1. DESCRIPTION OF PLAN

The following brief description of the Lumos Networks Retirement Plan ("Plan") is provided for general information purposes only. The Plan agreement should be referred to for more complete information.

A. GENERAL – The Plan is a defined benefit pension plan covering participants who transferred employment to Lumos Networks Operating Company and Subsidiaries (collectively "The Company") in connection with the reorganization of NTELOS Inc. An amendment to the Plan approved on November 1, 2012 ceased all benefit accruals for participants effective December 31, 2012. The accrued benefits as of December 31, 2012 shall not be reduced, diminished or eliminated. The Plan was effective October 1, 2011 as a "spin-off" of the Revised Retirement Plan for the Employees of NTELOS, Inc.

B. PENSION BENEFITS – Employees hired under NTELOS Inc. prior to October 1, 2003, automatically became participants in the Plan upon the later of (i) completion of 1 year of service with at least 1,000 hours of service, or (ii) attainment of age 21.

Normal retirement age is 65, at which time a participant shall receive a monthly retirement annuity payable for the life of the participant, unless another payment form is in effect, equal to the sum of:

- 1.23% of monthly highest average compensation multiplied by total years of service; plus

- .50% of the participant's monthly highest average compensation in excess of covered compensation multiplied by total years of service.

Compensation is defined as the total remuneration received for personal services rendered, including amounts contributed pursuant to a salary-reduction election. Compensation, therefore, includes base salary, overtime pay, bonuses, extraordinary payments, salary deferral contributions, and pretax benefits under Code section 125. Monthly highest average compensation is defined to be one-sixtieth of the total compensation received by the participant during the five consecutive years of employment with the employer producing the highest average. Covered compensation is the average of the taxable wage bases in effect for the calendar year during the thirty-five year period ending with the last day of the calendar year in which the participant attains social security retirement age, determined in accordance with tables published by the Secretary of the Treasury. Notwithstanding the foregoing, compensation earned by any participant following December 31, 2012 shall not be taken into account under the Plan. In addition and not withstanding any other provision of the Plan to the contrary, effective on and after December 31, 2012, all participants shall earn no additional years of service for purposes of determining accrued benefits.

B. PENSION BENEFITS – continued

A reduced early retirement annuity is available to participants at age 55, provided they have completed five years of service. Years of service for the limited purpose of calculating the amount of this benefit shall include years of service earned after June 30, 2012. An increased annuity is available to participants that delay retirement beyond the normal retirement date. A deferred annuity is available to participants that complete five years of service and terminate employment prior to retirement age.

Unless an election is filed, benefits will be paid under one of two automatic methods, depending on the marital status of the retiree. Unmarried participants will receive a single life annuity that ceases upon death. Married participants will receive a qualified joint and survivor annuity. This method provides a reduced annuity for the life of the participant with half the monthly benefit continuing for the life of the spouse.

Other payment options available upon election by the participant and, if applicable, consent by the spouse, include:

- Joint and survivor annuity that provides a reduced monthly benefit to the participant and continues to pay the designated beneficiary 100%, 75%, 66.67%, or 50% of the monthly benefit upon death of the participant.

- Ten year certain and continuous annuity that provides a reduced monthly benefit to the participant for life, with a guarantee of 120 payments to either the participant and or the beneficiary.

C. PRE-RETIREMENT DEATH BENEFITS – If a participant with five years of service dies before his annuity starting date, a qualified pre-retirement survivor annuity shall be paid to the participant's surviving spouse during such spouse's lifetime. Unless the surviving spouse elects a later date, the qualified pre-retirement survivor annuity payments must begin during the month that includes what would have been the participant's early retirement date.

2. SUMMARY OF ACCOUNTING POLICIES

A. BASIS OF ACCOUNTING – The accompanying financial statements are prepared on the accrual basis of accounting.

B. VALUATION OF INVESTMENTS - The plan assets are held in trust and are made up of amounts invested in registered investment companies valued at quoted market prices and a guaranteed interest account valued at contract value which equals the fair value.

C. USE OF ESTIMATES – The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

D. PAYMENT OF BENEFITS – Benefit payments to participants are recorded upon distribution.

E. SUBSEQUENT EVENTS REVIEW - The plan has evaluated subsequent events for possible recognition and/or disclosure through March 28, 2017, the date the financial statements were available to be issued.

F. ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS - Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (i) retired or terminated employees or their beneficiaries, (ii) beneficiaries of employees who have died, and (iii) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest average monthly compensation for five consecutive years of service. The accumulated plan benefits for active employees are based on the assumption that wages will increase at a rate of 3% per annum. Benefits payable under all circumstances - retirement, death, disability and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

An actuary determines the actuarial present value of accumulated plan benefits, which is the amount from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payments (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation and the expected date of payment.

The significant actuarial assumptions used in the valuations as of and for the year ended June 30, 2016 were:

- Life expectancy of participants – IRS 2015 Static Mortality.
- Retirement age assumptions – A graduated table was used ranging from 5% retired at age 55 to 100% retired by age 65.
- Employment turnover assumptions – Rates of turnover varied depending on the age of the participants and ranged from 5.29% to .94%.
- Investment return – Assumed to be 7.25%.

The foregoing actuarial assumptions were based on the presumption that the Plan will continue with benefits frozen as of December 31, 2012. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

3. FUNDING POLICY

The Employees are not required to contribute to the Plan. Employer contributions to the Plan are based upon the actuarial valuations made by the Plan's enrolled actuary and no contributions were required for the Plan year ended June 30, 2016 and 2015 in order for the Plan to equal or exceed the minimum funding requirements of the Employee Retirement Income Security Act of 1974 (ERISA). When benefits become payable, the Plan administrator authorizes the use of Plan assets to provide the benefits. All benefits are currently paid by check from the John Hancock Trust Company as authorized and directed by the Plan administrator.

While the Company expects and intends to continue the Plan with benefits frozen effective December 31, 2012 for its participants hired before October 1, 2003, continuance of the Plan is not a contractual obligation. Participation in the plan has been closed and is not available to employees hired on or after October 1, 2003. Each subsidiary of the Company who has adopted the Plan has the right to discontinue its contributions and to withdraw from the Plan and the Company has the right under the Plan to terminate the Plan subject to the provisions of ERISA.

4. PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations generally to provide the following benefits in the order indicated:

- Payments to participants who have been receiving benefits for at least three years prior to the date of termination limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding termination.
- Benefits guaranteed under ERISA in sequence set forth in ERISA.
- The remaining undistributed present value of accrued benefits

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. The PBGC guarantees vested benefits at the level in effect on the date of plan termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

5. FAIR VALUE MEASUREMENTS

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits.

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Unobservable Inputs (Level 3)
June 30, 2016

	$ 57,053,428	$ 48,445,473	$ 8,607,955

FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, and Level 3 inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. No Level 2 inputs were available to the Plan, and Level 3 inputs were only used when Level 1 or Level 2 inputs were not available. There have been no transfers between the various levels.

5. FAIR VALUE MEASUREMENTS - continued

Level 1 Fair Value Measurements – The fair value of Registered Investment Companies are based on quoted market prices as of year-end.

Level 3 Value Measurements – The New York Life Insurance Guaranteed Interest Account is not actively traded but is a group annuity contract issued to the Plan's trustee that provides for a book value record of the amounts deposited to and withdrawn from the account. The Guaranteed Interest Account is therefore at all times equal to the contributions to the contract, plus interest credited, plus dividends if any, minus expenses withdrawn, and minus withdrawals. This contract value also equals fair market value.

The following table sets forth a summary of changes in the fair value of the plan's level 3 assets:

	Guaranteed Interest Contracts
Balance, July 1, 2015	$ 8,607,955
Interest credited, included in interest income	172,843

7. INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Guaranteed Interest Account is a fully benefit-responsive investment contract with New York Life Insurance Company (Issuer) that is maintained in a group annuity contract. The contract is included in the financial statements at contract value (which represents contributions and earnings, less Plan withdrawals and administrative expenses), as reported by New York Life. New York Life Insurance Company guarantees the return of principal plus accrued interest. The Plan may direct the withdrawal or transfer of all or a portion of their investment at contract value.

Contributions to the Guaranteed Interest Account are currently invested in a broadly diversified fixed income portfolio within New York Like Insurance Company's general account. Fixed income investments in the general account are managed by New York Life Investments' Fixed Income Investor Group. These investments in the general account are intended to provide a stable crediting rate consistent with preservation of principal. The New York Life general account is invested primarily in a conservative array of securities and cash-equivalent investments in accordance with the investment restrictions of New York Insurance Law. The primary objective of the general account is to ensure that New York Life can meet its obligations to policyholders.

