Independent Auditor's Report

To the Administrative Committee of the
Hawaiian Telcom Management Pension Plan:

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Hawaiian Telcom Management Pension Plan (the Plan), which comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2015 and 2014, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 6, which was certified or provided by Northern Trust Company, the trustee of the Plan, except for comparing this information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds the Plan's assets and executes transactions. The Plan Administrator has obtained certifications from the trustee as of December 31, 2015 and 2014, and for the years then ended, that the information provided to the Plan Administrator by the trustee is complete and accurate.

1. Description of Plan

The Hawaiian Telcom Management Pension Plan (the "Plan") is a noncontributory cash balance plan covering management employees of Hawaiian Telcom Holdco, Inc. and subsidiaries (the "Company"). Participants with 10 years of net credited service as of January 1, 2002 are also eligible for a defined pension benefit. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The following brief description of the Plan is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

Effective April 1, 2007, the Plan was frozen whereby participants will continue to be eligible for benefits earned through that date but will not earn additional benefits.

Cash Balance – Regular Benefit
Under the cash balance formula, each participant has a hypothetical cash balance account in the Plan. Pay credits and interest credits were added to the cash balance formula on a monthly basis as long as a participant was an eligible employee. Interest credits continue to be credited every month until the benefit is paid to the participant.

Pay credits were a dollar amount determined as a percentage of eligible earnings based on total points. Points used for determining pay credits were the total of the employee's age and net credited service. The pay credits were determined each January 1 and remained the same for the entire year. The pay credit percentages were: fewer than 35 points (4%), 35 to 49 points (5%), 50 to 64 points (6%) and 65 or more points (7%).

Interest credits are added to the cash balance plan account on a monthly basis. The annual interest credit rate is the average annual yield of U.S. Treasury Securities with a constant maturity of one year, plus 1%.

Effective April 1, 2007, all participants are fully vested in the cash balance benefit. Participants are eligible to receive benefits upon leaving the Company. Benefits are generally payable immediately as a lump sum, immediately as a monthly annuity, or at a later date up to the participant's normal retirement age of 65.

Cash Balance – Death Benefit
If a participant dies before the commencement of benefits, the beneficiary will receive a death benefit in an amount equal to the cash balance.

Cash Balance – Disability Benefit
If a participant is disabled by an accident while working for the Company, they may be eligible to receive a benefit equal to 66-2/3% of the average final salary less any amount paid by workers' compensation.

Pension – Regular Benefit
Participating employees that had at least 10 years of credited service with Verizon Communications, Inc. ("Verizon"), the Company's predecessor owner, as of January 1, 2002 are eligible for the higher of the benefit under the cash balance formula and the pension benefit using the highest average pay formula. The highest average pay formula provides for the participant to receive the greater of the following as limited by the Plan freeze effective April 1, 2007.

- The benefit determined as: (1) 1.65% of average final pay, as defined, to December 31, 2007 multiplied by total service with the Company and Verizon to December 31, 2007 less the accrued normal retirement benefit from Verizon as of May 1, 2005, plus (2) 1.65% of average final pay at termination/retirement multiplied by the years of services with the Company beginning on January 1, 2008.

- The benefit determined as 1.65% average final pay at termination/retirement multiplied by service with the Company beginning May 2, 2005.

Participants are eligible to receive benefits upon leaving the Company. Benefits are generally payable immediately as a lump sum, immediately as a monthly annuity, or at a later date up to the participant's normal retirement age of 65. The single life annuity may be reduced if the benefit begins prior to the participant reaching age 60.

The Pension Protection Act of 2006 prohibits companies in certain circumstances from accelerating pension payments if the plan is not fully funded. Based on the funding level of the Plan, lump sum payments were limited to 50% of the participant's accrued benefit through September 30, 2014. Beginning October 1, 2014 through March 31, 2015, there was no restriction on the payment of lump sum distributions. Lump sum payments were limited again on April 1, 2015 through September 30, 2015. Effective October 1, 2015, there is no restriction on the payment of lump sum distributions.

Pension -- Death Benefit
If a participant dies before the commencement of benefits, the beneficiary will receive a death benefit. The death benefit is the greater of: (1) the cash balance or (2) the value of the 50% survivor benefit determined based on the highest average pay formula benefit.

