Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the Plan's net assets available for benefits as of March 31, 2017, and the changes therein for the year then ended, and its financial status as of April 1, 2016, and the changes therein for the year ended April 1, 2016, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

The financial statements of The Restated Noncontributory Retirement Plan for Cooperatives (Participating Employer – Cooperative Farmers Elevator, Group 302) as of and for the year ended March 31, 2016, were audited by other auditors whose report dated September 1, 2016, provided an unqualified opinion on those financial statements.

Report on Supplemental Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules are presented for the purpose of additional analysis and are not a required part of the financial statements but supplemental information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Notes to Financial Statements

As of and for the Years Ended March 31, 2017 and 2016

1. Description of the Plan

The following description of The Restated Noncontributory Retirement Plan for Cooperatives (Participating Employer – Cooperative Farmers Elevator, Group 302) ("Plan") is provided for general informational purposes only. Participants should refer to the Plan document for more complete information.

General – The Plan (inception date September 1, 2015) is a noncontributory defined benefit plan administered by Associated Benefits Corporation ("Plan Administrator") that covers substantially all full-time employees of Cooperative Farmers Elevator. Employees who work 1,000 hours or more per year are eligible on the first day of the first or the seventh month of the Plan year following the attainment of age 21 and 4 months of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Transfer of Assets Due to Merger – On March 31, 2016, participating employer, Cooperative Elevator Association, Group 026, in accordance with Plan adoption agreements, transferred its assets to the Plan. The net assets available for benefit of $11,298,491 were rolled into the Plan and were shown as transfer of assets due to merger in the Statement of Changes in Net Assets for the year ending March 31, 2016. As a result of the asset transfer at the end of the Plan year, no earnings were recognized by the Plan for the year ending March 31, 2016. Alternatively, in accordance with Plan adoption agreement, the actuarial present value of accumulated plan benefits of $8,721,971 rolled over to the Plan as of the inception date of September 1, 2015.

Pension Benefits – Participants can retire with their full pension on the first day of the month coincident with or immediately following the latter of their 65th birthday (normal retirement), attainment of age 62 with at least five years of service, or upon satisfying the Rule of 85 by reaching a combined total of age and years of service of 85 total years.

The monthly pension benefit under the Plan is equal to 1.1 percent of average monthly earnings, as defined, multiplied by years of credited service. The normal form is a pension payable for the participant's lifetime. However, an actuarially reduced joint and 50 percent survivorship basis with 120 guaranteed monthly payments is the automatic form for married participants unless both the participant and spouse elect another form.

Participants become vested in the employer contributions and earnings thereon at the rate of 20% after completion of two years of service and 20% for each year of service thereafter. Participants become fully vested after six years of service.

2. Summary of Significant Accounting Policies

Basis of Accounting – The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition – Investments are stated at fair value. Fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for description of valuation methods.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses – Administrative expenses consisting of Trustee fees, investment management fees, actuarial fees, and payments to the Pension Benefit Guarantee Corporation (PBGC) are paid from Plan assets. Other administrative expenses, including expenses of the Plan Administrator, are paid by the participating employer. Trustee fees and investment management fees are deducted from investment income or loss.

Payment of Benefits – Benefit payments to participants are recorded upon distribution.

3. Funding Policy

Contributions to provide benefits under the Plan are made solely by the participating employer. The participating employer's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The participating employer met the minimum funding requirements of ERISA for the years ended March 31, 2017 and 2016. For financial statement purposes, all employer contributions made to meet the minimum funding requirements of ERISA are considered attributable to the current plan year and are accrued in the financial statements if not paid by year end. For PBGC funding purposes, all employer contributions made to the Plan prior to the filing of the Form 5500 are considered attributable to the previous year.

4. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the employees' contributions, compensation, and services employees have rendered as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries and (2) present employees or their beneficiaries. Benefits payable as a result of retirement, death, disability or termination of employment are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by independent actuaries. The amount results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The more significant actuarial assumptions used in the valuations as of April 1, 2016 were as follows:

Interest Rate	4.75% - 7.5% per anum
Mortality	RP2014 separate annuitant/non-annuitant mortality tables projected with improvement based on Scale MP 2015
Turnover	Based on selected rates of turnover for the first four years of service and on termination rates from Table T-5 of the Actuary's Pension Handbook
Spouse's benefit	80% of employees are assumed married with male spouses 2 years older
Salaries	Will increase according to an age-related table ranging from 8.3% to 2.8%
Expenses	Investment related expenses and administration expenses will be paid from investment income in excess of assumed rates of return
Contingency fund charge	0.3726% of covered payroll

In addition, eligible employees will retire according to the following schedule – employees eligible for the special rule of 85 benefit are assumed to retire according to the select rates shown below for the first year after becoming eligible. The ultimate rates apply to rule of 85 retirements after the first year since becoming eligible and regular retirements. The first-year rates will not start before age 55 even if the rule of 85 applies earlier, nor will they ever fall below the ultimate rate for that age.

As determined on April 1, 2016, the rates of retirement assumed were as follows:

Age	First Year	Ultimate
55	6 %	3 %
56	6	3
57	6	3
58	6	3
59	6	3
60	6	3
61		10
62		30
63		25
64		25
65		40
66		25
67		25
68		25
69		25
70 and over		100

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that certain changes in these estimates and assumptions could be material to the financial statements.

The actuarial present value of accumulated Plan benefits, using the aggregate cost method, is determined as follows as of April 1, 2016:

Vested:	
Active Participants	$ 4,373,252
Beneficiaries and retirees	3,806,845
Other Participants (including participants active at other groups)	1,370,321
	9,550,418
Nonvested Active Participants	220,636
Total Actuarial Present Value of Accumulated Plan Benefits	$ 9,771,054

The changes in the actuarial present value of the Plan's accumulated benefits from April 1, 2015 to April 1, 2016 are as follows:

Acuarial Present Value of Accumulated Plan Benefits at Beginning of Year	$ --
Increase (Decrease) During the Year Attributable to:	
Increase from Plan Merger	8,721,971

5. Plan Termination

Although it has not expressed any intention to do so, the participating employer has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in order of priority determined in accordance with ERISA, applicable regulations there under and the Plan document.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at the time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

6. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). This hierarchy consists of three broad levels:

Level 1 – Quoted prices in active markets for identical financial instruments that are accessible at the measurement date.

Level 2 – Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active, and models and other valuation methodologies using inputs other than quoted prices that are observable.

Level 3 – Models and other valuation methodologies using significant inputs that are unobservable for financial instruments.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used as of March 31, 2017 and 2016.

Mutual Funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Common and Collective Trusts: Valued at the net asset value of the units of the trust.

Certain Investments in equity funds are valued based upon quoted prices from active markets. These investments in equity funds are categorized as Level 1.

Cash and money market funds held are primarily short-term money market commingled funds that are categorized as Level 2. They are valued at cost plus accrued interest, which approximates fair value.

Certain equity funds are valued at the net asset value of units of a bank collective trust. The net asset value (NAV) as provided by the trustee, is used as a practical expedient to estimate fair value. The net asset value is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported net asset value. Participant transactions (purchased and sales) may occur daily. Were the plan to initiate a full redemption of the collective trust, the investment advisor reserves the right to temporarily delay withdrawal from the trust in order to ensure the securities liquidations will be carried out in an orderly business manner. As the practical expedient is utilized, these certain equity funds are not included in the fair value leveling table, but are included as a reconciling line item to the Statements of Net Assets Available for Benefits.

In October of 2016, the assets of the Plan were transferred from a Master Trust, which previously held assets of all participant groups within the Restated Noncontributory Retirement Plan for Cooperatives in a combined Trust account. Beginning in October of 2016, the Plan's assets were transferred to a separate trust account containing assets held only for the benefit of Group 302, Cooperative Farmers Elevator. The following information is presented based on the movement of assets between master trust accounts and individual Plan accounts.

