as of December 31, 2009 (the Freeze Date), and to fully vest all participants who were active participants as of December 31, 2009.

The Schneider Electric Benefits Committee of the Company controls and manages the operation and administration of the Plan. State Street Bank and Trust Company (the Trustee) serves as trustee of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

The Plan's investment assets are held in a trust account and consist of an undivided interest in an investment account of the Schneider Electric USA, Inc. Common Trust (the Master Trust), a master trust established by the Company and administered by the Trustee.

On September 26, 2014, the Plan was amended and began notifying certain eligible participants of an offer to pay those individuals' pension benefit in a lump sum. Individuals eligible for the voluntary lump-sum payment option were generally participants who terminated employment on or prior to March 31, 2014, were entitled to a future benefit, had not commenced receipt of their pension benefit as of September 30, 2014, and whose vested benefit was below a specified threshold as of May 1, 2014. The 2014 lump-sum payments amounted to approximately $48 million. The accumulated benefit obligation disclosed in Note 5 reflects the impact of this amendment.

1. Description of the Plan (continued)

Pension Benefits

Under the Plan, employees retiring at their normal retirement date are entitled to defined-retirement benefits as specified in the plan document. Covered employees with five or more years of vesting service become fully vested in the Plan and are eligible for pension benefits upon attainment of retirement age or any time after age 55 with five or more years of vesting service on an actuarially equivalent basis. All participants that were active as of December 31, 2009, are fully vested.

The amount of benefits to be provided at the time of retirement depends upon an employee's years of benefit service, average earnings (as defined), age, and date of termination. For certain hourly participants, the amount of benefits to be provided at the time of retirement depends upon an employee's years of benefit service and the pension rate in effect at the date of termination. The Plan also provides for early retirement, deferred retirement, and surviving spouse benefits. Pension benefits are provided to participants under several retirement options based upon years of continuous service and age.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. Summary of Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition

The Plan's investments are held in the Master Trust and are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). See Note 8 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Administrative Expenses

The Plan pays most of its administrative expenses. All other administrative expenses of the Plan are paid by the Company. The Plan's sponsor provides accounting and other administrative services to the Plan at no charge.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 5) represent the actuarial present value of estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the Freeze Date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee services rendered to the valuation date.

New Accounting Pronouncements

In May 2015, the Financial Account Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-07, *Disclosures for Investments in Certain Entities that Calculate Net Asset Value Per Share (or its Equivalent)*, (ASU 2015-07). ASU 2015-07 removes the requirement to

2. Summary of Significant Accounting Policies (continued)

categorize within the fair value hierarchy investments for which fair values are estimated using the net asset value practical expedient provided by Accounting Standards Codification 820, *Fair Value Measurement*. Disclosures about investments in certain entities that calculate net asset value per share are limited under ASU 2015-07 to those investments for which the entity has elected to estimate the fair value using the net asset value practical expedient. ASU 2015-07 is effective for entities (other than public business entities) for fiscal years beginning after December 15, 2016, with retrospective application to all periods presented. Early application is permitted. Management has elected to adopt ASU 2015-07 early.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans* (Topic 960), *Defined Contribution Pension Plans* (Topic 962), *Health and Welfare Benefit Plans* (Topic 965): (Part I) *Fully Benefit-Responsive Investment Contracts,* (Part II) *Plan Investment Disclosures*, (Part III) *Measurement Date Practical Expedient*. Part II eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. Parts I and III are not applicable to the Plan. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Part II is to be applied retrospectively. Management has elected to adopt Part II of the ASU early.

3. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2015 and 2014. The Company made contributions of $29,000,000 and $51,908,762 for 2015 and 2014, respectively.

4. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

5. Accumulated Plan Benefits

An independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information is as follows:

	December 31, 2014
Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants and beneficiaries currently receiving payments	$ 497,392,101
Other participants	459,702,255
Non-vested benefits	10,490,034
	$ 967,584,390

5. Accumulated Plan Benefits (continued)

The changes in accumulated plan benefits are as follows:

Accumulated plan benefits – December 31, 2013	$ 1,028,899,134
Changes during the year attributable to:	
Benefits accumulated and actuarial gains	8,430,063
Benefits paid	(99,682,231)
Increase for interest	58,787,041
Assumptions	(28,849,617)
Net decrease	(61,314,744)
Accumulated plan benefits – December 31, 2014	$ 967,584,390

The significant actuarial assumptions used in the valuations were:

Assumed rate of return	2014 – 6.00% 2013 – 6.00%
Retirement age	Various rates ranging from 4% at age 55 to 100% at age 70
Life expectancy of participants	2014 – RP 2014, Buck Modified – MP-2016 2013 – RP 2014, MP-2014

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

6. Tax Status

The Plan has received a determination letter from the Internal Revenue Service (the IRS) dated September 2, 2014, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is tax-exempt. Subsequent to this determination by the IRS, the plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualified status. The plan administrator believes the plan is being operated in compliance with the applicable requirements of the Code and therefore believes the Plan is qualified and the related trust is tax-exempt.

6. Tax Status (continued)

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2015, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2012.

7. Master Trust

The investment in the Master Trust represents the Plan's undivided ownership of the net assets of the Master Trust, which have been accumulated through the Company's contributions and investment activity of the Master Trust, less benefit payments. Use of the Master Trust permits the commingling of trust assets with the assets of other defined-benefit pension plans sponsored by the Company. Although assets of all plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

All investment information disclosed in the accompanying financial statements, including investments held at December 31, 2015 and 2014, and net appreciation (depreciation) in fair value of investments, interest, dividends, and investment expenses for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Trustee.

7. Master Trust (continued)

At December 31, the investments of the Master Trust are summarized as follows:

	2015	2014
Investments, at fair value:		
Short-term investment funds	**$ 32,113,307**	$ 13,023,230
Private equity investment funds	**63,695,595**	77,336,311
Common/collective trust funds	**1,103,865,667**	1,131,520,502
Total investments	**$1,199,674,569**	$1,221,880,043
Plan's interest in the Master Trust	**74%**	76%

The net investment gain of the Master Trust for the years ended December 31 is summarized below:

	2015	2014
Dividend and interest income	**$ 20,720,483**	$ –
Net (depreciation) appreciation in fair value of investments	**(16,191,209)**	114,331,820
Other income	**167,320**	102,006
Net investment gain	**$ 4,696,594**	$ 114,433,826

8. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets and liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in markets that are not active.
- Observable inputs other than quoted prices that are used in the valuation of the assets or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals).
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

8. Fair Value Measurements (continued)

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The following is a description of the valuation techniques and inputs used for assets measured at fair value:

Private equity investment funds: Valued at the net asset value (NAV) provided by the investment fund managers. The NAV is calculated using valuation models developed by the investment fund managers and independent third-party appraisals.

Common/collective trust funds: Valued at the NAV provided by the administrators of the funds. The NAV is based on underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding.

Short-term investment fund: Valued at cost, which represents fair value.

	2015
Short-term investment fund	**$ 32,113,307**
Common/collective trust funds:	
Real estate[(a)]	**60,388,676**
Fixed income[(b)]	**741,083,928**
U.S. equities[(c)]	**207,571,157**
International equities[(c)]	**94,821,906**
Private equity investment funds[(d)]	**63,695,595**
Total assets at fair value	**$ 1,199,674,569**

8. Fair Value Measurements (continued)

	2014
Short-term investment fund	$ 13,023,230
Common/collective trust funds:	
Real estate[(a)]	70,344,830
Fixed income[(b)]	740,199,203
U.S. equities[(c)]	230,342,285
International equities[(c)]	90,634,184
Private equity investment funds[(d)]	77,336,311
Total assets at fair value	$ 1,221,880,043

(a) This category includes common/collective trust funds that are designed to produce a relatively high level of current income combined with moderate appreciation potential. This fund is primarily invested in real estate investments owned directly or through partnership interests and mortgage loans or income-producing real estate. A 45-day redemption notice is required to liquidate the fund. This category also includes a common/collective trust fund that is designed to generate a high level of total return through above-average income while maintaining the potential for capital appreciation. This fund is primarily invested in equity securities of issuers whose value is derived from development, management, and market pricing of underlying real estate properties. There are no redemption restrictions to liquidate this fund.