Interest on the contract accrues daily and is credited at the end of the month and reflects the crediting rate declared in advance and guaranteed by New York Life Insurance Company. The crediting rate is subject to a minimum rate provision, but may never fall below 1% after deduction for any expenses. The key factors that impact the crediting rate under the group annuity contract are the timing and magnitude of the cash flows in and out of the general account as well as prevailing market rates on fixed income assets available for investment by the general account. The interest crediting rate may not be reset more frequently than semi-annually after the first contract year.

The minimum crediting rate is 1%, as provided by the contract. As of June 30, 2016, the annualized gross crediting rate was 2.40%. The net annualized crediting rate was 2.15%.

Certain events, not considered probable to occur, limit the plan's ability to transact at contract value with New York Life Insurance Company. These events include employer-initiated events such as plan termination, merger, spin-off, or early retirement incentives. Plan-initiated transactions are permitted on a daily basis. Transfers to competing funds must first go through a non-competing investment option for at least 90 days.

Contract value is the relevant measurement attribute for fully benefit-responsive investment contracts because contract value is the amount the Plan would receive if they were to initiate permitted transactions under the terms of the Plan. The Statement of Net Assets Available for Plan Benefits presents the fair value of the investment contract. This value is also equal to the contract value of the guaranteed interest account so an adjustment to contract value is not necessary.

8. LIMITED – SCOPE AUDIT

As permitted by the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA, the scope of the audits on these financial statements was limited in regard to information certified to be complete and accurate by New York Life Trust Company or John Hancock Trust Company, who both served as the Plan trustee at various times. There were no auditing procedures performed with respect to the following information provided by the applicable trustee except for comparing such information to the related amounts included in the financial statements.

- Schedule of investments included in the Statements of Net Assets Available for Plan Benefits and Note 5 and Note 6.
- Investment income included in the Statements of Changes in Net Assets Available for Plan Benefits.

9. TAX STATUS

The Plan has not received a determination letter. The Plan was modeled after the Revised Retirement Plan for the Employees of Ntelos Inc., which obtained its latest determination letter on February 8, 2012, in which the Internal Revenue Service stated that this model plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. This model plan has submitted a request for determination on the plan document. The Plan Administrator for Lumos Networks Retirement Plan believes therefore, that the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Actuarial Cost Method

Funding Target / Target Normal Cost

An Actuarial Cost Method is an allocation of the expected cost of a pension plan on a year-by-year basis. The primary objective of an Actuarial Cost Method is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) mandates the use of the Traditional Unit Credit Actuarial Cost Method. Under this method, the accrued benefit is estimated based upon service and, if applicable, earnings as of the valuation date. The Funding Target is equal to the actuarial present value of all accrued benefits as of the valuation date. The Target Normal Cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefit attributable to service expected to be completed during the plan year (i.e. if applicable, one year's salary growth is reflected in the determination of Target Normal Cost).

For tax deduction purposes, the Funding Target may reflect the value of future pay increases on accrued benefits, if applicable.

PPA Discounting Method

The plan sponsor is responsible for making the following decisions with regard to the discounting method:

- Full yield-curve spot rates or a segmented yield-curve of 24-month average rates of corporate bond rates
- If the segmented yield curve is used, the rates as of the month of the valuation may be used or as of a lookback month up to 4 months prior to the valuation date (the full yield curve must use the rates as of the month of the valuation starting in 2010)

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

- Segment rates through the month of June preceding the valuation date adjusted such that each segment rate is no less than the applicable minimum percentage* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage** of that 25-year average segment rate.

Asset Valuation Method

The Plan Assets for purposes of this Actuarial Valuation are valued under the asset averaging method, including, if applicable, discounted receivable contributions. The value of plan assets is set equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value of assets (including expected earnings) determined for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must be constrained so that it falls between 90 and 110 percent of the fair market value of assets on the valuation date.

---

* The applicable minimum percentage is 90% for 2014 though 2017, 85% in 2018, 80% in 2019, 75% in 2020, and 70% in 2021 and later.

** The applicable maximum percentage is 110% for 2014 through 2017, 115% in 2018, 120% in 2019, 125% in 2020, and 130% in 2021 and later.
