Report of Independent Auditors

To the Administrator of Raytheon Company Pension Plan for Salaried Employees

We have audited the accompanying financial statements of Raytheon Company Pension Plan for Salaried Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2016 and December 31, 2015, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2016 and changes therein for the year then ended and its financial status as of December 31, 2015, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

1. Plan Description

The following description of the Raytheon Company Pension Plan for Salaried Employees (the "Plan") is for general purposes only. Participants should refer to the Summary Plan Document or the Plan Document for a complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan that covers all eligible salaried employees of the Raytheon Company and certain of its subsidiaries (the "Company").

Effective December 31, 2000, the HRB Systems, Inc. Salaried Retirement Plan, Raytheon E-Systems Inc. Salaried Employees Retirement Plan, Raytheon E-Systems, Inc. Richardson/Waco Retirement Plan (formerly the ESI/CTAS Retirement Plan), Raytheon TI Systems, Inc. Employee Pension Plan, and Raytheon Company Pension Plan for Discontinued Operations were merged into the Plan and ceased to exist as separate plans after December 31, 2000. Participants in the original plans retain the provisions and benefits of the original plans.

Investments are held in the Raytheon Master Pension Trust ("Master Trust"). The Plan is administered by the Plan Administrator appointed by the Company's Vice President of Human Resources and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Benefits, Eligibility and Vesting

The Plan provides specified retirement and death benefits to be paid from the net assets available for benefits. The level of benefits is based principally upon years of service and average compensation. Participants in the Plan retain the benefit rate of their legacy plans and should refer to the applicable exhibits in the Plan Document for details on the rates. Annual earnings in excess of the limit provided for that year by Section 401(a) (17) of the Internal Revenue Code, are not used in determining benefits under the Plan. The references to Exhibits in the following disclosures relate to Exhibits contained in the Plan Document. The standard form of retirement benefit for unmarried participants covered by Exhibit A (Raytheon Salaried); Exhibit E (Raytheon TI Systems); and Exhibit F (Discontinued Operations) is a monthly payment beginning the month following retirement and continuing until death. The standard form of benefit for unmarried participants covered by Exhibit B (E-Systems Salaried); Exhibit C (HRB Systems) and Exhibit D (Richardson Waco for participants terminating or retiring after January 1, 1999) is a five year certain and continuous benefit for all participants except Waco participants in Exhibit D. The standard form of benefit for married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms of benefits are also available. Under Exhibit E (Raytheon TI Systems) a lump sum form of payment is available to participants.

Each employee becomes a participant in this Plan on attainment of age 21 and completion of one year of service. Participants are fully vested upon completion of five years of vesting service. Effective January 1, 1999, any new employee became a participant in the Plan under the legacy Raytheon salaried provisions (Exhibit A in the Plan Document).

Effective January 1, 2007, employees who are either hired or rehired (after the expiration of any salary continuation payments) are not eligible to participate in the Plan. In addition, former employees who are rehired on or after March 1, 2007, and have received or are receiving payment from a Company-sponsored pension plan are not eligible to participate in the Plan.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

Contributions

The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan does not permit contributions by participants.

Plan Transfers In

The Plan received asset transfers during the year from the Raytheon Company Pension Plan for Hourly Employees and Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees for retirees who had service under both the Raytheon Company Pension Plan for Hourly Employees and the Plan or Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees and the Plan. The corresponding benefits and liabilities were also transferred into the Plan.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition

The Plan and 401(h) account's interest in the Master Trust is stated at fair value. Net investment income/ (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan and 401(h) account's interest in the Master Trust. See Note 5 and Note 7 for additional information.

Contributions

Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

Benefit Payments

Benefit payments to participants are recorded when paid.

Administrative Expenses

All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Raytheon Master Pension Trust investment income."

Use of Estimates

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP") and require the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements and the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

New Accounting Pronouncements

In February 2017, FASB issued Accounting Standards Update (ASU) No. 2017-06, Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - Employee Benefit Plan Master Trust Reporting. ASU No. 2017-06 amends the master trust disclosure to require additional disclosures related to the Plan's interest in the master trust.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

This ASU is effective for fiscal years beginning after December 15, 2018 and is required to be applied retrospectively for all comparative periods presented. Management does not expect the adoption of this ASU to have a significant impact on the Plan's financial statements.

