Notes to Financial Statements

June 30, 2017 and 2016

(1) Description of Plan

The following description of the Anaren Microwave, Inc. Pension Plan (Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

(a) General

The Plan is a noncontributory defined benefit pension plan covering eligible employees of Anaren Microwave, Inc. (Sponsor). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA) and is covered by the Pension Benefit Guaranty Corporation (PBGC).

(b) Eligibility

Full-time employees and part-time employees hired prior to August 15, 2000 who are at least 21 years of age with 1,000 hours of service per year are eligible to participate in the Plan. Employees hired after August 15, 2000 are not eligible to participate in the Plan. Current participants continue to accrue benefits under the Plan.

(c) Funding Policy

The Plan's funding policies for the Sponsor to contribute annually at a rate that is intended to fund the normal cost plus an amortization amount. The minimum funding requirements of ERISA have been met for both 2017 and 2016.

Although it has not expressed any intention to do so, the Sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

(d) Pension Benefits

Under the terms of the Plan, participants are eligible for a single lump sum payment or monthly benefit payments upon reaching age 65 (normal retirement) or at age 55 with a minimum of twelve years of service. Normal retirement benefits are equal to 0.60% of the average of the highest five consecutive years compensation from date of employment to June 30, 1992, times the years of service through June 30, 1992, plus 0.75% of compensation for each year of service thereafter, subject to certain limitations.

(1) Description of Plan, Continued

(e) Death Benefits

If death occurs after a participant is vested, 50% of the participant's accrued benefit is payable to the surviving spouse, at the participant's earliest retirement date applicable, reduced for early retirement and joint and survivor option.

(f) Vesting

Vesting is based on years of credited service. A participant becomes 20% vested after 3 years of service with an additional 20% for each subsequent year to 100% vested after 7 years.

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting

The financial statements are prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(c) Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's management determines the Plan's valuation policies utilizing information provided by the trustee. See note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

(2) Summary of Significant Accounting Policies, Continued

(d) Payment of Benefits

Benefit payments to participants are recorded upon distribution.

(e) Administrative Expenses

The Plan agreement states that the administrative expenses, unless paid by the Sponsor, will be paid out of the assets of the Plan. Actuarial and accounting fees are paid by the Sponsor; all investment fee expenses in 2017 and 2016 were paid out of the assets of the Plan.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary, and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were (a) assumed retirement age of 65 (including assumptions for early retirement); (b) a 7.5% rate of return in 2016 and 2015; (c) assumed mortality rate based on the sex-distinct RP-2014 Mortality Tables for employees and healthy annuitants adjusted to 2006, with mortality improvements projected using Scale MP-2016 and Scale MP-2015 on a fully generational basis for 2016 and 2015, respectively; (d) compensation rate increases of 3.5% in 2016 and 2015, and (e) actual administrative expenses paid, rounded to the nearest five-thousand dollars. The computations of the actuarial present value of accumulated Plan benefits were made as of July 1, 2016 and 2015. Had the valuations been performed as of June 30, there would be no material differences.

(3) Actuarial Present Value of Accumulated Plan Benefits, Continued

The actuarial present value of accumulated plan benefits of the Plan at July 1 is as follows:

	<u>2016</u>	<u>2015</u>
Vested benefits:		
Participants currently receiving benefits	\$ 7,150,139	\$ 7,146,127
Other vested participants	<u>9,212,427</u>	<u>8,665,214</u>
Total vested benefits and actuarial present value of accumulated plan benefits	<u>\$ 16,362,566</u>	<u>\$ 15,811,341</u>

Changes in the actuarial present value of accumulated plan benefits for the years ended July 1 are as follows:

	<u>2016</u>	<u>2015</u>
Actuarial present value of accumulated Plan benefits at beginning of year	\$ <u>15,811,341</u>	\$ <u>14,888,436</u>
Increase (decrease) during the year attributable to:		
Interest due to the decrease in discount period	1,155,660	1,087,821
Changes in actuarial assumptions	(189,628)	199,892
Benefits accumulated and actuarial gains and losses	390,269	403,498
Benefits paid	<u>(805,076)</u>	<u>(768,306)</u>
Net increase	<u>551,225</u>	<u>922,905</u>
Actuarial present value of accumulated Plan benefits at end of year	<u>\$ 16,362,566</u>	<u>\$ 15,811,341</u>

The changes in actuarial assumptions primarily relate to changes in the mortality tables used in 2016 and 2015.

(4) Information Certified by the Plan's Trustee

The Plan administrator has elected the method of annual reporting permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator has obtained certifications from Manufacturers and Traders Trust Company, the trustee of the Plan, that all of the information provided by them is complete and accurate. Information included in the accompanying financial statements as to investments, accrued interest receivable, interest and dividend income, net appreciation in fair value of investments, and all information in the supplemental schedules, is presented in reliance solely upon those certifications.

(4) Information Certified by the Plan's Trustee, Continued

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

(5) Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Notes to Financial Statements

(5) Fair Value Measurements, Continued

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at June 30, 2017 and 2016.

