Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS

September 30, 2016 and 2015

NOTE A - DESCRIPTION OF THE PLAN

The following description of the **Chelsea Industries, Inc. Retirement Plan** (the "Plan") is provided only for general information. Participants should refer to the plan document for more complete description of the Plan's provisions.

1. General

The Plan, established September 1, 1974, is a noncontributory defined benefit pension plan established for non-collective bargaining unit employees of Chelsea Industries Inc. and Affiliates (the "Employer") unless otherwise expressly agreed to in a collective bargaining agreement. An employee who has completed a year of service (worked 1,000 hours during the Plan year or during the 12 months from date of hire) and has attained the age of 21 is eligible to participate in the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

On March 31, 2009, the Plan was frozen with respect to benefit accruals and no new participants are permitted to be added to the Plan. Active participants continue to vest in benefits subsequent to March 31, 2009 for service rendered after that date.

2. Plan Administrator

The Employer is the Plan administrator and has the authority to appoint person(s) or entities to carry out the operation of the Plan.

3. Funding Policy

The Employer makes annual contributions to the Plan in amounts required to provide the benefits under the Plan determined by the application of accepted actuarial methods and assumptions, as calculated by an enrolled actuary using the aggregate cost method. For the years ended September 30, 2016 and 2015, the required minimum funding contributions totaled \$217,076 and \$-, respectively.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE A - DESCRIPTION OF THE PLAN - Continued

4. Pension Benefits

Plan participants receive a monthly pension benefit equal to the greater of 1.5% of the average of their highest consecutive 84 calendar months of base earnings ending on the earlier of their termination or retirement date, multiplied by their credited service not in excess of 30 years, less 1.67% of their social security benefit, times their credited service not in excess of 30 years, or \$3 for each month of credited service, up to 30 years.

The Plan permits early retirement upon attainment of age 55 and completion of at least 10 years of vested service. Benefits are determined in the same manner as normal retirement and are reduced by the appropriate early retirement factor, as defined in the Plan Document.

5. Death Benefits

If an active employee entitled to a vested benefit dies, a death benefit equal to the vested pension benefit, as adjusted for joint and survivor benefits, will become payable to the employee's spouse any time after the deceased participant's early retirement date.

6. Vesting

A participant's vested interest is based on years of continuous service. A participant is 100% vested in his/her benefits after five years of service with the Employer. One year of service for purposes of vesting is reached upon completion of 1,000 hours of service in a given year.

7. Plan Termination

Although it has not expressed any intention to do so, the Employer has the right to terminate the Plan.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE A - DESCRIPTION OF THE PLAN - Continued

7. Plan Termination - Continued

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed subsequently).
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, a statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2016, that ceiling is \$5,011 per month (or \$60,136 per year). That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE A - DESCRIPTION OF THE PLAN - Continued

7. Plan Termination - Continued

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

NOTE B - SIGNIFICANT ACCOUNTING POLICIES

1. Basis of Accounting

The financial statements have been prepared on the accrual basis of accounting.

2. Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reporting of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

3. Valuation of Investments and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note D for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

4. Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE B - SIGNIFICANT ACCOUNTING POLICIES - Continued

5. Administrative Expenses

The Plan's expenses are paid either by the Plan or the Employer, as provided by the Plan document. Expenses that are paid directly by the Employer are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statement of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation of fair value of investments presented in the statement of changes in net assets available for benefits.

NOTE C - INFORMATION CERTIFIED BY THE TRUSTEE AND CUSTODIAN (UNAUDITED)

The Plan's investments are held by Wells Fargo Bank, N.A. ("Wells Fargo"), the Plan's trustee and custodian. Investment balance information included in the accompanying financial statements and supplemental schedules at September 30, 2016 and 2015, and net appreciation/depreciation in fair values of investments, interest, dividends and other income for the year ended September 30, 2016, were obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by Wells Fargo.

NOTE D - FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

Level 1

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE D - FAIR VALUE MEASUREMENTS - Continued

Level 2

Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3

Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at September 30, 2016 and 2015.

Common stock: Valued at the closing price reported on the active market on which the individual securities are traded.

Corporate debt instruments: Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE D - FAIR VALUE MEASUREMENTS - Continued

Common collective trusts: Valued at the net asset value (NAV) of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the collective trust, the investment adviser reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

U.S. Government Securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

The following table sets forth by level within the fair value hierarchy, the Plan's assets at fair value as of September 30, 2016:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

Fair Value of Investments in Entities that Use NAV

The following table summarizes investments measured at fair value based on NAV per share as of September 30, 2016 and 2015, respectively.

<u>September 30, 2016</u>	<u>Fair Value</u>	<u>Unfunded Commitments</u>	<u>Redemption Frequency</u>	<u>Redemption Notice Period</u>

Transfers Between Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

There were no transfers between levels for the years ended September 30, 2016 and 2015.

NOTE E - RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE E - RISKS AND UNCERTAINTIES - Continued

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE F - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances- retirement, death, disability, and termination of employment- are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and it is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of September 30, 2016 and 2015 were (a) pre and post-retirement mortality (RP-2014 Table with Scale MP-2016 generational improvements from 2006 (Male/Female), RP-2014 Table with Scale MP-2015 generational improvements from 2006 (Male/Female) for 2016 and 2015, respectively), (b) retirement age assumptions (assumed retirement age of 65), (c) investment return (assumed rate of return of 7.5% for 2016 and 2015) and (d) interest discount rate (7.5% for 2016 and 2015, respectively).