Pension -- Disability Benefit
If a participant is disabled by an accident while working for the Company, they may be eligible to receive a benefit equal to 66-2/3% of the average final salary less any amount paid by workers' compensation.

Administrative Expenses
Administrative expenses of the Plan are paid by the Plan as provided in the Plan document.

2. Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Plan:

Basis of Accounting
The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties
The Plan utilizes various investment securities including U.S. government securities, corporate debt instruments, mutual funds, and corporate stocks. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Master Trust Arrangement

The assets of the Plan have been commingled with the assets of the Hawaiian Telcom Hourly Employees Pension Plan (collectively referred to as the "Plans") in the Hawaiian Telcom Master Retirement Trust (the "Master Trust") for investment and administrative purposes. The Plans do not own specific Master Trust assets but rather maintain an undivided beneficial interest in such assets. Each plan's interest in the Master Trust is credited or charged for contributions, transfers and distributions. Although assets of both plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. Investment income is allocated to the Plans based on each plan's beneficial interest in the net assets of the Master Trust.

Master Trust Investment Valuation and Income Recognition

The Plan's investment in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust. The underlying investments include common stocks, equity funds and fixed income funds which are generally valued based on quoted market prices. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the plan's gains and losses on investments bought and sold as well as held during the year.

Accumulated Plan Benefits

Accumulated plan benefits are those future benefit payments attributable under the Plan's provisions for service that employees have rendered as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died and (3) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits has been determined by an independent actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the benefit information date and the expected payment dates. The effect of Plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective.

The significant actuarial assumptions used in determining accumulated plan benefits as of December 31, 2015 and 2014 are as follows:

Investment return: 7.00 % at December 31, 2015 and 7.25% at December 31, 2014

Mortality: RP-2006 (with MP-2015 generational projection) at December 31, 2015 and RP-2014 (with MP-2014 generational projection) at December 31, 2014

Retirement: The rates at which participants retire range by age and years of service from a probability at age 30 at 0.0160 to age 70 at 1.0000.

The actuarial assumption as to the percentage of retirees selecting lump-sum benefits at retirement is 95%.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payment of Benefits
Benefit payments to participants are recorded upon distribution.

Subsequent Events
The Plan evaluated and gave recognition, if appropriate, to subsequent events which occurred after the financial statement date of December 31, 2015 through October 5, 2016, the date on which the financial statements were available to be issued.

3. Funding Policy

The Company's funding policy is to contribute funds to the trust for the Plan as necessary to provide for current service and for any unfunded projected benefit obligation over a reasonable period of time. To the extent that these requirements are covered by assets in the trust, the Company may elect not to make any contribution in a particular year. Company contributions to the Plan amounted to $434,865 and $1,230,738 for the years ended December 31, 2015 and 2014, respectively. The Plan met the minimum funding requirements of ERISA as of December 31, 2015 and 2014.

4. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and terminate the Plan subject to the provisions set forth in ERISA.

Benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC"). In the event that the Plan terminates, the net assets of the Plan shall be allocated among the participants and beneficiaries in accordance with the priorities mandated by ERISA. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

5. Master Trust Financial Information

At December 31, 2015 and 2014, the Plan's interest in the net assets of the Master Trust was approximately 6% and 5%, respectively. The investments in the Master Trust as of December 31, 2015 and 2014 were as follows.

Plan's interest in the net investment income from the Master Trust	$ 57,321	$ 731,963

Fair Value Measurements

In accordance with accounting standards for fair value measurements, the Plan classifies its investments into Level 1, which refers to securities valued using quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. There were no Level 3 investments as of December 31, 2015 and 2014. The following table sets forth by level within the fair value hierarchy a summary of the Master Trust's investments measured at fair value on a recurring basis.

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Total

6. Information Certified by the Plan's Trustee (Unaudited)

The Plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting under ERISA. Accordingly, as permitted under such election, the Plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information as of December 31, 2015 and 2014 and for the years ended December 31, 2015 and 2014, certified by Northern Trust Company as complete and accurate.

