SECTION VII ACTUARIAL METHODS

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

Plan Year	Corridor
Through 2020	90% - 110%
2021	85% - 115%
2022	80% - 120%
2023	75% - 125%
2024 and later	70% - 130%

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

SECTION VII — ACTUARIAL METHODS

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus $700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

SECTION VII *ACTUARIAL METHODS*

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

Plan Year	Corridor
Through 2020	90% - 110%
2021	85% - 115%
2022	80% - 120%
2023	75% - 125%
2024 and later	70% - 130%

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

SECTION VII — ACTUARIAL METHODS

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus $700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

THALES PENSION PLAN FOR CERTAIN U.S. EMPLOYEES

NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2016 AND 2015

1. DESCRIPTION AND SIGNIFICANT EVENTS OF THE PLAN

General – The Thales Pension Plan for Certain U.S. Employees (the "Plan") is a defined benefit plan subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") that was established December 1, 1970 for employees of various companies affiliated through common ownership. Employees who had become participants in the Plan prior to the closing of participation on December 31, 2002 and who were covered under the Plan as employees of one of the following participating Companies (collectively "the Company"):

- Thales North America, Inc.
- Thales Training and Simulation, Inc. (now part of Thales, ATM, Inc.)
- Thales Components Corporation (formerly Thomson-CSF Components Corporation)
- Thales Finance Corporation (formerly known as Thomson Corporation of America)
- Thales Avionics, Inc. (Auxilec Division)
- Thales TRC, Inc. (formerly The Racal Corporation; now part of Thales Holdings, Inc.)
- Thomson Passive Components Corporation

No other employees are eligible to participate under the Plan as participation was closed on December 31, 2002. On December 31, 2002, the accrual of plan benefits of the Plan was frozen. As a result of freezing the accrual of benefits, each person who was a general participant in the Plan on December 31, 2002, and who was in the employment of the Company on that date, became fully vested in their accrued benefits as of December 31, 2002. Participants should refer to the Plan Document for a more complete description of the Plan's provisions.

Effective June 1, 2004, the Plan became one of the participating plans in the Thales Master Trust ("Master Trust"), see Note 4. The Master Trust's custodian of the pooled separate account investments is Prudential Retirement Insurance and Annuity Company. The custodian for the Master Trust's other investments is Prudential Bank & Trust, FSB. Both custodians are affiliated through common ownership, and will collectively be referred to as "Prudential."

Contributions – Employer contributions are based upon actuarial determinations. Under the current provisions of the Plan, employees make no contributions. All contributions made by the employer are paid to the trustee and deposited in the trust fund.

Retirement Benefits – Participants become eligible for normal retirement on the first day of the month coincident with or next following the employee's 65th birthday. Early retirement is permitted after age 55 with ten years of vested service.

Upon retirement, participants receive benefits based upon years of credited service, average pay, and average offset compensation, as defined by the Plan Document. If an employee was formerly covered under the Racal Pension Plan at June 30, 2001 (or the Racal appendix to the Plan), see the Racal supplement to the Plan's Summary Plan Description for applicable special provisions.

Benefit distributions upon normal retirement are in the form of a life annuity for unmarried participants, if an optional payment is not selected. Married participants receive an actuarially

reduced 50% joint and survivor annuity. Optional payment forms include single life annuity, 75% Joint and Survivor Annuity option, or lump sum.

The Plan was amended in 2016 to allow for certain participants and beneficiaries to take a special lump sum option during a "window election period." This option was available from September 15, 2015 through October 31, 2015.

Vesting – At December 31, 2002, the accrual of plan benefits was frozen and all eligible participants who were employed on that date became fully vested.

Surviving Spouse Benefits – Upon the death of a vested participant prior to eligibility for early retirement, benefits become payable to the spouse beginning on the participant's earliest retirement date. The benefit payable to the spouse is equal to the 50% joint and survivor annuity that would have been paid had the participant survived to their earliest retirement date.

Upon the death of a vested participant after reaching eligibility for early retirement, the benefit payable to the spouse equals the benefit that would have been paid had the participant selected the early retirement option. The benefit is payable in the form of a 50% joint and survivor annuity.

Disability Retirement Benefits – In the event that a participant's employment is terminated as a result of disability, and the participant is eligible to receive a normal or early retirement benefit, they shall receive such benefit.

Administrative Expenses – Accounting fees incurred in administering the Plan are paid by the Company. Actuarial, PBGC, auditing and trustee fees are paid from the assets of the Plan.

