NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2016 AND 2015

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The financial statements of Globe Metallurgical, Inc. Pension Plan (the Plan) have been prepared using the accrual basis of accounting.

Contributions

Globe Metallurgical, Inc. (the Company) makes contributions in an amount at least equal to the amount necessary for the Plan to remain in compliance with the minimum funding requirements of the Internal Revenue Code and the Employee Retirement Income Security Act of 1974 (ERISA). There were no employer contributions for the years ended June 30, 2016 and June 30, 2015.

Investments

The Plan's investments are administered by Benefit Trust Company and are stated at fair value. Mutual Funds are valued at quoted market prices, which represent the net asset value of shares held by the Plan at yearend. Investments are reflected at fair market value as determined by the trustee. Investment transactions are recorded on a settlement-date basis. Total investment value as recorded on a settlement-date basis does not materially differ from what total investment value would be if transactions were recorded on a trade-date basis.

Administrative Expenses

The expenses necessary to administer the Plan are paid by the Plan including, but not limited to, those involved in retaining professional assistance from an attorney, an accountant, an actuary, or an investment adviser. Fees related to the administration of the Plan are included in management fees. Investment related expenses are included in net appreciation of the fair value of investments.

Income, Contributions, and Distribution Recognition

Interest income is recognized in the period earned. Dividend income is recognized in the period in which the dividends are declared. Employer contributions are recognized when determined. Distributions to participants are recorded in the period in which the payment is made.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets available for benefits during the reporting period. Actual results could differ from those estimates.

SUMMARY OF THE PLAN

The following description of the Plan provides general information only. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

The Plan is a defined benefit plan that was originally established on November 20, 1984 as the Pension Plan for Salaried Employees of the Alamet Division of Globe Metallurgical, Inc. On that date, in connection with a change in ownership, the Company became the sponsor of the Interlake, Inc. Pension Plan for Salaried Employees (the Prior Plan). Under the terms of the related purchase agreement: (1) all active participants in the Prior Plan automatically became participants in the Plan; (2) the Prior Plan continues to maintain all liability for benefit payments to participants who have retired before November 20, 1984; and (3) for participants retiring on or after November 20, 1984, the Prior Plan will be partially liable for benefit payments to participants in the amount of benefits accrued as of November 19, 1984 under the Prior Plan.

The Plan was amended and restated effective July 1, 1988 to expand its coverage to include all salaried employees of the Company and all nonunion hourly employees of the Beverly plant of the Company and, on the same date, the Plan's name was changed to the Globe Metallurgical, Inc. Pension Plan. The Plan was further amended and restated effective July 1, 1994 to include the salaried employees of the Niagara Falls, New York, plant and all employees of the Springfield, Oregon, plant and to comply with current federal legislation.

Effective December 1, 2000, October 1, 2001, and February 1, 2002 the plan was amended to provide early retirement window benefits for certain designated employees of the company. The early retirement date as defined by the plan is age 55, provided the participant has performed at least five years of service. The early retirement benefit calculation is based on a percentage of the participant's normal retirement benefit and the participant may be deemed to have been born 5 years prior to his actual birth date, and he/she will be credited with additional years of service as provided by the plan.

Generally, employees covered by the Plan are eligible to participate after completing one year of continuous service. A participant becomes eligible to receive normal retirement benefits at age 65. Early disability and deferred vested retirement benefits are available to participants who meet the specific requirements of the Plan. Retirement benefits payable under the Plan are based upon the number of years of continuous service and average monthly earnings of each participant. Participants become 100% vested in accrued benefits after 5 years of continuous service. The Plan is noncontributory for the participants with all contributions being made by the Company.

On March 3, 2003, the Plan was amended to freeze accrual of benefits at March 31, 2003. This amendment states that no compensation paid in a payroll period ending after March 31, 2003 will be taken into account for calculation of accrued benefits.

On January 25, 2010, the Plan was restated for the EGTRRA Remedial Amendment.

JUNE 30, 2016 AND 2015

SUMMARY OF THE PLAN (CONTINUED)

The plan was restated in January, 2014 for the Pension Protection Act.

The Plan provides that the Company shall have the right to modify, change, or terminate the Plan at any time. Upon termination or partial termination of the Plan, the rights of all employees to benefits accrued through the date of such termination or discontinuance are nonforfeitable to the extent that those benefits have been funded by the Company or are required by the Pension Benefits Guaranty Corporation (PBGC) to be funded as a result of a plan termination.

FEDERAL INCOME TAXES

The Internal Revenue Service determined that the Plan is qualified under section 401(a) of the Code and the related trust is exempt from tax under Section 501(a) of the Code. Accordingly, the accompanying financial statements do not include a provision for federal income taxes.