3. Actuarial Present Value of Accumulated Pension Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries. Benefits are based principally upon years of service and compensation. Benefits payable under all circumstances – retirement, death, and termination of employment – are included to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, Mercer, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of retirement, decrements for death, or withdrawal) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2015 and 2014, are as follows:

Assumed rate of return on investments for accumulated benefits	8.00%
Mortality basis	
Healthy participants	Modified version of the RP-2014 employee/retiree no collar tables, which has the projection scale backed off to 2007 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period and an ultimate improvement rate of 0.75%
Disabled participants	
- Raytheon TI Systems, Inc Employees Pension Plan; Raytheon E-Systems, Inc, Richardson / Waco Retirement Plan; Raytheon E-Systems Inc. Salaried Employees Retirement Plan and HRB Systems Inc, Salareied Retirement Plan	1985 Pension Disability Mortality for males and females
- All Others	Same as healthy participants
Retirement	Several rates, varying by age from 55 to 70

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

Assumption Changes

There have been changes in the actuarial assumptions since the prior valuation of the Plan as follows:

- For the Raytheon TI Systems Employees Pension Plan, the Pension Benefit Guaranty Corporation ("PBGC") interest rate basis for conversion to lump sum form of payment was changed from 1.75% to 1.25% for 2016, 2.75% to 2.0% for 2017 and 2.75% for 2018 and beyond.
- For Raytheon TI Systems Employees Pension Plan, the segmented interest rates changed from 4.50% for 5 years, 5.00% for the next 15 years and 6.00% thereafter to the following: 1.50% for 5 years, 3.50% for the next 15 years and 5.00% thereafter for 2016; 3.25% for 5 years, 3.50% for the next 15 years and 5.25% for 2017; 5.00% for 5 years, 5.25% for the next 15 years and 5.50% thereafter for 2017 and beyond.

The above changes were made to better reflect current economic conditions.

As of December 31, 2015, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested benefits	
Participants receiving benefits	\$ 3,942,295,439
Participants with deferred benefits	938,566,519
Active participants	3,085,860,597
Total vested benefits	7,966,722,555
Nonvested benefits	99,720,663
Total actuarial present value of accumulated plan benefits	<u>\$ 8,066,443,218</u>

The following is an analysis of changes in the present value of accumulated benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2014	\$ 7,688,668,634
Benefits accumulated and non-investment (gains)/losses	322,867,196
Increase for interest due to decrease in discount period	591,197,474
Benefits paid	(548,188,663)
Change in actuarial assumptions	11,898,577
Actuarial present value of accumulated plan benefits as of December 31, 2015	<u>\$ 8,066,443,218</u>

4. Funding Policy

Pension Benefits

The employer's contributions are actuarially determined to fund the Plan's current normal costs on a current basis and to generally fund the existing unfunded liability on account of qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

above the ERISA minimum requirements may be made to the Plan. Contributions for the years ended December 31, 2016 and 2015 met the minimum funding requirements of ERISA.

Medical Benefits

The medical benefits to be provided through the 401(h) Account will be funded by participant and employer contributions. Company contributions to the Plan, which are specifically designated by the Company at the time made as contributions to fund medical benefits, are maintained in a separate Retiree Medical Account (Note 5). To the extent assets in this account are not sufficient to fund such medical benefits, such benefits shall be paid from such other funding vehicles as the Company may establish, or in the absence of such other funding vehicles, directly by the Company. Assets designated for pension benefits may not be used to pay for medical benefits.

5. 401(h) Account

The Plan includes a medical-benefit component in addition to the normal retirement benefits to fund a portion of the postretirement obligations for retirees and their beneficiaries in accordance with Section 401(h) of the Internal Revenue Code (IRC). A separate account has been established and maintained in the Plan for the net assets related to the medical-benefit component ("401(h) account"). In accordance with IRC Section 401(h), the Plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries. Any assets transferred to the 401(h) account from the defined benefit pension plan in a qualified transfer of excess pension plan assets (and any income allocable thereto) that are not used during the plan year must be transferred out of the account to the pension plan. The obligations related to the health benefits are not included in this plan's present value of accumulated plan benefits but are reflected as obligations in the financial statements of Raytheon Retiree Health Benefits Plan. Employer contributions or qualified transfers to the 401(h) account are determined annually and are at the discretion of the plan sponsor. Certain of the Plan's net assets are restricted to fund a portion of postretirement health benefits for retirees and their beneficiaries in accordance with IRC Section 401(h).

The following table presents the components of the net assets as of December 31, 2016 and 2015:

	December 31, 2016	December 31, 2015
Interest in Raytheon Master Pension Trust (see note 6)	<u>\$ 160,135,352</u>	<u>\$ 168,042,497</u>

7. Master Trust

Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Bank of New York Mellon ("BNY Mellon"), the Trustee. The Investment Committee, appointed by the Chairman and CEO of the Company, periodically reviews the asset allocation and performance of the investments held in the Master Trust. The investment policy, as approved by the Investment Committee, permits asset diversification to include a combination of cash and cash equivalents, publicly traded equity securities, private equity funds, fixed-income securities, private real estate funds, commingled funds and other investments such as insurance contracts and derivatives.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required as well as the assets and liabilities that we value using those levels of inputs.