(b) This category includes common/collective trust funds that are designed to provide total return through investments in a diversified portfolio of investment-grade, fixed-income securities. This category also includes common/collective trust funds that are designed to provide total return through investments in a diversified portfolio of debt securities which are rated below investment grade or unrated. The redemption notice period is 15 business days (or such shorter period agreed to by the Trustee) for these funds. In normal functioning capital markets, generally there are no redemption restrictions to liquidate these funds.

(c) This category includes common/collective trust funds that are designed to provide a diversified profile of equity securities and emphasis on capital appreciation over an extended period of time. The redemption notice period is 15 business days (or such shorter period agreed to by the Trustee) for these funds. In normal functioning capital markets, generally there are no redemption restrictions to liquidate these funds.

(d) This category includes limited partnership investments, which offer portfolio diversification along with higher expected long-term market returns. These investments are 5 to 17 years old. The private equity investments can generally not be liquidated until the funds are fully terminated and distributed.

9. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan's contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

10. Related-Party Transactions

The Master Trust holds units of common/collective trust funds in which State Street Bank and Trust Company, the Trustee, is a sub-advisor or manager of these funds. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

11. Subsequent Events

Management has evaluated subsequent events through December 21, 2016, the date the financial statements were available to be issued.

In 2016, the Plan was amended to provide an early payout feature to certain eligible participants. Generally, participants whose employment ended on or before May 31, 2016, and have not yet commenced receiving benefit payments as of October 31, 2016, may elect to receive their accrued benefit in a lump-sum payment or an annuity.

Mortality

Mortality tables for non-disabled participants mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a static basis, projected 7 years from the valuation date for annuitants and 15 years for non-annuitants. For disabled participants, mortality is based on Rev. Rule 96-97 Post 1994 Disabled Mortality.

Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan administrative expenses to be paid from plan assets during the year.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (Continued)

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor and is an acceptable method under PPA.

Form of payment – Salaried

The underlying assumption is that 50% of future retirees will choose the life only option, while the remaining future retirees will choose a Joint and Survivor option.

Form of payment – Hourly

The underlying assumption is that 60% of future retirees will choose the life only option, while the remaining future retirees will choose a Joint & Survivor option.

Marital percentage

80% of participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including discounted receivable contributions, reduced by decreasing fractions, 2/3 and 1/3, of the of the gain/(loss) in each of the prior 2-years, respectively. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2015 Expected Return	6.00%	6.81%	6.00%
2014 Expected Return	6.00%	6.99%	6.00%
2013 Expected Return	7.50%	6.76%	6.76%

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Census and Assets

The valuation was based on data as of January 1, 2015 and does not take into account future participants. All census data was supplied by the plan administrator, Aon Hewitt, and was subject to reasonable consistency checks. Asset data was supplied by the trustee, State Street Bank, and was accepted unaudited.

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including discounted receivable contributions, reduced by decreasing fractions, 2/3 and 1/3, of the of the gain/(loss) in each of the prior 2-years, respectively. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2015 Expected Return	6.00%	6.81%	6.00%
2014 Expected Return	6.00%	6.99%	6.00%
2013 Expected Return	7.50%	6.76%	6.76%

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Census and Assets

The valuation was based on data as of January 1, 2015 and does not take into account future participants. All census data was supplied by the plan administrator, Aon Hewitt, and was subject to reasonable consistency checks. Asset data was supplied by the trustee, State Street Bank, and was accepted unaudited.