The Plan obtained its latest determination letter on October 7, 2015, in which the Internal Revenue Service stated that the Plan, as then designed was in compliance with the applicable requirements of the Internal Revenue Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to June 30, 2013.

ACTUARIAL VALUATION AND ASSUMPTIONS

Findley Davies Retirement Plan Services, an independent actuary, performed the actuarial valuations of the Plan as of July 1, 2015 and of July 1, 2016. The valuations used the following assumptions.

Actuarial cost method:	The Unit Credit Funding Method
Assumed rate of investment return	7.0%
Retirement age	65
Mortality	RP-2000 Blue Collar Mortality Table

Accumulated plan benefits are those future periodic retirement benefit payments that are attributable, under the Plan's provisions, to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees; (b) beneficiaries of employees who have died; and (c) present employees. Benefits under the Plan are based on employees' average monthly compensation during the last 120 full consecutive calendar months prior to the date of retirement or termination. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Effective December 1, 2000, October 1, 2001 and February 1, 2002, and incorporated into the June 26, 2002 restatement, the plan offered early retirement window benefits (see note 2). The actuarial valuation as of July 1, 2002 and for the year ended June 30, 2002, reflects a \$742,000 increase in the actuarial liability due to the early retirement window benefit being accepted by 14 participants.

The actuarial present value of accumulated benefits as of the actuarial valuation dates of July 1, 2016 and 2015 are as follows:

FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board Statement No. 157 Fair Value Measurements (FASB Statement No. 157) establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB Statement No. 157 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or Liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in active markets;
- Inputs other than quoted prices that are observable for the assets or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or by other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

GLOBE METALLURGICAL, INC. PENSION PLAN
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2016 AND 2015

FAIR VALUE MEASUREMENTS (CONTINUED)

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value: There have been no changes in the methodologies used at June 30, 2016 and 2015.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Non-interest bearing cash: Valued at carrying value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of June 30, 2016:

Assets at Fair Value as of June 30, 2016				
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

Assumptions Made In Valuing Spouse's Benefit

Sixty percent of the employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Form Election

All employees are assumed to elect the normal form of benefit.

Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.

Standing Elections

None.

Asset Method

Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Employees Valued

Only participants as of the valuation date were valued.

Appendix B (Continued)

Selection of Assumptions

Information used in the analysis of selecting assumptions include: discount rate – Citi Group yield curve; expected return on assets – review of historical and expected returns on various asset categories held by the plan as well as information provided by the plan’s investment advisor.

The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.

A complete review of non-economic assumptions, to satisfy ASOP 35 was done in December 2011.

Lump Sum values will also be calculated using the mortality rates from Revenue Ruling 2001-62 (which are related to the 1994 Group Annuity Reserving Table) and a 6.00% interest rate and the higher amount will be payable.

Statement of Actuarial Assumptions and Methods

Interest Rates

Funding: 24-month segment rates averaged through the end of February 2015 (published in March 2015):

	Pre MAP-21/ HATFA	Reflecting MAP-21/ HATFA
a. First Rate, Years 1-5	1.25%	4.72%
b. Second Rate, Years 5-20	4.08%	6.11%
c. Third Rate, Years 20+	5.15%	6.81%
d. Effective Interest Rate using the above rates	4.34%	6.25%
e. Interest rate for developing expected value of assets, (limited by statute)		7.00%

Salary Scale

None applicable.

Mortality

Funding: RP-2000 static, non-generational Mortality Table as described in Regulation 1.430(h)(3) projected by Scale AA, to between 7 and 15 years of the obligation, male and female, with different rates for annuitants and nonannuitants.

<u>Age</u>	<u>Rate</u>
55-59	5%
60-61	10
62	20
63-64	15
65+	100

Rates of Disability

<u>Age</u>	<u>Rate</u>
35	0.10%
45	0.40
55	1.00
65	0.00

Appendix B (Continued)

Rates of Turnover 200% of the Crocker-Sarason Table T-3. Sample rates and ages are as follows:

<u>Age</u>	<u>Rate</u>
25	10.54%
40	7.68
55	0.67
65	0.00

Assumptions Made In Valuing Spouse's Benefit Sixty percent of the employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Form Election All employees are assumed to elect the normal form of benefit.

Provision for Expenses The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.

Standing Elections None.

Asset Method Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Employees Valued Only participants as of the valuation date were valued.

Appendix B (Continued)

Selection of Assumptions

Information used in the analysis of selecting assumptions include: discount rate – Citi Group yield curve; expected return on assets – review of historical and expected returns on various asset categories held by the plan as well as information provided by the plan's investment advisor.

The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.

A complete review of non-economic assumptions, to satisfy ASOP 35 was done in December 2011.
