Note A – Description of Plan

The following brief description of the Tank Truck Workers Union Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a defined benefit pension plan covering all employees of Quality Distribution, Inc. ("the Company") who are members of the Tank Truck Workers Union. It is subject to the provisions of the Employees Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

A participant's normal retirement age is the latter of age 65 or the fifth anniversary of participation. A participant's vested accrued benefit as of a given date is equal to the product of the accrued benefit multiplied by the vesting percentage as of the same date. Each participant who becomes eligible for a normal retirement benefit under the Plan will be entitled to a monthly retirement pension benefit beginning on the normal retirement date. The annual normal retirement benefit shall be the monthly benefit factor multiplied by the number of years of service multiplied by 12. The monthly benefit factor for those who retire on or after December 1, 1991 is $34.

Vesting

Participants are 100% vested upon the completion of five years of service. Prior to the completion of five years of service the vesting percent is zero.

Credit Risk

Investment securities, in general, are exposed to various risks, such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the valuation of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Note B – Summary of Accounting Policies

Basis of Presentation

The accompanying financial statements are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (US GAAP).

In May 2015, the FASB issued ASU 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, which exempts investments measured using the net asset value (NAV) practical expedient in ASC 820, *Fair Value Measurement*, from categorization within the fair value hierarchy. The guidance requires retrospective application and is effective for public business entities for fiscal years, and interim periods within those years, beginning after December 15, 2015. For all other entities, the guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is permitted. Management elected to early adopt the provisions of this new standard. Accordingly, the amendment was retrospectively applied resulting in changes to the footnote disclosures related to fair value measurements in Note B.

Note B – Summary of Accounting Policies (continued)

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965): Part (I) Fully Benefit-Responsive Investment Contracts, Part (II) Plan Investment Disclosures, Part (III) Measurement Date Practical Expedient*. This three-part standard simplifies employee benefit plan reporting with respect to fully benefit-responsive investment contracts and plan investment disclosures, and provides for a measurement-date practical expedient. Parts I and II are effective for fiscal years beginning after December 15, 2015 and should be applied retrospectively, with early application permitted. Part III is effective for fiscal years beginning after December 15, 2015 and should be applied prospectively. Accordingly, the amendments were retrospectively applied resulting in changes to the footnote disclosures related to fully benefit-responsive investments. Part III is not applicable to this Plan.

As described in the Code *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (the Code), investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. As required by the Code, the Statement of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Plan had no fully benefit-responsive investments as of December 31, 2016 and 2015.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts in the accompanying financial statements. Actual results could differ from those estimates.

Fair Value Measurements

The Code has established establishes a framework for measuring fair value, Fair Value Measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements.) The three levels of the fair value hierarchy are described below:

Level 1	Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
Level 2	Inputs to the valuation methodology include: Quoted prices for similar assets or liabilities in active markets; Quoted prices for identical or similar assets or liabilities in inactive markets; Inputs other than quoted prices that are observable for the asset or liability; Inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
Level 3	Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Note B – Summary of Accounting Policies (continued)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2016 and 2015.

Common stocks, corporate bonds, asset backed securities and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2016 and 2015:

	Fair Value Measurements at Reporting Date Using:		
	Assets Measured at Fair Value at 12/31/2016	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)
Mutual funds	$ 2,419,606	$ 2,419,606	-

	Fair Value Measurements at Reporting Date Using:

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Administrative expenses are paid by the Plan.

Note B – Summary of Accounting Policies (continued)

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are distributable under the Plan's provisions for the services employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances, retirement, death, disability and termination of employment, are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits at January 1, 2017 and 2016 is determined by an actuary from Milliman, Inc. (the Actuary), by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The Pension Protection Act of 2006 required certain changes in actuarial assumptions used.