The following tables set forth, by level within the fair value hierarchy, a summary of the Plan's investments measured at fair value on a recurring basis at March 31, 2017 and 2016:

The valuation methods as described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Transfers Between Levels – The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluate the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. There were no transfers between levels for the years ended March 31, 2017 and 2016.

Net Asset Value (NAV) per Share – The Plan has disclosed the category, fair value, redemption frequency, and redemption notice period for those assets whose fair value is estimated using the net asset value per share as of March 31, 2017 and 2016. The following tables for March 31, 2017 and 2016 set forth a summary of the investments with a reported NAV:

	Plan Assets with Fair Value Estimated Using Net Asset Value per Share March 31, 2017				
Investment	Fair Value*	Unfunded Commitment	Redemption Frequency	Other Redemption Restrictions	Redemption Notice Period
Common and Collective Trusts	$ 8,089,461	$ --	Immediate	None	0-1 days

	Master Trust Assets with Fair Value Estimated Using Net Asset Value per Share March 31, 2016					
Investment		Fair Value*	Unfunded Commitment	Redemption Frequency	Other Redemption Restrictions	Redemption Notice Period
Equity Funds:						
Domestic Stock Funds	(a)	$ 289,172,350	$ --	Immediate	None	0-1 days
International Stock Funds	(b)	125,165,860	--	Immediate	None	0-2 days
Fixed Income Funds	(c)	211,250,308	--	Immediate - Weekly	None	0-2 days
Real Estate Stock Funds	(d)	27,391,632	--	Immediate	None	None
Total		$ 652,980,150	$ --			

*The fair values of the investments have been estimated using the net asset value of the investment.

(a) The domestic stock funds seek to provide long-term growth of capital by investing primarily in equity securities and to achieve above average results over a market cycle. The funds employ a "multi-style, multi-manager" approach whereby portions of the domestic stock funds are allocated to different money managers who employ distinct investment styles. The funds use three principal investment styles intended to complement one another:

Growth: Emphasizes investments in equity securities of companies with above-average earnings growth prospects.

Value: Emphasizes investments in equity securities of companies that appear to the money manager to be undervalued relative to their corporate worth, based on earnings, book or asset value, revenues, cash flow or other measures.

Market-Oriented: Emphasizes investments in companies from the broad equity market rather than focusing on the growth or value segments of the market.

(b) The international stock funds provide participation in financial markets outside of the United States. The international stock funds invest in international financial markets, primarily those of developed economies in Europe and Pacific Basin. These funds invest primarily in equity securities issued by foreign corporations, but may invest in other securities perceived as offering attractive investment return opportunities. As with the domestic equity funds, the international equity funds combine Growth, Value, and Market-Oriented Advisers to ensure style diversification.

(c) The fixed income funds strategies seek to invest at least 80% of their net assets plus any borrowing for investment purposes in a diversified portfolio of bonds, including corporate bonds of domestic and foreign issuers payable in U.S. dollars, short-term debt instruments, mortgage-related securities, and U.S. Treasury securities and other debt securities issued or guaranteed by the U.S. Government (including its agencies and instrumentalities). Although the strategies seek to invest primarily in investment-grade debt securities (i.e., those rated in the four highest rating categories by S&P or Moody's), they may include investing a portion of their net assets in bonds rated below investment grade.

(d) The real estate stock funds provide broad exposure to equity securities of real estate companies throughout the world, primarily real estate investment trusts (REITs) and other real estate operating companies whose value is derived from ownership, development and management of commercial properties. The real estate stock funds seek to provide current income and long-term capital growth with above-average consistency.