	2015	2014
Plan interest in Master Trust (and related Master Trust investment portfolio)	$ 9,146,352	$ 9,411,350
Interest in Master Trust net investment income (and related Master Trust investment activity)	$ 57,321	$ 731,963
Note 5 -- all investment balances and investment information excluding the classification of investments by level		

7. Federal Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated May 10, 2013 stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the "Code") and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax-exempt.

Management is required to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2015, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Benefit commencement date:

- Preretirement death benefit — The date of death of the active participant
- Deferred vested benefit — The later of age 55 or termination of employment
- Retirement benefit — Upon termination of employment

Form of payment — Calculation of Lump Sum: 95% of participants are assumed to elect a lump sum form of payment under the plan when eligible. Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.

Annuities were calculated from the cash balance accounts using the required methodology in IRS Regulation 1.430(d)-1(f)(5).

Percent married — 90% of males; 50% of females. Used to value pre-retirement surviving spouse benefits.

Spouse age — Wife three years younger than husband.

At-risk assumptions — For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the lump sum form of payment.

Timing of benefit payments — Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

SCHEDULE SB ATTACHMENTS

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Hawaiian Telcom and, based on that review, is not aware of any significant benefits required to be valued that were not. The plan pays small benefits (with a present value up to $1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

SCHEDULE SB ATTACHMENTS

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The interest crediting rate under the plan for a given month is the greater of (a) 1% plus the average annual yield on U.S. Treasury debt securities with a constant maturity of one year for the second month preceding the first day of the calendar quarter in which the given month occurs or (b) the "applicable interest rate" within the meaning of section 417(e)(3)(A)(ii)(II) of the Code for the second month preceding the first day of the calendar quarter in which the given month occurs. We have set the assumed interest credit rate to be the discount rate used for accounting less 2.00%; however, the result of this process is reviewed each year for reasonableness given current and expected future conditions.
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC 430, annuity benefits are valued by converting accounts to annuities using the current IRC 430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.

SCHEDULE SB ATTACHMENTS

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC 430. The assumed plan-related expenses added to the target normal cost were changed from $140,000 for the prior valuation to $157,000 for the current valuation to account for higher expected expenses to be paid from the trust.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Enrolled Actuary	Leonard Smothermon
Enrollment Number	14-04893

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Benefit commencement date:

- Preretirement death benefit — The date of death of the active participant
- Deferred vested benefit — The later of age 55 or termination of employment
- Retirement benefit — Upon termination of employment

Form of payment — Calculation of Lump Sum: 95% of participants are assumed to elect a lump sum form of payment under the plan when eligible. Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.

Annuities were calculated from the cash balance accounts using the required methodology in IRS Regulation 1.430(d)-1(f)(5).

Percent married — 90% of males; 50% of females. Used to value pre-retirement surviving spouse benefits.

Spouse age — Wife three years younger than husband.

At-risk assumptions — For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the lump sum form of payment.

Timing of benefit payments — Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

SCHEDULE SB ATTACHMENTS

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Hawaiian Telcom and, based on that review, is not aware of any significant benefits required to be valued that were not. The plan pays small benefits (with a present value up to $1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

SCHEDULE SB ATTACHMENTS

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The interest crediting rate under the plan for a given month is the greater of (a) 1% plus the average annual yield on U.S. Treasury debt securities with a constant maturity of one year for the second month preceding the first day of the calendar quarter in which the given month occurs or (b) the "applicable interest rate" within the meaning of section 417(e)(3)(A)(ii)(II) of the Code for the second month preceding the first day of the calendar quarter in which the given month occurs. We have set the assumed interest credit rate to be the discount rate used for accounting less 2.00%; however, the result of this process is reviewed each year for reasonableness given current and expected future conditions.
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC 430, annuity benefits are valued by converting accounts to annuities using the current IRC 430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.

SCHEDULE SB ATTACHMENTS

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC 430. The assumed plan-related expenses added to the target normal cost were changed from $140,000 for the prior valuation to $157,000 for the current valuation to account for higher expected expenses to be paid from the trust.

Hawaiian Telcom

Plan

Hawaiian Telcom Management Pension Plan

Effective Date and Most Recent Amendment

The plan was originally effective May 2, 2005. The last amendment reflected herein is effective January 19, 2009.

