• Segment rates or full yield curve	Segment	
• Look-back months	0	
	<u>Stabilized</u>	<u>Nonstabilized</u>
• First 5 years	4.43%	1.41%
• Next 15 years	5.91%	3.96%
• Over 20 years	6.65%	4.97%
Rationale:	Assumption prescribed by the IRS.	
Mortality sponsor elections		
• All participants	Section 430(h)(3) prescribed separate static separate generational annuitant and nonannuitant mortality tables. These tables are based on the RP-2000 mortality tables projected with mortality improvement.	
Rationale:	Assumption prescribed by the IRS.	
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates and unisex generational mortality rather than 417(e) rates and current year 417(e) unisex mortality. The plan provides the greater of the lump sum determined using the deferred accrued benefit and deferred conversion factor and the lump sum determined using the immediate conversion factor. The conversion factors used for the comparison are based on valuation assumptions.	
Optional form of payment conversion factors	Based on PPA mortality projected to 2027 and an interest rate of 7.0% per annum.	
Late retirement increase assumption	The valuation assumes that the late retirement actuarial increase factors for deferred vested participants who terminated before June 1, 2015 are best using the plan's old definition of actuarial equivalence that is protected under Section 1 (b) of Amendment #1. Therefore, late retirement increases for these deferred vested participants is based on the Unisex Pension 1984 Mortality Table rates with an age set back of one year for participants and an interest rate of 8%. Late retirement increases for active participants and terminated participants on or after June 1, 2015 are based on the PPA Mortality Table projected to year 2020 using Mortality Projection Scale AA and an interest rate of 7%.	
Other economic assumptions		
• Salary increases	Age grade table. See table of rates.	
Rationale:	Based on results of experience study in 2010 for the RPM Inc. Plan. Based on discussions with RPM management, they expect these rates to be representative of future experience.	

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- Social Security wage base 3.00% per year
- Inflation 2.25% per year
- Expected investment return 8.25% per year for years 2012 through 2014, 8.00% for 2015 and 7.90% for 2016.
Rationale: Based on blend of the hypothetical past performance of the plan's target asset mix and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's *Capital Market Outlook* for the plan's current target asset mix.
- Expenses \$75,707 added to current year normal cost
Rationale: Based on actual administrative expenses during the prior year.

Demographic assumptions

- Withdrawal 50% of SOA 2003 small plan table. See table of sample rates.
- Disability incidence 1985 Pension Disability Study Class 3, sex distinct. See table of sample rates. 0% of participants becoming disabled are assumed to be eligible for Social Security disability benefits.

Actuarial Methods**Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- **Participants included:** Only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants with the exception of nonvested transfers who are included with the actives until they are vested.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The expected investment return assumption decreased from 8.00% to 7.90% to reflect our expectations of future asset returns.
- The expense component of normal cost increased from \$65,250 to \$75,707 to reflect our expectations for the current plan year.
- The actuarial equivalence for form of payment conversion was updated to use PPA mortality projected to 2027.

The following assumptions were updated based on an experience study completed in April 2016:

- The retirement rates were updated to extend past age 65 and were decreased before age 60 (the previous rates are shown on page 10)
- The actuarial equivalence assumption for late retirement increases was refined to apply the old actuarial equivalence to terminations prior to June 1, 2015 and the new actuarial equivalence to terminations since June 1, 2015.
- Spouse age differences were updated to assume that spouses are 2 years younger for males, and 2 years older for females. Previously a 3 year age difference was assumed.
- The form of payment election was updated to assumed 85% lump sum and 15% life annuity (previously 65% lump sum and 35% lump annuity was assumed with the exception that 100% life annuity was assumed for current deferred vested).
- Benefit commencement age was updated for current vested deferreds to assume age 65 for participants over age 63 on the valuation date and age 63 otherwise, previously age 65 was assumed for all current vested deferred.

Mortality sponsor elections		
• All participants	Section 430(h)(3) prescribed separate static separate generational annuitant and nonannuitant mortality tables. These tables are based on the RP-2000 mortality tables projected with mortality improvement.	
Rationale:	Assumption prescribed by the IRS.	
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates and unisex generational mortality rather than 417(e) rates and current year 417(e) unisex mortality. The plan provides the greater of the lump sum determined using the deferred accrued benefit and deferred conversion factor and the lump sum determined using the immediate conversion factor. The conversion factors used for the comparison are based on valuation assumptions.	
Optional form of payment conversion factors	Based on PPA mortality projected to 2027 and an interest rate of 7.0% per annum.	
Late retirement increase assumption	The valuation assumes that the late retirement actuarial increase factors for deferred vested participants who terminated before June 1, 2015 are best using the plan's old definition of actuarial equivalence that is protected under Section 1 (b) of Amendment #1. Therefore, late retirement increases for these deferred vested participants is based on the Unisex Pension 1984 Mortality Table rates with an age set back of one year for participants and an interest rate of 8%. Late retirement increases for active participants and terminated participants on or after June 1, 2015 are based on the PPA Mortality Table projected to year 2020 using Mortality Projection Scale AA and an interest rate of 7%.	
Other economic assumptions		
• Salary increases	Age grade table. See table of rates.	
Rationale:	Based on results of experience study in 2010 for the RPM Inc. Plan. Based on discussions with RPM management, they expect these rates to be representative of future experience.	