- Level 1:** Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2:** Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
- Level 3:** Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2016 and December 31, 2015, there were no material transfers in or out of Levels 1, 2 or 3.

The following tables summarize the fair value of investment assets and liabilities as of December 31, 2016.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values Master Trust investments as follows:

Cash and cash equivalents are valued at amortized cost, which approximates fair value.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Investments in registered investment companies are valued at their last reported net asset value.

Investments in commingled funds, private equity fund and private real estate funds are estimated at fair market value, which primarily utilizes net asset values reported by the investment manager or fund administrator. Management reviews additional valuation and pricing information from fund managers, including audited financial statements, to evaluate the net asset values.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Valuation policies for derivative investments are disclosed in the Derivative Policy paragraph.

Investment Income (Loss)

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Master Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Derivatives Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options contracts and over-the-counter derivatives such as forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in over the counter derivatives and forward foreign exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. As needed for material exposures, the Master Trust manages these exposures through credit approvals, limits, monitoring procedures, and to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

The following tables present the values of derivatives (not accounted for as hedging instruments) carried on the Statement of Net Assets and the Statement of Changes in Net Assets of the Master Trust as of and for the year ended December 31, 2016.

Notes to Financial Statements

December 31, 2016 and 2015

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) on Master Trust net assets. When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

As of December 31, 2016 and 2015, the total aggregate face value of open forward currency contracts in the Master Trust was (\$9,296,528) and \$20,308,587, respectively.

Futures Contracts

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, cash and cash equivalents and commodities futures contracts to manage exposure to the market. Buying futures increases the Master Trust's exposure to the underlying instrument. Selling futures decreases the Master Trust's exposure to the underlying instrument held, or hedge the fair value of other fund investments.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are recorded as "margin flows," and the accumulated balances resulting from those flows are included within "cash held at broker due to variation margin" on the balance sheet. The Master Trust will also record an unrealized gain or loss on futures, which is calculated as the difference between the notional cost and the notional market value of open futures contracts.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the

contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security.

At December 31, 2016, U.S. Government Bonds with a par value of \$16,159,000 (\$15,959,093 fair value) were pledged as collateral for open equity, fixed income and cash and cash equivalents futures positions. These bonds are restricted from trading until the futures positions for which they are pledged as collateral are settled. A cash balance of \$7,424,714 was pledged to cover margin requirements for open futures contracts.

At December 31, 2015, U.S. Government Bonds with a par value of \$14,195,000 (\$14,153,190 fair value) were pledged as collateral for open equity, fixed income and cash and cash equivalents futures positions. These bonds are restricted from trading until the futures positions for which they are pledged as collateral are settled. A cash balance of \$10,270,155 was pledged to cover margin requirements for open futures contracts.

Grand Total	5,174	\$ 603,020,582	1,708	\$ 293,776,441

Options

The Master Trust may invest in option contracts. An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts in order to: hedge against potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments; to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments; and to enhance potential gain.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. Over-the-counter purchased or written options are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is closed.

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. Over-the-counter options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts prior to the expiration date and that a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

As of December 31, 2016, the Master Trust had open purchased equity index options with total market value of \$1,287,000 (450 contracts). The premiums paid in aggregate as of December 31, 2016 were \$1,337,418. As of December 31, 2015, the Master Trust was not invested in any options.

8. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- (a) The assets comprising the Plan, including the net income/ (loss) of the Plan shall be revalued at market by the Trustee.
- (b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- (c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the PBGC to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan Document for more information.

9. Certain Transactions Involving Related Parties and Parties-in-Interest

BNY Mellon is the Trustee and Custodian of the Plan, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY Mellon. The Plan Sponsor, Raytheon Company, is a party-in- interest with respect to the Plan and incurs expenses in connection with the administration of the Plan and the Master Trust.

Raytheon Company Pension Plan for Salaried Employees

Notes to Financial Statements

December 31, 2016 and 2015

The following table is a summary of the expenses paid to parties-in-interest, including from 401(h) accounts, for the years ended December 31, 2016 and 2015:

	<u>Year Ended 2016</u>	<u>Year Ended 2015</u>
Expenses specifically related to the Plan (included in "Administrative expenses")	\$ 562,039	\$ 686,238
Plan allocation of expenses paid directly by the Master Trust (included in "Raytheon Master Pension Trust investment income")	\$ 2,669,600	\$ 2,392,526
	<u>As of December 31, 2016</u>	<u>As of December 31, 2015</u>
Accrued expenses (included in "Accrued administrative expenses" and "Other liabilities")	\$ 612,864	\$ 763,586

All of these transactions either fall outside the scope of, or are exempt from, ERISA's prohibited transaction rules.

