MAKINO PENSION PLAN FOR BARGAINING UNIT EMPLOYEES

NOTES TO FINANCIAL STATEMENTS

December 31, 2016 and 2015

NOTE A – DESCRIPTION OF THE PLAN

The following brief description of the Makino Pension Plan for Bargaining Unit Employees (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

1. General

The Plan is a non-contributory defined benefit pension plan. The Plan provides monthly benefits upon retirement or disability to eligible employees of Makino Inc. (the “Company”) based upon years of service. The Plan is administered by the Company through its Retirement Committee. Conduent Consultants LLC serves as actuary for the Plan, and Principal Life Insurance Company and Principal Trust Company serve as the recordkeeper, and custodian and trustee, respectively, for the Plan. The Plan has been amended to comply with the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

The Plan was frozen effective October 13, 2005. The participant’s years of credited service are as of October 13, 2005 and will not increase after such date even if the employee continues to work for the Company. Additionally, no new participants may enter the Plan after October 14, 2005.

Because of the “freezing” of credited service used in the Plan’s regular benefit formula, each participant in the Plan who did not terminate employment with the Company prior to October 13, 2005 is deemed to be affected by this change in the Plan and the benefit payable will be calculated in accordance with the schedule outlined in the related amendment.

While the credited service used under the regular benefit formula provisions of the Plan is “frozen”, the Plan has not terminated. Vested benefits will generally only be payable to the Plan’s participants after retirement and in accordance with the current provisions of the Plan.

2. Pension Benefits

Normal retirement age is 65. Participants with the required years of vested service, as defined by the Plan, are entitled to annual pension benefits beginning at normal retirement age. The Plan permits early retirement with reduced benefits, subject to certain age and service requirements. Upon retirement, employees may elect to receive the value of their accumulated plan benefits as a single life annuity, qualified joint and survivor annuity, a life and five year certain annuity, or life and ten year certain annuity payable monthly from retirement.

3. Death and Disability Benefits

If an active employee dies at age 55 or older, a death benefit equal to the value of the employee’s accumulated pension benefit is paid to the employee’s beneficiary. Active employees who become totally disabled receive annual disability benefits that are equal to the normal retirement benefits they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age at which time disabled participants begin receiving normal retirement benefits computed as though they had been employed to normal retirement age subject to the amendment discussed above.

NOTE A – DESCRIPTION OF THE PLAN (continued)

4. Administrative Expenses

Administrative expenses are comprised primarily of Pension Benefit Guaranty Corporation fees and investment management expenses and are paid by the Plan unless the Company elects to pay such expenses.

5. Plan Funding

The Company follows a policy of funding the Plan in sufficient amounts to meet the minimum funding requirements of ERISA. As of December 31, 2016 and 2015, the Plan was sufficiently funded to meet the minimum requirements of ERISA.

NOTE B – SIGNIFICANT ACCOUNTING POLICIES

1. Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“US GAAP”).

2. Investment Valuations and Income Recognition

Investments are presented at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note G for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Net appreciation in fair value of investments includes the Plan’s gains and losses on investments bought and sold as well as held during the year.

3. Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

4. Payment of Benefits

Benefit payments to participants are recorded upon distribution.

5. Subsequent Events

The Plan administrator evaluated its December 31, 2016, financial statements for subsequent events through October 16, 2017, the date the financial statements were available to be issued. The Plan administrator is not aware of any subsequent events which would require recognition or disclosure in the financial statements.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

December 31, 2016 and 2015

NOTE C – TAX STATUS

The Internal Revenue Service (“IRS”) has determined and informed the Company, by a letter dated August 10, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (“IRC”). Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan is qualified, and the related trust is tax-exempt. US GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the Plan’s tax positions, and has concluded that as of December 31, 2016 and 2015, there are no uncertain positions taken or expected to be taken that do not meet the more likely than not threshold. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE D – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries. Benefits under the Plan are based on the employees’ years of service and a benefit factor as defined in the Plan document. The actuarial valuations were made by actuaries of Conduent Consultants LLC as of December 31, 2016 and 2015, and is the amount that results from applying actuarial assumptions to adjust accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payments. The following presents the actuarially computed present values of accumulated plan benefits at the valuation dates and changes in accumulated plan benefits:

	December 31, 2016	December 31, 2015
Vested benefits:		
Participants currently receiving benefits	\$ 5,709,761	\$ 5,860,812
Other vested participants	1,596,658	1,704,887
	<u>7,306,419</u>	<u>7,565,699</u>
Nonvested benefits	2,608	2,414
Actuarial present value of accumulated plan benefits	<u>\$ 7,309,027</u>	<u>\$ 7,568,113</u>
Actuarial present value of accumulated plan benefits at December 31, 2015		\$ 7,568,113
Actuarial experience		11,368

MAKINO PENSION PLAN FOR BARGAINING UNIT EMPLOYEES

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

December 31, 2016 and 2015

NOTE D – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (continued)

The significant actuarial assumptions underlying the actuarial computations as of December 31, 2016 and 2015, are as follows:

1. Actuarial Cost Method

Unit Credit Method

2. Discount Rate

The discount rate used is 7.50%

3. Life Expectancy

As of December 31, 2016 and 2015, the Plan's benefit obligation was calculated using the RP-2014 Total Employee and Healthy Annuitant Mortality Tables rolled back to 2006. Mortality Improvement Scale MP-2016 and MP-2015 were utilized as of December 31, 2016 and 2015, respectively.