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- Social Security wage base 3.00% per year
 - Inflation 2.25% per year
 - Expected investment return 8.25% per year for years 2012 through 2014, 8.00% for 2015 and 7.90% for 2016.
- Rationale: Based on blend of the hypothetical past performance of the plan's target asset mix and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's *Capital Market Outlook* for the plan's current target asset mix.
- Expenses \$75,707 added to current year normal cost
- Rationale: Based on actual administrative expenses during the prior year.

Actuarial Methods**Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- **Participants included:** Only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants with the exception of nonvested transfers who are included with the actives until they are vested.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Summary of Plan provisions

Effective date and plan year	Original plan: January 1, 1998 Restated plan: January 1, 2009 Plan year: Calendar year
Most recent amendment	Effective August 1, 2010
Status of the plan	The plan has ongoing benefit accruals and new employees are eligible to participate in the plan once they satisfy the participation requirements.
Significant events that occurred during the year	None
Definitions	
• Participation	All employees who are members of the Union and were covered under the prior Plan become participants on the Plan's effective date. All other Union employees become participants upon attainment of age 21 and completion of 1,000 hours in a 12-month period.
• Vesting service	Vesting Service is computed on an elapsed time basis, rounded to the nearest month, from date of hire.
• Benefit service	Benefit Service is computed in the same manner as Vesting Service; however, Benefit Service for Participants employed at Tremco Incorporated shall not commence earlier than February 1, 1997.
• Compensation	W-2 during calendar year, increased for salary reduction amounts which are excluded from taxable income under Code Sections 125(a), (including amounts deemed to be contributions under Code Section 125), 132(f)(4), 402(e)(3) and 402(h), and decreased for any auto allowances, general business expense allowances, and taxable life insurance amounts. Effective January 1, 2009, any "differential wage payments" (as described in Section 3401(h)(2) of the Code) paid with respect to Military Service shall be considered Compensation for purposes of the Plan. Severance payments are not considered Compensation under the Plan.
• Average annual compensation	Average Compensation is the average of total compensation over the 60 consecutive months that produce the highest average in the 120 months prior to retirement or termination. Effective January 1, 1989 for all formulas, annual compensation is limited to \$200,000 (indexed); such cap on pensionable earnings was decreased to \$150,000 (indexed) effective January 1, 1994 and in 2001 is \$170,000, in 2002 and 2003 is \$200,000, in 2004 is \$205,000, in 2005 is \$210,000, in 2006 is \$220,000, in 2007 is \$225,000, in 2008 is \$230,000, in 2009 through 2011 is \$245,000, in 2012 is \$250,000, in 2013 is \$255,000, and in 2014 is \$260,000. For 2015 and 2016, the cap on pensionable earnings is \$265,000.

Disability																									
• Eligibility	A Plan participant is eligible for a Disability Benefit when he is eligible under the long term disability plan maintained by his employer.																								

Schedule SB, Part V — Summary of Plan provisions

• Benefit	The Disability Benefit is equal to the Accrued Benefit based on Average Compensation at the date of disability and Benefit Service accrued through the benefit commencement date. Benefit Service continues to be earned during the period of disability.
Pre-retirement spouse's benefit	
• Eligibility	Spouse of an active or terminated participant who dies after attaining eligibility for a benefit under the above conditions but prior to his pension starting date.
• Benefit	The Pre-Retirement Death Benefit, payable to the surviving spouse, if any, is equal to the monthly pension at retirement age that would have been payable had the participant survived to retirement age with Accrued Normal Retirement Benefit at the time of death, retired under the 50% Joint and Contingent Annuitant Annuity form of payment and then died. If death occurs after age 60 and completion of 20 years of Vesting Service, but before commencement of retirement benefits, the participant's designated beneficiary will be entitled to the lump sum equivalent of the participant's accrued Normal Retirement Benefit at date of death. A surviving spouse may elect any optional form of payment available under the plan.
Form of benefits	
• Automatic form for unmarried participants	Unless otherwise elected, any benefit payable under the Plan shall be paid on a straight-life basis.
• Automatic form for married participants	Unless otherwise elected, any benefit payable under the Plan shall be paid on a 50% Joint and Contingent Annuitant Annuity basis.
• Optional forms	An employee commencing benefits may elect to have his lifetime benefit payable on an actuarially equivalent 50%, 75% or 100% Joint and Contingent Annuitant Annuity basis, a 5-Year, 10-Year, or 15-Year Certain and Life Annuity basis, or a single lump sum basis, each of which is the actuarial equivalent of the lifetime form.
Miscellaneous	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2016, the limit is \$265,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2016, the limit is \$210,000.
• Funding medium	Trust