Termination of the Plan – Upon termination of the plan, each participant's accrued benefits as of the date of termination shall become fully vested and nonforfeitable to the extent funded. The Pension Benefit Guaranty Corporation (PBGC) guarantees the payment of all nonforfeitable basic benefits subject to certain limitations described in ERISA. Some benefits may be fully or partially provided for by the then existing net assets and PBGC guaranty. Other benefits may not be provided at all.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements have been prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires of the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment in Master Trust – The fair value of the Plan's Investments in the Master Trust is based on the beginning of year value of the Plan's interest in the trust plus actual contributions and allocated investment income less actual distributions and allocated expenses. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Funding Policy - Annual contributions, as determined by the Plan's actuary, are made by the Company to fund the Plan and have been computed in accordance with the Unit Credit

Actuarial Cost Method. The Company's contributions for 2016 met the minimum funding requirements of ERISA.

Accounting Standards Updates – In February, 2017, the FASB issued ASU 2017-06 *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting*. The ASU clarifies how employee benefit plans will present and disclose investments in master trusts. The ASU requires: 1) The Plan's interest in the master trust and the change in that interest in separate line items in the statement of net assets available for benefits and the statement of change in net assets available for benefits, respectively; 2) Disclosure of the total master trust investment amounts by general type and the dollar amount of the plan's interest in each general type of investment; 3) Disclosure of the master trust's other assets and liabilities and the dollar amount of the Plan's interest in each balance; 4) Disclosure of the net appreciation (depreciation) in the fair value of the investments of the master trust; 5) Description of the basis used to allocate net assets and total investment income to the plan; 6) Removal of investment disclosures about 401(h) account assets to be provided in health and welfare benefit plan financial statements. This new guidance will be effective for annual financial statements for fiscal years beginning after December 15, 2018. Early adoption is permitted and should be retrospectively applied to each period for which financial statements are presented. Management is currently assessing the potential impact the guidance will have upon adoption.

Date of Management's Review – Subsequent events have been evaluated through October 5, 2017, which is the date the financial statements were available to be issued.

3. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances-retirement, death, disability, and termination of employment, are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the plan's actuary, Prudential. Significant actuarial assumptions used include the following:

Investment return – 7.5% per annum, compounded annually for 2016 and 2015.

Life expectancy assumptions – for the 2016 year, the RP–2015 Adjusted to 2006 Total Dataset with Scale MP-2016, and for the 2015 year, the RP–2015 Total Dataset with Scale MP-2015 Mortality Table.

Discount rate – 7.25% for 2016 and 7.5% for 2015.

Estimated expenses – $225,000 for 2016 and $185,000 for 2015.

The actuarial present value of accumulated plan benefits as of January 1 is as follows:

	2017	2016
Vested Benefits:		
Active and terminated participants	$ 6,520,451	$ 6,905,337
Retired participants	10,835,749	10,413,677
	17,356,200	17,319,014
Non-Vested Benefits	10,298	-
Total accumulated plan benefits	$ 17,366,498	$ 17,319,014

The change in accumulated plan benefits for the year ended December 31, is as follows:

	2016
Actuarial present value of accumulated plan benefits at beginning of period	$ 17,319,014
Increase (decrease) during the year attributable to:	
Benefits accumulated	216,353
Interest due to the decrease in discount period	1,241,353
Assumption changes	153,333
Benefits paid to participants	(1,563,555)
Actuarial present value of accumulated plan benefits at end of period	$ 17,366,498

The changes in the actuarial assumptions discussed above resulted in a increase to the accumulated plan benefits of $153,333.

4. MASTER TRUST

The Plan's sole investment is its interest in the Master Trust which was established for the investment of assets of this Plan (referred to as Plan C below) and two other Thales Company sponsored retirement plans, Thales Communications Pension Plan (Plan A) and Retirement Plan of Thales ATM, Inc. (Plan B). Each participating retirement plan has a divided interest in the Master Trust. The value of the Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income (loss), less actual distributions and allocated administrative expenses. Investment income (loss), investment management fees and other direct expenses relating to the Master Trust are allocated to individual plans based on the average daily balances. The Plans' respective interests in the Master Trust as of December 31, 2016 and 2015, are shown in the table.

The following is a summary of the value of the investments of the Master Trust as of December 31:

The Master Trust is comprised of mutual funds, pooled separate accounts, and prior to December 31, 2016, a limited partnership, which invest in a variety of investments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility due to the level of risk associated with certain investment securities. It is reasonably possible that changes in the values of investment securities will occur in the near term and, that such changes could materially affect the amounts reported in the financial statements.

Investment expenses are allocated to the individual plans based upon each Plan's investments, and certain other expenses are charged to each specific plan.