8. Investments and Interest in the Retirement Trust for Cooperatives

Until October 2016, Wells Fargo Bank, N.A. managed the Trust on behalf of the Plan under the terms of the trust agreement between the Wells Fargo Bank, N.A. and the Plan. The Plan was a participant in the Trust. The authority to invest is vested in the appointed money managers, subject to the funding policy and investment objectives established by the Plan Administrator. The investments and changes therein of the Trust had been reported to the Plan by Wells Fargo Bank, N.A. ("Trustee") as having been determined through the use of fair values. Since the Plans' funds were commingled with other plans participating in the Trust, the investments reported in these financial statements for the Plan year ending March 31, 2016, reflect only the Plan's allocable portion of the individual investments. Although assets of all plans were commingled in the Trust, the Plan Administrator maintained supporting records for the purpose of allocating the net investment income to the participating plans. The net investment income was allocated by the Plan Administrator to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

The following presents the Trust's net assets as of March 31, 2017 and 2016:

	2017	2016
Investments - At Fair Value:		
Equity Funds	$ --	714,516,755
Cash and Money Market Funds	--	7,374,447

Plan's Allocable Portion of The Retirement Trust for Cooperatives	$ --	11,298,491

During the years ended March 31, 2017 and 2016, the Master Trust's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value as follows:

	2017	2016
Interest and Dividend Income	$ 973,805	2,132,164
Net Appreciation (Depreciation) of Investments	38,163,948	(20,631,407)

Net Investment Gain (Loss)	$ 38,506,315	(20,701,903)
Plan's Allocable Portion of Net Investment Income of The Retirement Trust for Cooperatives	$ 599,335	--

9. Risks and Uncertainties

The Plan's investment in the Retirement Trust for Cooperatives (the "Trust") utilizes various investment securities including cash and money market funds, and equity funds. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with the certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

10. Federal Income Tax Status

The Plan obtained its determination letter on April 6, 2017, in which the Internal Revenue Service states that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

11. Exempt Party-In-Interest Transactions

Certain Trust investments are shares of mutual funds which are managed by Wells Fargo Bank, N.A. Wells Fargo Bank, N.A. is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Trust for the investment management services are included as a reduction of the return on each fund.

12. Subsequent Events

The Plan has evaluated events and transactions occurring after March 31, 2017. Effective May 1, 2017, through corporate acquisition, employees of Top Line Feeds & Supply, Inc. became employees of Cooperative Farmers Elevator and were immediately eligible to participate in The Restated Noncontributory Retirement Plan for Cooperatives. Vesting and credited service of former Top Line employees will be calculated from May 1, 2017 or date of hire, if later. Additionally, effective September 1, 2017, through corporate acquisition, employees of Sioux Fertilizer Inc., became employees of Cooperative Farmers Elevator and were immediately eligible to participate in The Restated Noncontributory Retirement Plan for Cooperatives. Vesting and credited service of former Sioux Fertilizer employees will be calculated from September 1, 2017 or hire date, if later. Subsequent events were evaluated through December 22, 2017, the date the financial statements were available to be issued.

Based on select rates of turnover for the first four years of service and ultimate rates thereafter. Turnover rates reflect findings from the analysis of plan experience for the 2007-2010 valuation years. Sample rates are shown below.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

	Rate of turnover				
	Completed years of service				
Age	0	1	2	3	4+
25	25.00%	25.00%	20.00%	15.00%	11.00%
30	25.00	25.00	20.00	15.00	11.00
35	20.00	20.00	15.00	15.00	8.66
40	20.00	20.00	15.00	15.00	7.31
45	16.00	16.00	12.00	8.00	6.00
50	16.00	16.00	12.00	8.00	4.75
55	12.00	12.00	10.00	8.00	4.00
60	12.00	12.00	10.00	8.00	4.00

Disability — None assumed.

Expected Return on Plan Assets — Varies based on which asset pool the plan sponsor is invested in on the valuation date.

- Pool A 7.50%
- Pool B 6.25%
- Pool C 4.75%

As of April 1, 2016, assets for groups 78 and 201 were in Pool B, and assets for all other groups in this valuation were in Pool A.

