Economic Assumptions

Interest rate basis:

• Applicable month	April 2015
• Interest rate basis	IRC 430 Funding Segment Rates (24-month average)

Interest rates:

	Reflecting Corridors	Not Reflecting Corridors
• First segment rate	4.72%	1.26%
• Second segment rate	6.11%	4.07%
• Third segment rate	6.81%	5.13%
• Effective interest rate	6.25%	4.35%

• Administrative "and investment" expenses	$0; the plan sponsor pays administrative expenses directly

The rates not reflecting HATFA corridors are to be used for purposes of determining the deductible limit; for simplicity, the corridors have been reflected in Section 2.5: Calculation of estimated maximum deductible contribution, which produces a smaller deductible limit than the actual deductible limit.

New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	Separate rates for non-annuitants based on RP-2000 "Employees" table without collar or amount adjustments projected to 2030 using Scale AA and annuitants based on RP-2000 "Healthy Annuitants" table without collar or amount adjustments, projected to 2022 using Scale AA.
Termination	Rates varying by age and gender.

Schedule SB, Part V – Statement of Actuarial Assumptions/ Methods

Benefit commencement date:	
• Preretirement death benefit	The later of the death of the active participant or the date the participant would have attained age 65
• Deferred vested benefit	Age 65
• Retirement benefit	Upon termination of employment
Form of payment	100% of participants are assumed to elect a single life annuity.
Percent married	80% of males; 80% of females. Used to value pre-retirement surviving spouse benefits.
Spouse age	Wife three years younger than husband
Covered pay	N/A
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from

	plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings not in excess of the average of the third segment rates for the 24-month period ending with the month preceding the month containing the valuation date. The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	Willis Towers Watson has reviewed the plan provisions with Huntsman LLC and, based on that review, is not aware of any other significant benefits required to be valued that were not.

Data Sources

The plan sponsor furnished participant data as of 8/1/2015. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Assumed termination rates differ by age and gender because of expected differences in termination rates by gender.
Retirement	Retirement rates are based on plan sponsor expectations for the future, with periodic monitoring of gains and losses caused by retirement patterns different than assumed.
Form of payment	Based on observed experience.
Percent married	The assumed percentage married is based on plan sponsor expectations for the future.
Spouse age	The spouse age assumption is based on plan sponsor expectations for the future.

Schedule SB, Part V – Statement of Actuarial Assumptions/ Methods

Source of Prescribed Methods	
Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods	
Change in assumptions since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC 430.
Change in methods since prior valuation	There have been no changes in methods since the prior valuation.

Other Plan Provisions

Forms of payment	Preretirement death benefits are payable only as described above. Monthly pension benefits are paid as described above as a life annuity, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of a 50% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are a single life annuity, 50% joint and survivor annuity, or 100% joint and survivor annuity.
Actuarial Equivalence	Converts optional forms of payment to the same actuarial present value as the benefit it replaces, based on an interest rate of 6.0% per year compounded annually and the UP-1984 mortality table.
Pension Increases	None
Plan participants' contributions	None
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are not assumed for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining minimum and maximum contributions.