Plan Year

The twelve-month period ending December 31.

Coverage and Participation

Employed in a non-union salaried position other than an individual employed in a division or unit designated by the company to be a nonparticipating division or unit. Due to the plan freeze effective March 31, 2007, no new employees are eligible to participate after that date.

Credited Service

Used for eligibility and vesting purposes. Elapsed time method from May 2, 2005 to date of separation, excluding any period of severance exceeding 12 months. If employee transferred directly from Verizon Hawaii, then service earned under Verizon Management Plan as of May 1, 2005 included for vesting purposes.

Final Average Compensation/Salary

Average monthly compensation of the highest 60 consecutive months or the five highest consecutive calendar years out of the last ten years of service. Due to the plan freeze effective March 31, 2007, the Final Average Earnings is frozen as of March 31, 2007.

SCHEDULE SB ATTACHMENTS

Normal Retirement Benefit

Normal Retirement Date: Later of age 65 and 5 years of vesting service.

Benefit Formula: Less than 10 years of service at January 1, 2002 (when at Verizon):
Cash Balance Formula.

10 years or more of service at January 1, 2002 (when at Verizon):
Greater of:
Cash Balance Formula or the Pension Formula

Pension Formula: Greater of:

- 1.65% of Final Average Earnings to March 31, 2007 multiplied by total Credited Service (with Verizon and Hawaiian Telcom) to March 31, 2007 less the accrued benefit at Verizon.
- 1.65% of Final Average Earnings at retirement multiplied by Credited Service with Hawaiian Telcom starting as of May 2, 2005 and ending as of March 31, 2007, and using pay which includes pay while a Verizon employee.

Cash Balance Formula: Pay Credits plus Interest Credits as follows:

Pay Credit

Points = Age plus service	Pay Credit Percentage
Less than 35	4%
At least 35, but no more than 49	5%
At least 50, but no more than 64	6%
65 or more	7%

Points for any given month will be the sum of Participant's age in years and completed months and Participant's net credited service as of January 1 in such a year. Pay Credit Percentage is multiplied by monthly Compensation.

Interest Credit

Interest Credit is determined based on interest credit percentage for the month times the account balance of the Participant's cash balance account at the end of the prior month. Interest credit percentage is determined as 1/12 of the average annual yield on Treasury debt securities with a constant maturity of one year for the second month of the previous calendar quarter. 1/12 of one percentage point will be added to the interest credit rate, with the total limited to 1/12 of the average annual yield on 30-year Treasury bonds.

The plan was frozen effective March 31, 2007 so no pay credits are applied after

that date. Interest credits will continue to apply until benefits commence or the cash balance account is distributed.

Normal Form of Benefit: If not married: Life Annuity
If married: 50% Joint and Survivor Annuity actuarially equivalent to the Life Annuity.

Late Retirement

The greater of the accrued benefit calculated at termination and the accrued benefit determined as if the participant had terminated at Normal Retirement then actuarially increased to date of commencement.

Early Retirement Benefit

Eligibility: 15 years of Credited Service or retirement on or after age 60.

Benefit: Pension Formula:

- Unreduced at age 55 and 25 years of service or age 60
- Reduced 3% per year from age 60 if age 55 and 15 years of service, otherwise reduced 5% from age 60 to 46, then reduced actuarially from age 46.

Cash Balance Formula:
Account as of payment date

Death Benefits for Participants in Active Service

Eligibility: Death of vested Participant before commencing retirement benefit.

Benefit: Cash Balance Account or if eligible, “Pension” formula. If Participant was eligible for “Pension” formula, the benefits are compared. If “Pension” formula is greater, the 50% Joint and Survivor benefit would be payable to the spouse as if the Participant had terminated employment on the date of death, elected a 50% Joint and Survivor annuity and died on the same day. Early Retirement reductions apply to the benefit only if Participant dies after termination of employment.

Optional Forms of Retirement Income in Lieu of Normal Form

Single life benefit
Joint and Survivor Annuity (50%, 66-2/3%, 75%, 100%)
Period Certain and Life Annuity (5-Year or 10-Year)
Lump sum benefit

Plan

Hawaiian Telcom Management Pension Plan

Effective Date and Most Recent Amendment

The plan was originally effective May 2, 2005. The last amendment reflected herein is effective January 19, 2009.