Exchange-traded and money market funds: Valued at the daily closing price as reported by the fund. The funds held by the Plan are closed-end funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The funds held by the Plan are deemed to be actively traded.

U.S. government and agency obligations: Valued using pricing models maximizing the use of observable inputs for similar securities.

Corporate bonds: Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flow approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of June 30:

	2017			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Exchange-traded and money market funds	\$ 12,052,172	\$ -	\$ -	\$ 12,052,172
U.S. government and agency obligations	-	3,304,678	-	3,304,678
Corporate bonds	-	2,814,838	-	2,814,838
	<u>\$ 12,052,172</u>	<u>\$ 6,119,516</u>	<u>\$ -</u>	<u>\$ 18,171,688</u>

(5) Fair Value Measurements, Continued

	2016			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Exchange-traded and money market funds	\$ 11,898,745	\$ -	\$ -	\$ 11,898,745
U.S. government and agency obligations	-	2,513,317	-	2,513,317
Corporate bonds	-	2,893,296	-	2,893,296
	<u>\$ 11,898,745</u>	<u>\$ 5,406,613</u>	<u>\$ -</u>	<u>\$ 17,305,358</u>

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. For the years ended June 30, 2017 and 2016, there were no transfers in or out of levels 1, 2 or 3.

(6) Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
- (b) Other vested benefits insured by the PBGC (a U.S. government agency) up to the applicable limitations.
- (c) All other vested benefits (that is vested benefits not insured by the PBGC).
- (d) All nonvested benefits.

ANAREN MICROWAVE, INC.
PENSION PLAN

Notes to Financial Statements

(6) Plan Termination, Continued

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

(7) Tax Status

The Plan obtained its latest determination letter on August 8, 2008, in which the Internal Revenue Service (IRS) states that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

(8) Risks and Uncertainties

The Plan invests in various types of investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

ANAREN MICROWAVE, INC.
PENSION PLAN

Notes to Financial Statements

(8) Risks and Uncertainties, Continued

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(9) Party-In-Interest

Certain Plan investments are managed by Manufacturers and Traders Trust Company (M&T). M&T is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions under ERISA. Fees charged to the Plan for investment management services amounted to \$79,281 and \$75,969 in 2017 and 2016, respectively.

(10) Subsequent Events

Anaren, Inc., the parent company of the Sponsor expects to be acquired by TTM Technologies, Inc. in April 2018.

Subsequent events have been evaluated through April 12, 2018, which is the date the financial statements were available to be issued.

ACTUARIAL ASSUMPTIONS AND METHODS

The valuation of a defined benefit pension plan involves estimates and assumptions about the probability of events occurring far into the future. Examples include assumptions about future employment, mortality, and retirement. Below is a description of the actuarial assumptions used in the valuation.

Funding Target Liability

Valuation Date: July 1, 2016

Demographic Information: The demographic information was provided as of July 1, 2016 by Anaren, Inc. Although we did not audit the data, we did review the data for reasonableness.

Actuarial Cost Method: As required by PPA, the Traditional Unit Credit Cost Method was used.

Anticipated Rate of Return on Plan Assets: 7.50%, based on a review of the Plan's asset allocation and expert opinions regarding the expected future returns of asset classes.

Interest Rates used to determine Minimum Required Contribution: The July 2016 funding segment rates were utilized as prescribed by IRC Section 430(h) and elected by Anaren, Inc. Below, please find the segment rates after reflection of the segment rate stabilization provisions of IRC Section 430(h)(2)(C)(iv).

Segment	Interest Rate
Segment 1	4.43%
Segment 2	5.91%
Segment 3	6.65%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Effective Interest Rate: 6.10%

Interest Rates used to determine Maximum Recommended Contribution: The July 2016 funding segment rates were utilized as prescribed by IRC Section 430(h) and elected by Anaren, Inc.

Segment	Interest Rate
Segment 1	1.51%
Segment 2	3.86%
Segment 3	4.86%

Effective Interest Rate: 4.18%

Rate of Compensation Increase: Salaries are assumed to increase at 3.50% per year, based on the Corporation's expectation of future salary increases.

ACTUARIAL ASSUMPTIONS AND METHODS

Mortality:

Prior to July 1, 2016:

The RP-2000 Mortality Tables for annuitants and non-annuitants with projected mortality improvements using Scale AA; specifically as outlined in IRC Regulation 1.430(h)(3)-1 for 2015 valuations. The static mortality tables are projected from the base table for the year 2000 through 2015 with further projection to reflect the approximate expected duration of liabilities, namely 7 years for annuitants and 15 years for non-annuitants.

As of July 1, 2016:

The RP-2000 Mortality Tables for annuitants and non-annuitants with projected mortality improvements using Scale AA; specifically as outlined in IRC Regulation 1.430(h)(3)-1 for 2016 valuations. The static mortality tables are projected from the base table for the year 2000 through 2016 with further projection to reflect the approximate expected duration of liabilities, namely 7 years for annuitants and 15 years for non-annuitants.