Significant actuarial assumptions and methods used were as follows as of January 1, 2017 and 2016:

- For the January 1, 2017 valuation, the assumed rate of return on investments was based on a discount rate of 6%. As required by the Pension Protection Act of 2006 the actuarial cost method used is the unit credit method for determining the plan's ERISA funding requirements and for the purpose of applying the actuarial cost method, the plan assets are valued using adjusted fair market value.
- The IRS Prescribed Mortality-Generational Annuitant, Male and Female (and Non Annuitant for participants who are not yet receiving payments) assumption is used for both pre and post-retirement males and females for the January 1, 2017 and the January 1, 2016 valuation.
- The projected unit credit actuarial cost method was used to determine liabilities and costs related to retirement, termination and pre-retirement death benefits.
- For the January 1, 2017 and 2016 valuations, marital status is estimated at 100% married for the group, and males are assumed to be four years older than females.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue existence until all accrued benefits are paid. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulates benefits.

Note C – Investments

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan Administrator instructed the auditors not to perform any auditing procedures with respect to the information certified by the Trustee, except for comparing such information to the related information included in the financial statements and supplemental schedules. The Plan Administrator has obtained a certification from the Trustee that the information provided to the Plan Administrator by the Trustee as of December 31, 2016 and 2015, and for the year ended December 31, 2016, is complete and accurate. Such information includes all investments, investment income, and the information in the supplemental schedules of assets (held at end of year).

Note D – Funding Policy

The Company's funding policy is to make quarterly or annual contributions to the Plan, which are sufficient to satisfy the minimum funding requirements of ERISA. The Company satisfied the minimum ERISA funding obligations for the year ended December 31, 2016.

Note E – Party-in-Interest Transactions

Certain Plan investments are shares of funds managed by Principal Life Insurance Company. Principal Life Insurance Company is the Trustee of the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid to the Trustees by the Plan for investment services amounted to approximately $145,000 during the year ended December 31, 2016.

Note F – Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan.
b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
c. All other vested benefits (that is, vested benefits not insured by the PBGC).
d. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivors' pensions.

However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Note G – Tax Status of Plan

The Plan obtained a favorable determination letter dated March 20, 1996, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Plan's administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC, and was qualified and the related trust was tax-exempt as of the financial statement date. Accordingly, no provisions for Income taxes has been included in the Plan's financial statements.

The Plan Administrator evaluated the Plan's tax positions and concluded that the Plan had maintained its tax-exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the accompanying financial statements. The Plan is no longer subject to examination by taxing authorities for years prior to 2014.

Note H – Subsequent Events

Subsequent events have been evaluated through October 11, 2017, which is the date the financial statements were available to be issued.

See Accountant's Opinion

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help to ensure that the plan will be adequately and systematically funded. There are several commonly-used cost methods which differ in how much of the ultimate cost is assigned to each prior and future year. Therefore, the pattern of annual contributions varies with the choice of cost method. Annual contributions are also affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The plan's actuarial cost method used for determining the plan's ERISA funding requirements is the unit credit method, as required by the Pension Protection Act of 2006. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

Asset Valuation Method

The Actuarial Value of Assets used for determining the plan's ERISA funding requirements is equal to the Adjusted Market Value of Assets minus a decreasing fraction of the investment gain or loss for each of the two immediately preceding plan years, but it cannot be less than 90% nor more than 110% of the Adjusted Market Value of Assets. The expected investment return for a plan year is based on the lesser of the expected rate of return on plan assets (currently 6% per year effective January 1, 2016; previously 6.5% per year) or the applicable statutory interest rate for the year.

Changes in Actuarial Methods Since Prior Valuation

None.

Interest Rates

For ERISA minimum funding purposes: Segment rates (based on statutory rates in effect four months prior to beginning of plan year, limited by Segment Rate Stabilization) of 4.43% per year for first 5 years, 5.91% per year for next 15 years, and 6.65% per year thereafter. The equivalent Effective Interest Rate is 5.80% per year.

For Maximum Deductible Contribution purposes: Segment rates (based on statutory rates in effect four months prior to beginning of plan year, not limited by Segment Rate Stabilization) of 1.34% per year for the first 5 years, 4.03% per year for the next 15 years, and 5.06% per year thereafter. The equivalent Effective Interest Rate is 3.87% per year.