10. Tax Status

The Internal Revenue Service (the "IRS") has determined and informed the Company by letter dated September 23, 2013, that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures. The Company, on behalf of the Plan, applied for a new determination letter on January 29, 2016.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentation and disclosure of uncertain tax positions. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2016 and 2015, respectively. The Plan is subject to examinations by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to federal tax examination for years prior to 2013.

11. Risks and Uncertainties

The Plan financial statements are based on the application of U.S. GAAP, which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are

Notes to Financial Statements
December 31, 2016 and 2015

exposed to various risks, such as interest rate, market and credit risks. See Note 7 for additional information with respect to investment risk.

12. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2016 through the date the Plan's financial statements were available to be issued, September 11, 2017.

Actuarial equivalence for conversion to lump sum for Raytheon TI Systems Employees Pension Plan

The basis for valuation is based on whichever of the following bases yields a greater lump sum value:

- PBGC interest rates of 1.25% for plan year 2016, 2.00% for 2017 and 2.75% thereafter and the UP-1984 mortality table; or
- Segmented interest rates of 1.50% for 5 year, 3.50% for the next 15 years and 5.00% thereafter for 2016; 3.25% for 5 year, 4.50% for the next 15 years and 5.25% thereafter for 2017; 5.0% for 5 years, 5.25% for the next 15 years and 5.5% thereafter for 2018 and beyond. Current 417(e) unisex mortality was used.

Rationale (PBGC interest rates): Based on long-term historical trends in the PBGC rate which suggests a range of 40 to 200 basis points below the long government bond. The assumption for long government bonds is periodically published by Mercer Investment Consulting's Capital Markets Outlook.

Rationale (Segmented interest rates): Based on a long-term view of the three segment rates extrapolated by bootstrapping the forward rates from the current year's PPA full yield curve.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Other economic assumptions**

- Salary increases

Rates are based on past experience and current plan membership, adjusted to reflect management's expectation of future wage increases.

20	6.68%
25	6.55%
30	5.99%
35	5.08%
40	4.45%
45	3.94%
50	3.62%
55	3.34%
60	3.16%
65	2.94%

Rationale: Based on past experience, current plan membership, adjusted to reflect management's expectation of future wage increases.

- Social Security wage base

3.75% per year

Rationale: Reflects long-term view of inflation and the average real wage increases for the U.S. economy as a whole.

- Inflation

3.00% per year

Rationale: Based on the inflation assumption periodically published by Mercer Investment Consulting in their *Capital Markets Outlook*.

- Expected investment return

The expected investment return is 8.00% per year, but no greater than 3rd segment rate in effect for each year.

Rationale: The expected long-term return on assets assumption was developed based on the plan's current target investment allocation and a building block approach, which looked at the weighted average expected return for each asset class based on long-term capital market assumptions. The expected return for each asset class is composed of inflation plus a risk free rate of return, plus an expected risk premium for each asset class. The resulting return was then adjusted for administrative, investment management and trading expenses as well as recognition of alpha for active management.

- Expenses

\$52,600,000 (added to current year target normal cost)

Rationale: Based on an estimate of administrative expenses expected to be incurred in the current plan year.

¹ Employees on leave of absence and transfers from Raytheon Company Pension Plan for Salaried Employees before Merger, E-Systems, Inc. Salaried Retirement Plan, HRB Systems, Inc. Salaried Retirement Plan, and Raytheon TI Systems Employees Pension Plan have no assumed salary increases.

Actuarial Methods for Funding***Asset Methods***

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Xerox HR Solutions, LLP provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:**
 - No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
 - It is assumed that 100% of participants with deferred benefits past age 66 will forfeit their benefits as described in Article 4.3 of the plan document.
 - In addition, for the Raytheon Company Pension Plan for Salaried Employees before Merger only, for retirees who elected a contingent annuitant form of payment, 15% of future beneficiaries are assumed to die prior to receiving benefits.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The **plan's target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V — Summary of Plan Provisions**Early retirement**

• Eligibility	Age 60 with 5 years of service, or age 55 with 20 years of service.
• Benefit	The annuity is determined as for normal retirement considering credited service for benefit accrual and compensation to date of termination. An employee may elect to receive a reduced benefit commencing on the first day of any month prior to his normal retirement date beginning with the second month following his termination. The reduction is 1/3% for each of the first 60 months for which payment shall be made before age 65 and 7/24% for each of the next 60 months, except for the portion under (2) of the formula, as described above, since the retirement age factor has been adjusted for early commencement.