Schedule SB, Part V — Summary of Plan provisions

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated and amended through Amendment #1, are included in this valuation.

- **Most recent plan amendments included:** Amendment #1
- **Plan amendments excluded:** None
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Late retirement increases:**
 - *Active participants:* Active participants over normal retirement age are valued with the late retirement actuarial increases. Active participants assumed to retire after normal retirement age are also valued with late retirement actuarial increases.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Sections 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan Provision Changes Since Prior Valuation

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2015 to 2016.

Schedule SB, Part V — Summary of Plan provisions

Effective date and plan year	Original plan: January 1, 1998 Restated plan: January 1, 2009 Plan year: Calendar year
Most recent amendment	Effective August 1, 2010
Status of the plan	The plan has ongoing benefit accruals and new employees are eligible to participate in the plan once they satisfy the participation requirements.
Significant events that occurred during the year	None
Definitions	
• Participation	All employees who are members of the Union and were covered under the prior Plan become participants on the Plan's effective date. All other Union employees become participants upon attainment of age 21 and completion of 1,000 hours in a 12-month period.
• Vesting service	Vesting Service is computed on an elapsed time basis, rounded to the nearest month, from date of hire.
• Benefit service	Benefit Service is computed in the same manner as Vesting Service; however, Benefit Service for Participants employed at Tremco Incorporated shall not commence earlier than February 1, 1997.
• Compensation	W-2 during calendar year, increased for salary reduction amounts which are excluded from taxable income under Code Sections 125(a), (including amounts deemed to be contributions under Code Section 125), 132(f)(4), 402(e)(3) and 402(h), and decreased for any auto allowances, general business expense allowances, and taxable life insurance amounts. Effective January 1, 2009, any "differential wage payments" (as described in Section 3401(h)(2) of the Code) paid with respect to Military Service shall be considered Compensation for purposes of the Plan. Severance payments are not considered Compensation under the Plan.
• Average annual compensation	Average Compensation is the average of total compensation over the 60 consecutive months that produce the highest average in the 120 months prior to retirement or termination. Effective January 1, 1989 for all formulas, annual compensation is limited to \$200,000 (indexed); such cap on pensionable earnings was decreased to \$150,000 (indexed) effective January 1, 1994 and in 2001 is \$170,000, in 2002 and 2003 is \$200,000, in 2004 is \$205,000, in 2005 is \$210,000, in 2006 is \$220,000, in 2007 is \$225,000, in 2008 is \$230,000, in 2009 through 2011 is \$245,000, in 2012 is \$250,000, in 2013 is \$255,000, and in 2014 is \$260,000. For 2015 and 2016, the cap on pensionable earnings is \$265,000.

Schedule SB, Part V — Summary of Plan provisions

• Actuarial equivalence	<p>Benefits other than lump sum payments: PPA mortality and an interest rate of 7.0% per annum.</p> <p>Lump Sum Payments: PPA mortality and interest rates equal to the 3-tiered minimum present value segment rates for the month that is two months prior to the first day of the calendar quarter in which a distribution is made, reflecting the appropriate phase-ins.</p> <p>For late retirement adjustments, the mortality assumption is the PPA mortality table projected to 2020 using Mortality Projection Scale AA and an interest rate of 7.0%. For participants whose protected benefits are greater, UP84 mortality with a one-year setback and an interest rate of 8.0% per annum are used for late retirement adjustments.</p>
Normal retirement	
• Eligibility	Eligible at attainment of age 65 and 5 years of participation in the Plan.
• Benefit	<p>A monthly benefit, payable on a straight-life basis, equal to the greater of:</p> <ul style="list-style-type: none"> • 22.5% of Average Compensation times the ratio of Benefit Service to Normal Retirement Date (maximum 30 years) over 30 plus 22.5% of Average Compensation in excess of Social Security Covered Compensation times the ratio of Benefit Service to Normal Retirement Date (maximum 35 years) over 35; and • \$20.00 time Benefit Service <p>Social Security Covered Compensation is one twelfth of the average of the Social Security taxable Wage Bases in effect for the 35 years ending with the year the participant would attain Social Security Normal Retirement Age (SSNRA), assuming, in the case of a participant who retires or terminates before SSNRA that the Wage Base then in effect continues unchanged until his SSNRA.</p> <p>For certain Euclid Chemical participants that were hired before June 1, 2001 and had non-union service before Euclid Chemical adopted this plan, a Euclid transfer benefit is added to the benefit earned under this plan.</p>
Early retirement	
• Eligibility	Eligible at any age and completion of 5 years of Vesting Service.

