Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2015 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Xtek, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation	■ The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. ■ The required interest rates used to calculate the funding target and target normal cost were updated. ■ The stock value for the ESOP was updated to reflect the most recent valuation.

Our actuarial valuation assumes a going concern, and the results of our valuation are heavily dependent on this assumption. No provision has been made for the increase in pension liabilities that would occur as a result of other contingencies such as a loss of value in the ESOP stock.

Other Plan Provisions

Forms of payment	Preretirement spouse benefits are payable only as described above. Monthly pension benefits are paid in the form of a life annuity with 5 years certain if the participant has no spouse as of the date payments begin, or if the participant so elects. Optional forms are a one-time lump sum payment (on or after December 1, 2015), straight life annuity, a 50%, 66-2/3%, 75% or a 100% joint and survivor annuity, a 10-year, 15-year, or 20-year certain and life annuity, a level income annuity, or (for married participants) a 5-year certain and life annuity. Actuarial equivalence is based on 6.5% interest and the 1971 Group Annuity Mortality Table for Males, set back 3 years, for all but 417(e) forms of payment. 417(e) forms of payment are based on the 417(e) rate for June proceeding distribution and 417(e) mortality.
Pension Increases	None
Plan participants' contributions	None
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension cost or in determining minimum and maximum contributions

Changes in Benefits Valued Since Prior Year

A lump sum form of payment is available for participants commencing their benefit on or after December 1, 2015.

1. PLAN DESCRIPTION:

The following is a brief description of the Xtek, Inc., Defined Benefit Pension Plan (the "Plan"). Participants should refer to the Plan agreement for a complete description of the Plan's provisions.

The Plan is a defined benefit pension plan covering substantially all full-time employees of Xtek, Inc. (the "Company") who were hired before January 1, 2004. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Pension benefits

Employees are entitled to annual pension benefits beginning at their normal retirement age of 65. The Plan permits early retirement at age 55 with at least 10 years of service. The early retirement benefit is the actuarial equivalent of the accrued pension benefit as of the retirement date. Participants may also elect a lump sum payment option of the full present value of the participant's accrued benefit in lieu of any other retirement benefit payable. Benefits are paid by the trustee from the Plan's net assets based on actuarially determined benefit amounts.

Vesting

Participants become 100% vested after five years of service with the Company.

Death and disability benefits

The Plan provides death benefits to vested employees and disability benefits to employees who become disabled while an active participant under the Plan.

Floor offset provision

On June 20, 1986, the Xtek, Inc. Employee Stock Ownership Plan ("ESOP") acquired substantially all of the Company's common stock. Effective August 1, 1986, the Company instituted a floor offset provision in the Plan, whereby benefits payable to Plan participants are offset by benefits provided by the ESOP.

Plan termination

The Company intends to continue the Plan indefinitely for the benefit of the participants but reserves the right to terminate the Plan at any time by resolution of its Board of Directors. In the event the Plan is terminated, participants become fully vested, and Plan assets are distributed to participants in accordance with the Plan agreement. However, in the event of Plan termination, to the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation up to specified limits.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The following is a brief description of the significant accounting policies of the Plan.

Basis of accounting

The financial statements of the Plan have been prepared on the accrual basis.

Use of estimates

The Plan's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which require management to make estimates and assumptions that

affect the reported amounts of assets and liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Investment valuation and income

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/(depreciation) includes the plan's gains and losses on investments bought and sold as well as held during the year.

Funding policy

The Company is required to make all contributions to the Plan. These contributions are made based upon actuarially determined amounts as calculated by an independent actuary and are estimated to fully provide for all employees' benefits under the Plan by the time the employees retire. The Company's contributions for the year ended June 30, 2017 and June 30, 2016 met the minimum funding requirements of ERISA.

Administrative expenses

Certain expenses of maintaining the Plan are paid directly by the Company and such expenses are excluded from these financial statements. If the Company does not pay such expenses, the trustee shall pay them from the Plan assets.

Payment of benefits

Benefit payments are recorded when paid to participants.

Subsequent events

The Plan has evaluated subsequent events through the report date, the date the financial statements were available to be issued.