For FASB ASC Topic 960 purposes: Discount rate of 6% per year (based on plan's investment policy and Milliman's capital market expectations).

Mortality

For ERISA minimum funding and Maximum Deductible Contribution purposes: Statutory static tables for 2016 based on RP-2000 Mortality Table projected to anticipate greater future longevity, with separate rates for non-annuitants and annuitants.

For FASB ASC Topic 960 purposes: RP-2014 Mortality Tables with Blue Collar adjustments further adjusted to reflect Mortality Improvement Scale MP-2015 from the 2006 base year, and projected forward using MP-2015 on a generational basis, with employee rates before benefit commencement and healthy annuitant rates after benefit commencement. As a generational table, it reflects mortality improvements both before and after the measurement date. The Society of Actuaries' Retirement Plans Experience Committee recommends use of the RP-2014 table and MP-2015 scales for valuing retirement plan liabilities.

Decrement Timing

Decrements are assumed to occur at the middle of the year.

Form of Payment

Life annuity.

Marital Characteristics

For participants not in pay status: 100% of participants are assumed to be married, with males 4 years older than females (based on actuary's judgment).

For participants in pay status: Actual birth dates of spouses are included in the census data, where relevant.

Administrative Expenses

Expected administrative expenses are assumed to be the average of actual administrative expenses for the prior 4 years plus anticipated PBGC premium expenses for the year, rounded to the nearest $5,000. For 2016, administrative expense of $65,000 are assumed payable at the middle of the year.

Benefits Not Valued

All benefits are valued.

Special Data Adjustments

None.

Changes in Actuarial Assumptions Since Prior Valuation

ERISA minimum funding interest rates: From 4.72%, 6.11%, and 6.81% per year to 4.43%, 5.91%, and 6.65% per year, respectively.

Maximum Deductible Contribution interest rates: From 1.15%, 4.06%, and 5.15% per year to 1.34%, 4.03%, and 5.06% per year, respectively.

ERISA minimum funding and Maximum Deductible Contribution mortality: From statutory tables for 2015 to statutory tables for 2016.

FASB ASC Topic 960 discount rate: From 6.5% per year to 6% per year.

FASB ASC Topic 960 mortality: From RP-2014 Mortality Tables with Blue Collar adjustments projected with Mortality Improvement Scale MP-2014 to RP-2014 Mortality Tables with Blue Collar adjustments further adjusted to reflect Mortality Improvement Scale MP-2015 from the 2006 base year and projected with Scale MP-2015. This change was made to better reflect future mortality experience.

This summary of principal plan provisions is intended to only describe the essential features of the plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

Definitions

Accrued Benefit: The benefit determined under the formula used to calculate the Normal Retirement Benefit, based on Years of Service as of the date of determination. The Accrued Benefit is determined as of the earlier of the date of termination of employment or November 1, 2001, and is payable in monthly installments.

Actuarially Equivalent Equality in value such that the present value of the amount under any form of payment is essentially the same as the present value of the amount under the normal form of annuity payment for single participants. For purposes other than determining lump sum amounts, Actuarially Equivalent factors are based on the 1971 Group Annuity Mortality Table for males and an 8% interest rate. For purposes of determining lump sum amounts, Actuarially Equivalent factors are based on the applicable mortality table specified in IRS Notice 2015-53 for the Plan Year of distribution and the statutory three-tier segment interest rates in effect for the second month prior to the plan year of distribution.

Plan Effective Date: May 1, 1963 for Bridgeport participants and February 2, 1968 for Williamsport and Wilkes Barre participants. The plan was last amended effective November 1, 2001.

Plan Year: The 12-month period beginning January 1 and ending December 31.

Year of Service: Service is credited according to the following schedule for each calendar year:

Hours of Service	Percentage of a Year of Service Earned
0 - 99	0%