Retirement Incidence

Rates of retirement are assumed between ages 60 – 70 and were determined based on the June 2015 experience study using valuation data from July 1, 2009 through July 1, 2014. Future experience is not expected to deviate significantly from these results. The annual number of retirements expected at each age is as follows:

Age	Percentage	Age	Percentage
60 – 61	5%	65 – 66	35%
62	10%	67 – 69	25%
63 – 64	5%	70	100%

Current and future vested terminated participants are assumed to retire at age 65.

Turnover

Rates of turnover are based on 60% of the 2003 SOA Pension Plan Turnover Study Small Plan Age Table. Rates of turnover were determined based on the June 2015 experience study using valuation data from July 1, 2009 through July 1, 2014. Future experience is not expected to deviate significantly from these results. Illustrative rates are shown below:

Age	Percentage	Age	Percentage
25	11.70%	45	4.38%
30	9.30%	50	3.36%
35	7.26%	55	2.52%
40	5.64%	60	1.80%

Disability: Rates of disability were not assumed in the valuation because the Plan does not have additional disability benefits.

ACTUARIAL ASSUMPTIONS AND METHODS

Administrative Expenses: Actual plan expenses, not including investment advisory fees, paid out of the trust during the previous plan year rounded to the nearest five thousand.

Spouse Assumptions: 80% of participants not currently collecting benefits are assumed to be married, with male spouses assumed to be three years older and female spouses assumed to be three years younger than the participant. This assumption was based on national averages.

Form of Benefit: The assumed form of benefit is based on the Plan provisions.

Death:	Life annuity deferred to participant's normal retirement age.
Termination:	Life annuity with ten years certain deferred to normal retirement age.
Retirement:	Life annuity with ten years certain.

Actuarial Present Value of Accumulated Plan Benefits (ASC 960)

Interest Rate: 7.50%, based on a review of the Plan's asset allocation and expert opinions regarding the expected future returns of asset classes.

Mortality:

<i>Prior to July 1, 2016:</i>	The sex-distinct RP-2014 Mortality Tables for employees and healthy annuitants adjusted to 2006, with mortality improvements projected using Scale MP-2015 on a fully generational basis. No collar adjustment was reflected in these rates.
<i>As of July 1, 2016:</i>	The sex-distinct RP-2014 Mortality Tables for employees and healthy annuitants adjusted to 2006, with mortality improvements projected using Scale MP-2016 on a fully generational basis. This assumption was based on a review of published mortality tables and the demographics and industry of the Plan. No collar adjustment was reflected in these rates.

Unless specifically mentioned, all remaining assumptions for the Actuarial Present Value of Accumulated Plan Benefits remain the same as described for the Funding Target Liability above.

A participant that has attained age 62 and has completed 12 years of Service shall receive no less than \$250 minimum monthly benefit.

- iii. *Late Retirement Benefit.* The greater of the benefit determined in the same manner as the Normal Retirement Benefit including years of service and compensation after Normal Retirement or the actuarial equivalent of the Normal Retirement Benefit.

- iv. *Maximum Benefits.* The maximum retirement benefit is determined in accordance with Section 415 of the Internal Revenue Code and Regulations.

NORMAL AND OPTIONAL FORMS OF BENEFIT

A monthly income payable for life with 120 payments guaranteed is the normal form of benefit. A joint and survivor annuity with 50% continued to the Participant's Spouse will be automatically payable to each Participant who is married at retirement, unless the Participant elects otherwise. This benefit form will be actuarially adjusted to the normal form.

The Qualified Joint and Survivor Annuity and other available optional forms are “actuarially equivalent” to the normal form, meaning that the amount of benefit is determined so as to have the same value when computed using the following actuarial assumptions:

Interest – 6.00% per annum

Mortality – 1971 Group Annuity Mortality Table

In the event a lump sum payment is made to a terminated or retired participant in lieu of the accrued benefits, the amount shall be calculated on the basis of GATT interest rates. If the determined value of the Participant’s accrued benefit is not more than \$5,000 (\$3,500 prior to July 1, 1998), the Trustee will be authorized to pay a lump sum in lieu of a monthly benefit.

If the value of the participant’s accrued benefit is more than \$5,000, a lump sum cannot be paid, and when eligible for retirement, the Participant may elect any form of annuity that the Plan provides.

VESTING

Years of service for vesting are all years of service with the Employer in which the employee was given credit for 1,000 or more hours of service.

Years of Service	Vested Percentage
Less than 3	0%
3	20%
4	40%
5	60%
6	80%
7 or more	100%

DEATH BENEFITS

The only Death Benefit under the Plan is a Qualified Pre-Retirement Survivor Annuity (QPSA) to an eligible spouse. The amount of monthly benefit shall be 50% of the benefit payable to the participant had the participant retired on the day before his death, with the QJS option in effect.