3. ACTUARIAL CONSIDERATIONS AND ACCUMULATED PLAN BENEFITS:

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The significant actuarial assumptions used in the valuation as of June 30, 2016 were (a) life expectancy of participants – RP 2014 mortality tables for employees and annuitants (sex-distinct, base year 2006) with generational

projection using scale MP-2015. (b) interest rate of 7.25%, and (c) investment return of 7.25%. The computations of the actuarial present value of accumulated plan benefits were made as of July 1, 2016. Had the valuation been performed as of June 30, there would be no material differences. Benefits to be provided by the Plan via the floor-offset provision, described in Note 1, are relied on in determining the accumulated plan benefits due from the Plan. A summary of information relative to the actuarial present value of accumulated plan benefits as of July 1, 2016 is presented as follows:

Vested benefits:	<u>July 1, 2016</u>
Participants currently receiving benefits	\$ 3,816,565
Other vested benefits	<u>216,686</u>
Total vested benefits	4,033,251
Nonvested benefit	<u>489</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 4,033,740</u>

Changes in the actuarial present value of accumulated plan benefits for the year ended July 1, 2016 are summarized below:

Actuarial present value of accumulated plan benefits, beginning of year, July 1, 2015	\$ 4,121,726
Increase (decrease) attributable to:	
Increase for interest due to the decrease in the discount period	282,752
Benefits accumulated	5,249
Benefits paid	(461,976)
Actuarial (gains)/losses	85,989
Assumption changes	<u>-</u>
Actuarial present value of accumulated plan benefits, end of year, July 1, 2016	<u>\$ 4,033,740</u>

4. FAIR VALUE MEASUREMENTS:

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below.

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at June 30, 2017 and 2016.

Mutual funds: Valued at the quoted daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Money market funds: The carrying value approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of June 30, 2017 and 2016.

<u>Investments at fair value as of June 30, 2017</u>				
	<u>Fair Value</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Money market funds	\$ 110,124	110,124	-	-

<u>Investments at fair value as of June 30, 2016</u>				
	<u>Fair Value</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>

Mutual funds	<u>3,399,355</u>	<u>3,399,355</u>	-	-
Total investments at fair value	<u>\$ 3,509,355</u>	<u>3,509,355</u>	-	-

5. INFORMATION CERTIFIED BY THE TRUSTEE:

All investments, investment income and the net appreciation/(depreciation) in fair value of investments included in the accompanying financial statements and supplemental schedules were obtained from data that was prepared and certified as complete and accurate by the trustee, BMO Harris Bank N.A.

6. RISKS AND UNCERTAINTIES:

Investment securities are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements and supplemental schedules.

7. RELATED PARTY TRANSACTIONS:

Certain plan investments are shares of a money market fund managed by BMO Harris Bank N.A., the trustee of the Plan. Therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for the trustee services amounted to \$8,338 and \$9,300 at June 30, 2017 and 2016, respectively.

8. TAX STATUS OF THE PLAN:

The Plan obtained its latest determination letter dated October 26, 2015, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter. However, the Company believes that the Plan designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Description of Weighted Average Retirement Age
as of January 1, 2016

For each participant, an expected retirement age was calculated, weighted in proportion to the probability that the individual would remain an active participant to each age and then retire at that age.

The weighted average retirement age of 62 is calculated as follows:

Participant Age (A)	Probability Remaining at BOY (B)	Retirement Probability (C)	Expected Retirement Age (A) X (B) X (C)
55	100%	2%	1.1000
56	98%	2%	1.0976
57	96%	2%	1.0949
58	94%	2%	1.0918
59	92%	2%	1.0884
60	90%	10%	5.4235
61	81%	10%	4.9625

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2015 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Xtek, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation	■ The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. ■ The required interest rates used to calculate the funding target and target normal cost were updated. ■ The stock value for the ESOP was updated to reflect the most recent valuation.

Other Plan Provisions

Forms of payment	Preretirement spouse benefits are payable only as described above. Monthly pension benefits are paid in the form of a life annuity with 5 years certain if the participant has no spouse as of the date payments begin, or if the participant so elects. Optional forms are a one-time lump sum payment (on or after December 1, 2015), straight life annuity, a 50%, 66-2/3%, 75% or a 100% joint and survivor annuity, a 10-year, 15-year, or 20-year certain and life annuity, a level income annuity, or (for married participants) a 5-year certain and life annuity. Actuarial equivalence is based on 6.5% interest and the 1971 Group Annuity Mortality Table for Males, set back 3 years, for all but 417(e) forms of payment. 417(e) forms of payment are based on the 417(e) rate for June proceeding distribution and 417(e) mortality.
Pension Increases	None
Plan participants' contributions	None
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension cost or in determining minimum and maximum contributions

Changes in Benefits Valued Since Prior Year