<ul style="list-style-type: none"> Benefit 	<p>The Early Retirement Benefit is equal to the Normal Retirement Benefit multiplied by Benefit Service at date of termination and divided by Benefit Service to Normal Retirement Date, payable starting at Normal Retirement date, or payable starting at early retirement date on a reduced basis. <ul style="list-style-type: none"> Eligibility 	<p>A Plan participant is eligible for a Disability Benefit when he is eligible under the long term disability plan maintained by his employer.</p>																								

Schedule SB, Part V — Summary of Plan provisions

• Benefit	The Disability Benefit is equal to the Accrued Benefit based on Average Compensation at the date of disability and Benefit Service accrued through the benefit commencement date. Benefit Service continues to be earned during the period of disability.
Pre-retirement spouse's benefit	
• Eligibility	Spouse of an active or terminated participant who dies after attaining eligibility for a benefit under the above conditions but prior to his pension starting date.
• Benefit	The Pre-Retirement Death Benefit, payable to the surviving spouse, if any, is equal to the monthly pension at retirement age that would have been payable had the participant survived to retirement age with Accrued Normal Retirement Benefit at the time of death, retired under the 50% Joint and Contingent Annuitant Annuity form of payment and then died. If death occurs after age 60 and completion of 20 years of Vesting Service, but before commencement of retirement benefits, the participant's designated beneficiary will be entitled to the lump sum equivalent of the participant's accrued Normal Retirement Benefit at date of death. A surviving spouse may elect any optional form of payment available under the plan.
Form of benefits	
• Automatic form for unmarried participants	Unless otherwise elected, any benefit payable under the Plan shall be paid on a straight-life basis.
• Automatic form for married participants	Unless otherwise elected, any benefit payable under the Plan shall be paid on a 50% Joint and Contingent Annuitant Annuity basis.
• Optional forms	An employee commencing benefits may elect to have his lifetime benefit payable on an actuarially equivalent 50%, 75% or 100% Joint and Contingent Annuitant Annuity basis, a 5-Year, 10-Year, or 15-Year Certain and Life Annuity basis, or a single lump sum basis, each of which is the actuarial equivalent of the lifetime form.
Miscellaneous	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2016, the limit is \$265,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2016, the limit is \$210,000.
• Funding medium	Trust

Schedule SB, Part V — Summary of Plan provisions

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated and amended through Amendment #1, are included in this valuation.

- **Most recent plan amendments included:** Amendment #1
- **Plan amendments excluded:** None
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Late retirement increases:**
 - *Active participants:* Active participants over normal retirement age are valued with the late retirement actuarial increases. Active participants assumed to retire after normal retirement age are also valued with late retirement actuarial increases.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Sections 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan Provision Changes Since Prior Valuation

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2015 to 2016.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The expected investment return assumption decreased from 8.00% to 7.90% to reflect our expectations of future asset returns.
- The expense component of normal cost increased from \$65,250 to \$75,707 to reflect our expectations for the current plan year.
- The actuarial equivalence for form of payment conversion was updated to use PPA mortality projected to 2027.

The following assumptions were updated based on an experience study completed in April 2016:

- The retirement rates were updated to extend past age 65 and were decreased before age 60 (the previous rates are shown on page 10)
 - The actuarial equivalence assumption for late retirement increases was refined to apply the old actuarial equivalence to terminations prior to June 1, 2015 and the new actuarial equivalence to terminations since June 1, 2015.
 - Spouse age differences were updated to assume that spouses are 2 years younger for males, and 2 years older for females. Previously a 3 year age difference was assumed.
 - The form of payment election was updated to assumed 85% lump sum and 15% life annuity (previously 65% lump sum and 35% lump annuity was assumed with the exception that 100% life annuity was assumed for current deferred vested).
 - Benefit commencement age was updated for current vested deferreds to assume age 65 for participants over age 63 on the valuation date and age 63 otherwise, previously age 65 was assumed for all current vested deferred.