Chelsea Industries, Inc. Retirement Plan

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE F - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS - Continued

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of October 1, 2016 and 2015. Had the valuations been performed as of September 30, there would be no material differences.

NOTE G - PLAN AMENDMENTS

The Plan was amended as follows during the Plan year ended September 30, 2016:

1. Effective October 1, 2015, Section III.B.1 of the Plan's Adoption Agreement is amended in its entirety to read as follows: "Optional Forms of Benefits: actuarial assumptions for purposes of determining the present value of optional forms of benefits shall be as follows:
 - i. Pre-Retirement: 1971 Group Annuity Mortality Table
 - ii. Set Back: 2
 - iii. Interest: 6.00%"
2. Effective October 1, 2015, Section VII.B. of the Plan's Adoption Agreement is amended in its entirety to read as follows: "The optional forms of benefits available under the Plan are:
 - i. Lump sum, but only for amounts of \$5,000 or less, or if Provided in Schedule A to the Plan
 - ii. Life annuity with payments guaranteed for 10 years"
3. Effective October 1, 2015, Section XVIII.A.1 of the Plan's Adoption Agreement is amended its entirety to read as follows: "Distributions payable as a result of termination for reasons other than death, disability or retirement shall be paid from the options available per the list in (A)(3).

NOTE G - PLAN AMENDMENTS - Continued

4. Effective July 1, 2016, Section VII of the Plan's Adoption Agreement is amended by the addition of a new subsection C, immediately following subsection B, to read as follows: "In accordance with Section VII.D., during the period of July 1, 2016 to August 31, 2016, a vested Participant who terminated their employment with the Employer on or before June 30, 2016 and has not commenced distribution of their accrued benefit prior to September 1, 2016, and the actuarial equivalent of whose vested accrued benefit, calculated as a lump-sum as of September 1, 2016 does not exceed \$100,000 may elect between:
 - i. An immediate lump-sum payment of the actuarial equivalent of their vested accrued benefit of their normal retirement date or date of distribution, if later; or

NOTES TO FINANCIAL STATEMENTS - CONTINUED

September 30, 2016 and 2015

NOTE H - TAX STATUS OF THE PLAN

The Plan obtained its latest determination letter in April 2012, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE I - PARTY-IN-INTERST TRANSACTIONS

Certain plan investments are managed by Wells Fargo Bank, N.A., the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions.

Certain administrative functions are performed by officers and employees of the Sponsor or its subsidiaries. No such officer or employee receives compensation from the Plan.

The company has contracted with an independent third party for the purposes of handling administrative procedures related to the calculation of benefits, administrative communication, and issue resolution of beneficiary inquiries. Amounts paid to such third party for these services are included within the administrative expenses reported on the "Statement of Changes in Net Assets Available for Benefits."

NOTE J - SUBSEQUENT EVENTS

Management has evaluated all other subsequent events through July 13, 2017, the date the financial statements were available to be issued. There are no recognized or non-recognized subsequent events that existed at the balance sheet date which are necessary to disclose to keep the financial statements from being misleading.

SECTION XII

ACTUARIAL COST METHODS

Traditional Unit Credit

The actuarial cost method used in the development of the minimum contribution was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

ACTUARIAL METHODS AND ASSUMPTIONS

A summary of the actuarial assumptions used in the valuation is presented below:

Valuation Assets – Average of fair market value of plan assets as of the current valuation date and as of the valuation date for each of the prior two plan years adjusted for contributions and distributions from the prior period to the current valuation date. The resulting amount is restricted to fall within 90% to 110% of the fair market value of assets. [IRC Sec. 430(g)(3)(B)]. This method is restricted in that the expected earnings are limited by Internal Revenue Code Regulations. Therefore, the resulting asset value may tend to be less than the fair market value of assets over a long period of time. The Assumed Earnings Rate is 7.50% per annum as of October 1, 2015 (previously, 6.50% per annum).

Segment Interest Rates for Minimum Contribution		4.72% 6.11% 6.81%	The Funding Target Liability for Minimum Contribution is determined using three 24-month average interest rates ("segment rates"), each of which applies to cash flows during specified periods. The Plan Sponsor has elected a 0 month look back for determining these rates each Plan Year. These segment rates are adjusted by the applicable percentage of the 25-year average segment rates.	The segment 1, segment 2 and segment 3 interest rates changed from 4.99%, 6.32%, and 6.99%, respectively as of the prior measurement date, October 1, 2014, to reflect the current prescribed rates. Current prescribed tables are based on the RP-2000 Mortality Tables Report, adjusted for mortality improvement using Projection Scale AA. Sponsors of small plans are permitted to use a combined table that applies the same mortality rates to both annuitants and nonannuitants.	The mortality tables changed from the 2014 IRS Optional Combined (M/F) tables as of the prior measurement date, October 1, 2014, to reflect the current prescribed tables. Changes In Actuarial Methods

Automatic approval under IRS Announcement 2015-3 due to change in both the enrolled actuary and the business organization providing actuarial services to the plan (“takeover plan”).

Changes In Actuarial Assumptions

The Qualified Pre-Retirement Survivor annuity required by ERISA is being valued based on pre-retirement mortality, pre-retirement interest, percent married, and the age of spouse assumptions.

This assumption changed from applying a 1.7% load to the terminated vested liability, as utilized by the prior plan actuary.