Plan Year

The twelve-month period ending December 31.

Coverage and Participation

Employed in a non-union salaried position other than an individual employed in a division or unit designated by the company to be a nonparticipating division or unit. Due to the plan freeze effective March 31, 2007, no new employees are eligible to participate after that date.

Credited Service

Used for eligibility and vesting purposes. Elapsed time method from May 2, 2005 to date of separation, excluding any period of severance exceeding 12 months. If employee transferred directly from Verizon Hawaii, then service earned under Verizon Management Plan as of May 1, 2005 included for vesting purposes.

Final Average Compensation/Salary

Average monthly compensation of the highest 60 consecutive months or the five highest consecutive calendar years out of the last ten years of service. Due to the plan freeze effective March 31, 2007, the Final Average Earnings is frozen as of March 31, 2007.

Normal Retirement Benefit

Normal Retirement Date: Later of age 65 and 5 years of vesting service.

Benefit Formula: Less than 10 years of service at January 1, 2002 (when at Verizon):
Cash Balance Formula.

10 years or more of service at January 1, 2002 (when at Verizon):
Greater of:
Cash Balance Formula or the Pension Formula

Pension Formula: Greater of:

- 1.65% of Final Average Earnings to March 31, 2007 multiplied by total Credited Service (with Verizon and Hawaiian Telcom) to March 31, 2007 less the accrued benefit at Verizon.
- 1.65% of Final Average Earnings at retirement multiplied by Credited Service with Hawaiian Telcom starting as of May 2, 2005 and ending as of March 31, 2007, and using pay which includes pay while a Verizon employee.

Cash Balance Formula: Pay Credits plus Interest Credits as follows:

Pay Credit

Points = Age plus service	Pay Credit Percentage
Less than 35	4%
At least 35, but no more than 49	5%
At least 50, but no more than 64	6%
65 or more	7%

Points for any given month will be the sum of Participant's age in years and completed months and Participant's net credited service as of January 1 in such a year. Pay Credit Percentage is multiplied by monthly Compensation.

Interest Credit

Interest Credit is determined based on interest credit percentage for the month times the account balance of the Participant's cash balance account at the end of the prior month. Interest credit percentage is determined as 1/12 of the average annual yield on Treasury debt securities with a constant maturity of one year for the second month of the previous calendar quarter. 1/12 of one percentage point will be added to the interest credit rate, with the total limited to 1/12 of the average annual yield on 30-year Treasury bonds.

The plan was frozen effective March 31, 2007 so no pay credits are applied after

that date. Interest credits will continue to apply until benefits commence or the cash balance account is distributed.

Normal Form of Benefit: If not married: Life Annuity
If married: 50% Joint and Survivor Annuity actuarially equivalent to the Life Annuity.

Late Retirement

The greater of the accrued benefit calculated at termination and the accrued benefit determined as if the participant had terminated at Normal Retirement then actuarially increased to date of commencement.

Early Retirement Benefit

Eligibility: 15 years of Credited Service or retirement on or after age 60.

Benefit: Pension Formula:

- Unreduced at age 55 and 25 years of service or age 60
- Reduced 3% per year from age 60 if age 55 and 15 years of service, otherwise reduced 5% from age 60 to 46, then reduced actuarially from age 46.

Cash Balance Formula:
Account as of payment date

Death Benefits for Participants in Active Service

Eligibility: Death of vested Participant before commencing retirement benefit.

Benefit: Cash Balance Account or if eligible, “Pension” formula. If Participant was eligible for “Pension” formula, the benefits are compared. If “Pension” formula is greater, the 50% Joint and Survivor benefit would be payable to the spouse as if the Participant had terminated employment on the date of death, elected a 50% Joint and Survivor annuity and died on the same day. Early Retirement reductions apply to the benefit only if Participant dies after termination of employment.

Optional Forms of Retirement Income in Lieu of Normal Form

Single life benefit
Joint and Survivor Annuity (50%, 66-2/3%, 75%, 100%)
Period Certain and Life Annuity (5-Year or 10-Year)
Lump sum benefit
