Reasonable efforts were made in the valuation to ensure items that are significant to the actuarial liabilities or cost are treated appropriately and not included or excluded inappropriately.

A range of results different from those shown in this report could also be considered reasonable. The results are shown to the nearest dollar for convenience and do not imply a precision not inherent in actuarial calculations.

Future actuarial measurements may differ significantly from the current measurements in this report due to factors such as plan experience differing from anticipated demographic or economic assumptions, increases or decreases inherent in the methodology used for the measurements, changes in plan provisions, or changes in applicable law.

Cost Methods

Funding

The actuarial cost method used for funding purposes is frequently described as the Unit Credit funding method. This method sets the accrued liability equal to the present value of accrued benefits, and sets the normal cost equal to the present value of the benefit accrued in the current year. This method is required by Internal Revenue Code.

Asset Method

Funding

Assets are valued at Market Value with receivable contributions adjusted as required by law.

Other Methods

The valuation date was set as of the beginning of the plan year.

Interest rates used are the three Segment Rates as published monthly by the Internal Revenue Service for the third full month prior to the valuation date. The first Segment Rate is applicable for benefit payments made during the first 5 years from the valuation date, the second Segment Rate is applicable for benefit payments during the next 15 years, and the third segment rate is applicable for all benefits payments after 20 years.

Funding relief was not elected for the 2009, 2010 nor 2011 plan years.

Minimum funding interest rates are limited by a corridor over the next few valuations in accordance with the following table per the current law:

Valuation Cycle Beginning	Percentage of the 25 year Average of IRS Rates	
	Minimum	Maximum
2015	90%	110%
2016	90%	110%
2017	90%	110%
2018	85%	115%