Late retirement

• Benefit	The annuity is computed considering credited service for benefit accrual and compensation to actual retirement.
-----------	---

Deferred vested

• Eligibility	Completion of five years of vesting service.
• Benefit	The participant is entitled to an annuity deferred to age 65. The benefit is determined as for early retirement. If the participant terminates prior to age 60, then the participant may elect to receive a reduced benefit commencing on the first day of any month prior to his normal retirement date, beginning with the second month following his attainment of age 60. This reduced benefit shall be actuarially determined.

Disability

• Eligibility	Totally and permanently disabled prior to age 65 and after 5 years of credited service for vesting.
• Benefit	The annuity, deferred to age 65, is computed as for normal retirement, considering compensation to date of disablement and credited service for benefit accrual (including number of years and days between the date of disablement and the normal retirement date) to normal retirement date.

Schedule SB, Part V — Summary of Plan Provisions

Pre-retirement death	
• Eligibility	5 years of vesting service
• Benefit prior to normal retirement	The designated beneficiary of a participant who dies in-service and beyond normal retirement shall receive a benefit equal to 50% of the normal retirement benefit the participant would have received had he retired on the date of his death.
• Benefit after normal retirement	Upon the death of an active participant who has met the requirements for a deferred vested benefit, the designated beneficiary is eligible to receive a benefit for life (or the equivalent lump sum) equal to 50% of the benefit the employee could have received if he had terminated employment on the date of his death and elected a Joint and Survivor option with payments commencing at the earliest date permissible.
Unpredictable contingent event benefits	N/A
Form of benefits	
• Automatic form for unmarried participants	Single Life Annuity
• Automatic form for married participants	Actuarially reduced 50% Joint and Survivor benefit with the spouse as beneficiary.
• Optional forms	Lump sum 100% Joint & Survivor Annuity 5 or 10 year Certain & Life

Deferred vested	
• Eligibility	5 years of service.
• Benefit	An employee who terminates with five or more years of vesting service but does not, at the termination date, meet the requirements for normal or early retirement as specified, is eligible for a deferred vested benefit. The annuity, commencing at Normal Retirement Date, shall be computed as for normal retirement using service and compensation to date of termination.
Disability	
• Eligibility	Totally and permanently disabled, following 10 years of service.
• Benefit	The benefit is calculated in the same manner as the Normal Retirement Benefit based on average monthly pay at termination and benefit service projected to Normal Retirement Age.
Pre-retirement death	
• Eligibility	5 years of vesting service.
• Benefit	The monthly benefit is an amount equal to 50% of the benefit the employee would have received if the employee had terminated on the date of his death under the Deferred Vested, Early, or Normal Retirement and chosen a 50% Joint and Survivor benefit and then died. The benefit would commence on the date the employee would have reached his earliest retirement date.

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated effective January 16, 2015, are included in this valuation.

- **Most recent plan amendments included:** None.
- **Plan amendments excluded:** None.
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over age 66 are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Schedule SB, Part V — Summary of Plan Provisions**Plan Provisions Specific to Funding*****Additional Benefits Included or Excluded***

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
 - *Scheduled benefit increases:* None.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan Provision Changes Since Prior Valuation

Maximum compensation and maximum benefits were updated from 2015 to 2016.

Schedule SB, line 24 — Change in Actuarial Assumptions

- Mortality and interest rates were updated from 2015 to 2016 in accordance with PPA.
- Expenses loaded on the normal cost increased from \$14,653,102 to \$52,600,000 to reflect our best estimate of the current plan year's expenses.
- For the Raytheon TI Systems Employees Pension Plan, the PBGC interest rate basis for conversion to lump sum form of payment was changed from 1.75% to 1.25% for 2016, 2.75% to 2.0% for 2017 and 2.75% for 2018 and beyond.
- For the Raytheon TI Systems Employees Pension Plan, the segmented interest rates changed from 4.50% for 5 years, 5.00% for the next 15 years and 6.00% thereafter to the following: 1.50% for 5 years, 3.50% for the next 15 years and 5.00% thereafter for 2016; 3.25% for 5 years, 4.50% for the next 15 years and 5.25% for 2017; 5.00% for 5 years, 5.25% for the next 15 years and 5.50% thereafter for 2017 and beyond.