Expenses paid by the Master Trust attributable to this Plan and in total consisted of the following for the year ended December 31, 2016:

	Plan A	Plan B	Plan C	Total

5. FAIR VALUE MEASUREMENTS

FASB ASC 820, *Fair Value Measurements*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs consist of unadjusted quoted prices for identical assets in active markets that the plan has the ability to access.

Level 2 – Inputs consist of 1) quoted prices for similar assets in active markets, 2) quoted prices for identical or similar assets in inactive markets, 3) inputs other than quoted prices that are observable, and 4) inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset has a specified (contractual) term, the level 2 input must be observable for substantially the full term.

Level 3 – Inputs consist of unobservable inputs where there is little or no market activity, and the reporting entity makes estimates and assumptions related to the pricing of the asset including assumptions regarding risk.

The assets fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2016 and 2015:

Master Trust – Valued at fair value based on the fair value of the underlying investments of the fund, which have been determined based on the fair value of the underlying investments of the Master Trust. When quoted market prices are not available, the fair value of investments is estimated primarily by independent investment brokerage firms and insurance companies.

The underlying investments in the master trust are valued as follows:

Pooled Separate Accounts – Prudential calculates a unit value (similar to a net asset value “NAV”) of a separate account daily. It is the sum of the market value of the underlying investments as determined by quoted market prices, less operating expenses accrued but not deducted, if any.

Mutual Funds – Valued at the closing price reported on the active market on which the individual securities are traded.

Limited Partnership – Valued at the reported amount in the audited financial statements, based on the fair value of the underlying investments held by the limited partnership. The limited partnerships were liquidated prior to December 31, 2016.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Master Trust's investments are reported at fair value as follows at December 31, 2016 and 2015:

		Master Trust Assets

		Level 1	Level 2	Level 3	Fair Value

(a) Certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in Note 4.

The following table summarizes investments for which fair value is measured using the net asset value per Share Practical Expedient as of December 31, 2016 and 2015, respectively.

December 31, 2016	Fair Value	Unfunded Commitments	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Pooled Separate Accounts **(b)**	$ 32,031,356	n/a	Daily	None

December 31, 2015	Fair Value	Unfunded Commitments	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Pooled Separate Accounts **(b)**	$ 33,900,247	n/a	Daily	None
Limited Partnership **(c)**	$ 3,448,268	n/a	See below	See below

(b) Pooled separate accounts are investments offered through Prudential that use NAV per share to determine fair value. The investments are direct filing entities, and therefore, it is not necessary to disclose their investment strategies herein.

(c) This investment is the "Alternative Investments Institutional, L.P., (the "LP") a Delaware limited partnership. The LP was organized for the purpose of investing in securities and private investment companies. The LP is managed by Alternative Investment Group, L.L.C. (the "General Partner") and Alternative Investment Group Services, L.P. (the "Management Company"). The LP invests substantially all of its assets through a master-feeder structure in Alternative Investments Institutional Master Fund Ltd. (the "Master Fund"), an investment company that has the same investment objectives as the LP. The LP is valued at the end of each calendar year. Redemption requirements call for 90 days' notice, and the LP will be redeemed at the end of that quarter. Ninety percent of the fund will be redeemed, and 10% will be held back until the next annual audit is complete.

The Plan Administrator assesses the reasonableness of the valuation of the limited partnership investment by reviewing the published financial statements of the limited partnership, and by reviewing industry and market conditions.

6. INFORMATION CERTIFIED BY CUSTODIANS

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Prudential Retirement Insurance and Annuity Company and Prudential Bank & Trust, FSB, the custodians of the Plan, have certified that the following data included in the accompanying financial statements is complete and accurate with respect to investments as of December 31, 2016 and 2015, and for the year ended December 31, 2016:

- Investment in Master Trust, at fair value
- Investment income from Master Trust

The Plan's independent public accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

7. TAX STATUS

The IRS has determined and informed the Company by a letter dated July 27, 2014, that the Plan is designed in accordance with applicable sections of the IRC. The Plan has been amended since the date of the determination letter, however, the Plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision has been made in the financial statements for income taxes.

Generally accepted accounting principles requires Plan management to evaluate tax positions taken by the plan and recognizes a tax liability (or asset) if the plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the applicable taxing authorities. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments held in the Master Trust are pooled separate accounts managed by Prudential. Prudential is the custodian of the Plan and therefore, these transactions qualify as party-in-interest.

9. SUBSEQUENT EVENT

Subsequent to year end, the custodian of the Master Trust's assets changed to US Bank.