The expected rate of return on plan assets is based on a blend of hypothetical past performance of each pool's target asset mix and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's *Capital Markets Outlook* for each pool's target asset mix. This assumption is net of an adjustment of 25 basis points for investment expenses.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Salary increases

Salaries will increase according to an age-related table ranging from 8.25% down to 2.75% per annum. Illustrative future salary increase information is as follows:

Age	Salary increase
20	8.25%
25	7.50%
30	6.25%
35	5.50%
40	5.00%
45	4.25%
50	4.00%
55	3.75%
60	2.75%
65	2.75%

The salary increase assumption reflects findings from the analysis of plan experience for the 2007-2010 calendar years.

Incidence of retirement

No special retirement rates apply for Rule-of-85 retirements.

Age	Rate of Retirement
55	3%
56	3
57	3
58	3
59	3
60	3
61	10
62	30
63	25
64	25
65	40
66	25
67	25
68	25
69	25
70 & Over	100

For employees who become eligible to retire prior to age 55, turnover rates are used.

For frozen groups 177 and 201, same assumptions until eligible for unreduced retirement, but then 100% at unreduced retirement age.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Retirement rates reflect findings from the analysis of plan experience for the 2007-2010 valuation years.

Spouse's benefit — 80% of all employees are assumed married with husbands two years older than their wives.

Form of payment — 1/3 of participants are expected to commence benefits as a Life Only annuity, 1/3 as a 100% J&S annuity, and 1/3 as a 5-Year Certain annuity

Commencement for vested terminations — Age 62

Contingency fund charge — 0.3726% of covered payroll (0.3029% in prior valuation). Details of this calculation are provided in the Preliminary Results report dated June 2016.

Conversion basis — For the Contributory Plan, contribution accounts are converted to equivalent monthly benefits using segmented interest rates and the mortality table described above.

Interest earned by employee contributions

Year	Interest rate
2014	2.25%
2015	3.00%
2016	3.75%
2017	4.50%
2018	5.00%
2019 and later	5.50%

These rates are based on five-year bond yields implied from the IRS Funding Yield Curve for April 2014.

Inflation — The inflation assumption used to project the maximum salary limitation for future years is 2.2% (previously 3.0%). This assumption is based on the inflation assumption periodically published by Mercer Investment Consulting in their *Capital Markets Outlook* and historical averages.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Actuarial Methods

An actuarial valuation is only a snapshot of a plan's estimated financial condition at a particular point in time; it does not predict the plan's future financial condition or its ability to pay benefits in the future and does not provide any guarantee of future financial soundness of the plan. Over time, a plan's total cost will depend on a number of factors, including the amount of benefits the plan pays, the number of people paid benefits, the period of time over which benefits are paid, plan expenses and the amount earned on any assets invested to pay benefits. These amounts and other variables are uncertain and unknowable at the valuation date.

Because modeling all aspects of a situation is not possible or practical, we may use summary information, estimates, or simplifications of estimates to facilitate the modeling of future events in an efficient and cost-effective manner. We may also exclude factors or data that, if used, in our judgment, would not have significantly affected our results. Use of such simplifying techniques does not, in our judgment, affect the reasonableness of valuation results for the plan.

Valuations do not affect the ultimate cost of the plan, only the timing of when benefit costs are recognized. Cost recognition occurs over time. If the costs recognized over a period of years are lower or higher than necessary, for whatever reason, normal and expected practice is to adjust future cost levels to recognize the entire cost of the plan over time.

Asset Valuation Method

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

(a) **Participants included:** Associated Benefits Corporation provides us with data on only those employees who have completed the eligibility requirements so only participants are included in the valuation of the liabilities.
(b) **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
(c) **Insurance contracts:** The plan does not have any insurance contracts.
(d) **Transferred participants:** The liabilities for benefits earned prior to their transfer by employees who have transferred to another Associated Benefits Corporation employer

have been included with the liabilities for terminated vested participants at their former employer.

(e) **Nonvested terminated participants:** Benefits for return of employee contributions were estimated for four nonvested terminated participants. These participants are included in the data exhibits as vested terminations.

Actuarial Cost Method

Minimum Funding Method

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.