4. Employee Turnover

As of December 31, 2015, the T-8 withdrawal table was used to determine employee turnover. As of December 31, 2016, the employee turnover assumption was eliminated.

5. Retirement Age

The retirement age was assumed to be age 60 to 66 and age 55 to 65 for the December 31, 2016 and 2015 valuations, respectively.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE E – PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations.

MAKINO PENSION PLAN FOR BARGAINING UNIT EMPLOYEES

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

December 31, 2016 and 2015

NOTE E – PLAN TERMINATION (continued)

4. All other vested benefits (that is, vested benefits not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

NOTE F – CERTIFIED INFORMATION

The Plan administrator has elected the method of annual reporting compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the recordkeeper, trustee and custodian have certified that the following information included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments, as of December 31, 2016 and 2015
- Net appreciation in fair value of investments and dividend income for the year ended December 31, 2016

NOTE G – FAIR VALUE MEASUREMENTS

Fair value is defined as an exit price, representing the amount that will be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based upon assumptions that market participants would use to price the asset or liability. Fair value is based on a three-level hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

December 31, 2016 and 2015

NOTE G – FAIR VALUE MEASUREMENTS (continued)

The three levels of the fair value hierarchy are described below:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value:

Mutual Funds – Valued at the daily closing price of shares held by the Plan at year-end. These funds are publicly-traded securities and transact at daily net asset value (“NAV”).

Hedge Funds – Valued at the NAV of shares held by the Plan at year-end as determined by the fund manager.

Pooled Separate Accounts (“PSAs”) – Valued at the NAV of shares held by the Plan at year-end.

The Plan records hedge funds and PSAs at NAV as a practical expedient, or an equivalent measure of fair value. The NAV of these investments is determined using the market value, or fair value if market data is unavailable, of the underlying securities.

PSAs are invested in a broad mix of underlying mutual funds. PSA funds do not have restrictions on the trading of the securities. Hedge funds are redeemable monthly or quarterly with less than 95 days' notice. The hedge funds' investment objectives include capital appreciation, speculative trading in commodities, and achievement of equity-like returns. There are no lock-up provisions and no unfunded commitments for PSAs or hedge funds.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

NOTE H – PARTIES-IN-INTEREST

Certain Plan investments are shares of PSAs managed by Principal Life Insurance Company, the recordkeeper of the Plan. These transactions qualify as parties-in-interest transactions.

NOTE I – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits and Company funding requirements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

The following assumptions and methods are prescribed by ERISA.

Funding interest rates

For 2016 Plan Year: Segment Rates with four-month lookback, constrained in accordance with relevant legislation as follows:

	Unconstrained Rates*	Rates Reflecting HATFA Corridor**
First Segment Rate	1.34%	4.43%
Second Segment Rate	4.03%	5.91%
Third Segment Rate	5.06%	6.65%
Effective Interest Rate Based on constrained rates		5.87%

For 2015 Plan Year: Segment Rates with four-month lookback, constrained in accordance with relevant legislation as follows:

	Unconstrained Rates*	Rates Reflecting HATFA Corridor**
First Segment Rate	1.15%	4.72%
Second Segment Rate	4.06%	6.11%
Third Segment Rate	5.15%	6.81%
Effective Interest Rate Based on constrained rates		6.08%

*Used for maximum tax-deduction purposes

**Used for minimum funding and benefit restriction purposes.

Mortality

Mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.

Actuarial cost method

Unit Credit Method. The Funding Target is the present value of accrued benefits and based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected administrative and investment expenses to be paid from plan assets during the year.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under PPA.

The assumptions are based on the plan's anticipated experience. Actual experience is reviewed each year and compared to the assumptions. Changes are made, as appropriate, based on this review.

Maximum Benefit and Compensation Limits

In accordance with the Section 415 and Section 401(a)(17) limits in effect as of January 1, 2016 and both limits are assumed not to increase.

Expenses

Expected plan related expenses of \$106,055 were added to the Target Normal Cost. The expense load is based on the prior year's non-PBGC plan related expenses plus this year's PBGC premium.

Frequency of optional payment forms

Participants are assumed to elect a life annuity.

Marital percentage

80% of participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Retirement rates

Retirements are assumed to occur according to the following rates:

Age	Annual Rates
55 - 57	0.02
58 - 59	0.05
60 - 61	0.10
62 - 64	0.80

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods (continued)

Vested Termination Retirement

Once the participant is eligible for retirement with no reduction at age 62, the participant is assumed to commence benefits.

Asset valuation method

The Actuarial Value of Assets is Market Value as of the valuation date, including discounted receivable contributions, reduced by decreasing fractions, 2/3 and 1/3, of the gain/(loss) in each of the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on Market Value during the period less the expected return on Market Value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of Market Value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2016 Expected Return	7.50%	6.65%	6.65%
2015 Expected Return	7.50%	6.81%	6.81%
2014 Expected Return	7.50%	6.99%	6.99%

The actuary's expected rate of return is based on the plan's asset allocation and forward-looking expected rates of return by asset category provided by the plan's investment consultant.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Summary of Changes from the January 1, 2015 Valuation

- The segment rates were updated in compliance with the Pension Protection Act of 2006 and as constrained by HATFA. This change increased the Funding Target by approximately \$240,000.
- The mortality assumption was updated as described in IRS Reg. Section 1.430(h)(3)-1. This change increased the Funding Target by approximately \$16,500.
- Expected plan related expenses added to the Target Normal cost were updated from \$90,280 to \$106,055 mainly due to the change in PBGC premium and in order to better reflect anticipated plan experience.
