Liberty Steel Products, Inc. Defined Benefit Plan
NOTES TO FINANCIAL STATEMENTS

December 31, 2016 and 2015

NOTE A – DESCRIPTION OF PLAN

The following description of Liberty Steel Products, Inc. (the “Company”) Defined Benefit Plan (the “Plan”) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan covering substantially all employees of the Company. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Employees are eligible to become participants upon completion of one year of continuous service and attaining the age of 21.

Contributions

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan members. The actuarial cost method utilized by the Plan is the projected unit credit cost method. This method considers expected future pay increases in the calculation of liability and normal cost.

The Company's present intention is to make the required minimum annual contributions and such additional contributions as the Company may decide to make. The Plan has met the ERISA minimum funding requirements in 2016 and 2015.

Vesting

A participant becomes vested as follows:

Years of Service	Vested Percentage of Employer Contributions
Less than 5	0%
5 or more	100%

Payment of Benefits

Benefits for retired or terminated employees are based on the employee's highest consecutive 5-year average salary over the ten years prior to retirement age. Compensation is limited in accordance with Section 401(a) (17) of the Internal Revenue Code. In the event of the death of an active employee, the monthly benefit payable to the beneficiary is equal to the survivor's portion of the participant's joint and 50% survivor benefit, calculated at earliest retirement age, reduced on an actuarially equivalent basis for early commencement and for the 50% joint and survivor form of payment.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (“PBGC”) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's guaranty while other benefits may not be provided for at all.

Plan Termination

Although it has not expressed any intention to do so, the Company has the right to discontinue its contributions at the discretion of the Board of Directors at any time and to terminate the Plan subject to the provisions of ERISA.

NOTE A – DESCRIPTION OF PLAN (continued)

Transfers to Another Plan

On March 31, 2015, the Company reorganized which resulted in a spin-off of part of its operations into a separate legal entity. As a result, approximately half of the current workforce has been terminated and is no longer in the Plan. Plan assets allocated to the terminated participants, as calculated by the actuary, were transferred to the plan of the new company resulting from the reorganization.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared using the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation

Investments are reported at fair value, as determined by the trustee. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note D for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses

Administrative and recordkeeping fees of the Plan are paid by the Plan.

Actuarial Present Value of Accrued Plan Benefits

Accrued plan benefits are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accrued plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) present employees or their beneficiaries. Benefits payable under all circumstances--retirement, death, disability, and termination of employment--are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

NOTE C – INFORMATION CERTIFIED BY THE PLAN'S CUSTODIAN

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2016 and 2015 and net change in investment income and expenses for the years ended December 31, 2016 and 2015, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Plan's custodian, BNY Mellon.

NOTE D – FAIR VALUE MEASUREMENTS

Financial accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 assets primarily include exchange traded equity securities and mutual funds. Prices are obtained from readily available sources for market transactions involving identical assets and liabilities.

Fair values for Level 2 inputs are based on inputs other than quoted prices within Level 1 that are observable for the asset, either directly or indirectly. Observable inputs include quoted market prices in active markets for similar assets, quoted prices in markets that are not active for identical or similar assets and other market observable inputs such as interest rate, credit spread and foreign currency exchange rates observable in the marketplace or derived from market transactions. Level 2 assets primarily includes fixed maturity securities (including public and private bonds), equity securities, over-the-counter derivatives, group annuity contracts, pooled separate accounts and other investments. These fair values are generally obtained from third-party pricing services or determined through the use of valuation models or methodologies, including matrix pricing, using substantially all observable inputs. Prices are validated through an investment analyst review process including direct interaction with external sources, recent trade activity or through use of internal models.

Level 3 fair values are based on at least one significant unobservable input for the asset. Level 3 securities contain unobservable market inputs and as a result considerable judgment may be used in determining the fair values. Level 3 assets include certain fixed maturity securities, private equity securities, and complex derivatives. These fair values are generally obtained through the use of valuation models or methodologies using significant unobservable inputs or broker quotes. In circumstances where broker quotes are used to value an instrument, a nonbinding quote is generally received. Broker quotes are validated through an investment analyst review process, including direct interaction with external sources, through the use of internal models or other relevant information.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2016 and 2015.

Money market: As a practical expedient, valued at the net asset value (NAV) of shares held by the Plan at year end.

Mutual funds: Valued at the NAV of shares held by the Plan at year end.

Common stock: Valued at the closing price reported on the active market on which the individual securities are traded.

Federal agency and government securities: Valued on the basis of market valuations primarily furnished by an independent pricing service which employs various evaluation methods, utilizing the most appropriate method of each security. Such market valuations may represent the last quoted price on the securities' major trading exchange, quotes received from dealers or market makers in the relevant securities, or matrix pricing.

Corporate debt: Investments which are not actively traded are valued at the derived price of industry pricing providers on the last business day of the year

NOTE D – FAIR VALUE MEASUREMENTS (continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In accordance with GAAP, investments measured at net asset value as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the following tables are intended to permit reconciliation to the amounts presented in the Statements of Net Assets Available for Benefits.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2016 and 2015.

NOTE E – TAX STATUS

The Plan obtained its latest determination letter on September 17, 2014, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

NOTE F – PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments are shares of mutual funds managed by BNY Mellon or Dreyfus Corporation. BNY Mellon is the custodian as defined by the Plan, and Dreyfus Corporation is a wholly-owned subsidiary of BNY Mellon, therefore, these transactions qualify as party-in-interest. Fees paid by the Plan for investment management services were \$30,738 and \$43,043 for the years ended December 31, 2016 and 2015, respectively.

NOTE G – RISKS AND UNCERTAINTIES

The Plan provides various investment options which are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with investments, it is at least reasonably possible that changes in the values of the investments will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTES TO FINANCIAL STATEMENTS

NOTE H – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The Plan's actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants; the RP-2014 mortality tables for employees and healthy annuitants and the mortality rates are projected generationally from 2006 using Scale MP-2015 at December 31, 2016, the RP-2014 mortality tables for employees and healthy annuitants and the mortality rates are projected generationally from 2014 using Scale MP-2014 were used at December 31, 2015; (b) retirement age assumptions - for 2016 and 2015 it is assumed that 50% of the participants will have retired at age 65, 67% at age 66, and 100% at age 67. (c) the assumed salary increase was 3.00% per year for 2016 and a graded scale beginning at 2.75% and increasing by 0.25% per year up to an ultimate rate of 3.00% for 2015 and (d) expected return on assets for 2016 and 2015 is 7.00%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accrued plan benefits.

The accumulated plan benefit information is as follows:

	January 1,	
	2016	2015
Actuarial present value of accumulated plan benefits prior to Plan spin-off January 1, 2015	\$ 6,611,305

Valuation Compensation	2015 pensionable earnings as provided by Liberty Steel Industries, Inc.
Benefit and Compensation Limits	Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$210,000 and the IRC section 401(a)(17) compensation limit of \$265,000.

The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Decrement Timing	Beginning of year decrements
Surviving Spouse Benefit	It is assumed that 100% of males and 100% of females have an eligible spouse, and that males are three years older than their spouses.
Valuation Compensation	2015 pensionable earnings as provided by Liberty Steel Industries, Inc.
Benefit and Compensation Limits	Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$210,000 and the IRC section 401(a)(17) compensation limit of \$265,000.
Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior year, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected Return on Assets	
2015 Plan Year	7.00%, limited to 6.81%
